Wildland Fire Equipment Price Update 2014

www.GSAglobalsupply.gsa.gov

Important News for GSA Wildland Fire Customers

As part of the comprehensive supply transformation underway at GSA Global Supply™, GSA will soon transfer its Wildland Fire Program to the Defense Logistics Agency (DLA). Though details of the transition are being finalized, a few key facts are known:

- GSA's Western Distribution Center (WDC) in French Camp, CA is scheduled to close by September 30, 2014. The WDC has stored and shipped virtually all GSA fire items in recent years.
- The last date for customer orders to ship from WDC is May 1, 2014. After May 1, customer orders for Wildland Fire items will be routed to DLA for fulfillment.
- The current GSA Forest Service (FS) agreement will be honored during this current fire season and until DLA and FS can mutually modify it.
- Ultimately, DLA will assume responsibility for the full spectrum of activities associated with management of the Wildland Fire Program. This includes acquisition, storage, order processing, delivery, billing and a revised support agreement.

GSA and DLA are collaborating to make this transition as smooth as possible for all parties. In February 2014, representatives from the FS, GSA and DLA discussed the current transfer status and ways to insert FS Subject Matter Experts (SMEs) into the current working level and senior leadership discussions GSA and DLA are having. As more details emerge, updates will be posted at **www.gsa.gov/fireprogram**. We appreciate your support and invite you to submit questions and comments to fireprogram@gsa.gov, which will help us provide transition updates that are informative and address top concerns.

About This Catalog

This Wildland Fire Equipment Catalog is the basic supply publication for use by the U.S. Forest Service (USFS), Bureau ofLand Management (BLM), Bureau of Indian Affairs (BIA), U.S. Fish & Wildlife Service (USF&WS), National Park Service (NPS), and other Forest Service-sponsored participants in the governmentwide wildland firefighting effort.

This catalog contains descriptions and ordering data for wildland fire protection equipment and supplies managed by GSA. Each item is indexed alphabetically by name and numerically by National Stock Number (NSN) and National Fire Equipment System (NFES) number.

Your suggestions for improving this catalog are invited at all times. Items will be deleted or added as needed, provided they meet the criteria established by GSA, USFS and BLM. Questions or comments should be directed to GSA Fire Program Coordinator Bill Hicks by telephone at (817) 850-8244 or (817) 456-5161 or email at bill.hicks@gsa.gov.

To receive future Wildland Fire Equipment Catalogs automatically, visit **www.gsa.gov/cmls**. From this site, you can access the Centralized Mailing List Service website, where you can subscribe. Under the “My Account” tab, select “Wildland Fire Equipment Catalog” as a publication of interest. Select “Print” to have a copy automatically shipped to you or “Electronic” to have GSA send you a link to an online version you can view or download. Facilities with requirements for the Wildland Fire Equipment Catalog in bulk quantities should contact Therese Anderson at therese.anderson@gsa.gov or (312) 886-8972.

You can view or download the online catalog year-round at **www.gsa.gov/fireprogram**. Printed catalogs can be ordered year-round by emailing cmls@gsa.gov, calling (817) 334-5215 or faxing (817) 334-5561. When placing an order, please include your name, phone number, email address, mailing address and the quantity of catalogs requested.

Clearances
GSA has complied with all regulations governing the purchase of items available from the Federal Prison Industries, Inc., Federal Supply Schedule contractors, NISH, National Industries for the Blind (NIB), and the Government Printing Office (GPO). Ordering offices are not required to obtain clearance on items available from these sources when ordering directly from GSA.

Freight Charges
The cost of normal motor-carrier transportation to consignees located in the United States (except certain areas of Alaska) is included in the prices shown in this catalog. Premium transportation (such as air freight, emergency trip, or exclusive use of vehicle service) must be paid by the requisitioner, and appropriate transportation funds must be cited when placing the order

Prices
Prices are on a Freight on Board (F.O.B.) destination basisfor surface transportation to consignees in the United States. Special transportation payment policy is applied to Alaskan shipments, depending on the ultimate destination. Any requirements for premium transportation must be paid by the ordering activity.

