54 **Section B**

55 **Supplies or Services and Prices**

56 **B.1 Pricing Overview**

57 This section defines the pricing structure and the associated pricing elements for the  
58 following Metropolitan Area Acquisition (MAA) service categories defined in Section C:

- 59 (a) Circuit Switched Services (CSS)
- 60 (b) Dedicated Transmission Services (DTS)

61 It is the Government's intention, through this solicitation, to obtain price schedules for  
62 provisioning those services and related features for the service area specified in Section J.1.  
63 The offeror shall provide all prices in the format and structure defined herein. The offeror  
64 may not propose any additional price elements not included in the defined format and  
65 structure, except as noted in Sections B.4 and B.7. The Government intends to make the  
66 necessary structure available to offerors in spreadsheet format to facilitate the delivery of the  
67 pricing information.

68 **B.1.1 Provisions**

69 The contractor shall furnish all personnel, materials, services, and equipment necessary  
70 to perform the requirements set forth in the contract.

71 The contractor's Final Revised Price Proposal, dated \_\_\_\_\_, including the Contract  
72 Line Item Prices contained herein, and all amendments thereto, are hereby incorporated by  
73 reference into this contract.

74 The contractor's Final Revised Technical Proposal, \_\_\_\_\_, and all amendments  
75 thereto, are hereby incorporated by reference into this contract.

76 Section K (Representations, Certifications, and Other Statements of Offerors), as signed  
77 by the contractor on \_\_\_\_\_, is hereby incorporated by reference into this contract.

78 The contractor's Small, Small Disadvantaged, Women-Owned Small, and HUBZone  
79 Small Business Concerns Subcontracting Plan, dated \_\_\_\_\_, and all amendments thereto,  
80 are hereby incorporated by reference into this contract.

81 **B.1.2 Pricing of Orders**

82 All orders under this contract shall be priced in accordance with the prices contained in  
83 the price schedules of this Section B.

84 The offeror shall propose fixed price schedules for all specified services and related  
85 features identified in Section C including the management and operations requirements in  
86 Section G for each applicable year of an eight year period. The prices for services (as  
87 defined in the Section B price tables) shall not include federal, state, or local taxes and duties  
88 in effect on the contract date that the taxing authority is imposing and collecting on the  
89 transactions or property covered by this contract. The offeror shall provide in its proposal a  
90 separate itemized list of these taxes that would be included in its monthly invoices at the time  
91 of the proposal submission, including the name of the tax, jurisdiction by name, reference to  
92 the statutory source for the tax, and applicable tax rate. Excepted taxes, as defined in Federal  
93 Acquisition Regulation (FAR) 52.229-4, shall be included in the contract price, but not  
94 itemized on the monthly invoices.

95 All price tables are effective at contract award. If the contract is awarded between  
96 October 1 and March 31 of a given fiscal year, price tables for contract pricing year one shall  
97 be effective through September 30 of that year. If the contract is awarded between April 1  
98 and September 30 of a given year, price tables for contract pricing year one shall be effective  
99 through September 30 of the following year. Price tables for years two through eight shall  
100 be on a Government fiscal year basis. Prices provided in the proposal shall not change  
101 within a fiscal year, but may vary from fiscal year to fiscal year to reflect changes, such as  
102 changes in technological and market maturity and improved commercial availability. For  
103 those service orders that span more than one fiscal year, the invoice shall reflect the price  
104 tables in effect for the period in which services are provided.

105 Prices shall be entered in spreadsheets provided with this solicitation. Eight workbooks  
106 are provided each named PRICESX.xls where the "X" indicates the applicable contract year  
107 (1-8). Each workbook contains spreadsheets corresponding to each price table defined in  
108 this Section B.

109 **B.1.3 Prices**

110 MAA pricing is divided into three general categories:

- 111 (a) Basic Service for the service categories defined in Section C.2.1.1
- 112 (b) Features
- 113 (c) Other Charges

114 Basic service is defined as that set of capabilities that are inherent within the base price  
115 and may not be unbundled from the base price. The basic service prices shall include  
116 management and operations; transition and migration and implementation; and reporting  
117 functions unless specified otherwise within this contract. Basic service prices shall also  
118 exclude any taxes and End User Common Line (EUCL) charges, that may apply. Universal  
119 Service Fund (USF) and Pre-subscribed Inter-exchange Carrier Charges (PICC) are  
120 considered as part of the basic service prices (also see Section H.15).

121 Features are capabilities that are offered beyond the basic service to be selected at the  
122 option of the user. Other Charges are non-service specific non-recurring charges associated  
123 with service provisioning in accordance to best commercial practices.

124 In addition, at the request of the Government, the offeror may provide services that are  
125 within the scope of this contract, but not included in the three categories above. Charges for  
126 these services shall be considered "Other Direct Costs" (ODCs), as described in Section  
127 H.27, except otherwise specified in Sections C.2.1.5, C.2.1.6, and J.2.1 and shall be  
128 negotiated on a task-by-task basis. Examples of ODCs include incidental services such as  
129 telephone sets, automatic call distributors (ACDs), on-premises wiring and horizontal  
130 cabling located beyond the Service Delivery Point (SDP) selected by the Government that  
131 may be required as part of the service installation, providing features that are compatible  
132 with existing Private Branch Exchange (PBX) or key systems (e.g., call trace), and achieving  
133 compatibility with existing Government non-standard legacy systems and networks.

134 The offeror may propose prices that are sensitive to a number of general factors. These  
135 factors, and the ways in which prices may depend upon them, are defined in detail for each  
136 service category later in this section. The offeror may choose to propose prices that are  
137 insensitive to any of the factors (e.g., flat rate or postalized rate that is not distance and time  
138 sensitive). The factors may be expressed in general terms as follows:

139 (d) **Year.** A year during the lifetime of the contract, i.e., 1, 2, 3, 4, 5, 6, 7, and 8. The  
140 offeror may vary prices on a yearly basis.

141 (e) **Time of Day.** Normal Business Day (NBD) is defined as 8:00 a.m. to 5:00 p.m.,  
142 Monday through Friday, excluding federal holidays. Outside of Normal Business  
143 Day (ONBD) is all other times. Charges for a call that spans the two time periods  
144 shall be split, with the appropriate rates applied to each portion of the call.

145 (f) **Geographic Location**

146 (1) The geographic location of both the user and the user's MAA local switch is  
147 determined by the vertical and horizontal (V&H) coordinates of the Incumbent  
148 Local Exchange Carrier (ILEC) central office associated with the user's

149 NPANXX, where NPA is the Numbering Plan Area, also known as the Area  
150 Code, and NXX is the first three digits in a seven-digit local telephone number  
151 which currently identifies the local switch that serves this number.

152 (2) The geographic location of an interexchange carrier (IXC) point of presence  
153 (POP) is determined by the V&H coordinates of the POP.

154 (3) Dedicated services between MAA users or between an MAA user and IXC POP  
155 are measured by distance. All distance measurements shall be based on the  
156 airline distance between the locations involved. The distance between locations  
157 (in miles) is computed using the V&H coordinates method, as set forth in the  
158 National Exchange Carrier Association (NECA), Inc. Tariff Federal  
159 Communications Commission (FCC) No. 4.

160 (4) For convenience, the offeror shall group the NPANXXs comprising the MAA  
161 service area into not more than five (5) NPANXX groups for originating and  
162 terminating CSS locations and for DTS local loop transmission facility locations.  
163 Where the price for service provided to, from, or between NPANXXs is sensitive  
164 to location, the NPANXX group shall be used in lieu of specific NPANXXs.  
165 That is, each of the NPANXXs within a group shall be deemed to be in the same  
166 location for the purpose of that pricing table. When changes in NPANXX  
167 coverage areas require a modification (change or additions) to NPANXX group  
168 assignments, those modifications shall be made so that no increase in price shall  
169 result at or between any locations.

170 The pricing for each basic service may include, unless otherwise stated, any appropriate  
171 combination of the following pricing elements:

172 (g) **Installation.** This price element includes a one-time charge for service and features  
173 initiation. The prices tables allow for two different service initiation charges (SIC).  
174 The basic service price tables in Sections B.2 and B.3 include separate SICs for the  
175 transition of existing lines and for installation of new lines. The feature price table in  
176 Section B.4 includes separate SICs for features installed at the time of service  
177 initiation and for features installed after service initiation.

178 The offeror may charge or waive charges for service initiation. Note: The offeror  
179 may choose to waive installation charges for existing lines to be transitioned as  
180 specified in Section J.2.2. The offeror shall clearly state such an offer as part of the  
181 instructions for pricing (Section B.1.4).

182 (h) **Monthly Recurring Charge.** This price element includes fixed monthly charges for  
183 basic MAA services. The offeror may choose to charge only a flat monthly recurring  
184 fee without any additional charges that are usage- or distance-based (i.e., flat rate  
185 pricing). The monthly recurring charge shall begin on the date the service is accepted  
186 by the customer and end on the effective service disconnect date requested by the  
187 customer. The monthly recurring charge shall be prorated according to the number of  
188 days service is available.

189 (i) **Usage.** The offeror may recover switched service prices on a usage basis. The price  
190 tables include prices per initial one minute period and additional one minute period  
191 for circuit switched services.

192 (j) **Distance.** The offeror may charge based on the distance for dedicated connections.  
193 The offeror shall bear all charges to connect switched service into its network.

194 The offerors' attention is directed to FAR 52.216.22 (OCT 1995), "Indefinite quantity,"  
195 which states, in part, "This is an indefinite-quantity contract for supplies or services  
196 specified, and effective for the period stated in the schedule." The quantities of supplies and  
197 services specified in Section J.2 are estimates and are provided for bidding purposes only.

#### 198 **B.1.4 Instructions for Pricing**

199 All price elements shall be priced and all cells in the spreadsheets shall be populated.  
200 Where charges do not vary by year, time-of-day, etc., price entries for each similar element  
201 should contain the same price. Where charges do not vary by usage or distance, per minute  
202 or mileage, price entries can be set to zero. The price elements that are included as part of  
203 the basic service capabilities and are therefore not separately priced shall be noted as "NSP."  
204 In Tables B.2.1-1, B.2.2-1, and B.3.1-1 where a price element is not appropriate due to  
205 unused NPANXX groups, the price entry shall be noted as "N/A." "N/A" shall not be placed  
206 in any other price table.

207 The offeror shall provide a document, entitled "Instructions for Pricing," that provides  
208 detailed procedures for applying the offeror's price tables. Several levels of pricing  
209 procedures shall be provided. The document shall provide the capability for a user to choose  
210 and price common services (e.g., business line, T1 trunk) without the need to understand the  
211 complexity of the underlying price components. It shall also provide the user with the  
212 information necessary to understand those price components where necessary. The offeror  
213 shall not use its Instructions for Pricing or any price proposal narrative to place caveats,  
214 clarifications, modifications, or restrictions on any RFP or RQS technical, management, or  
215 price requirement. Any such language that is deemed necessary shall be identified by the  
216 offeror as exceptions, deviations, or clarifications in a separate section of the proposal  
217 (Section L.20.1.4).

218 This document shall be updated as necessary so that any combined prices provided in this  
219 document remain equivalent to the actual component prices as provided in the price tables.  
220 In case of any discrepancy, the effective prices provided in the price tables shall apply.

### 221 **B.1.5 Service Prices All Inclusive**

222 Any service-related price for the service categories CSS and DTS, in this contract, for  
223 which a price is not specifically identified by the offeror, shall be considered to be included  
224 in the price of another item or provided at no cost to the Government unless otherwise  
225 provided in this contract.

### 226 **B.1.6 Organization of This Section**

227 The pricing requirements and format for CSS and DTS are described in Sections B.2 and  
228 B.3, respectively. Price tables for features and other price elements are provided in Sections  
229 B.4 and B.5. Contract Line Item Number (CLIN) cross reference is provided in Section B.6.  
230 Section B.7 contains instructions for pricing additional offerings.

## 231 **B.2 Circuit Switched Services**

### 232 **B.2.1 Circuit Switched Services Local Loop**

233 The local loop component provides connectivity from the user's SDP to the MAA local  
234 switch and includes all services that the MAA local switch provides to the user on the user  
235 side of the local switch. The contractor shall provide all service, equipment, and labor  
236 necessary to connect the user at the SDP. The format shown in Table B.2.1-1 shall be used  
237 to provide prices for the local loop extending on the network side of the network interface  
238 device (NID). Where the user requires connection at a point on the user's side of the NID,  
239 additional local loop charges shall apply as provided in Table B.5.1-1. Section C.2.1.5  
240 describes the SDP and NID concept.

241 The following price tables cover charges for all basic services provided over the local  
242 loop component. Basic requirements for each service category are defined in Section C.2.

243

**Table B.2.1-1. Circuit Switched Service Local Loop Pricing**

Local Loop NPANXX Group	CSS Type ID No*	SIC for Transition of Existing Line	SIC for Installation of New Line	Monthly Recurring Line Charge	EUCL Charge per Trunk

244

\* The CSS type ID numbers are listed in Table B.2.1-2.

245

**Table B.2.1-2. Circuit Switched Service Local Loop Types**

Circuit Switched Service Type	CSS Type ID Number
Analog Business Line	001A
Reserved	
Digital ISDN BRI Business Line	001C
Analog Off-Premises Switch-Based Voice Service Line	001D
Digital ISDN BRI Off-Premises Switch-Based Voice Service Line	001E
Analog Key System Access Line	001F
Digital ISDN BRI Key System Access Line	001G
Analog PBX System Access Line	001H
Digital ISDN PRI PBX System Access Line	001I

246

The offeror shall follow the pricing structure for the off-premises switch-based voice service in Table B.2.1-1 to reflect pricing for any types of host switch/PBX service solutions. After contract award, the Government reserves the right to decide whether to implement a specific PBX solution at a particular location.

247

248

249

250

**B.2.2 Circuit Switched Services Local Usage**

251

CSS local usage provides circuit switched voice and Circuit Switched Data Service (CSDS) data connectivity between the user's SDP and other points within the MAA area.

252

253

There are two types of local calls, on-net and off-net. Currently, CSS on-net calls are defined as calls that originate from an SDP on an MAA contractor's network and terminate

254

255

on an SDP on the same MAA contractor's network (e.g., contractor 1 network to contractor 1

256 network). CSS off-net calls are calls that originate from an SDP on an MAA contractor's  
257 network and terminate on an SDP on a different network, but are within the MAA service  
258 area (e.g., MAA contractor network to another network). Albuquerque MAA, all on-net and  
259 off-net voice and data termination terminations shall be free of usage charges.

260 In a potential multiple vendor environment, the Government desires to have calls  
261 between SDPs between MAA contractors' networks to be considered on-net calls (i.e., calls  
262 originate from a MAA SDP on contractor 1 network and terminate to a MAA SDP on  
263 contractor 2 network.) The offeror shall address in its RFP proposal its intention to provide  
264 on-net calling between MAA contractor's networks and the projected time frame when this  
265 capability can be implemented (i.e., at award, or a period shortly after award). If the  
266 Government implements this capability, the definition of on-net calls will be modified.

267 For the Albuquerque MAA, Tables B.2.2-1 and B.2.2.2 are reserved.

268 **Table B.2.2-1. Reserved**

269 **Table B.2.2-2. Reserved**

### 270 **B.2.3 Circuit Switched Services IXC Access**

271 The IXC Access component provides switched services from the user's MAA local  
272 switch port to the POP of a user-designated IXC. Any usage charges will be determined by  
273 the appropriate IXC (or local long distance if applicable) tariff. No additional usage or  
274 monthly port connection charges will result under this contract. In the future, if and when  
275 the MAA contractor is permitted to provide full IXC access service, as defined in the  
276 FTS2001 RFP, this contract may be amended to include pricing for that service.

### 277 **B.3 Dedicated Transmission Service**

278 There are two (2) types of DTS circuits: (a) Local DTS and (b) DTS-Access-to-an-IXC-  
279 POP.

280 A DTS circuit consists of at least two of the following components:

- 281 (1) A local loop component, which connects an originating or a terminating SDP to the  
282 local switch. The pricing structure for the local loop component is provided in  
283 Section B.3.1.

- 284 (2) A local interoffice channel component, which provides connections between local  
 285 switches. The pricing structure for the local interoffice channel component is  
 286 provided in Section B.3.2.
- 287 (3) An IXC access component, which provides the connection between the local switch  
 288 and the IXC POP. The pricing structure for the IXC access component is provided in  
 289 Section B.3.3.

290 For pricing purposes, each Local DTS circuit will consist of two (2) local loop  
 291 components (i.e., one originating and one terminating SDP) and one (1) local interoffice  
 292 channel component.

293  
 294 For pricing purposes, each DTS-Access-to-an-IXC-POP circuit will consist of one (1)  
 295 local loop component and one (1) IXC access component.

296 **B.3.1 Dedicated Transmission Service Local Loop**

297 The local loop component provides the termination of a DTS circuit at the user's SDP.  
 298 The contractor shall provide all services, equipment, and labor necessary to connect the user  
 299 at the SDP. Table B.3.1-1 provides prices for the local loop extending on the network side of  
 300 the NID. Where the user requires connection at a point on the user's side of the NID,  
 301 additional local loop charges shall be as provided in Table B.5.1-1. No local loop charges  
 302 shall apply where the SDP occurs on the network side of the contractor-provided switch.

303 **Table B.3.1-1. Dedicated Transmission Service Local Loop Pricing**

Local Loop NPANXX Group	DTS Type ID No*	SIC for Transition of Existing Line	SIC for Installation of New Line	Monthly Recurring Charge

307

**308 B.3.2 Dedicated Transmission Services Local Interoffice Channel**

309 DTS local interoffice channel provides connectivity between DTS loops within a single  
 310 MAA local switch or between 2 MAA local switches. Distance will be determined as  
 311 defined in Section B.1.3. The format shown in Table B.3.2-1 shall be used to provide prices  
 312 for DTS local interoffice channel. The base price and additional price per mile shall be  
 313 monthly recurring charges.

314 **Table B.3.2-1. Dedicated Transmission Service Local Interoffice Channel Price Table**

DTS Type ID No*	Base Price	Additional Price Per Mile

315

\*The DTS type ID numbers are listed in Table B.3.1-2.

316 **B.3.3 Dedicated Transmission Services IXC Access**

317 DTS IXC access provides dedicated connectivity between a DTS loop and a user-  
318 designated IXC POP. Distance will be determined as defined in Section B.1.3. The format  
319 shown in Table B.3.3-1 shall be used to provide DTS IXC access prices. The base price and  
320 additional price per mile shall be monthly recurring charges. The service initiation charge  
321 shall apply to the IXC POP termination.

322 **Table B.3.3-1. Dedicated Transmission Service IXC Access Price Table**

DTS Type ID No*	SIC for Transition of Existing Line	SIC for Installation of New Line	IXC POP Termination Charge	Base Price	Additional Price per Mile

323 \*The DTS type ID numbers are listed in Table B.3.1-2.  
324

325 **B.4 CSS Features**

326 This section provides pricing for all CSS features that shall be provided in addition to  
327 basic CSS services. All CSS features shall be individually priced such that users may order  
328 any applicable feature without being required to order a “package” of features.

329 Table B.4.1-1 provides the format for pricing CSS features. The CSS type ID numbers  
330 are listed in Table B.4.1-2. Cells in Table B.4.1-2 that contain “N/A” indicate that the  
331 particular feature does not apply to a specific service. There are no columns for CSS type  
332 001B in these tables because this CLIN has been changed to “Reserved” in Table B.2.1-2.

333 The features listed in Table B.4.1-2 comprise a minimal requirement set. The offeror is  
334 encouraged to provide descriptions and prices for additional features using the format  
335 defined in Table B.4.1-1. Although they will not be part of the price evaluation, at the  
336 Government’s option, one or more of these additional features may become part of the  
337 contract. The offeror shall identify and provide descriptions and prices for these additional  
338 features separately from the features identified in Table B.4.1-2.

