SUBJECT:	Instructions for Loading and Running the Revit Plugin R5 BIM Standards Checks

Revit Plugin – R5 BIM Standard Checks

This Revit plugin runs the Origin Point, Reference Files, Binding of Files as a plugin to Revit Architecture 2011. This plugin can be installed in Revit MEP 2011 or Revit Structure 2011.

1. Copy **CheckLinks_2011.dll** to C:\Program Files\Autodesk\Revit Architecture 2011\Program.

Type of Check	Name of Check File
Origin Point	CheckLinks_2011.dll
Reference Files (Nesting of Reference Files)	CheckLinks_2011.dll
Binding of Files (Overlay vs. Attachment Linked Files)	CheckLinks_2011.dll

2. Open the CheckLinks_2011.addin using the Notepad application, edit the line that begins with <Assembly> to point to the file location of the CheckLinks_2011.dll plugin.
3. Copy CheckLinks_2011.addin to C:\Documents and Settings\All Users\Application Data\Autodesk\REVIT\Addins\2011.

To run the check and save results:

1. Open a Project in Revit Architecture 2011.
2. Select the Add-Ins tab.
3. Select External Tools menu.
4. Select Check Links.
5. In the File Save As dialog box, enter the file path to save the report. The report will be saved as a .txt file. It is preferable to open the report in Microsoft Word or another word processor application.