Note: The prices in the publication are established each year as of April 1. In most cases, they remain in effect through March 31 of the following year; however, from time to time, it is necessary to make changes without notice. This happens when new contract prices are significantly higher or lower, in which case adjustments must be made. To obtain the most current prices, contact the Fort Worth Customer Assistance Branch at (800) 525-8027, option 3, or research the NSN through the GSA Global Supply™ website at **www.GSAglobalsupply.gsa.gov** or GSA*Advantage!*® at **www.gsaadvantage.gov**

Specification References

The specifications cited in catalog descriptions may undergo a series of revisions (indicated by successive suffix letters) to keep current with industry changes and agency needs. Because it is not feasible to show the latest revision on the catalog publication date, only the basic specification is referenced in this catalog. Although stock items are always procured under the latest edition of a specification in effect at the time of procurement, on-hand stock that was procured under a previous edition of a specification will be issued until the supply is depleted.

The National Stock Number

The National Stock Number (NSN) is used for requisitioning, new procurements, existing contracts, shipments, shippers' invoices, payments, cataloging, stock records, etc. Accordingly, the items in this catalog are identified by 13-digit NSNs. For further information on NSNs, consult the FEDSTRIP Operating Guide (Mail List code 5-06-00135), which is available from GSA's Centralized Mailing List Service (CMLS). Please visit **www.gsa.gov/cmls**, call (817) 334-5215, fax (817) 334-5561 or email cmls@gsa.gov.

Give the operator your name and telephone number. The answering service will contact depot personnel and relay your message. Depot personnel will then return your call and take care of the situation. During fire season, depot personnel are on standby to handle any emergencies.

If you experience trouble contacting any of the above after-hours numbers, please call (888) 282-7862 (monitored 24 hours a day) and leave a message containing a telephone number where you can be reached. The duty officer will contact a GSA employee who will return your call as soon as possible.

The above procedures should produce a prompt response to your emergency situation. If additional assistance is required, please contact Bill Hicks, GSA Fire Program Coordinator, at (817) 850-8244 (office) or (817) 456-5161 (cell).

GSA Global Supply™ or GSA*Advantage!*®?
Many GSA fire customers are familiar with GSA*Advantage!* for online ordering, and the shopping aisle that exists for the Wildland Fire Program. Another excellent GSA resource for pricing information and ordering is the GSA Global Supply website, available at **www.GSAglobalsupply.gsa.gov**. The main difference between the two is that the GSA Global Supply site does not display any products from GSA Multiple Award Schedules (MAS) vendors. Every item on this site is a GSA Global Supply item; therefore, search results are generally shorter, easier to review, and simpler to use. To compare the two sites, please check the table below for key attributes.

Online FEDSTRIP Process
Customers must have an AAC or DODAAC and log in using their respective user IDs and passwords. First-time users can register and select a user ID and password. Once registered, users click on the FEDSTRIP link to access the screen shown to the right. Customers may enter NSNs or part numbers, quantities and any exception data. Links are provided to reference materials (including the FEDSTRIP Operating Guide) for detailed explanations of screens and fields.

*"GSA Global Supply items" refers to products managed and billed by GSA Global Supply.
**"GSA MAS items" refers to products offered by commercial vendors holding a GSA MAS contract. These vendors generally bill the customer's purchase card and cannot bill a customer via AAC.

Reminder for USDA Customers

The USDA accounting system requires USDA customers to provide a Document Reference Number (DRN) with Activity Address Code (AAC) orders. Orders called in to GSA or placed online at either the GSA Global Supply™ website or GSA*Advantage!*® can accommodate a DRN; therefore, USDA customers wishing to arrange payment via their AAC have multiple ordering options. Purchase-card orders do not require a DRN and can be submitted through any of the ordering mechanisms noted above. This change does not affect U.S. Forest Service cooperators or Department of Interior organizations. Reminder: The requirement to provide a DRN with FEDSTRIP orders is mandated by USDA, not GSA.