344 **B.5 Additional Pricing Tables**

345 **B.5.1 Additional Local Loop Charges**

346 Local loop service prices for CSS and DTS (Tables B.2.1-1 and B.3.1-1) include all  
 347 services, equipment (e.g., T1 channel bank at SDP 3), and labor necessary to connect the  
 348 user at the NID. Where the Government requires the SDP to be located on the customer  
 349 premises at a point other than the NID, additional charges may apply. Table B.5.1-1  
 350 provides prices for the additional charges from five on-premises locations other than the  
 351 NID. The SDP description and location Ids are defined in Section C.2.1.5.

352 **Table B.5.1-1. Additional Local Loop Pricing**

SDP Location ID	Service Type ID No*	SIC for Transition of Existing Line	SIC for Installation of New Line	Monthly Recurring Charge

353 \* Service types are identified in Table B. 2.1-2 and Table B. 3.1-2. SDP 6 does not apply to DTS.

354 **B.5.2 Moves and Reconfigurations and Other Charges Price Tables**

355 The offeror shall propose specific charges in the formats shown in Table B.5.2-1 and  
 356 Table B.5.2-2.

359

360

\* Service visit charge may be applied only when it is not a routine maintenance trip or a follow-up trip for a previous unfinished task and the service visit is requested by the customer for work done beyond the SDP.

361

362

363

\*\* Training materials provided to customer organizations for future use for follow-up or new employee training.

364

365

\*\*\* Charge is per circuit only and does not include a service visit charge. The applicable additional local loop SIC price provided in Table B.5.1-1 includes a service visit charge. Only when cross-connection installation is not done in conjunction with an additional local loop installation will a Service Visit Charge (i.e., 005I and 005J) apply.

366

367

368

369

**B.5.3 Revenue Discount Price Table**

370

The offeror may provide a revenue discount based on the total billable revenue of all local services used to provide MAA service, of all service categories and service types, in the month. Table B.5.3-1 provides the required format for volume discount.

371

372

373

**Table B.5.3-1. Revenue Discount Table**

Volume Band <sup>^</sup>	Revenue Minimum*	Revenue Maximum	Basic Discount Amount**	Additional Discount Factor***

374

<sup>^</sup> There is no restriction on the number of Volume Bands (rows) the offeror defines in this table.

375

For the first row, \$0

376

377

shall be entered for the Revenue Minimum.

378

\*\* The Basic Discount Amount is automatically computed to be the cumulative discount amount for all previous Volume Bands

379

380

\*\*\* The Additional Discount Factor shall be used to determine the discount applied to revenue in that band only.

381

382

383

The total discount is automatically computed using the following steps:

384

(a) Calculate the yearly revenue amount using the Price Evaluation Tool.

385

(b) Find the row in which the revenue amount falls between the Revenue Minimum and Revenue Maximum.

386

387

(c) Subtract the Revenue Minimum for the row found in the previous step from the revenue amount and multiply the difference by the Additional Discount Factor for that row to obtain the additional discount amount for that row.

388

389

390

(d) Add the additional discount amount and the Basic Discount Amount to obtain the total discount for the revenue.

391

392

**B.5.4 NPANXX Group Tables**

393

The offeror shall provide a table that groups NPANXXs having the same prices for each price table that is location-sensitive as defined in Sections B.2 through B.4. The NPANXX group number is used in the price tables to simplify the number of entries in each of the price tables and to enable the Government to easily view the various rates offered for each area covered by the NPANXX groups. All NPANXXs within the MAA calling area shall be included. NPANXX group information shall be provided in the format shown in Table B.5.4-1.

394

395

396

397

398

399

400

401

**Table B.5.4-1. NPANXX Group Table**

NPANXX	Local Loop NPANXX Group	CSS Orig. NPANXX Group	CSS Term. NPANXX Group

402

403 The offeror shall provide no more than five (5) NPANXX groups, respectively, for Local  
404 Loop Service and CSS originating and CSS terminating. The group number for a given  
405 NPANXX in the local loop, CSS Orig. and CSS Term. columns are independent of each  
406 other. The NPANXX group numbers shall be consecutive integers starting with 1, up to a  
407 maximum of 5. The contractor shall be responsible for maintaining the list of originating  
408 and terminating NPANXXs in Table B.5.4-1 for the life of the contract.

409 **B.5.5 Interexchange Carrier Point of Presence Location Table**

410 The offeror shall identify all IXC POP locations that the offeror may use to provide IXC  
411 Access service in the format shown in Table B.5.5-1. The contractor shall add and/or delete  
412 appropriate IXC POPs as necessary throughout the life of the contract.

413 **Table B.5.5-1. Interexchange Carrier Point of Presence Location Table**

IXC	IXC POP Location Name	IXC POP Location ID	IXC POP V Coordinate	IXC POP H Coordinate

414

415 **B.6 Contract Line Item Number Cross Reference**

416 The following tables provides a cross reference between the CLIN, Statement Of Work  
417 (SOW) requirements, and price tables. Services that are priced only on a usage basis are not  
418 included.

419

429

**B.7 Pricing for Additional Offerings**

431 The offeror may propose prices for additional features or services that are not specified in  
 432 Section C.2. Any MAA contractor who proposes pricing for services, features, functions, or  
 433 other offerings extending beyond the MAA calling areas shall conform to the appropriate  
 434 pricing specifications and structures defined under the FTS2001 contracts or appropriate  
 435 MAA contracts.

436 The offeror may also propose enhanced services (see Section C.2.1.2) and/or emerging  
 437 services (see Section C.2.1.13) for possible incorporation, at Government option, into the  
 438 initial MAA contract.

35 **Section C**

36 **Descriptions/Specifications/Work Statement**

37 **C.1 Background**

38 The Federal Technology Service (FTS) provides Government users with up-to-date, cost-  
39 effective, and easy to utilize telecommunications services. Working in partnership with the  
40 Interagency Management Council (IMC), which advises the Administrator of General  
41 Services on all matters related to technology services, FTS seeks to involve its users to  
42 achieve the best possible service. The program is designed to enhance the goals of the  
43 National Information Infrastructure (NII) and to support implementation of key information  
44 technology recommendations of the National Performance Review (NPR). The FTS  
45 Program is expected to provide the bulk of telecommunications services for the emerging  
46 Government Services Information Infrastructure (GSII). The FTS Program comprises many  
47 contracts and acquisition activities, of which the Metropolitan Area Acquisition (MAA) is  
48 one. Other contracts and acquisitions include but are not limited to FTS2001, Federal  
49 Wireless Telecommunications Services, International Direct Distance Dialing, Technical and  
50 Management Support, and Wire and Cable Services.

51 The FTS Program is market oriented. It is explicitly recognized that:

- 52 (a) Multiple contracts will be required to most effectively meet Government  
53 requirements. The General Services Administration (GSA) and other agencies will  
54 compete and administer these contracts for the benefit of the overall program.
- 55 (b) The Government will encourage competition through multiple contracts of the same  
56 or overlapping scope.
- 57 (c) Acquisitions will be initiated and contracts awarded in the best interest of the  
58 Government. All contracts will be available to all users as authorized by law.
- 59 (d) Agencies will generally have the right to choose which contract they use to meet  
60 their needs, to buy from multiple contracts, and to change contractors and services  
61 within the FTS Program when appropriate to meet their requirements, subject to the  
62 limitations necessary to meet Minimum Revenue Guarantees.

63 **C.1.1 MAA Program Objectives**

64 The MAA program's principal objectives are to:

- 65 (a) Achieve an immediate, substantial, and sustained price reduction for  
66 telecommunications services in selected metropolitan areas

- 67 (b) Provide a contractual vehicle to facilitate customer flexibility in choosing high  
68 quality services
- 69 (c) Provide a contractual structure that encourages cross-agency cooperation making  
70 more options possible for interagency aggregation and sharing of resources consistent  
71 with customer requirements and budgets

72 **C.1.2 MAA Contract Scope**

73 **C.1.2.1 Authorized Users**

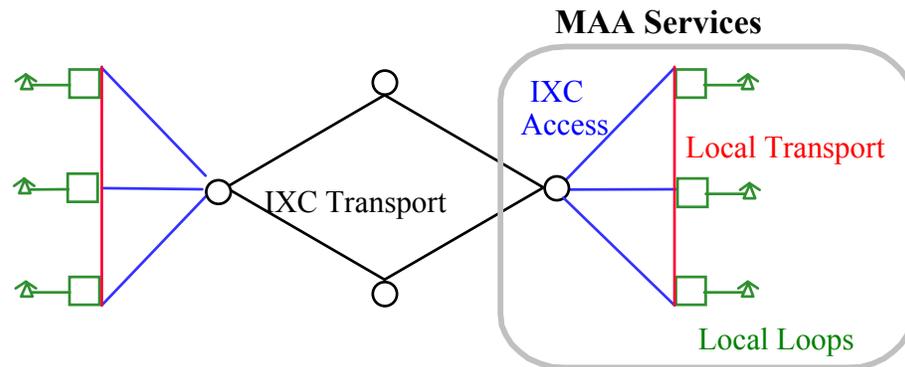

- 74 (a) This contract is for the use of all Federal agencies; authorized Federal contractors;  
75 agency-sponsored universities and laboratories; and as authorized by law or  
76 regulation, state, local, and tribal Governments, and other organizations. All  
77 organizations listed in GSA Order ADM 4800.2D (as updated) are eligible.
- 78 (b) The Government has the right to add authorized users as defined in paragraph (a)  
79 above, and at any time during the term of this contract up to the limits specified in  
80 Section H.3. Specific to the Albuquerque MAA RFP, offerors are advised that there is  
81 potential for additional government services that may be added to the Albuquerque  
82 MAA service location in the future. The potential locations are listed in Table J.2.1-4.

83 **C.1.2.2 Services Coverage**

84 The scope of this resultant contract is to provide telecommunications services to the  
85 Government for the life of this contract including both local services (described in this  
86 Request for Proposals [RFP]) and long-distance services (described in the FTS2001 Request  
87 for Proposal [RFP]).

88 Figure C.1.2-1 depicts the scope of MAA services within the context of the entire FTS  
89 Program. MAA mandatory services include local loop, which includes local switching and  
90 associated features, and local transport (both switched and dedicated) between terminating  
91 locations within the MAA service area. MAA mandatory services also include both  
92 switched and dedicated access to Interexchange Carriers (IXCs). Until allowed by law and  
93 regulation to provide full IXC switched access services, the contractor shall support IXC  
94 switched access by providing the customer organizations the ability to choose the  
95 Government-specified FTS2000/2001 presubscribed interexchange carrier (PIC) for all long  
96 distance services (INTER and INTRA LATA Service). When allowed by law and regulation  
97 and when it is in the best interest of the Government, any MAA contractor, upon MAA  
98 contract award, may provide full IXC switched access services, anywhere as defined in the  
99 FTS2001 RFP for mandatory service, features, performance, and interface requirements.  
100 IXC dedicated access shall be provided

101 using MAA Dedicated Transmission Service (DTS). The term IXC transport is used to  
102 depict the connection between the IXC POPs. When allowed by law and regulation, after the  
103 FTS2001 contract(s) one-year forbearance period, and when it is in the best interest of the  
104 Government, any MAA contractor may provide IXC transport services, as defined in the  
105 FTS2001 RFP for mandatory services, features, performance, and interface requirements.  
106 Section C.1.2.3 provides additional details on the service scope and the mechanism to  
107 incorporate non-mandatory services into the contract. Section J.3 further describes the  
108 relationship between MAA and FTS2001 and the guiding principles for the FTS Program.

109

110

**Figure C.1.2-1. MAA Service Coverage**

111 The Government will not execute any MAA contract modifications for optional long-  
112 distance services (i.e., IXC transport) before one year after the award of the initial FTS2001  
113 contract. Additionally, the Government will not execute any FTS2001 contract  
114 modifications for local services as defined in the MAA program acquisition before one year  
115 after the award of a relevant MAA contract.

116 **C.1.2.3 Service Scope**

117 This [redacted] specifies two mandatory MAA technical services:

- 118 (a) Circuit Switched Services (CSS), which include Local Voice Service (LVS) and  
119 Circuit Switched Data Service (CSDS). LVS includes business line service, off-  
120 premises switch-based voice service, access to existing key systems, and access to  
121 existing Private Branch Exchange (PBX) systems. Business line service provides a  
122 customer with a single, voice-grade telephonic communications channel which can be  
123 used to place or receive one call at a time. This service also provides connection of

124 (b) customer-single station sets or facsimile machines to the public switched  
125 telecommunications network.

126 Off-premises switch-based voice service refers to voice services for a large number  
127 of users that can be provided via various solutions. Off-premises switch-based voice  
128 service is a set of capabilities and features that are commonly provided by Centrex-  
129 like or PBX-like services and features.

130 After contract award, for existing PBX sites, the Government may consider replacing  
131 the PBX with a central office-based service, providing a PBX trunk to the existing  
132 PBX, replacing the existing PBX with an on-premises or off-premises PBX, or other  
133 solutions. For a new on-premises PBX, costs for providing space and environmental  
134 support (e.g., HVAC) will be negotiated on a case by case basis where the  
135 Government determines space is available.

136 (b) Dedicated Transmission Service (DTS), which includes Local DTS and DTS access  
137 to an IXC POP. Local DTS provides dedicated connections between customer  
138 organizations' locations within an MAA area. DTS access to an IXC POP is the  
139 dedicated connection between a customer organization location and an IXC POP.

140 For any solution provided by the vendor, the prices for the implementation of such  
141 solution and provision of the associated services will be all inclusive as structured in Section  
142 B. Beyond the information to be provided in the RFPs, it is the offeror's responsibility to  
143 perform necessary research or information gathering to understand the existing system and  
144 service implementation at each potential site for proposal development purposes. The  
145 Government may offer reasonable assistance to the offerors, when requested.

146 For the metropolitan area-specific proposal, the offeror will be responsible only for  
147 mandatory services. Only mandatory services will be evaluated for qualification of offerors  
148 and for contract award. In addition to the specific mandatory requirements for technical  
149 services set forth in Section C, the scope of this contract includes:

- 150 (c) Additional enhanced circuit switched and dedicated transmission service capabilities  
151 and features as defined in Section C.2.1.2
- 152 (d) Full IXC switched access services (as defined in the FTS2001 RFP), when allowed  
153 by law and regulation
- 154 (e) IXC transport services (as defined in the FTS2001 RFP), when allowed by law and  
155 regulation, after the forbearance period, and in the Government's best interest
- 156 (f) Switched data services, which include, but are not limited to:

- 157 (1) Packet switched services (PSS) such as X.25  
158 (2) Internet Protocol (IP) services  
159 (3) Frame relay (FR) service  
160 (4) Asynchronous Transfer Mode (ATM) service  
161 (5) Switched Multi-megabit Data Service (SMDS)  
162 (6) Synchronous Optical Network (SONET) service  
163 (g) Video teleconferencing services (VTS)  
164 (h) Technology enhancements, service improvements, and all new and/or emerging  
165 telecommunications services offerings as defined in Section C.2.1.13.

166 These service enhancements or new services, when required by the Government, will be  
167 considered as modifications to the contract. The scope of the MAA contract will also  
168 include all telecommunications services, features, functions, and offerings that will be  
169 generally available as part of the contractor's commercial offerings, as well as offerings  
170 available in the commercial marketplace, during the term of the contract, plus services for  
171 which there may not be commercial offerings.

172 Additional services that may be required by customer organizations on an individual case  
173 basis, include but are not limited to:

- 174 (i) Premises services, which include, but are not limited to, incidental service-related  
175 equipment (for example, telephones and workstations), local area network (LAN) and  
176 LAN inter-networking services, multiplexing and de-multiplexing services, and other  
177 additional inside wiring that is not part of the Service Delivery Point (SDP) (See  
178 Section C.2.1.5)  
179 (j) Diversity routing  
180 (k) Solutions to legacy and proprietary equipment and systems  
181 (l) Management and maintenance of Government-owned PBX systems

182 These additional services, when required by the Government, will be negotiated on an  
183 individual case basis. These services will then be acquired using Other Direct Cost (ODC)  
184 procedures (See Section H.27).

#### 185 **C.1.2.4 Geographic Scope**

186 In the RFP for each specific metropolitan area, the definition and coverage of the  
187 metropolitan area(s) will be defined in Section J.1. Geographical coverage in terms of zip  
188 codes, county boundaries, city boundaries, or other means will be defined. For pricing  
189 purposes, the geographic area will also be described in terms of the NPANXXs covering that  
190 area. The Government reserves the right to expand the geographical coverage beyond the

191 coverage area originally identified in the RFP (e.g., adding another site outside of the  
192 original MAA coverage area) up to the limits specified in Section H.3. It is anticipated that  
193 any geographical expansion will be within close proximity of the metropolitan area boundary  
194 defined in the RFP. The impact of such geographical expansion to the contract, if any, will  
195 be negotiated with the contractor on a case-by-case basis.

## 196 **C.2 Service Descriptions and Technical and Performance Requirements**

197 The general requirements for the MAA contract are provided in Section C.2.1. Sections  
198 C.2.2 and C.2.3 describe the basic MAA services, features, performance requirements, and  
199 interfaces to be provided by the contractor under this procurement.

### 200 **C.2.1 General Requirements**

201 An overview of the MAA requirements is provided in this section.

#### 202 **C.2.1.1 Services**

203 The contractor shall provide local telecommunications service in the following two  
204 categories:

205 (a) Circuit Switched Services (CSS). These services are based on circuit/time-division  
206 switching technologies and are sub-divided into voice services and data services sub-  
207 categories, as described below:

208 (1) Local Voice Service (LVS)

209 (2) Circuit Switched Data Service (CSDS)

210 (b) Dedicated Transmission Service (DTS). These are dedicated transmission services  
211 which allow the aggregation of bandwidths for transmission of voice and data traffic.  
212 DTS is subdivided into the following two groups:

213 (1) Local DTS

214 (2) DTS access to an IXC POP

215 CSS shall provide local loop (including local switching and associated features), local  
216 transport between terminating locations within the MAA service area, access to local long  
217 distance services, and access to and from interexchange carriers. Detailed specifications for  
218 CSS, including basic capabilities, features, performance, and interfaces, are described in  
219 Section C.2.2.

220 DTS shall provide dedicated circuits between sites within the MAA service area as well  
221 as between an MAA site and an IXC POP. Detailed specifications for DTS, including basic  
222 capabilities, features, performance, and interfaces, are described in Section C.2.3.

223 As part of the service offering, the contractor shall ensure proper delivery and operations of  
224 all telecommunications services as described in Sections C.2.2 and C.2.3.

225 **C.2.1.2 Enhanced Services**

226 Certain enhanced circuit switched or dedicated services may be acquired using either  
227 initial metropolitan area-specific requirements (to be specified in a metropolitan area-specific  
228 RFP) or post-MAA contract award using contract modification procedures. These enhanced  
229 services may include the following.

230 **C.2.1.2.1 Additional Circuit Switched Services**

231 Customer organizations may require the following services<sup>1</sup>:

- 232 (a) Foreign exchange service
- 233 (b) Customized intercept and recorded announcements

234 Customer organizations may require the following enhanced features as additional  
235 interfaces to the existing PBX:

- 236 (c) Signaling System 7 (SS7) Interface
- 237 (d) T3 at line rate of 44.736 Mb/s and information-payload data-rate of 43.008 Mb/s

238 Customer organizations may require the following CSDS features:

- 239 (e) Multirate DS0: Range from DS0 (64 kb/s clear channel) to N times DS0 data  
240 rates, where N varies at specific numbers from 2 to 23
- 241 (f) Multirate DS1: Range from DS1 to N times DS1 data rates, where N varies at  
242 specific numbers from 2 to 27
- 243 (g) DS3: 43.008 Mb/s data rate

244 **C.2.1.2.2 Additional DTS Features**

245 Customer organizations may require the following features as additions to the basic DTS:

- 246 (a) Multipoint Connection, including the following capabilities:
  - 247 (1) Branch-Off (also known as Drop-and-Continue)
  - 248 (2) Drop-and-Insert (also known as Add-Drop-Multiplexing)
- 249 (b) 7.5 kHz Audio
- 250 (c) Service Assurance: Providing improved availability of DTS circuits, including  
251 such schemes as automatic restoration and reconfiguration

---

<sup>1</sup> For this Albuquerque MAA RFP, the requirement for foreign exchange is specified in Section C.2.2.1.1.2 and for customized intercept and recorded announcements is specified in Sections C.2.2.1.1.2.1, C.2.2.1.1.2.2, C.2.2.1.1.2.5, and C.2.2.1.1.2.6.

