

## SUMMARY OF FAIR OPPORTUNITY DECISIONS MADE ON NETWORKX CONTRACTS

March 2009

The Networkx contracts allow individual agencies to place, as a result of fair opportunity (FO) decisions, delivery/task orders under these contracts to satisfy the Agencies' requirements. GSA does not collect specific information correlating Agencies' fair opportunity decisions and delivery or task orders; that information may be available only from the Agencies themselves.

Agencies are, however, required to notify GSA's Networkx Contracting Officers when the Agencies make each FO decision. Although, they are not required to provide the estimated value of the decision on the Networkx contract. When an Agency does provide a detailed list of services in its FO notification, and the services are to be transitioned from FTS2001 contracts, GSA estimates the annual value of those services using FTS2001 pricing. Those figures are included in this report.

The attached report lists FO decisions the Agencies have reported to GSA as of March 2009.

- **Column (1) – Letter Date:** The date of the Agency's FO notification to GSA.
- **Column (2)\* - Estimated FTS2001 Value:** The estimated annual revenue on FTS2001 contracts for the services in the FO decision.
- **Column (3) – Agency:** The name of the Agency or sub-Agency that made the FO decision.
- **Column (4) – Contract Selected:** The Networkx contractor the Agency selected in its FO decision and the respective contract number.
- **Column (5) – Services Selected:** The Agency's description of its FO decision.

\* Not all listed FO decisions have an Estimated FTS2001 Value because Agencies are not required to provide a detailed listing of all services included in each FO decision, and the Agency may not be currently subscribing to those services on an FTS2001 contract.

Networkx Transition Manager