Orders with DRNs

USDA customers can use the GSA Global Supply website or GSA*Advantage!* to compile an order. When your order is complete, click “checkout.” At step one of the checkout process, select “Activity Address Code” and enter the relevant AAC. After verifying shipping information in step two, you can enter appropriation data in step three. At this point, you can enter the DRN data and then proceed to finish the checkout process.

More Information

GSA Multiple Award Schedules
By offering supplies that cover the breadth of the commercial marketplace, the GSA Multiple Award Schedule (MAS) program enables your agency to choose from thousands of products and services available from hundreds of pre-qualified vendors. Typically, this method of procurement is quicker and easier than open-market procurements. Although an acquisition is a more involved option than a requisition through GSA Global Supply™, issuing a purchase order through the MAS program may be appropriate for obtaining products not widely requested enough to be included in the GSA Global Supply inventory. For more information, visit **www.gsa.gov/products**.

Ensuring Reuse with GSA Personal Property Management
Screening other agencies' excess personal property inventories is the federal government's priority source of supply. And, with today's increased environmental consciousness, reusing excess property is a source of pride. To help you acquire the excess property your agency needs, GSA offers GSAXcess®, the personal-property reporting tool for the federal government. At **www.gsa.gov/gsaxcess**, reporting, searching and selecting excess property is convenient and user-friendly.

Special Order Program (SOP)
There are times when your product requirements are not readily solved by the GSA Global Supply Catalog or website. We can satisfy your most complex, mission-critical requirements through our Special Order Program (SOP). This full-service, assisted-acquisition service complies with the Federal Acquisition Regulation (FAR) and other applicable federal policies, laws and regulations. Our certified contracting professionals offer complete acquisition support for the pre-solicitation, pre-award, award and post-award phases of a project. State and local agencies with cooperative agreements to purchase wildland fire equipment can also request SOP support. For more information, email us at SpecialOrderProgram@gsa.gov or call us toll-free at (855) 809-6044.

Reporting Discrepancies
GSA Global Supply is committed to providing quality products and resolving problems with professional service. There are several ways to report a discrepancy:

Telephone	Call (800) 525-8027 and select "option 2" for customer service. Indicate that you are calling about a fire-suppression item. The call center is staffed continuously from 8 p.m. Sunday to 8:30 p.m. Friday (Central Time). Callers outside those hours should leave a clear message that includes a name, a commercial phone number, and a brief description of the problem.
eResolve	Report a problem by using eResolve, an online customer solution service. eResolve allows direct reporting of problems with a requisition or GSA Global Supply shipment, including damage, short/over, wrong item, quality, tracking shipments, and merchandise-return issues. To use eResolve, log on to **www.gsa.gov/ncsc** and select the link for eResolve.
Email	Send a message to NCSCcustomer.service@gsa.gov, indicating "Fire Suppression" in the subject line.

Customers seeking the product Quality Deficiency Report (QDR) form can download it online at **www.gsa.gov/forms** after searching for Standard Form 368. Although GSA prefers customers to use the telephone or electronic methods mentioned above, forms can still be sent via the following methods:

Fax	(816) 926-5561
Mail	U.S. General Services Administration Attn: Fire Suppression National Customer Service Center (QCOCC) 1500 E. Bannister Road, Bldg. 4 Kansas City, MO 64131-3088

Water-Handling Accessories

Unless otherwise noted, the working pressure of all items under this heading is 600 psi.

All flow rates are at 100 psi flowing pressure.

3/4" connections in this catalog use GHT (Garden Hose Thread) threads and 11-1/2 NH threads interchangeably; both designations are the same threads.