- 252 (d) Route or Path Diversity: Providing multiple, physically separated routes for DTS  
253 circuits
- 254 (e) Route or Path Avoidance: Providing the capability for a customer organization to  
255 define a geographic location or route on the network to avoid
- 256 (f) Fractional T1: Adjacent DS0 clear channels, over an interface with a line rate of  
257 1.544 Mb/s, in increments of one DS0 channel to a maximum capacity of 12 DS0  
258 channels.
- 259 (g) Fractional T3: Three, four, five, or seven adjacent DS1 clear channels over an  
260 interface with a line rate of 44.736 Mb/s
- 261 (h) T3: 44.734 Mb/s line rate

262 **C.2.1.3 Management and Operations Services**

263 The contractor shall be fully responsible for the management and operation of its  
264 services. The detailed specifications of these management services are described in Section  
265 C.3 and Sections G.1 through G.6.

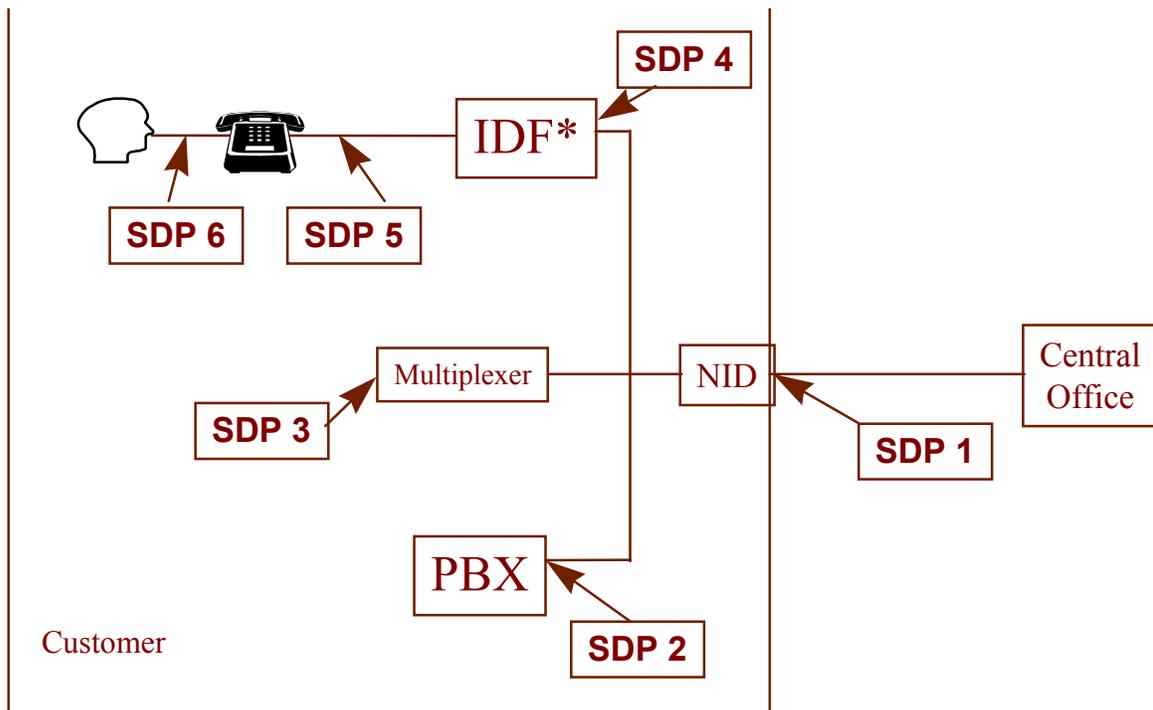

266 **C.2.1.4 Features**

267 The individual service descriptions in Sections C.2.2 and C.2.3 define the basic  
268 capabilities and features associated with each service. Basic capabilities of the service are  
269 those that are included in the base price of the service as defined in Section B. The  
270 contractor should identify capabilities included in its basic services that are not specified in  
271 this **RFP**. Features of a service are additional capabilities that shall be provided by the  
272 contractor and priced separately from the basic price. Additional features not specified in the  
273 **RFP** may be proposed by the contractor.

274 **C.2.1.5 Service Delivery Points**

275 The SDP is the interface point for the physical delivery of a service, one of the points at  
276 which performance parameters are measured to determine compliance with the contract, and  
277 the point used by the contractor to identify the charges for services rendered. Each SDP is  
278 defined as the combined physical, electrical, and service interface through an appropriate  
279 industry standard connector (e.g., RJ-21X/110 block) between the contractor's network and  
280 the Government on-premises equipment, off-premises switching and transmission  
281 equipment, and other facilities (such as those provided by telephone central offices). Figure  
282 C.2.1.5-1 depicts the potential MAA SDP locations.

283  
284

285 \* Contractor-provided terminal block adjacent to a government terminal block in the intermediate distribution  
286 frame (IDF), computer room, or telephone closet(s) on each floor of a multistory building or appropriate  
287 telephone closet(s) in a single story building. SDP 6 includes a voice instrument equipped with a line/mounting  
288 cord for connection to the jack at SDP 5.  
289

290  
291

**Figure C.2.1.5-1. MAA SDP Locations**

292  
293  
294

The Government's requirements are for services and features to the SDP. An SDP is the interface point at which a service is delivered by the contractor to the user. It is the point at

295 which responsibility for the service transfers from the service provider to the Government  
296 (i.e., service on the left side of an SDP in the diagram is the responsibility of the customer  
297 organization, and service on the right side of an SDP is the responsibility of the contractor).  
298 By way of exception, ISDN service orders to SDP5 will treat rack-mounted NT1/Power  
299 Supply equipment at the IDF as customer premises equipment associated with SDP6. ISDN  
300 service orders to SDP6 will include the associated NT1/Power Supply, but will not include  
301 ancillary data terminal equipment. For example, at SDP6, the contractor is responsible for  
302 providing and/or servicing the phone equipment; wiring between the phone and the Network  
303 Interface Device (NID), which is the demarcation point defined by the Federal  
304 Communications Commission (FCC) and the Public Utility Commission (PUC); and all  
305 services on the network side of the NID. (See Section C.2.1.12 for appropriate treatment of  
306 inside wiring).

307  
308 The physical location of the SDP will be determined by the Government. SDPs may also  
309 be located off Government premises when necessary, e.g., to provide DTS circuits from a  
310 switch to an IXC POP.

311 Any contractor-provided equipment to be located on the customer organization's  
312 premises shall be placed in locations as approved by the Government.

313 The contractor shall support SDP locations other than the NID. SDP locations that are  
314 not defined in Figure C.2.1.5-1 shall be supported and negotiated on a case-by-case basis  
315 under ODC. Other possible SDP locations include, but are not limited to:

- 316 (a) Network side of off-premises switch-based voice service system, or other  
317 communications system or network
- 318 (b) IXC POP for IXC access service component

319 The detailed interface specification of the SDP at the user-to-network interface (UNI) is  
320 described in each service description.

#### 321 **C.2.1.6 Compatibility**

322 The contractor shall ensure that the local telecommunications services provided under  
323 this contract are compatible with the Government's existing equipment to the extent that  
324 commercial standard interfaces and implementation exist to support such compatibility. For  
325 Albuquerque, the contractor shall support the existing Government-owned telephone sets  
326 (1,043, Mode NEC Dterm Series III). This support may include substitution of contractor-  
327 provided equipment of equal or greater quality and functionality at no additional cost to the  
328 Government. The contractor shall identify the necessary operations, procedures, software,  
329 and equipment to ensure service compatibility. The contractor shall provide identification of  
330 incompatibilities between the required services and the existing Government equipment  
331 within 15 business days after service order acknowledgment.

332 The contractor shall continue to use the existing telephone numbers assigned to MAA  
333 stations when these stations are transitioned from existing Government networks/systems to  
334 the contractor's network.

335 The contractor shall be responsible for achieving compatibility with its network for  
336 systems/networks, procured by GSA or customer organizations after MAA contract award,  
337 that conform to the industry standards as specified in this contract. As part of operational  
338 support, the contractor shall be responsible for providing assistance, as necessary, to  
339 determine compatibility requirements with the customer organizations and vendors of  
340 equipment that is to be connected to the contractor's network regardless of when the  
341 equipment is purchased. When a solution is required to resolve a system incompatibility, the  
342 implementation of the solution shall be negotiated on an individual case basis.

#### 343 C.2.1.7 Performance

344 The contractor shall be responsible for managing and coordinating all aspects of service  
345 quality, security, interconnectivity, and interoperability of services between SDPs. The  
346 applicable performance parameters for each service and feature are specified separately for  
347 service components in each service description. Each performance parameter is defined in  
348 terms of the minimum acceptable level of performance for the service or feature. The  
349 performance provided shall always be at a level not less than what is available commercially.  
350 If the available commercial performance parameter is more demanding than the minimum  
351 acceptable level specified in the contract, the available commercial performance parameter  
352 shall prevail. (See Section G.6.1 for performance data reporting requirements and Section  
353 G.5.2 for repair requirements.)

354 The contractor shall be responsible for delivering services at the required performance  
355 levels as specified in this solicitation. In the case of service disruptions, the contractor shall  
356 restore service as specified in Section G.5.2.

#### 357 C.2.1.8 Interoperability Requirements

358 In addition to this MAA acquisition, the Government has acquired, or is acquiring,  
359 services and equipment to meet a range of telecommunications requirements, including local  
360 service, intra-Local Access and Transport Area (LATA) toll, inter-LATA access, data  
361 networking (local and wide area), inter-LATA transport, international voice/data transport,  
362 wireless, electronic commerce, Internet, and electronic messaging. The MAA services shall,  
363 when required by the Government, interface and interoperate with the systems and services  
364 provided under other FTS Program acquisitions. The interface requirements for  
365 interoperability for each of the above acquisitions will be available from the Government.  
366 When interconnectivity and interoperability are required at an SDP located at another  
367 vendor's network, the contractor shall conform to commercial standard interfaces for  
368 interconnectivity and interoperability. If there are non-commercial standard interfaces used  
369 by the other vendor's network, the contractor shall coordinate and negotiate with the  
370 Government on a case-by-case basis.

371 **C.2.1.9 Security of Contractor Infrastructure**

372 The contractor shall describe how it will provide security within the infrastructure of the  
373 contractor's network, consistent with commercial practices, which shall ensure availability of  
374 service, confidentiality, and data integrity of both the contractor's transmission systems and  
375 databases being maintained by the contractor in support of its services. The contractor shall  
376 clearly label all wires installed or used by the contractor at the SDP (main distribution frame  
377 [MDF] and intermediate distribution frame [IDF] in the wiring closet). Where existing  
378 wiring labeling is not adequate, the contractor shall negotiate the labeling upgrade with the  
379 Government on a case-by case basis, and any additional cost will be covered under ODC.  
380 The contractor shall provide physical security of contractor facilities (e.g., locked door and  
381 sign in/out procedures to gain access). For SDPs that are in locations other than the  
382 contractor's locations, the contractor shall follow security procedures specified by the  
383 Government in coordination with the building owner. The contractor shall describe how its  
384 infrastructure shall utilize best commercial practices to protect against threats from hacker,  
385 criminal, and terrorist activities.

386 **C.2.1.10 Hardware and Software**

387 When commercial-off-the-shelf (COTS) equipment and software is required to interface  
388 to customer organization's equipment as specified within this contract, these shall be  
389 provided as an integral part of the services. On a case-by-case basis, where proprietary or  
390 legacy system/equipment exist and the Government requires compatibility with such  
391 system/equipment, the Government will negotiate with the contractor. The cost for  
392 accomplishing this compatibility will be under ODC. Any such hardware and software shall  
393 remain the property of the contractor, unless otherwise specified or agreed by the  
394 Government. Where available, the Government will authorize the use without charge of a  
395 reasonable amount of space and power at Government locations for the installation of  
396 contractor equipment.

397 **C.2.1.11 Implementation**

398 For services and features provided under this contract, the contractor shall be responsible  
399 for their implementation at specific customer organization locations. The details of  
400 implementation are defined in Section C.4. Implementation shall include the following:

- 401 (a) Replacement of existing GSA-provided services with MAA contract services
- 402 (b) Installation of new MAA contract services at locations currently served by GSA
- 403 (c) Installation of MAA contract services at locations not currently served by GSA

404

405 (d) Enhancements, changes, and additions to previously implemented MAA contract  
406 services

407 **C.2.1.12 On-Premises Wiring**

408 The contractor shall be responsible for delivering service to the SDP. In cases where the  
409 Government-defined SDP is beyond the NID and the existing wiring between the NID and  
410 the SDP meets the technical standards (e.g., U.S. cabling and safety standards and guidelines  
411 as published by Building Industry Consulting Services International (BICSI), and ANSI  
412 Electronic Industry Association/Telecommunications Industries Association [EIA/TIA] 568  
413 (with all revisions) 569/606/TSB-36/TSB-40, ANSI/National Fire Protection Association  
414 [NFPA]-70 and meets the service performance levels specified in the RQS and the  
415 metropolitan area specific RFP, the contractor shall use the existing wiring to provide service  
416 to the SDP. Existing on-premises wiring may be owned and/or maintained by other  
417 contractors, the commercial building owner, or the Government. The MAA contractor shall  
418 be responsible for managing and coordinating with the appropriate organization(s) to ensure  
419 service delivery to the SDP.

420 In cases where the Government-defined SDP is beyond the NID and the existing wiring  
421 between the NID and the SDP is determined by the contractor as inadequate, the contractor  
422 shall provide notification of non-compliance of existing wiring and propose a solution within  
423 15 business days after service order acknowledgment. Inadequate wiring is defined as  
424 wiring implementation that does not allow the contractor to provide service from the NID to  
425 the SDP at the required performance levels specified in the RQS and the metropolitan-area  
426 specific RFP. The contractor shall demonstrate, with appropriate engineering specifications  
427 and evidence, that the existing wiring is inadequate. Once the Government agrees to the  
428 contractor's assessment of the inadequate wiring, the Government may negotiate with the  
429 contractor to upgrade the on-premises wiring as ODC.

430 In cases where the Government-defined SDP is beyond the NID and there is no existing  
431 wiring (e.g., a new building or a new floor), the contractor shall provide a price quote for  
432 installing the inside wiring to the SDP. The Government may negotiate with the contractor  
433 to install new wiring as ODC.

434 The contractor shall ensure that all wiring meets the technical standards for the services  
435 being provided. The Government may request the contractor to conduct a site survey in  
436 anticipation of new service. The contractor shall, at the Government's request, provide  
437 installation of wiring to the SDP. After the installation, the site shall be returned as closely  
438 as possible to the same condition as it was prior to the installation. The Government reserves  
439 the right to use other contractors to upgrade the existing on-premises wiring or to install the  
440 new inside wiring. If the Government contracts separately to provide installation of wiring,

441 the MAA contractor shall coordinate and cooperate with the building manager and the wiring  
442 vendor. If the Government contracts separately to provide installation of wiring, any  
443 postponement or delay in upgrade or installation of wiring caused by actions or inactions of  
444 the building management and a wiring vendor will be matched by an automatic day-for-day  
445 extension in the MAA contractor's service delivery date.

446 **C.2.1.13 Emerging Services**

447 Given the rapid pace of communications technology expansion, a number of services  
448 and applications are expected to emerge during the course of the MAA program. As the  
449 commercial infrastructure evolves, and new services become commercially available, the  
450 Government intends to add new services to maintain the technical adequacy of its  
451 communication systems.

452 If any Emerging Service (ES) is available at time of proposal submission, the offeror is  
453 encouraged to propose it. ES, as proposed, is expected to interoperate seamlessly with other  
454 MAA services, including but not limited to:

455 (a) CSS

456 (b) DTS

457 (c) Other ES (e.g., Digital Subscriber Line [xDSL]) when incorporated into this contract

458 After the contract award, the contractor shall advise the Government of any new  
459 technology, not in the MAA program, when it becomes commercially available. If the  
460 contractor implements a new service for any of its customers, the contractor shall advise the  
461 Government of the offerings. If there is sufficient interest within the Government, the  
462 contractor shall propose the new technology to the Government for consideration to be  
463 incorporated into the MAA program.

464 **C.2.1.14 Conformity to Standards**

465 Throughout Section C, references are made to standards (including interim standards,  
466 Internet Engineering Task Force (IETF) Requests for Comments (RFCs), or defacto  
467 standards) as they exist at the time of issuing this RFP. Compliance with the latest versions  
468 of these standards is expected throughout the duration of the contract. Considering the  
469 evolving nature of standards in the telecommunications industry, discussions will be held  
470 between the contractor and the Government on an ongoing basis to assess the impact of any  
471 standard changes.

472 Service provided to the Government shall be in conformance with the same standards as  
473 that of the contractor's commercial offering at no additional cost to the Government.  
474 However, if a customer organization wants conformance to a new standard earlier than the  
475 contractor's commercial plan for development, then it shall be negotiated on an individual

476 case basis.

477 Where multiple standards are cited, the order of precedence shall be as follows unless  
478 otherwise specified:

- 479 (a) Industry forums (e.g., Frame Relay Forum, NIUF, ATMF, EIA/TIA)
- 480 (b) American National Standards Institute (ANSI)
- 481 (c) Bellcore
- 482 (d) International Telecommunications Union-Telecommunications Service Sector (ITU-  
483 TSS)

484 The Government reserves the right to waive the standards requirement for any service.

## 485 **C.2.2 Circuit Switched Services (CSS)**

486 The requirements for local CSS under the MAA contract are specified in the following  
487 sections.

### 488 **C.2.2.1 Local Voice Service (LVS)**

489 Local voice service shall provide calling capabilities from any MAA customer  
490 organization to any termination point within the MAA area, as well as access to any  
491 termination point within the Public Switched Telephone Network (PSTN).

#### 492 **C.2.2.1.1 Basic Configurations**

493 LVS shall support the following configurations:

- 494 (a) Business Line. Analog (loop and ground start) and ISDN lines.
- 495 (b) Off-Premises Switch-Based Voice Service. Off-premises switch-based voice service  
496 over Analog (loop and ground start) and ISDN lines including the sharing of ISDN  
497 Bearer (B) Channels to provide two voice, voice/data, or two data channels utilizing  
498 two Service Profile Identifier and Directory (SPID) numbers. Off-premises switch-  
499 based voice service equipment shall not be located in Government facilities except at  
500 locations with an existing on-premises PBX (See Section C.1.2.3).
- 501 (c) Access to Existing Key Systems. Analog and ISDN lines for Government key  
502 systems.
- 503 (d) Access to Existing PBX Systems. Analog (loop and ground start) and digital local  
504 central office access trunks for a Government PBX systems.

505 The contractor shall support connections for voice and analog data rates of at least 9.6  
506 kilobits per second (kb/s) using an ITU-TSS V.32 modem and 28.8 kb/s using an ITU-TSS  
507 V.34 modem, not including impairment of data rates by the local loop. The contractor shall  
508 also support modems at the latest commercially available modem rates over the life of the

509 contract. LVS shall comply with ANSI T1.101 and all applicable Bellcore and ANSI  
510 standards, primarily Bellcore's *BOC Notes on the LEC Networks*, and ANSI ISDN and SS7  
511 standards. The service interfaces at the SDP are defined in Section C.2.2.1.1.4.