This catalog includes some threads that are specific to the USDA Forest Service and do not follow the NFPA standard. We indicate the threads used on each item.

The National Fire Protection Association (NFPA) standard calls for 3/4" and larger connections to be NH (national stan 3/4" 11-1/2 NH (rather than the NFPA standard of 3/4" 7.5 to 8 NH), and 1" shall be NPSH (straight pipe) thread.

All female connections come with gaskets in place.

All aluminum-threaded items are hard-coated for durability.

American-pattern files mainly consist of machinist's files and mill or saw files. Machinist's files are used when metal must be removed rapidly and finish is of secondary importance. Mill or saw files are suitable for the following tasks: sharpening mill or circular saws and large crosscut saws; lathe work; draw filing; filing brass and bronze; smooth general filing. These files are characterized by hardened, uniform teeth and conventional tang for attaching a wooden handle. Forged from carbon alloy steel. The three standard tooth cuts available on American-pattern files are as follows: bastard-cut (coarse teeth for rapid stock removal); second-cut (medium teeth for moderate stock removal); smooth-cut (fine teeth for smooth finishes).

Mill (regular) file is for sharpening mill or circular saws and for general use. Width is tapered for one-third of length to point; thickness is uniform. Bastard-cut is single cut on both flat surfaces and both square edges.

Large New-Generation Fire Shelter

(Taken from TechTips 0551-2325-MTDC, June 2005)

	Regular Fire Shelter (inches)	Large Fire Shelter (inches)
Length:	86"	96"
Height:	15-1/2"	19-1/2"
Width:	31"	33"
Packed Size:	8-1/2 x 5-1/2 x 4"	9 x 5-1/2 x 4"

How Does the Large Shelter Differ from the Regular Shelter?

The large shelter is longer, wider and taller than the regular shelter and weighs about 0.6 lbs. more. The table above shows the dimensions of both shelters. The large version is recommended for firefighters who are taller than 6'1" or whose girth is larger than 53". Firefighters shorter than 5'7" may have difficulty deploying and holding the large shelter down. The large shelter is easily identified by “LARGE” stenciled on the quick-deployment strap. The large shelter’s deployment strap is orange rather than yellow, the color of the strap on the regular shelter.

Requisitioning from Defense Logistics Agency (DLA)

Throughout the federal government, there are two principal wholesale supply support activities providing intergovernmental support: the Defense Logistics Agency (DLA) and the General Services Administration (GSA). These two agencies have been working closely to eliminate avoidable overlap and duplication in their supply systems and have agreed to support military and civilian customers.

Requisitions for items managed by DLA should be placed with the DLA Call Center by toll-free phone at (877) DLA-CALL(352-2255) or fax at (269) 961-7791. Inquiries can be made by calling the DLA number or by emailing dla.contactcenter@dla.mil. The DLA Call Center is available 24 hours a day, 365 days a year and is your centralized point for any matters concerning DLA support.

When placing an order with DLA, you will need your FEDSTRIP Activity Address Code (six-digit code) or a Government Credit Card. DLA may ask for a DoDAAC (Department of Defense Activity Address Code) or a SRAN (Stock Record Account Number). Your FEDSTRIP information will be needed to process your order. The information you provide will be used to check the status of your requisition or to return the item to DLA.

Customer Assistance Representatives
DLA customer-assistance representatives are available to assist you with resolving problems by answering any questions about DLA support. Their mission is to provide top-quality customer assistance on a continuing basis. Please call (877) DLA-CALL(352-2255) if you have questions regarding DLA support. Additional customer support can be found at the DLA website (www.dla.mil) under the “Customer Support” link: click on “Customer/Military Service Support,” then, on the left under “Quick Links,” click on “Support Reps.”

DLA Items

Note: DLA-managed items are not available from GSA. They are listed in this publication as a courtesy to customers and must be ordered from the DLA center (a.k.a. RIC) listed for each item. The following DLA items have been admitted to NFES.