512 **C.2.2.1.1.1 Basic Service Capabilities**

513 The contractor shall provide the following common basic capabilities for all business  
514 lines, off-premises switch-based voice service, line access to existing key systems, and trunk  
515 access to existing PBX systems configurations (Note: Some terms are not defined below.  
516 See Section J.4 for definition of terms.):

- 517 (a) 10XXX/NPA/NXX Routing. The numbering plan shall conform to the North  
518 American Numbering Plan (NANP). The dialing plan shall also support a truncation  
519 of the standard ten-digit station number (e.g., the last four, five, or six digits of the  
520 station number) for all customer organizations using MAA off-premises switch-based  
521 voice services provided by a single MAA contractor in the Albuquerque MAA  
522 service area. The numbering plan shall include access codes of two digits or less for  
523 off-premises switch-based voice service user access to carriers and/or services  
524 external to the system/service. Assignment of access codes to these services shall be  
525 at the discretion of the Government. The contractor shall incorporate any changes in  
526 the NANP in both routing and automatic route selections (ARS) tables as necessary.
- 527 (b) Dual Tone Multi-Frequency (DTMF) Dialing
- 528 (c) Automatic Number Identification (ANI) for outgoing calls
- 529 (d) Access to 911 Service. Customer organizations shall be able to access emergency  
530 service/assistance by dialing (prefix, if appropriate) 911
- 531 (e) Operator Assistance. Operator assistance shall be provided for any services offered  
532 by the service provider
- 533 (f) Primary Directory Listings
- 534 (g) Access to a pre-subscribed interexchange carrier (PIC)
- 535 (h) Flexible Disconnect, Both/Either Party
- 536 (i) Off-hook Time Out
- 537 (j) Intercept and Recorded Announcement. The contractor shall provide commercially  
538 available network intercept to recorded announcement as an inherent network  
539 capability when a call cannot be completed

540 **C.2.2.1.1.1.1 Non-ISDN Business Line Additional Basic Service Capabilities**

541 No additional capabilities for non-ISDN business line basic service are identified at this  
542 time. As additional capabilities are identified during the life of the contract, they will be

543 incorporated via contract modification. Offerors are encouraged to propose additional basic  
544 service capabilities for business lines as part of the RFP proposal, if they are currently  
545 available, for possible inclusion as part of each MAA contract.

546 **C.2.2.1.1.1.2 Non-ISDN Off-Premises Switch-Based Voice Service Additional**  
547 **Basic Service Capabilities**

548 In addition to the common basic capabilities specified in Section C.2.2.1.1.1, the  
549 contractor shall provide the following capabilities for basic non-ISDN off-premises switch-  
550 based voice service:

- 551 (a) Call Back/Camp On
- 552 (b) Call Consultation
- 553 (c) Call Forward - Busy
- 554 (d) Call Forward - Don't Answer
- 555 (e) Call Forward - Variable
- 556 (f) Call Hold
- 557 (g) Call Hunting
- 558 (h) Call Park
- 559 (i) Call Pick-Up
- 560 (j) Call Transfer
- 561 (k) Call Waiting
- 562 (l) Direct Inward Dialing (DID)
- 563 (m) Direct Outward Dialing (DOD)
- 564 (n) Last Number Redial
- 565 (o) Message Waiting Indication
- 566 (p) Speed Calling
- 567 (q) Three-Way Conference Calling
- 568 (r) Blocking of Selected Numbers
- 569 (s) Class of Service. The service shall provide 64 classes of service available to each  
570 customer organization line. Due to the diverse nature of the customer organizations  
571 served, each class of service shall be available on all customer organization line  
572 circuits, and shall permit class of service changes without requiring a station number  
573 change. Each class of service shall provide a flexible mix of both system/station  
574 features and transport level restrictions. The Government will select a variety of

575 classes, some of which will be unique. The class of service applicable to each line  
576 termination shall be assigned and determined by the Government during final station  
577 design planning. Access to the commercial networks shall be provided by the  
578 contractor to properly class-marked users. The contractor shall provide the following  
579 nine transport access level restrictions:

- 580 (1) COS 1 - Limited Service: Service within the same serving system
- 581 (2) COS 2 - Standard Service: Local Government service provided through the  
582 system(s) and local exchange NXXs dedicated to the Government
- 583 (3) COS 3 - Commercial Service: Standard service plus access to the LEC
- 584 (4) COS 4 - Government Service: Standard service plus access to a Government-  
585 acquired, IXC-provided service (on-net), but with no access to the LEC
- 586 (5) COS 5 - Extended Service: Standard service plus access to both a Government-  
587 acquired IXC service (on-net) and the LEC
- 588 (6) COS 6 - National Service: Standard service plus access to a Government-  
589 acquired IXC service (on-and-off-net) and the LEC
- 590 (7) COS 7 - Interexchange Carrier Service: Commercial service plus access to IXCs  
591 other than a Government-acquired IXC service
- 592 (8) COS 8 - International Service: National Service plus Government-acquired  
593 International Direct Distance Dialing (IDDD)
- 594 (9) COS 9 - Interexchange and International Service: IXC Service plus IDDD

595 (t) Reserved

596 (u) Software Reconfiguration by Customer

597 **C.2.2.1.1.1.3 Non-ISDN Access to Existing Key Systems Additional Basic**  
598 **Service Capabilities**

599 In addition to the common basic capabilities specified in Section C.2.2.1.1.1, the  
600 contractor shall provide line hunting capability for non-ISDN access to existing key systems  
601 basic service.

602 **C.2.2.1.1.1.4 Non-ISDN Access to Existing PBX Systems Additional Basic**  
603 **Service Capabilities**

604 No additional capabilities for non-ISDN access to existing PBX systems basic service are  
605 identified at this time. As additional capabilities are identified during the life of the contract,  
606 they will be incorporated via contract modification. Offerors are encouraged to propose  
607 additional basic service capabilities for access to existing PBX as part of the RFP proposal, if  
608 they are currently available, for possible inclusion as part of each MAA contract.

609 **C.2.2.1.1.1.5 Additional Basic Service Capabilities for ISDN Business Line**

610 In addition to the common basic capabilities specified in Section C.2.2.1.1.1, the  
611 contractor shall provide the following capabilities for ISDN business line basic service:

- 612 (a) Caller Identification (ID)
- 613 (b) Data Call Setup
- 614 (c) Data Hot Line
- 615 (d) Data Line Privacy
- 616 (e) Default Dialing (SDP 6 only)
- 617 (f) Personalized Ringing (SDP 6 only)
- 618 (g) Three-way Conference Calling

619 **C.2.2.1.1.1.6 Additional Basic Service Capabilities for ISDN Off-Premises**  
620 **Switch-Based Voice Service**

621 In addition to the common basic capabilities specified in Section C.2.2.1.1.1 and  
622 C.2.2.1.1.2, the contractor shall provide the following capabilities for ISDN off-premises  
623 switch-based voice basic service:

- 624 (a) Call Back/Camp On
- 625 (b) Call Consultation
- 626 (c) Call Forward - Busy
- 627 (d) Call Forward - Don't Answer
- 628 (e) Call Forward - Variable
- 629 (f) Call Hold
- 630 (g) Call Hunting
- 631 (h) Call Park
- 632 (i) Call Pick-Up
- 633 (j) Call Transfer
- 634 (k) Call Waiting
- 635 (l) DID
- 636 (m) DOD
- 637 (n) Last Number Redial
- 638 (o) Message Waiting Indication
- 639 (p) Speed Calling

- 640 (q) Three-Way Conference Calling
- 641 (r) Blocking of Selected Numbers
- 642 (s) Class of Service (as specified in Section C.2.2.1.1.1.2)
- 643 (t) Software Reconfiguration by Customer
- 644 (u) Caller ID
- 645 (v) Customized Group Dialing Plan
- 646 (w) Data Call Setup
- 647 (x) Data Hot Line
- 648 (y) Data Line Privacy
- 649 (z) Default Dialing (SDP 6 only)
- 650 (aa) Distinctive Ringing (SDP 6 only)
- 651 (bb) Intercom Dial
- 652 (cc) Multi-Appearance Preselection and Preference (SDP6)
- 653 (dd) Multiple Appearance Directory Number
- 654 (ee) Personalized Ringing (SDP 6 only)

**C.2.2.1.1.1.7 Additional Basic Service Capabilities for ISDN Access to Existing Key Systems**

In addition to the common basic capabilities specified in Section C.2.2.1.1.1, the contractor shall provide the following capabilities for ISDN access to existing key systems:

- 659 (a) Line Hunting
- 660 (b) Caller ID
- 661 (c) Three-way Conference Calling

**C.2.2.1.1.1.8 Additional Basic Service Capabilities for ISDN Access to Existing PBX Systems**

In addition to the common basic capabilities specified in Section C.2.2.1.1.1, the contractor shall provide the following capability for ISDN access to existing PBX systems basic service:

- 667 (a) Caller ID

668 **C.2.2.1.1.2 Features**

669 The contractor shall provide the following features as additions to the basic service for  
670 all business lines, off-premises switch-based voice service, line access to existing key  
671 systems, and trunk access to existing PBX systems (where such features are supported by the  
672 PBX):

- 673 (a) Blocking Caller-Paid Information Phone Numbers
- 674 (b) Calling Number Suppression
- 675 (c) Directory Assistance. Directory assistance (to obtain directory numbers) for the local  
676 calling area shall be provided by dialing 411 or [1-NPA-] 7 digits.
- 677 (d) Pre-subscribed Interexchange Carrier (PIC) Change
- 678 (e) Vanity Number
- 679 (f) Call Return (e.g., \*69)
- 680 (g) Call Screen
- 681 (h) Foreign Exchange Service
- 682 (i) Number Portability. The contractor shall retain all existing telephone line numbers at  
683 a Government location. Remote call forwarding is not a compliant solution for  
684 number portability.
- 685 (j) Anonymous Call Rejection
- 686 (k) Meet Me Conference for up to 400 participants

687 The contractor shall provide the following features as additions to the basic service for  
688 all business lines and off-premises switch-based voice service:

- 689 (l) Additional Directory Listings
- 690 (m) Alternate Call Directory Listings
- 691 (n) Operator Assistance - Busy Line Verification
- 692 (o) Operator Assistance - Busy Line Verification with Interrupt
- 693 (p) Voice Mail. All calls to voice mail that originate in the contractor's network shall be  
694 treated as on-net calls. Voice mail shall provide the following capabilities:
  - 695 (1) Be accessible to any station within the system that has a telephone equipped with  
696 a push-button tone pad
  - 697 (2) Automatically cue the recipient of message(s) in the voice mailbox. Message cue  
698 alerting should include, but not be limited to, message waiting visual signal or  
699 stutter dial tone.
  - 700 (3) Handle inside, as well as outside, calls on the system.
  - 701 (4) Store messages automatically and forwards the message at specific times  
702 designated by users.

- 703 (5) Deliver mass announcements to all or part of its users.  
704 (6) Be accessible to any on-net or off-net station equipped with a push-button dial  
705 pad in order for the mail box owner to retrieve or change messages.  
706 (7) Provide automated attendant functions.  
707 (8) For the Albuquerque MAA RFP, the incoming message duration shall be 120  
708 seconds.  
709 (9) When providing off-premises switch-based voice service, the contractor shall  
710 supply and/or interface with and support a data link (e.g., Station Message Desk  
711 Interface [SMDI], Simplified Message Service Interface [SMSI]) to integrate a  
712 Government-owned voice mail system into its switching system.  
713 (10) Provide, at a minimum, thirty-minute storage capability for all incoming  
714 messages per individual voice mailbox.  
715

716 **C.2.2.1.1.2.1 Non-ISDN Business Line Additional Features**

717 In addition to the features specified in Section C.2.2.1.1.2, the contractor shall provide  
718 the following features for non-ISDN business line service:

- 719 (a) Authorization Codes
- 720 (b) Billing Account Code – Verified
- 721 (c) Billing Account Code – Unverified
- 722 (d) Call Forwarding
- 723 (e) Call Waiting
- 724 (f) Caller Identification (ID)
- 725 (g) Data Line Privacy
- 726 (h) Speed Calling
- 727 (i) Three-Way Conference Calling
- 728 (j) Bridging Service
- 729 (k) Call Trace
- 730 (l) Customized Intercept and Recorded Announcement
- 731 (m) Dual Service
- 732 (n) Six-Way Conference Calling

733 **C.2.2.1.1.2.2 Non-ISDN Off-Premises Switch-Based Voice Service Additional**  
734 **Features**

735 In addition to the features specified in Section C.2.2.1.1.2, the contractor shall provide  
736 the following features for non-ISDN off-premises switch-based voice service:

- 737 (a) Authorization Codes
- 738 (b) Billing Account Code – Verified
- 739 (c) Billing Account Code – Unverified
- 740 (d) Caller Identification (ID)
- 741 (e) Call Restriction
- 742 (f) Customized Group Dialing Plan
- 743 (g) Data Line Privacy
- 744 (h) Distinctive Call Waiting Tones
- 745 (i) Distinctive Ringing (SDP6 only)
- 746 (j) Dual Service

- 747 (k) Multiple Appearance Directory Numbers
- 748 (l) Privacy
- 749 (m) Attendant Multi-Line Hunt Group
- 750 (n) Blocking Dialed Carrier Identification Code (CIC)
- 751 (o) Bridging Service
- 752 (p) Call Forward Remote Access
- 753 (q) Call Trace
- 754 (r) Customized Intercept and Recorded Announcement
- 755 (s) Directed Call Pickup
- 756 (t) Six-Way Conference Calling

757 **C.2.2.1.1.2.3 Non-ISDN Access to Existing Key Systems Additional Features**

758 In addition to the features specified in Section C.2.2.1.1.2, the contractor shall provide  
759 the following features for non-ISDN access to existing key systems:

- 760 (a) Caller Identification (ID)
- 761 (b) Data Line Privacy
- 762 (c) Blocking Dialed Carrier Identification Code (CIC)
- 763 (d) Call Trace
- 764 (e) E911-Centralized Automatic Message Accounting (CAMA) Trunk (EIA/TIA-689)

765 **C.2.2.1.1.2.4 Non-ISDN Access to Existing PBX Systems Additional Features**

766 In addition to the features specified in Section C.2.2.1.1.2, the contractor shall provide  
767 the following features for non-ISDN access to existing PBX systems:

- 768 (a) DID. This feature shall allow incoming calls to a PBX to reach destination stations,  
769 without attendant assistance, by routing calls by truncated station digits contained in  
770 the incoming call signal.
- 771 (b) DOD. This feature shall allow PBX station users to gain access to the local Central  
772 Office without attendant assistance by dialing an access code.
- 773 (c) DID/DOD Two Way. This feature shall allow a Central Office access trunk(s) to  
774 have both DID and DOD capabilities.
- 775 (d) Tie Trunk. This feature shall allow trunk circuit between two PBXs.
- 776 (e) DID Number Block Assignment and Maintenance. Customer organizations shall be  
777 provided the capability to request assignment and maintenance of DID number blocks  
778 for a new DID-PBX installation.
- 779 (f) Caller Identification (ID)
- 780 (g) Blocking Dialed Carrier Identification Code (CIC)
- 781 (h) Call Trace
- 782 (i) E911-CAMA Trunk (EIA/TIA-689)

783 **C.2.2.1.1.2.5 ISDN Business Line Additional Features**

784 In addition to the features specified in Section C.2.2.1.1.2, the contractor shall  
785 provide the following features for ISDN business line service:

- 786 (a) Additional Directory Number, i.e., Service Profile Identifier and Directory (SPID)
- 787 (b) Authorization Codes

- 788 (c) Billing Account Code –Verified
- 789 (d) Billing Account Code – Unverified
- 790 (e) Blocking Dialed Carrier Identification Code (CIC)
- 791 (f) Bridging Service
- 792 (g) Call Forwarding
- 793 (h) Call Trace (e.g., \*57)
- 794 (i) Call Waiting
- 795 (j) Customized Intercept and Recorded Announcement)
- 796 (k) Six-way Conference Calling
- 797 (l) Speed Calling

798 **C.2.2.1.1.2.6 ISDN Off-Premises Switch-Based Voice Service Additional**  
799 **Features**

800 In addition to the features specified in Section C.2.2.1.1.2, the contractor shall  
801 provide the following features for ISDN off-premises switch-based voice service:

- 802 (a) Additional Directory Number, i.e., SPID
- 803 (b) Attendant Multi-Line Hunt Group
- 804 (c) Authorization Codes
- 805 (d) Billing Account Code –Verified
- 806 (e) Billing Account Code – Unverified
- 807 (f) Blocking Dialed Carrier Identification Code (CIC)
- 808 (g) Bridging Service
- 809 (h) Call Forward Remote Access
- 810 (i) Call Restriction
- 811 (j) Call Trace (e.g., \*57)
- 812 (k) Customized Intercept and Recorded Announcement
- 813 (l) Directed Call Pickup
- 814 (m) Distinctive Call Waiting Tones
- 815 (n) Privacy
- 816 (o) Six-way Conference Calling

817 **C.2.2.1.1.2.7 ISDN Access to Existing Key Systems Additional Features**

818 In addition to the features specified in Section C.2.2.1.1.2, the contractor shall  
819 provide the following features for ISDN Access to Existing Key Systems:

- 820 (a) Additional Directory Number, i.e., SPID
- 821 (b) Authorization Codes
- 822 (c) Blocking Dialed Carrier Identification Code (CIC)
- 823 (d) Six-way Conference Calling

824 **C.2.2.1.1.2.8 ISDN Access to Existing PBX Systems Additional Features**

825 In addition to the features specified in Section C.2.2.1.1.2, the contractor shall  
826 provide the following features for ISDN Access to Existing PBX Systems:

- 827 (a) Backup of ISDN PRI Shared D Channel Capability
- 828 (b) Blocking Dialed Carrier Identification Code (CIC)
- 829 (c) DID
- 830 (d) DID/DOD Two Way
- 831 (e) DOD
- 832 (f) DID Number Block Assignment and Maintenance
- 833 (g) Tie Trunk
- 834 (h) Six-Way Conference Calling

835 **C.2.2.1.1.3 Performance**

836 The performance parameters for LVS shall meet the following parameters:

837 (a) Transmission Performance:

- 838 (1) All analog transmission parameters shall satisfy the values and ranges set forth in
- 839 *Section 7, Transmission, BOC Notes on the LEC Networks* (Standard: ANSI
- 840 EIA/TIA-464 for PBX trunk service and Bellcore Pub SR-2275 for other
- 841 services).

842 (2) All digital transmission parameters shall satisfy the values and ranges set forth in  
843 the *High-Capacity Digital Special Access Service - Transmission Parameter*  
844 *Limits and Interface Combinations* (Standard: Bellcore Pub TR-TSY-00754 or  
845 GR-342-CORE).

846 (b) Grade of Service (GOS):

847 (1) Terminating calls: P.01 (Erlang-B)

848 (2) Originating calls: P.01 after dial tone (Erlang-B)

849 (3) Transport: P.01

850 (4) Dial tone delay: Less than 1 percent for delay greater than 3 seconds

851 (c) Availability of Service: The availability shall be at least 99.5 percent at the SDP

852 **C.2.2.1.1.4 Interfaces**

853 **C.2.2.1.1.4.1 User-to-Network Interface**

854 The interfaces for lines and trunks at the customer organization terminal shall meet the  
855 following interface standards:

856 (a) Analog Line, two-wire and four-wire, loop signaling, at 4 kHz bandwidth (300 to  
857 3300 Hz) (for Business Lines, off-premises switch-based voice service, and Key  
858 System Access configurations): Two-wire and four-wire loop access circuits  
859 (Standard: Bellcore's *BOC Notes on the LEC Networks* [SR-2275] for non-PBX  
860 services and ANSI EIA/TIA-464 for PBX trunk services)

861 (b) Digital Line (for Business Lines, off-premises switch-based voice service, and Key  
862 System Access configurations): ISDN BRI<sup>2</sup> (2B+D) [Standard: ANSI T1.607 and  
863 610]

864 (c) Analog Trunk at 4 kHz bandwidth (300 to 3300 Hz) (for PBX System Access  
865 configuration: incoming/outgoing/two-way traffic; direct inward/outward dialing):

866 (1) Two-wire and four-wire access circuit with Dial Pulse/Dual Tone Multi-  
867 frequency (DP/DTMF) pulsing (Standard: Bellcore's *BOC Notes on the LEC*  
868 *Network* [SR-2275])

869 (2) Signaling/supervision types:

870 (i) Immediate start

871 (ii) Ground start

---

<sup>2</sup> ISDN BRI shall be composed of 2 B (64 kb/s) and 1 D (16 kb/s) channels (Standard: ITU-TSS Q.931 signaling type).

- 872 (iii) Loop Start  
873 (iv) Wink start  
874 (v) Delay Dial  
875 (vi) E&M Types (Standard: Bellcore's *Notes on the LEC Network* [SR-2275])  
876 (d) Digital Trunk (for PBX System Access configuration: incoming/outgoing/two-way  
877 traffic; direct inward/outward dialing):  
878 (1) T1 (with Extended Super Frame [ESF] format) at line rate of 1.544 Megabits per  
879 second (Mb/s) and information-payload data rate of 1.536 Mb/s. (Standard:  
880 Bellcore's *BOC Notes on the LEC Networks* [SR-2275] and ANSI  
881 T1.102/107/403)  
882 (2) ISDN PRI at line rate of 1.544 Mb/s and information-payload data rate of 1.472  
883 Mb/s for (23B+D) and 1.536 Mb/s for (24B+0D)<sup>3</sup>. (Standard: ANSI T1.607 and  
884 610; National ISDN-1 [Bellcore Pub SR-NWT-1937], and National ISDN-2  
885 [Bellcore Pub SR-NWT-2120])

886 **C.2.2.1.1.4.2 IXC Interface**

887 The contractor shall provide the following interfaces, as appropriate, to connect to an  
888 IXC POP:

- 889 (a) All applicable sections, related to LEC to Interexchange Carrier/International Carrier  
890 (IC/INC) interconnections for CSS, *BOC Notes on the LEC Networks* (Standard: ANSI  
891 EIA/TIA-464 for PBX trunk service and Bellcore Pub SR-2275 for non-PBX services)  
892 (b) *Compatibility Information for Feature Group D Switched Access Service* (Bellcore  
893 Pub TR-NPL-258)  
894 (c) Exchange Access Interconnection FSD 20-241004 (Standard: Bellcore Pub GR-690-  
895 CORE)  
896 (d) *Bellcore Specification of Signaling System Number 7* (Standard: Bellcore Pub TR-  
897 NWT-246) where available at the IXC POP

---

<sup>3</sup> ISDN PRI shall be composed of 23B+D channels or 24B channels, where more than one PRI is provisioned at one SDP (Standard: ITU-TSS Q.931 signaling type).

898 **C.2.2.2 Circuit Switched Data Services (CSDS)**

899 The basic capabilities, features, performance, and interface requirements for local CSDS  
900 are specified in the following sections.

901 **C.2.2.2.1 Basic Service Capabilities**

902 CSDS shall provide a synchronous, full duplex, totally digital, SDP to SDP, or SDP to  
903 IXC POP, circuit switched data service at a data rate of Digital Signal Level 0 (DS0).

904 CSDS shall comply with ANSI X3.189, ITU-TSS E.721, and all applicable Bellcore and  
905 ANSI standards for digital transmission including ITU-TSS and EIA standards for data  
906 terminal equipment (DTE) interfaces.

907 CSDS access shall be delivered directly to customer organization's terminal equipment  
908 including but not limited to the following types: DTE (e.g., workstation, host computer, PC,  
909 Group 4 Fax, and other communicating office equipment), digital PBX, or Intelligent  
910 multiplexer. The interfaces at the SDP are defined in Section C.2.2.2.4.1.

911 CSDS shall provide network-derived clocking to the DTE or PBX/multiplexer (MUX) at  
912 the SDP. Once a call has been established, all bit sequences transmitted by the DTE shall be  
913 transported as data/bit transparent, maintaining data/bit sequence integrity.

914 CSDS shall support the following categories of information-payload bandwidth for DS0:  
915 56 kb/s and 64 kb/s data rates.

916 To the maximum extent practicable, the contractor shall support a uniform numbering  
917 plan for all MAA locations. The Government recognizes, however, that such factors as  
918 "legacy" numbers may preclude, in certain cases, a uniform numbering plan. This  
919 numbering plan shall use the NANP normally used for voice services. CSDS services shall  
920 be "on demand"; that is, a customer organization will not have to schedule a call.

921 **C.2.2.2.2 Features**

922 The contractor shall provide dial-in feature as an addition to the basic service. The  
923 contractor shall support 7-digit (preferred) or 10-digit PSTN numbers, for dial-in access over  
924 ISDN access arrangement where available commercially. Access to CSDS shall only be  
925 provided after verification of the authorization code entered by the dial-up user.

926 **C.2.2.2.3 Performance**

927 The CSDS performance parameters shall meet the following:

928 (a) Transmission Performance: All digital transmission parameters shall satisfy the  
929 values and ranges set forth in the *High-Capacity Digital Special Access Service -*  
930 *Transmission Parameter Limits and Interface Combinations* (Standard: Bellcore Pub  
931 GR-342-CORE) and ANSI T1.510.

932 (b) GOS (end-to-end): Shall be better than 1 percent (i.e., < P.01)

933 (c) Availability of Service: Shall be at least 99.5 percent at the SDP

934 **C.2.2.2.4 Interfaces**

935 The contractor shall support the required interfaces for CSDS as specified below.

936 **C.2.2.2.4.1 User-to-Network Interface**

937 The contractor shall support the following interfaces at the SDP:

938 (a) ITU-TSS V.35, at rate up to 1.544 Mb/s, RS366A (dialing) signaling type

939 (b) EIA RS-449, at rate up to 2 Mb/s, RS366A (dialing) signaling type

940 (c) EIA RS-232, at rate up to 19.2 kb/s, RS366A (dialing) signaling type

941 (d) EIA RS-530, at rate up to 2 Mb/s, RS366A (dialing) signaling type

942 (e) ISDN BRI, at rate up to 128 kb/s, ITU-TSS Q.931 signaling type. (Standard: ANSI  
943 T1.607 and 610)

944 (f) ISDN PRI at line rate of 1.544 Mb/s and information-payload data rate of 1.472 Mb/s  
945 for (23B+D), 1.536 Mb/s for (24B+0D), and ITU-TSS Q.931 signaling type.  
946 (Standard: ANSI T1.607 and 610)

947 (g) T1 (with Extended Super Frame [ESF] format) at line rate of 1.544 Mb/s and  
948 information-payload data rate of 1.536 Mb/s. (Standard: Bellcore's *BOC Notes on*  
949 *the LEC Networks* [SR-2275] and ANSI T1.102/107/403)

950 **C.2.2.2.4.2 IXC Interface**

951 The contractor shall provide the following interfaces to connect to an IXC POP:

952 (a) All applicable sections, related to LEC to IC/INC interconnections for CSS, *BOC*  
953 *Notes on the LEC Networks* (Standard: Bellcore Pub SR-2275)

954 (b) *Compatibility Information for Feature Group D Switched Access Service* (Standard:  
955 Bellcore Pub TR-NPL-258)

956 (c) Reserved.

- 957 (d) Exchange Access Interconnection FSD 20-24-1004 (Standard: Bellcore Pub GR-690-  
958 CORE
- 959 (e) *Bellcore Specification of Signaling System Number 7* (Standard: Bellcore Pub GR-  
960 317, GR-394, and TR-NWT-246) where available at the IXC POP

961 **C.2.3 Dedicated Transmission Service (DTS)**

962 The basic capabilities, features, performance, and interface requirements for local DTS  
963 are specified in the following sections.

964 **C.2.3.1 Basic Service Capabilities**

965 DTS shall provide dedicated transmission bandwidth between SDPs at customer  
966 organization's sites within the MAA area and between an SDP at a customer organization's  
967 site within the MAA area and an SDP at an IXC POP. The connection between the locations  
968 receiving this service shall be permanently established unless a service request for  
969 modification, move, or disconnect is received. This service shall be capable of supporting  
970 any application, such as voice, data, or multimedia. This service shall allow aggregation of  
971 bandwidth for transmission of voice and data traffic.

972 DTS shall comply with ITU-TSS T1.503 and all applicable Bellcore and ANSI standards,  
973 primarily ANSI T1.102/107/403 for T1.

974 DTS connections shall be delivered directly to equipment, such as analog terminal  
975 equipment (e.g., analog PBX, modem), DTE (e.g., computer, Group 4 Fax), and also to a  
976 digital PBX, multiplexer, or LAN bridge/router. Both analog and digital modes of  
977 transmission shall be supported. The interfaces to this equipment are defined in Section  
978 C.2.3.3.1.

979 For digital DTS for T1 rates and below, the network shall provide network-derived  
980 clocking to the connected DTE, digital PBX, intelligent MUX, or LAN bridge/router, if  
981 requested by the Government. The service shall provide data transport and shall be  
982 transparent to any protocol used by the DTE or bridge/router. All bit sequences transmitted  
983 by the DTE through the SDP shall be treated with data transparency.

984 The following categories of DTS shall be supported:

- 985 (a) Analog: 4 kilohertz (kHz) nominal bandwidth
- 986 (b) Subrate DS0: Information payload data rates of 4.8, 9.6, and 19.2 kb/s
- 987 (c) DS0: Information payload data rates of 56 and 64 kb/s
- 988 (d) T1: Line rate of 1.544 Mb/s, which shall be used to provide channelized or  
989 unchannelized T1 service as follows:

990 (1) Channelized T1: 24 separate DS0s, channels of 64 kb/s where each DS0 channel  
991 may be either a clear channel or may contain multiple subrate DS0 payloads

992 (2) Unchannelized T1: A single 1.536 Mb/s information payload

993 **C.2.3.2 Performance**

994 The DTS performance parameters for originating or terminating connection shall meet  
995 the following:

996 (a) Transmission Performance:

997 (1) All analog transmission parameters shall satisfy the values and ranges set forth in  
998 Sections 7.4 and 7.5, *Transmission, BOC Notes on the LEC Networks* (Bellcore  
999 Pub SR-2275).

1000 (2) All digital transmission parameters shall satisfy the standards set forth in the  
1001 *High-Capacity Digital Special Access Service - Transmission Parameter Limits*  
1002 *and Interface Combinations* (Standard: Bellcore Pub GR-342-CORE); and  
1003 additionally, ANSI T1.503/510 for T1.

1004 (b) Availability of Service: The availability of a DTS circuit shall be at least 99.5  
1005 percent.

1006 **C.2.3.3 Interfaces**

1007 **C.2.3.3.1 User-to-Network Interface**

1008 The contractor shall provide the required DTS local loop interfaces at the SDP as  
1009 specified below:

1010 (a) ITU-TSS V.35 at rate up to 1.544 Mb/s

1011 (b) EIA RS 449 at rate up to 2 Mb/s

1012 (c) EIA RS 232 at rate up to 19.2 kb/s

1013 (d) EIA RS-530 at rate up to 2 Mb/s

1014 (e) RJ-x (e.g., RJ-11/41/45), at 4 kHz (300 to 3300 Hz)

1015 (f) T1 (with ESF format) at line rate of 1.544 Mb/s and information-payload data-rate of  
1016 1.536 Mb/s. (Standard: Bellcore's *BOC Notes on the LEC Networks* [SR-2275] and  
1017 GR-342-CORE; and ANSI T1.403)

1018 **C.2.3.3.2 IXC Interface**

1019 The contractor shall provide the following interfaces, as appropriate, to connect to an  
1020 IXC POP:

1021 (a) T1 with ESF format (Standard: Bellcore's *BOC Notes on the LEC Networks* [SR-  
1022 2275] and GR-342-CORE; ANSI T1.102/107/403)

1023 **C.3 Management and Operations**

1024 This section identifies the management and operations support required by the  
1025 Government as part of the MAA contract. This support is divided into the following  
1026 categories:

- 1027 (a) Program Administration
- 1028 (b) Service Ordering
- 1029 (c) Operational Support
- 1030 (d) Billing
- 1031 (e) Trouble Handling
- 1032 (f) Customer Training

1033 **C.3.1 Program Administration**

1034 The roles and responsibilities of the Government's personnel involved in MAA program  
1035 administration are defined in Section G.1. The administrative roles and responsibilities of  
1036 the contractor personnel are also defined in Section G.1.

1037 **C.3.2 Service Ordering**

1038 Section G.2 describes the MAA service ordering requirements and requirements to  
1039 interface to the Government's ordering and billing system. The service ordering process  
1040 incorporates the following functions:

- 1041 (a) Initiate service or features
- 1042 (b) Disconnect service or features
- 1043 (c) Add, change, or move service or features
- 1044 (d) Modify an existing service order

1045 The contractor shall provide the capability for GSA to provide its customer organizations  
1046 two service ordering methods:

- 1047 (e) Ordering via GSA: Customers will submit orders to GSA. GSA will in turn submit  
1048 the orders to the contractor.
- 1049 (f) Direct Ordering: Customers place orders directly with the contractor. After contract  
1050 award, the contractor will be notified by GSA which customer organizations have  
1051 been authorized to perform direct ordering. The direct ordering capability will be  
1052 authorized by GSA when it is in the best interest of the Government.

1053

1054 **C.3.3 Operational Support**

1055 Section G.3 describes the requirements for operational support. Operational support  
1056 consists of the following functions:

- 1057 (a) Number inventory and administration
- 1058 (b) Moves, adds, and changes
- 1059 (c) Maintenance
- 1060 (d) Inventory management
- 1061 (e) Physical security and work area management
- 1062 (f) Security services
- 1063 (g) Marketing MAA services to customer organizations
- 1064 (h) Telephone Directories

1065 **C.3.4 Billing**

1066 Section G.4 details the billing procedures and requirements. The contractor shall provide  
1067 the capability for GSA to provide its customer organizations two service billing methods:

- 1068 (a) Centralized: This option allows customers who place orders via GSA to be billed by  
1069 GSA. The contractor bills GSA for the customers using centralized billing. GSA  
1070 pays the contractor, bills the individual customer organizations, and collects payment  
1071 from the customer organizations.
- 1072 (b) Direct: This option allows customers who are authorized by GSA to place orders  
1073 directly with the contractor to be billed directly from the contractor. The contractor  
1074 collects payment from the customer directly. After contract award, the contractor  
1075 will be notified by GSA which customer organizations have been authorized to be  
1076 directly billed by the contractor. The direct billing capability will be authorized by  
1077 GSA when it is in the best interest of the Government.

1078 **C.3.5 Trouble Handling**

1079 Trouble handling includes the procedures for trouble reporting, entry, tracking, analysis,  
1080 priority classifications, and escalation to ensure that problems are resolved in a timely  
1081 manner. Section G.5 describes the trouble handling requirements.

1082 **C.3.6 Customer Training**

1083 The contractor shall provide training for end-users and other designated system  
1084 administrator personnel, such as Agency Designated Representatives (ADRs) and GSA  
1085 Designated Representatives (GDRs), on all services and features provided

1086 under this contract. This training may vary, depending upon complexity of the subject  
1087 material, from hands-on classroom training to video or computer-based training to printed  
1088 materials. The contractor shall provide appropriate documentation for users to retain as a  
1089 minimum requirement of all training.

1090 The contractor shall submit a Final Training Plan to the Contracting Officer's Technical  
1091 Representative (COTR) within 30 business days after notice to proceed for each MAA  
1092 contract. The Government will approve the plan or will provide feedback to the contractor  
1093 within ten business days after the submission of the Training Plan. The contractor shall  
1094 coordinate with the GDR/ADR to schedule training sessions and to arrange for government  
1095 provided locations to conduct the training sessions.

#### 1096 **C.3.6.1 Initial End User Training**

1097 The contractor shall provide initial end user training, including appropriate training  
1098 materials and number of sessions to accommodate all users during their normal work hours  
1099 at their normal work locations. The contractor shall provide initial end user training for the  
1100 approximate number of users specified in Section J.2.2. The location of training sessions for  
1101 customer locations with less than 20 users may be negotiated with the GDR/ADR on an  
1102 individual case basis. Typical class sizes, and training methods for each service shall be  
1103 included in the training plan. Initial training shall be conducted prior to cutover or  
1104 implementation of initial services and features. The training shall include:

- 1105 (a) Correct operation of the service and features
- 1106 (b) How to obtain assistance when difficulties are encountered using services and  
1107 features
- 1108 (c) How to report troubles
- 1109 (d) How to obtain credit adjustments

#### 1110 **C.3.6.2 System Administrator (GDR/ADR) Training**

1111 The contractor shall provide system administrator training, including appropriate training  
1112 materials and number of sessions to accommodate all trainees during their normal work  
1113 hours. The contractor shall provide system administrator training for the approximate  
1114 number of GDRs and ADRs specified in Section J.2.2. System administrator training shall  
1115 equip trained individuals to conduct day-to-day administration and performance monitoring  
1116 activities including, but not limited to:

- 1117 (a) Place a service request to add, terminate, or change services
- 1118 (b) Obtain price quotes
- 1119 (c) Modify or cancel service orders
- 1120 (d) Obtain status reports from service order tracking system
- 1121 (e) Indicate service acceptance or rejection

- 1122 (f) Submit a notice of service order completion
- 1123 (g) Verify billing data
- 1124 (h) Initiate and track billing disputes
- 1125 (i) Obtain status of credit adjustments
- 1126 (j) Trouble reporting procedures
- 1127 (k) Access the status of trouble/complaint resolution progress
- 1128 (l) Trouble resolution escalation procedures
- 1129 (m) Fraud prevention, including customer premises safeguards
- 1130 (n) Obtain and analyze reports specified in Section G.6.1

1131 **C.3.6.3 Additional, Follow-up, and New Employee Training**

1132 The contractor shall provide new customer organizations with the same type of training  
1133 as was provided for initial training for each applicable service and feature. Follow-up  
1134 (remedial) and new employee training may be accomplished by contractor-trained  
1135 Government employee trainers or through the use of training videos or other methods as may  
1136 be included in the approved training plan.

1137 **C.4 Implementation**

1138 This section describes the Government's requirements for service implementation.

1139 **C.4.1 Implementation Strategy**

1140 The contractor shall be responsible for managing and facilitating the implementation of  
1141 services, to include cutover testing and execution planning, in order to:

- 1142 (a) Meet service delivery schedules required by the customer organizations
- 1143 (b) Assure the services, functions, and features provided at SDPs conform with  
1144 specifications and requirements defined in this contract
- 1145 (c) Maintain the continuity and quality of existing service to the customer organizations  
1146 until the implementation of service is completed successfully
- 1147 (d) Minimize disruptions
- 1148 (e) Ensure seamless operations to the customer organizations

1149 The offeror shall describe the proposed technical approach for providing Albuquerque  
1150 MAA-specific services. The offeror's proposal discussion of technology, network  
1151 architecture or routing techniques will not limit the offeror's ability to upgrade, expand, or  
1152 replace components or items at any time without a formal contract modification, provided

1153 performance parameters are met in accordance with the awarded Albuquerque MAA contract  
1154 and there is no additional cost to the Government.

1155 The offeror shall describe the proposed system architecture for the Albuquerque MAA  
1156 reflecting the engineering data provided with this solicitation:

1157 (f) The overall network architecture, including the types and capacity of the transmission  
1158 and switching media, the transmission facility(ies) configuration, the type of  
1159 equipment used in the network, and how the network will be used to fulfill  
1160 Albuquerque MAA service requirements.

1161 (g) The anticipated local loop configuration to the NID for each location defined in  
1162 Section J.2.2 (e.g., service category, User to Network Interface, trunk size) in  
1163 sufficient detail for the Government to determine that performance parameters are  
1164 satisfied.

1165 (h) The facilities that will be part of the proposed MAA network to include identification  
1166 of ownership (e.g., offeror owned, subcontractor owned).

1167 **C.4.1.1 Management Strategy**

1168 The contractor shall describe the management strategy to be used for implementing each  
1169 service category.

1170 The offeror shall illustrate its proposed approach to managing and controlling the  
1171 operations of each proposed subcontractor.

1172 The contractor shall submit a detailed, site-specific Management Plan to the COTR  
1173 within 30 business days after notice to proceed for each MAA contract. The Government  
1174 will approve the plan or will provide feedback to the contractor within ten business days  
1175 after the submission of the Management Plan.

1176 **C.4.1.2 Cutover Testing**

1177 The contractor shall conduct cutover testing for each service category during service  
1178 installation following the requirements as defined in Section E.2.1. As part of the cutover  
1179 test plan, the contractor shall describe its overall approach to testing transmission  
1180 performance for each service category during service installation and explicit service-  
1181 specific processes and procedures that will be employed for testing. Additionally, the  
1182 contractor shall describe processes and procedures for restoration of existing service in the  
1183 event that the performance of the contractor's installed service fails the cutover tests.

1184 The contractor shall procure and provide all necessary test equipment, data terminals,  
1185 load boxes, test cables, and any other hardware and software required for system testing.

1186 The contractor shall submit a detailed, service-specific Cutover Test Plan, specifically  
1187 tailored for Albuquerque, to the COTR within 30 business days after notice to proceed. The  
1188 Government will approve the plan or will provide feedback to the contractor within ten  
1189 business days after the submission of the Cutover Test Plan.

1190 **C.4.1.3 Execution Plans**

1191 For each service order of a size and complexity that requires detailed planning, the ACO  
1192 will request that the contractor prepare an Execution Plan. The Execution Plan shall describe  
1193 the activities that will be conducted in implementing service. The Execution Plan shall  
1194 document in detail the contractor's day-to-day activities at the individual customer  
1195 organization's location. The Execution Plan shall describe procedures for tracking status of  
1196 the activities and escalating issues and problems to the appropriate authority. The Execution  
1197 Plan shall include, but not be limited to, the following site specific information and activity  
1198 descriptions:

1199 (a) Network map to include each customer organization building location address and  
1200 SDPs by service type, estimated requirements of switched voice, data lines, and  
1201 dedicated facilities, identification of critical SDPs and circuits, identification of  
1202 feature class of service and network class of service for each SDP

1203 (b) Location map of each proposed voice/data switching system and other required POPs  
1204 which the contractor shall use to form the nucleus of its MAA network

1205 (c) Proposed approach and physical route to connect each building location to its core  
1206 MAA network to include identification of loops, trunks, cables, fiber, microwave or

- 1207 other transmission medium and ownership (contractor-owned or leased, Government-  
1208 owned or leased)
- 1209 (d) Site specific design plan to include:
- 1210 (1) Site preparation requirements for SDP
- 1211 (2) Interim and final configuration to include hardware (type, manufacturer, model),  
1212 software, special circuit arrangements, environmental and electrical requirements,  
1213 equipment room layouts (if applicable), MDF/riser cable diagrams (if needed),  
1214 and any unique or special design plans
- 1215 (3) Number plan with an explanation of the dialing scheme, including access codes
- 1216 (e) Interface equipment and interface arrangements for customer owned and operated  
1217 key systems and PBXs including identification and location of proprietary equipment
- 1218 (f) UNIs to be provided by SDP
- 1219 (g) Installation/service implementation schedule
- 1220 (h) Site-specific cutover test plan and schedule
- 1221 (i) Contingency activities to restore services
- 1222 (j) Proposed points of interface to FTS2001, Department of Defense Networks, and  
1223 other relevant Government or commercial networks.

1224 The contractor shall provide the Execution Plan within 30 business days after the ACO's  
1225 request for the plan, unless otherwise mutually negotiated. The ACO, upon coordination  
1226 with the COTR and customer organizations, will approve or provide feedback to the  
1227 contractor within 10 business days after the submission of the Execution Plan by the  
1228 contractor. If the Government requires longer than 10 business days to review and provide  
1229 feedback, or approve an Execution Plan, the Government will grant an automatic day-for-day  
1230 extension to the amount of time required for service availability as specified in Section  
1231 G.2.3.1.2.

#### 1232 **C.4.1.4 Albuquerque Transition Plan**

1233 The Albuquerque MAA Transition Plan shall include, but not be limited to, the following  
1234 site specific information and activity descriptions:

- 1235 (a) The proposed and/or existing overall network architecture including the types and  
1236 capacity of the transmission and switching media, the transmission facility(ies)  
1237 configuration, the type of equipment used in the network and other required POPs  
1238 which the contractor intends to use in providing the Albuquerque service  
1239 requirements (Maps, diagrams, data matrixes are acceptable formats)

- 1240 (b) Each proposed location (identified in Engineering Data file, circuits.exe) to include:  
1241 type and capacity of distribution facility proposed (e.g., copper cable, fibercable,  
1242 microwave); serving network switch/node and status of distribution facilities (e.g.,  
1243 owned versus leased, existing or proposed) (Maps, diagrams, data matrixes are  
1244 acceptable formats)
- 1245 (c) Proposed points of interface to FTS2001, Department of Defense Networks, and  
1246 other relevant Government or commercial networks
- 1247 (d) Number plan with an explanation of the dialing scheme, including access codes
- 1248 (e) Installation/service implementation schedule
- 1249 (f) Contingency activities to restore services

1250 The transition of all initial Albuquerque MAA locations shall be completed within nine  
1251 months after notice to proceed. The contractor shall provide a Final Albuquerque MAA  
1252 Transition Plan within 45 business days after notice to proceed. The Final Albuquerque  
1253 Transition Plan shall address the locations awarded to the contractor after completion of the  
1254 fair consideration process for the initial Albuquerque MAA locations. The ACO, upon  
1255 coordination with the COTR and customer organizations, will approve or provide feedback  
1256 to the contractor within 10 business days after the submission of the Final Albuquerque  
1257 MAA Transition Plan by the contractor. The Final Albuquerque MAA Transition Plan shall  
1258 contain all information required for an Execution Plan as specified in Section C.4.1.3.

#### 1259 C.4.2 Implementation Requirements

1260 For each service order, the contractor shall provide a single point of contact for  
1261 implementation of services. The point of contact shall be accessible by telephone or pager  
1262 during the time periods when service implementation activities are taking place. The  
1263 contractor shall coordinate with the COTR, customer organizations, subcontractors, and  
1264 other service providers during the service implementation. The contractor shall inform the  
1265 COTR and GDR/ADR when activities, including installation and all cutover testing, are  
1266 scheduled at a location.

1267 The contractor shall complete the implementation of each service order within the standard  
1268 service availability interval or negotiated service availability date (Section G.2.3.1.2).

1269 **C.5 National Security and Emergency Preparedness (NS/EP)**

1270 Telecommunications requirements for NS/EP are based on a set of telecommunications  
1271 policies and procedures that exist to ensure critical Government and industry needs are met  
1272 when an actual or potential emergency threatens the security or socio-economic structure of  
1273 the U.S.

1274 **C.5.1 NS/EP Capabilities for Voice and Data Services**

1275 The contractor shall support the following NS/EP capabilities to provide services for  
1276 critical users (key Government officials) during emergencies.

1277 **C.5.1.1 Priority Treatment**

1278 NS/EP origination and termination traffic shall receive priority treatment over normal  
1279 traffic through the use of:

- 1280 (a) Control mechanisms, such as trunk queuing, trunk subgrouping, or trunk reservation
- 1281 (b) Exemption from restrictive network management controls that are used to reduce  
1282 network congestion
- 1283 (c) Operator assistance to achieve preferential treatment, such as interrupting an ongoing  
1284 call

1285 **C.5.1.2 Network Facility Augmentation and Restoration**

1286 The contractor shall describe the processes, procedures, and network capabilities it will  
1287 employ to provide network facility augmentation and restoration during NS/EP events  
1288 consistent with:

- 1289 (a) National Telecommunications Management Structure (NTMS) and  
1290 Telecommunications Service Priority (TSP) System (See NCS-3-1-1 and NCS-3-1-2  
1291 manuals) or any subsequent TSP replacement system for providing TSP restoration,  
1292 TSP provisioning, and TSP level change.
- 1293 (b) Reserve emergency power per best commercial practices and use of  
1294 Telecommunications Electric Service Priority (TESP) in all transmission, switching,  
1295 signaling, and major facility nodes

1296 **C.5.1.2.1 Transmission Facilities**

1297 The contractor shall describe the processes, procedures, and network capabilities it will  
1298 employ to provide transmission augmentation and restoration during NS/EP events  
1299 consistent with:

- 1300 (a) Transmission augmentation using terrestrial, fiber optic, microwave, and  
1301 transportable capabilities
- 1302 (b) Rapid restoration of network transmission facilities by deployment of such  
1303 techniques as SONET self-healing architecture

1304 (c) Alternate local loop when specifically requested by a customer organization

1305 **C.5.1.2.2 Switching and Signaling Systems**

1306 The contractor shall follow best commercial practices to protect against the loss of services  
1307 caused by the failure, blockage, or damage of a switching or signaling node.

1308 **C.5.2 Protection of Classified and Sensitive Information**

1309 The contractor shall describe the approach it will employ to follow best commercial  
1310 practices to protect its NS/EP-related sensitive systems. These sensitive systems include:

- 1311 (a) Databases for classified information
- 1312 (b) Critical users' locations, identifications, authorization codes, and call records
- 1313 (c) Customer organization profiles
- 1314 (d) Computer systems that control or can control the network or services

1315 The contractor will be provided access to classify and sensitive materials required for  
1316 NS/EP planning, management, and operations. That information will be in various forms,  
1317 including hard copy and electronic media. The material will be identified as to its  
1318 classification and must be protected by the contractor in accordance with applicable  
1319 industrial security regulations (National Industrial Security Program Operating Manual  
1320 [NISPOM] for Safeguarding Classified Information). The level of classification will be up  
1321 to and including Top Secret, and as identified by the Government. The contractor shall  
1322 protect unclassified sensitive information with the same level of protection required of "For  
1323 Official Use Only" (FOUO) information as defined by industrial security regulations.

1324 **C.5.3 NS/EP Management**

1325 The contractor shall notify the COTR immediately when event(s) arise that may have  
1326 major consequences on its network. This notification would be similar to the "abnormal  
1327 report" currently furnished to the NCS. The COTR will set priorities; however, the contractor  
1328 shall be solely responsible for network operations.

1329 The contractor shall provide an NS/EP plan. The contractor shall provide a final NS/EP  
1330 plan to the COTR 30 business days after notice to proceed for each MAA contract. The  
1331 contractor shall update and provide this plan to the Government annually after contract award,  
1332 describing how its architecture, technical capabilities, and organizational capabilities

1333 will protect telecommunications services during emergency situations. The plan shall include  
1334 examples of how these resources will be brought to bear during an emergency.

1335 **C.6 Reporting Requirements**

1336 GSA and customer organizations require timely status information on performance,  
1337 technical, price, service ordering, billing, administrative, and contractual issues. Section G.6  
1338 defines the reporting requirements. Table F.2-1 lists data elements required for each  
1339 deliverable, including reports.

10

11 **Section D**

12 **Packaging and Marking**

13 **D.1 552.211-75 Preservation, Packaging and Packing (FEB 1996)**

14 Unless otherwise specified, all items shall be preserved, packaged, and packed in  
15 accordance with normal commercial practices, as defined in the applicable commodity  
16 specification. Packaging and packing shall comply with the requirements of the Uniform  
17 Freight Classification and the National Motor Freight Classification (issue in effect at time of  
18 shipment) and each shipping container of each item in a shipment shall be of uniform size  
19 and content, except for residual quantities. Where special or unusual packing is specified in  
20 an order, but not specifically provided for by the contract, such packing details must be the  
21 subject of an agreement independently arrived at between the ordering agency and the  
22 contractor.

23 **D.2 552.211-77 Packing List (FEB 1996)**

24 (a) A packing list or other suitable shipping document shall accompany each shipment  
25 and shall indicate:

- 26 (1) Name and address of the consignor  
27 (2) Name and complete address of the consignee  
28 (3) Government order or requisition number  
29 (4) Government bill of lading number covering the shipment (if any)  
30 (5) Description of the material shipped, including item number, quantity, number of  
31 containers, and package number (if any)

32 (b) When payment will be made by Government commercial credit card, in addition to  
33 the information in (a) above, the packing list or shipping document shall include:

- 34 (1) Cardholder name and telephone number  
35 (2) The term "Credit Card"

36 **D.3 Initial Packing, Marking, and Storage of Equipment**

37 All initial packing, marking and storage incidental to shipping of equipment to be  
38 provided under this contract shall be made at the contractor's expense. Supervision of  
39 packing, unpacking of initially acquired equipment shall be furnished by the contractor.  
40 Such packing, marking and storage costs shall not be billed to the Government.

41 **D.4 Equipment Removal**

42 All contractor-provided MAA equipment, accessories, and devices located on  
43 Government property shall be dismantled and removed from Government premises by the  
44 contractor, at the contractor's expense, within 30 calendar days after the service termination  
45 date. Equipment that is not removed within 30 calendar days shall be subject to a space  
46 privilege fee. The space privilege fee shall equal the average monthly charge based on the  
47 charges to the customer organization over the 12 previous months. Exceptions to this  
48 requirement shall be mutually agreed upon and written notice issued by the Administrative  
49 Contracting Officer (ACO). In the event that the contractor notifies the Government that it is  
50 ready to remove its equipment and entry to Government buildings or locations is denied,  
51 delayed, or rescheduled by the Government or its authorized agents, an automatic day-for-  
52 day extension will be granted to the contractor.

17 **Inspection and Acceptance**

18 **E.1 52.252-2 Clauses Incorporated by Reference (FEB 1998)**

19 This contract incorporates one or more clauses by reference, with the same force and  
20 effect as if they were given in full text. Upon request, the Contracting Officer will make  
21 their full text available.

<u>Clause No.</u>	<u>FAR Clause No.</u>	<u>Title and Date</u>
E.1.1	52.246-2	Inspection of Supplies – Fixed Price (AUG 1996)
E.1.2	52.246-4	Inspection of Services – Fixed Price (AUG 1996)
E.1.3	52.246-16	Responsibility for Supplies (APR 1984)

22 **E.2 Cutover and Acceptance Testing of Services and Systems**

23 **E.2.1 Introduction**

24 During implementation (Section C.4), the contractor shall conduct cutover testing and  
25 support acceptance testing activities for the services and systems it provides under the  
26 Metropolitan Area Acquisition (MAA) program. For the purposes of the contract, the term  
27 “cutover testing” refers to the contractor’s activities of testing services and system(s) to  
28 verify their correct operational performance prior to the transition of live traffic onto them.  
29 The term “acceptance testing” refers to the testing conducted by the Government to verify  
30 proper operation of the service(s) and system(s) being cut over. This verification testing will  
31 be conducted for 72 consecutive hours over three consecutive normal business days. The  
32 contractor shall correct any deficiencies identified during the acceptance testing period.

33 The contractor shall provide a specific Cutover Test Plan, when requested by the ACO,  
34 for service orders of a size and complexity that require detailed planning. The contractor  
35 shall provide a final report of the cutover testing results to the General Services  
36 Administration (GSA) Contracting Officer’s Technical Representative (COTR) or customer  
37 organization COTR for review and approval within five business days after the cutover  
38 testing activity has been completed. The report shall include, but not be limited to, the  
39 following information:

- 40 (a) The parameters tested and the measured results

41 (b) An analysis of whether the measured results meet the specific performance  
42 requirements in the contract

43 **E.2.1.1 Cutover Test Plan**

44 The offeror shall provide a Cutover Test Plan tailored specifically for the Albuquerque  
45 MAA. The contents of the Albuquerque Cutover Test Plan are specified in Section C.4.1.2.  
46 Following contract award, the contractor shall finalize its sample Cutover Test Plan (to be  
47 included in the qualification statement) to reflect customer organization selection of  
48 service(s). The contractor shall submit its updated Cutover Test Plan to the GSA or  
49 customer organization COTR within the time periods specified in Section F.2. If the  
50 Government requires longer than 10 business days to review and provide feedback, or  
51 approve the Cutover Test Plan, the Government will grant an automatic day-for-day  
52 extension in the amount of time required to complete the implementation as specified in  
53 Section C.4.1.2.

54 **E.2.1.2 Cutover Testing**

55 The contractor shall allow the GSA Designated Representative (GDR) or Agency  
56 Designated Representative (ADR) to observe the cutover testing to ensure that the required  
57 tests are correctly performed. The contractor shall notify the customer organization  
58 responsible for the location when the cutover testing is successfully completed.

59 The contractor shall alert the GDR or ADR of any problems, concerns, temporary  
60 measures, or follow-up work to be performed within two weeks following the start of cutover  
61 testing at the location. If problems are encountered by the contractor during cutover testing  
62 and these problems may impact the schedule or the successful completion of the cutover  
63 testing, the contractor shall cooperate with the customer organization, or other contractors  
64 involved, to the extent allowed by law, to isolate problems between the MAA and other  
65 network(s) and system(s) and connecting devices or facilities and to resolve the problems.  
66 The contractor shall report the status of the problem resolution to the COTRs, GDR, or ADR  
67 and shall describe the impact of the problems on the cutover testing activities. At the  
68 discretion of the COTRs, GDR, or ADR, the contractor on a daily or weekly basis shall  
69 provide the status.

70 **E.2.2 Acceptance Testing**

71 If the results of the cutover testing, as limited to the criteria in the approved Cutover Test  
72 Plan, are deemed acceptable by the GDR or ADR, the Government may begin acceptance  
73 testing based upon the Government's acceptance criteria. Any deficiencies identified during  
74 the 72 consecutive hour acceptance-testing period will be those associated with the  
75 performance requirements as specified in the contract. The acceptance test will verify  
76 satisfactory end-to-end performance and that all ordered features and functions operate  
77 properly. In developing the acceptance testing process and procedures, the Government will

78 take into account the vendor's cutover testing process and procedures and balance them  
79 against the performance requirements as specified in the contract. Performance shall be  
80 considered satisfactory when service(s), systems(s), and their associated features and  
81 functions perform as specified in the contract. If performance problems are encountered  
82 during testing, the contractor shall work cooperatively with the GDR or ADR, and other  
83 contractors, to the extent allowed by law, to isolate and eliminate problems between the  
84 MAA network(s), system(s), and their connecting devices or facilities.

85 If the performance of the service(s) and/or system(s) is accepted by the GDR or ADR  
86 after the acceptance testing period ends, the service will be deemed delivered.

87 If the acceptance testing results are unacceptable, as they relate to the specific  
88 performance requirements as specified in the contract, the Government will notify the  
89 contractor of the problems. The contractor shall initiate corrective action and shall return the  
90 service(s) and/or system(s) to their original network to ensure no disruption to the users. If  
91 the service(s) and/or system(s) is rejected by the Government based upon the results of the  
92 acceptance testing, the Government may extend the testing period, request a replacement of  
93 the service(s) and/or system(s) (in whole or in part), or terminate the order. Should the  
94 Government elect any of these alternatives, all expenses incurred by the Government,  
95 including recurring charges and service initiation charges (when returning services to the  
96 original network), shall be borne by the contractor.

97 In cases when the Government cannot successfully complete acceptance testing of  
98 service(s) and/or system(s) due to circumstances beyond the control of the contractor, the  
99 contractor shall notify the GDR/ADR of the details surrounding the deficiencies and the  
100 steps the contractor has taken to overcome the deficiencies. These cases shall be discussed  
101 between the GDR/ADR and the contractor. On a case-by-case basis, the ACO or designee  
102 may choose to waive the acceptance testing or extend the testing period. Waiver of the  
103 acceptance testing may be considered in those instances when the contractor has  
104 demonstrated that the problems encountered are not the fault of the contractor and the  
105 GDR/ADR has determined that the contractor has taken all reasonable actions to correct all  
106 problems. The waiver issued by the ACO or designee will specify the grounds for the  
107 waiver.

108 If the waiver is not granted, the contractor shall be obligated to continue to attempt  
109 correction of the deficiencies encountered in order to successfully accomplish the acceptance  
110 testing.

### 111 **E.2.3 Acceptance of Products/Services Criteria**

112 Acceptance criteria for deliverable products will be specified in the modification and/or a  
113 delivery order. All products or services provided under this contract shall be subject to  
114 acceptance in conformity with the standards contained in the requirements of Section C. The

115 provisions of this clause apply also to all replacement products or services, substitute  
116 products or services, and products or services added and/or modified during the contract  
117 period.

118 Acceptance shall be deemed to have occurred only after a product or service has fully  
119 met the following criteria:

120 (a) Quality. The quality of requirements will be as specified in Section C.

121 (b) Quantity. The quantity of work shall meet the minimum requirements established in  
122 Section C.

123 (c) Timeliness. The contractor shall complete work on schedule.

124 (d) Certification of Acceptability. The GSA or customer organization COTR shall  
125 review and certify to the GSA or customer organization ACO the acceptability of all  
126 products and/or services prior to processing the applicable invoices for payment.

127 (e) Acceptance. Any deliverable products under this contract will be accepted or  
128 rejected in writing by the GSA or customer organization ACO.

129 **E.3 Rights and Remedies Available to the Government for Uncorrected**  
130 **Defects and/or Failures on Contract Covered Supplies and/or Services**

131 In addition to rights and remedies contained elsewhere in the contract, the Government  
132 will have the rights and remedies described in this clause.

133 If the contractor fails or refuses to perform corrections requested by the Government  
134 within the time allowed for such corrections, the Government will have the right to secure  
135 detailed recommendations from sources other than the contractor for corrective action. The  
136 Government may have someone other than the contractor correct the supplies and/or  
137 services, and bill the contractor for all incurred costs. These costs shall include any costs  
138 incurred by the Government which are directly related to the replacement or performance.  
139 The Government will have the right to make an equitable adjustment in the contract or  
140 delivery order price.

**Section F**

**Deliveries Or Performance**

**F.1 52.252-2 Clauses Incorporated by Reference (FEB 1998)**

This contract incorporates one or more clauses by reference, with the same force and effect as if they were given in full text. Upon request, the Contracting Officer will make their full text available.

<u>Clause No.</u>	<u>FAR Clause No.</u>	<u>Title and Date</u>
F.1.1	52.242-15	Stop Work Order (AUG 1989)
F.1.2	52.242-17	Government Delay of Work (APR 1984)
F.1.3	52.247-35	F.O.B. Destination with Consignees Premises (APR 1984)

**F.2 Deliveries**

This section identifies the items that the Contractor shall deliver to the Government and/or the Government's agent(s). In this section, the items the contractor delivers are called "deliverables".

The contractor shall provide the deliverables in the media specified by the Government and/or the Government's agent(s) where the Medium of Delivery column in Table F.2-1 contains options. Contractor deliverables provided in electronic media shall be provided in Microsoft Word, Microsoft Excel, or ASCII text. The deliverables include, but are not limited to, the items listed in Table F.2-1.

If there is a discrepancy between this section and Sections C, E, G, and H, Sections C, E, G, and H shall take precedence.

**Table F.2-1 Contractor Deliverables**

RQS Section	Deliverable Required in Sections C, E, G, or H	Quantity	Medium of Delivery	Where to Deliver	Submittal Date	Data Elements
C.2.1.6	Incompatibility Report	As required	Contractor proposed electronic media approved by GSA	ACO	15 business days after service order acknowledgment	Description of incompatibility between the required services and the existing government equipment

---	-------

44 **Section G**

45 **Contract Administration Data**

46 **G.1 Contract Administration**

47 Notwithstanding the contractor's responsibility for total management during the  
48 performance of the contract, the administration of the contract will require maximum  
49 coordination between the Government and the contractor. The following sections describe  
50 the roles and responsibilities of individuals who will be the Government and contractor  
51 points of contact during performance of the contract.

52 **G.1.1 Government Points of Contact**

53 Figure G.1.1-1 shows the various levels of Government contract management personnel.  
54 The Procuring Contracting Officer (PCO) is the sole Government point of contact. During  
55 the conduct of the procurement, the PCO is the sole Government official authorized to bind  
56 the Government. After each MAA contract award, the PCO will delegate contract  
57 administration authority to the General Services Administration (GSA) Administrative  
58 Contracting Officer (ACO). The GSA ACO may also delegate certain technical,  
59 management, and operations authority to the GSA Contracting Officer's Technical  
60 Representative (COTR) and to GSA Designated Representatives (GDRs).

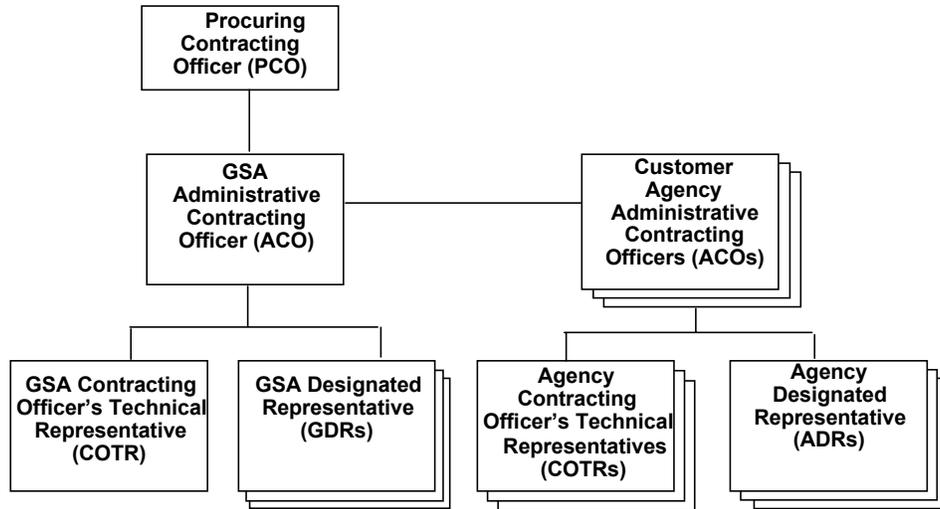

61 The GSA ACO may further delegate contract administration authority to customer  
62 organization ACOs. The customer organization ACOs may delegate certain technical,  
63 management, and operations authority to the customer organization COTR and to the  
64 Agency Designated Representatives (ADRs). The customer organization ACO, COTR, and  
65 ADRs will have authority within their respective organization only. The following sections  
66 describe the specific functions of the various Government contract management personnel.

67 **G.1.1.1 Procuring Contracting Officer**

68 The PCO will designate to the contractor, in writing and by name the GSA ACO. The  
69 GSA ACO will designate the Government personnel who will have delegated responsibility  
70 and authority under the contract. The PCO is:

71  
72  
73  
74  
75  
76

Name: George A. Davis  
Title: PCO  
Address: 7525 Colshire Drive, Mail Stop Z397, McLean, VA 22102  
Telephone No.: (703) 610-1632

77  
78

**Figure G.1.1-1. Government Contract Administration Points Of Contact**

79 **G.1.1.2 Administrative Contracting Officer**

80 ACOs are responsible for administration of the contract. The right to issue contract  
81 revisions, change the terms and conditions of the basic contract, terminate the contract,  
82 exercise option renewals, and approve subcontractors is delegated in writing to the GSA  
83 ACO.

84 The PCO may delegate the ACO authority to the GSA ACO. The GSA ACO is:

85 Name: [To be designated at or after award]  
86 Title: ACO  
87 Address:  
88 Telephone No.:

89 Communications pertaining to contract administration matters shall be addressed to the  
90 GSA ACO. The GSA ACO will be the only person authorized to make or approve any

91 changes in any of the requirements of this contract, and, notwithstanding any provisions  
92 and/or clauses contained elsewhere in the contract, said authority would remain solely in the  
93 GSA ACO. In the event the contractor should make any changes at the direction of any  
94 person other than the GSA ACO, such change shall be considered to have been made without  
95 authority, and no adjustment shall be made in the contract price to cover any increase in  
96 costs incurred as a result thereof. When necessary, the GSA ACO will:

- 97 (a) Serve as liaison between the contractor and customer organizations
- 98 (b) Assist in expediting orders
- 99 (c) Ensure compliance with contract requirements
- 100 (d) Issue final decisions and handle all disputes under the Contract Dispute Act

101 The GSA ACO will delegate ACO authority to the customer organization ACO. The  
102 customer organization ACO performs the procurement functions of negotiating and issuing  
103 service orders. Acceptance or rejection of deliverables is also delegated to the customer  
104 organization ACO under this contract. Acceptance or rejection of deliverable products may  
105 be delegated, in writing, to the COTR by the ACO.

106 **G.1.1.3 Contracting Officer's Technical Representative**

107 The GSA ACO will appoint a GSA COTR to assure orderly performance of orders. The  
108 GSA COTR is:

109 Name: [To be designated at or after award]  
110 Title: COTR  
111 Address:  
112 Telephone No.:

113 The customer organization ACO will appoint the customer organization COTR. A letter  
114 of delegation will be issued by the ACO to the COTR, with a copy supplied to the contractor,  
115 stating the COTR's responsibilities and limitations.

116 The GSA COTR or customer organization COTR is authorized to be the technical point  
117 of contact under each order; however, the contractor shall direct all inquiries of a technical or  
118 non-technical nature through the ACO.

119 The types of actions within the purview of the COTR's authority will be:

- 120 (a) Ensure that the contractor performs the technical requirements of the contract

- 121 (b) Perform or cause to be performed inspections necessary in connection with  
122 performance of the contract
- 123 (c) Monitor the contractor's performance under the contract and notify the contractor and  
124 ACO of any deficiencies observed
- 125 (d) Coordinate Government-furnished property availability
- 126 (e) Provide for site entry of contractor personnel if required

127 The GSA or customer organization COTR may provide technical direction and general  
128 guidance to the contractor.

129 As used herein, "technical direction" is direction to the contractor that fills in details,  
130 suggests possible lines of inquiry, or otherwise completes the general scope of the work.  
131 "Technical direction" must be within the terms of this contract, shall not change or modify  
132 the contract in any way, and shall not constitute changes (as described in the clause of this  
133 contract entitled "Changes - Fixed Price" (AUG 1987)), which may only be accomplished by  
134 the GSA ACO.

135 The COTR will provide no supervisory or instructional assistance to contractor  
136 personnel. The COTR's responsibility is to provide contractor access to working data and to  
137 clarify technical areas as necessary to assure useful expenditure of contractor effort. The  
138 COTR is not empowered to make any commitments or changes which affect the contract  
139 price, terms, or delivery provisions. Any such proposed changes must be brought to the  
140 immediate attention of the GSA or customer organization ACO for action. The acceptance  
141 of any change by the contractor without specific approval and written consent of the GSA  
142 ACO shall be at the contractor's risk.

143 If in the contractor's opinion, the COTR requests or indicates an expectation of effort  
144 which would justify or require an equitable adjustment to the contract, the contractor shall  
145 promptly notify the GSA or customer organization ACO in writing, pursuant to the  
146 Notification of Changes clause, FAR 52.243-7, but take no other action on that request or  
147 effort until the GSA ACO has issued a change or otherwise resolved the issue.

148 **G.1.1.4 GSA Designated Representative**

149 The GDR will be nominated by the GSA COTR and delegations will be granted by the  
150 GSA ACO. The specific authority granted to each GDR will be provided by the GSA ACO  
151 to the GDR and the contractor in writing. The types of actions within the GDR purview will  
152 be:

- 153 (a) Initiate, approve, and sign service orders

- 154 (b) Monitor service implementation
- 155 (c) Review invoices
- 156 (d) Monitor contractor performance
- 157 (e) Notify the GSA COTR of any contractor deficiencies
- 158 (f) Coordinate Government-furnished property availability
- 159 (g) Provide for site access for contractor personnel as required
- 160 (h) Serves as customer organization's point of contact for technical issues

161 **G.1.1.5 Agency Designated Representative**

162 The ADR will be nominated by the customer organization. The ADR is the designated  
163 representative of the customer organization and will perform the GDR functions for the  
164 customer organization.

165 **G.1.2 Contractor's Points of Contact**

166 The contractor shall provide an organizational structure for the management and  
167 administration of the **Albuquerque** Metropolitan Area Acquisition (MAA) program. The  
168 organization structure shall include personnel to perform the following functions:

- 169 (a) Serve as the point of contact to interface with the Government (GSA and customer  
170 organizations) on issues related to program administration
- 171 (b) Oversee the overall management and operations of services provided under the MAA  
172 contract
- 173 (c) Serve as the point of contact to interface with the Government (GSA and customer  
174 organizations) on major issues related to operational support and implementation
- 175 (d) Coordinate as necessary with the COTR, customer organizations, subcontractors, and  
176 other service providers during the implementation of services
- 177 (e) Serve as the single point of contact to interface with the COTR and meet with the  
178 Government (GSA and customer organizations) on planning and operational issues  
179 related to classified requirements and/or problems in the event of national security  
180 threats and/or disaster situations
- 181 (f) Obtain and maintain a Top Secret clearance for National Security/Emergency  
182 Preparedness (NS/EP) requirements, as necessary
- 183 **(g) Serve as the point of contact to interface with the Government (GSA and customer  
184 organizations) on issues related to trouble reporting and trouble report resolution**

185 (h) Provide copies of trouble reports when requested by the Government (GSA and  
186 customer organizations)

187 (i) Report to the COTR within four hours upon notice of an NS/EP event.

188 The contractor shall identify a Program Manager and Project Manager for the  
189 Albuquerque MAA and shall define their respective roles and responsibilities. All personnel  
190 assigned by the contractor to fulfill contract management and administrative functions shall  
191 be accessible to the Government (GSA and customer organizations) 24 hours a day, 7 days a  
192 week by telephone or pager. Lists of all points of contact for the Albuquerque MAA shall be  
193 provided including telephone and pager numbers. The contractor shall provide the GSA  
194 ACO with an updated list of all points of contact within five calendar days after changes to  
195 the list.

### 196 G.1.3 Agent for the Government

197 In order for the MAA contractor to act as the Government's liaison, it will be provided a  
198 Letter of Agency by the GSA ACO after the notice to act as the Government's liaison. The  
199 contractor shall act as the Government's liaison with telecommunications carriers and  
200 equipment suppliers for activities including, but not limited to, installation and maintenance  
201 of trunks, off-premise locations, and activities necessary for restoration of service caused by  
202 faulty circuitry and equipment.

203 Additionally, the Letter of Agency will empower the contractor to coordinate  
204 implementation activity at user locations as follows:

- 205 (a) Coordinate with providers of the current services all preparations that are necessary  
206 to accomplish the transition of existing services to the contractor's services
- 207 (b) Undertake all preparations necessary to implement new services
- 208 (c) Resolve service problems with other contractors
- 209 (d) Use specified Government schedules and Basic Ordering Agreements to order  
210 incidental services and equipment, provided a related service order has been received  
211 from an authorized ADR or GDR

### 212 G.1.4 Access to Management Data

213 To facilitate the administration of the contract, the contractor shall provide GDRs and  
214 ADRs access to the management data specified in Sections C.4 and G.2 through G.7. The  
215 GDRs shall have access to all contract information. The ADRs shall only have access to  
216 their own organizational information. Data and reports shall be provided in electronic format

217 on a media to be determined by the Government and the contractor after each MAA contract  
218 award. Data and reports shall be available on one of the following electronic media options:  
219 3.5 inch diskette, Compact Disk-Read Only Memory (CD-ROM), magnetic tape, DAT data  
220 cartridge, Internet, or Electronic Data Interchange (EDI) when technically feasible.

221 Where on-line access to management data is available to commercial customers, the  
222 contractor shall provide the Government (GDR and ADRs) similar on-line access to  
223 management data.

## 224 **G.2 Service Ordering**

225 The contractor shall provide the services and/or supplies specified on each order at the  
226 price set forth on each order. Either the GDR or the ADR will be responsible for the  
227 administration of the orders issued under this contract. Orders may be issued under this  
228 contract from date of each MAA contract award through the life of the contract. All orders  
229 issued under this contract are subject to the terms and conditions of the contract. The  
230 contract shall prevail in the event of conflict with any order. All orders issued prior to the  
231 end of contract shall be honored and performed by the contractor according to all terms and  
232 conditions of the contract, subject to the Government's right to stop orders. Copies of all  
233 service orders shall be maintained by the contractor for the length of the contract.

234 The service ordering process shall include the following activities:

- 235 (a) Service price quotes
- 236 (b) Service order processing

237 The contractor shall provide a single, toll free, point of contact for customers to obtain  
238 service price quotes, submit service orders, track service orders, and initiate service order  
239 changes.

240

241

242

243

244

245 **G.2.1 Service Price Quotes**

246 The contractor shall provide price quotes for specific services and features when  
247 requested by the GDR or ADR prior to submitting a service order request. The price quote  
248 shall identify all recurring and non-recurring charges, the service availability date, the date  
249 when the price quote will become nonbinding, and appropriate technical information that  
250 describes the service. The contractor shall work with GDRs and ADRs to plan, define, and  
251 develop service alternatives/solutions in a proposal with associated price quotes. The  
252 contractor may, in addition to responding to the approach the Government defines, submit an  
253 additional proposal if the contractor determines another approach can more economically  
254 and/or efficiently accommodate the Government's requirements.

255 The contractor's initial service price quote (proposal) shall be received by the GDR or  
256 ADR no later than five business days after the service price quote request is received by the  
257 contractor. At the request of the contractor, the GDR and ADR may agree to negotiate a  
258 later initial service price quote date. The GDR or ADR may submit requests for a service  
259 price quote using telephone, mail, electronic mail, or facsimile formats.

260 The contractor may request a pre-price quote (proposal) meeting. The request for the  
261 meeting shall be made to the GDR or ADR no later than three business days after receipt of  
262 the service price quote request. If a pre-price quote (proposal) meeting is held, the service  
263 price quote (proposal) shall be received by the GDR or ADR as negotiated in the pre-price  
264 quote (proposal) meeting.

265 All costs associated with the development, presentation, and negotiation of the  
266 contractor's service price quotes (proposal) shall be at the contractor's expense. The  
267 contractor's final proposal reflecting the results of negotiations shall be submitted at the  
268 conclusion of a negotiation meeting by pen and ink changes to the initial proposal, unless  
269 otherwise requested and authorized by the GDR or ADR, in which case submittal shall not  
270 exceed three business days.

271 **G.2.2 Fair Consideration Process**

272 The GDR or the ADR will give fair consideration to the contractors for all orders under  
273 this contract as described herein. When considering with which contractor an order will be  
274 placed, the Government will exercise business judgement consistent with the business and  
275 mission requirements of the organization placing the order(s). The fair consideration process  
276 is intended to be straightforward, simple, and reflective of the nature of the  
277 telecommunications services being procured.

278 For the purposes of conducting the fair consideration process, an “order” is the service  
279 requirement submitted by an authorized user to the GDR or ADR for procurement. The  
280 service requirements constitute the order even if the actual service order process to fill these  
281 service requirements involves submission of multiple electronic or paper service order forms  
282 within the contractor’s system.

283 The GDR or ADR will use the following procedures to give fair consideration to the  
284 contractors for any given order that requires fair consideration:

285 (a) The GDR or ADR will consult the latest available information about the contractors  
286 relevant to the service requirements. Sources of data may include, but are not limited  
287 to the following:

288 (1) Published contract prices (e.g., H.9, Electronic Access to the Contract and H.12,  
289 Tariff Filing Requirements) and any other current contractor-provided information  
290 (e.g., marketing materials, product specifications, etc.)

291 (2) Related analyses that aid the decision-making

292 (3) Information sought and received from the contractors (i.e., service price quotes,  
293 proposals, technical or price analyses, oral presentations, oral discussions, etc.)

294 (4) Other available information relevant to the decision

295 (b) The GDR or ADR will decide based on consideration of the available information. The  
296 GDR or ADR will use one of the following methods for deciding which contractor will  
297 receive a given order:

298 (1) The GDR or ADR may base their decision solely on relative contract prices without  
299 further consideration of other factors

300 (2) The GDR or ADR may base their decision on a combination of price, technical, and  
301 past performance considerations appropriate to the particular decision being  
302 considered. (For example, a decision to implement a new data network  
303 interconnecting multiple locations may weigh technical issues more highly than a  
304 decision to install a single link between two locations where technical issues may  
305 be less complex.)

306 (c) The GDR or ADR will place the order with the selected contractor

307 The Government intends to place orders for the initial transition using the process  
308 described above.

309 The Government reserves the right to modify this fair consideration process and will notify  
310 the contractors of any such modifications in advance of any orders being placed using the  
311 modified process.

312 Neither the user nor GSA is required to communicate any ordering decision to the  
313 contractor that did not receive a particular order. The Government assumes that contractor-  
314 furnished data is current. The contractor is encouraged to maintain the currency of  
315 information presented to the Government. The GDR or ADR may rely on these data when  
316 making ordering decisions.

317 The GDR or ADR may issue service orders without the fair consideration process  
318 whenever circumstances warrant the exercise of any exception set forth in 41 USC §253j. In  
319 accordance with 41USC §253j, fair consideration does not apply to orders that are under  
320 \$2,500 or to service orders above \$2,500 where the Contracting Officer determines that: (1)  
321 the need for the services ordered is of such unusual urgency that providing such opportunity  
322 to all contractors would result in unacceptable delays in fulfilling that need; (2) only one  
323 contractor is capable of providing the services required at the level of quality required  
324 because the services ordered are unique or highly-specialized; (3) the service order should  
325 be issued on a sole-source basis in the interest of economy and efficiency because it is a  
326 logical follow-on to a service order already issued on a competitive basis; or (4) it is  
327 necessary to place the order with a particular contractor to satisfy a minimum revenue  
328 guarantee.

329 Examples of exceptions include, but are not limited to, those described in the following  
330 table. These examples are provided only for illustration purposes.

331

**Table G.2-1. Examples of Fair Consideration Exceptions**

Exception Provided for by 41 USC §253j [abbreviated description]	Examples of Service Order Types that Qualify As Exceptions
Unusual urgency that would lead to unacceptable delays	<ul style="list-style-type: none"> <li>• Natural disaster or other emergency needs</li> <li>• Military/mobilization needs</li> <li>• Immediate short-term need arising on short notice</li> </ul>
Only one capable contractor	<ul style="list-style-type: none"> <li>• Only one contractor offers the service</li> <li>• Only one contractor offers the service to the locations where the service is needed</li> <li>• Only one contractor can demonstrate that it is capable of providing service in the manner required by the user or to the required locations</li> </ul>
Economy, efficiency and logical follow-on to an order already issued under fair consideration	<ul style="list-style-type: none"> <li>• Service orders associated with any moves, additions, changes, or similar needs</li> <li>• Incremental service orders for the same or a new service to locations where service already exists or has been ordered</li> <li>• Service orders placed to minimize inefficiencies or additional costs that would result from introducing multiple maintenance, operations, training network management, or other support systems</li> <li>• Service orders placed to maintain the engineering and operational integrity of, or to augment an established telecommunications capability within an organization</li> </ul>
Meet a minimum revenue guarantee	<ul style="list-style-type: none"> <li>• No examples provided.</li> </ul>

332

333 The Government does not intend to advise the contractors of every order to be placed or  
 334 provide the contractors a separate opportunity to compete for each order. A GSA Service  
 335 Order Ombudsman has been appointed to hear concerns from contractors. The Service Order  
 336 Ombudsman does not diminish the authority of the GSA Contracting Officer, the GDR,  
 337 ADRs, or the authorized users. The Service Order Ombudsman is responsible for reviewing  
 338 complaints from the contractors and for ensuring that the contractors are given fair  
 339 consideration in the ordering process as described above. The Service Order Ombudsman is  
 340 a senior GSA official who is independent of the GSA Contracting Officer. The Service Order  
 341 Ombudsman does not have the authority to overturn ordering decisions or to adjudicate  
 342 formal contract disputes. The GSA Service Order Ombudsman is:

343 Name: [To be designated at or after award]  
 344 Title: GSA Service Order Ombudsman  
 345 Address:  
 346 Telephone Number:

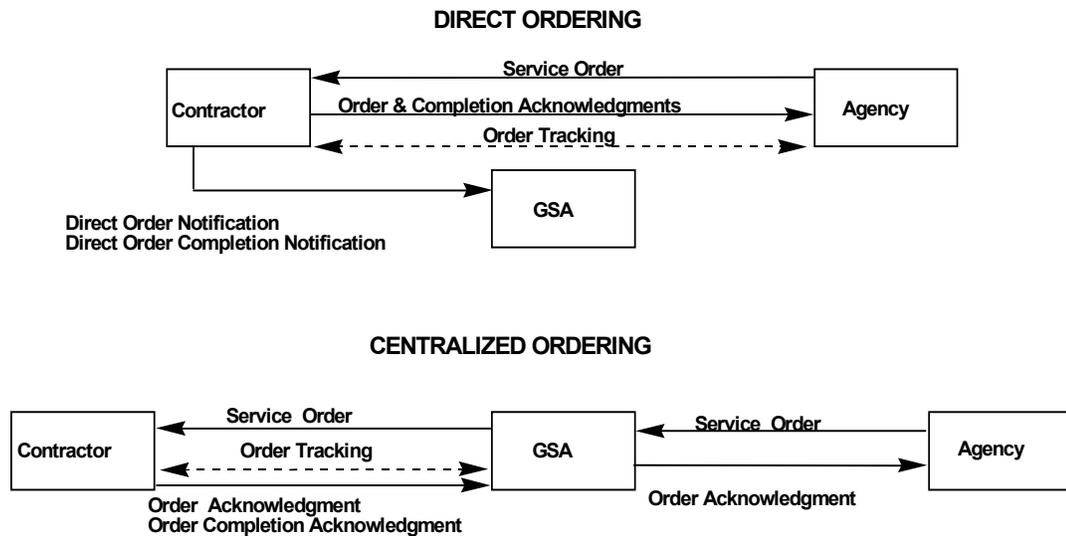

347  
348  
349  
350  
351  
352  
353  
354

357  
358  
359  
360  
361  
362

363 **G.2.3 Service Order Processing**

364 The contractor shall process, implement, and manage service orders. The Government  
365 intends to use the contractor's existing service order process as much as possible for MAA  
366 service ordering. The service order process shall accommodate the following functions:

- 367 (a) Order Initiation
- 368 (b) Order Tracking
- 369 (c) Order Completion and Acknowledgment

370 Figure G.2.3-1 illustrates the service order process and the order status information to be  
371 provided to the Government (GSA and customer organizations).

372

373

374

**Figure G.2.3-1. MAA Service Order Processes**

375 **G.2.3.1 Service Order Initiation**

376 The contractor shall accept service orders to initiate, add, change, move, or disconnect  
377 service and service features. The contractor shall accept changes to pending orders and  
378 accept order cancellations. The contractor shall be responsible for directing and  
379 accomplishing all tasks associated with processing all service orders.

380 As illustrated in Figure G.2.3-1, the contractor shall receive service orders from two  
381 sources:

382 (a) ADR (direct ordering)

383 (b) GDR, on behalf of a customer organization, (centralized ordering)

384 GSA will delegate to ADRs, the authority to place orders directly with the contractor.  
385 For customer organizations that place orders directly with the contractor, their ADR is  
386 responsible for the orders and will sign and approve each order. The ADR is responsible for  
387 inspection and acceptance or rejection of the services performed by the contractor, as ordered

388 by the ADR. After contract award, the contractor will be notified by the GSA ACO which  
389 customer organizations have been authorized to perform direct ordering.

390 For centralized ordering, GSA will act as an agent for customer organizations as  
391 authorized by a Memorandum of Understanding (MOU) executed between the customer  
392 organization and GSA (i.e., orders will be placed by customer organizations through GSA,  
393 and GSA will issue the orders to the contractor). For the orders placed through GSA, the  
394 GDR is responsible for the orders and will approve and sign each service order. The GDR is  
395 responsible for inspection and acceptance or rejection of the services performed by the  
396 contractor.

397 The contractor shall enable the GDR or ADR to submit service orders to the contractor  
398 using the following media:

- 399 (c) Telephone
- 400 (d) Facsimile
- 401 (e) Electronic mail
- 402 (f) Electronic file
- 403 (g) Mail
- 404 (h) EDI, where technically feasible

405 EDI service ordering transactions shall conform to the ANSI X12 850 transaction sets, as  
406 interpreted by the Telecommunications Industry Forum (TCIF).

407 The contractor shall provide an example and specify the format and content of the service  
408 order to be used by the Government (GSA and customer organizations) for submitting  
409 service orders. After contract award, the contractor shall provide 60 days advance notice of  
410 any changes in the service order format and content and provide any necessary retraining to  
411 GDRs and ADRs.

412 The contractor shall provide the ability for the GDR or ADR to submit bulk service  
413 requests for multiple services or features on a single service order, and batch service requests  
414 for services or features on different orders at the same time. The contractor shall be able to  
415 accept and process orders for a single service or a combination of the services. For orders  
416 that include a combination of services, the contractor shall process each individual service in  
417 the order as if it is an individual order.

418 The contractor shall be responsible for assigning an order identification number for each  
419 service order and each item of a bulk service order.

420 The contractor shall provide and implement a mechanism for providing service order  
421 acknowledgments to the ADR (direct ordering) or GDR (centralized ordering). The  
422 contractor shall provide an example and specify the format, content, delivery time frame, and  
423 media of the service order acknowledgment. However, the contractor shall provide a service  
424 order acknowledgment within five business days after receiving a service order.

425 The contractor shall provide direct order notification to the designated GSA organization  
426 of all direct orders it receives from customer organizations. The contractor shall provide an  
427 example and specify the format, content, frequency, and the electronic delivery media of the  
428 direct order notification (e.g., copy of service order, monthly summary report). The GSA  
429 organization designated to receive the direct order notifications will be determined at the  
430 time of each MAA contract award.

431 If additional information or modification from the Government is required before service  
432 order processing can be completed, the contractor shall notify the GDR or ADR within two  
433 business days after receipt of the service order and shall specify the required information and  
434 action to be provided by the Government.

#### 435 **G.2.3.1.1 Service Order Changes**

436 The Government has the right to cancel, modify, or change the due date of a service  
437 order at any time during the service order process. The service order change date shall be the  
438 date the GDR or ADR provides verbal or written notice of change orders to the contractor.  
439 The Government will provide written confirmation of verbal notices within five business  
440 days or before the scheduled service due date, whichever is earlier.

441 Service order change charges may be applied as follows:

- 442 (a) If an order is changed prior to start of installation, no charge shall apply.
- 443 (b) If the service availability date is changed after installation is initiated, a one-time  
444 service order change charge may apply.
- 445 (c) If the location is changed after installation is initiated, the contractor may charge  
446 actual direct and indirect expenses incurred at both locations. The total charge shall  
447 not exceed the Service Initiation Charge (SIC) for both locations.
- 448 (d) If an order is canceled after installation is initiated, the contractor may charge its  
449 actual direct and indirect expenses of service installation incurred up to the service  
450 order change date. The total charge shall not exceed the SIC for the order.

#### 451 **G.2.3.1.2 Service Availability Intervals**

452 Service shall be provided in the following service availability intervals:

- 453 (a) Standard Service Availability Interval
- 454 (b) Negotiated Service Availability Interval

455 The contractor shall specify a standard service availability interval for the services  
456 specified in Section C.2. The contractor shall publish, and make available to all customers, a  
457 schedule of the standard service availability intervals. The schedule of standard service  
458 availability intervals shall specify the services and quantities of service that can be provided  
459 in standard intervals. The standard intervals shall be consistent with the contractor's  
460 offerings to commercial customers. Copies (paper or electronic format) shall be provided to  
461 all GDRs and ADRs within 30 business days after notice to proceed for each MAA contract.  
462 Updates to the standard service availability intervals shall be provided to all GDRs and  
463 ADRs prior to the effective date of the updates.

464 The contractor may negotiate a service availability date with the GDR or ADR under the  
465 following conditions:

- 466 (c) There is no standard service availability interval for the service.
- 467 (d) The GDR or ADR requests a service date before or beyond the applicable standard  
468 service availability interval.
- 469 (e) The contractor identifies equipment compatibility problems (Section C.2.1.6).
- 470 (f) The contractor identifies on-premise wiring deficiencies (Section C.2.1.12).
- 471 (g) The service order requires an Execution Plan due to the complexity and scope of the  
472 service order (e.g., number of locations, geographic coverage, technology) (Section  
473 C.4.1.3).

474 The contractor shall allow for expedited service implementation. Service orders  
475 requesting expedited service implementation shall take priority for completion over routine  
476 service orders submitted previously by the requesting customer organization only, and shall  
477 not be placed ahead of the orders of any other customer organization (unless otherwise  
478 directed by the GSA ACO or COTR). When a customer requires expedited service  
479 implementation, an order expedite charge will be allowed.

#### 480 **G.2.3.1.3 Service Termination Date**

481 Service termination shall be effective on the service termination date requested by the  
482 GDR or ADR. Notice should be given to the contractor at least ten days prior to the  
483 requested service termination date. No payment will be made by the Government for  
484 services after the service termination date.

485 **G.2.3.2 Service Order Tracking**

486 The contractor shall provide and implement the means for the COTR, GDR, or ADR to  
487 verify the status of service orders from service order initiation to order completion. The  
488 contractor's existing service order tracking procedures shall be used to the extent possible.

489 **G.2.3.3 Service Order Completion and Acknowledgment**

490 The contractor shall complete cutover tests specified in Sections C.4.1.2 and E before  
491 delivering the service to the customer. The contractor shall be responsible for coordinating  
492 with any other contractors who may be involved in the service activation to ensure that  
493 everything is ready for activation. The contractor shall verify that the service is activated  
494 and operational before delivering it to the customer organization. The contractor shall  
495 perform necessary adjustments or corrections to any service deficiencies, at no cost to the  
496 Government, during service activation.

497 The contractor shall implement and activate the service within the standard service  
498 availability date or the negotiated service availability date, as appropriate.

499 When a service order is completed, the contractor shall provide an order completion  
500 acknowledgment to the ADR (direct ordering) or GDR (centralized ordering). The order  
501 completion acknowledgment shall include sufficient information to identify the effective  
502 service date, SDP identifiers, associated telephone numbers, and customer organization. The  
503 contractor shall provide an example and specify the format, content, delivery date, and the  
504 electronic delivery media of the service order completion acknowledgment.

505 The contractor shall provide direct order completion notification to the designated GSA  
506 organization, to be determined at the time of each MAA contract award, of all completed  
507 direct service orders. The contractor shall provide an example and specify the format,  
508 content, frequency, and electronic delivery media of the direct order completion notification  
509 (e.g., copy of service order acknowledgment, summary report). However, at a minimum, the  
510 direct order completion notification shall be provided to the designated GSA organization on  
511 a weekly basis.

512 **G.3 Operational Support**

513 The following activities are considered as part of operational support:

- 514 (a) Number inventory and administration  
515 (b) Moves, adds, and changes  
516 (c) Maintenance

- 517 (d) Inventory management
- 518 (e) Physical security and work area management
- 519 (f) Security services
- 520 (g) Marketing MAA services to customer organizations
- 521 (h) Telephone Directories

### 522 **G.3.1 Number Inventory and Administration**

523 The contractor shall maintain an inventory of the NPANXXs and telephone numbers  
524 assigned through this contract. The contractor shall provide status information on the MAA  
525 numbers, including those assigned, deleted, modified on a semi-annual basis. The contractor  
526 shall ensure that the numbers are available for use when requested. The contractor shall  
527 provide number portability.

### 528 **G.3.2 Moves/Adds/Changes**

529 The contractor shall provide the GDR and ADR the capability to request moves, adds,  
530 and changes of lines, services, and features through its service ordering process (Section  
531 G.2).

532 At Government request and when available, the contractor shall provide the means  
533 necessary to allow customer organizations the ability to make internal software  
534 reconfigurations and software changes. All changes shall be processed within 5 minutes on  
535 average.

### 536 **G.3.3 Maintenance**

537 The contractor shall provide preventive (scheduled) maintenance that conforms to the  
538 maintenance practices for each service that are based on the contractor's commercial  
539 practices. Preventive maintenance shall not interfere with, disrupt, or degrade services  
540 provided to the customer organization during normal Government business hours.

### 541 **G.3.4 Inventory Management**

542 The contractor shall provide an inventory management system to keep track, on a  
543 location and customer organization-basis, of the inventory of the lines, equipment, services,  
544 and features of the services provided under this contract. The contractor shall provide  
545 inventory status information to the GDRs and ADRs on semi-annual basis.

546 **G.3.5 Physical Security and Work Area Management**

547 The contractor shall follow security procedures established by the Government in  
548 conjunction with building management to prevent unauthorized access to the building  
549 telecommunications facilities (e.g., telephone closet). These security measures shall include,  
550 but are not limited to, procedures for signing in and out, escort procedures, and inspection  
551 routines. When multiple contractors share the telecommunications facility, the contractor  
552 shall work with the Government in coordination with other contractors and the building  
553 management to agree on procedures that ensure the security of the facility, while allowing  
554 access to the facility by multiple parties.

555 The contractor shall make its best effort to maintain equipment rooms, wire closets, and  
556 all other work areas at Government locations in a clean, orderly, and neat state. The  
557 contractor's responsibility shall be limited to cleaning up disorder and trash created by its  
558 personnel only. The contractor shall provide all labor, tools, parts, and software, and any  
559 additional test equipment required to maintain continuity of service to the Government.

560 For wiring/telephone closets, the contractor shall clearly label the wires and circuits used  
561 to provide MAA services to permit the Government to identify and trace the physical  
562 installation of a particular line or group of lines. The contractor shall ensure that these labels  
563 are readable and up-to-date at all times.

564 **G.3.6 Security Services**

565 Telecommunications services under this contract will carry nonsensitive programmatic  
566 and administrative traffic, Sensitive But Unclassified (SBU) traffic, and higher levels of  
567 sensitive and/or classified traffic that has been encrypted by users. Therefore, security  
568 services are required. The services provided by the contractor shall be compatible with  
569 existing security devices and systems used by the Government. Security services shall  
570 protect all facilities and services, portions of the contractor's network used to provide MAA  
571 services, information, and information processing resources provided under this contract  
572 against threats, attacks, or failures of systems.

573 The contractor shall include a security plan that outlines the risk avoidance methodology  
574 and management that are to be implemented after each MAA contract award. The security  
575 plan and risk analysis shall address all aspects of security, including but not necessarily  
576 limited to those described in Sections C.5.3 and G.3.5. The security plan shall identify all  
577 risks, including identification of critical risks. The risk analysis shall include identification  
578 of measures to mitigate risks. These risk analysis results must be approved by the

579 Government prior to acceptance of support systems or any service. The contractor shall  
580 ensure that the security plan and related risk analyses are compliant with requirements  
581 outlined in this section, Section C.5.3, and any additional requirements of the Office of  
582 Management and Budget (OMB) Circular A130.

### 583 **G.3.7 Marketing MAA Services to Customer Organizations**

584 The contractor shall market and promote the services, system features, and capabilities  
585 provided through this contract to customer organizations as part of service provisioning. The  
586 contractor shall provide a service marketing and promotion plan for Albuquerque MAA  
587 customer organizations. As part of the plan, the contractor shall detail how it will conduct  
588 demonstrations and briefings for existing and potential customer organizations in  
589 Albuquerque that describe services and features, the frequency of such demonstrations and  
590 briefings, and how the services and features can be obtained and utilized to improve  
591 customer organizations' productivity and reduce costs.

### 592 **G.3.8 Telephone Directories**

593 The contractor shall provide updated local telephone directories (i.e., telephone books)  
594 on an annual basis incorporating all publicly listed residential and business lines for each  
595 metropolitan area. The telephone directories shall be the same as those provided to the  
596 public by the Regional Bell Operating Companies (i.e., include white, blue, green, and  
597 yellow pages). The Government blue pages shall be consistent with the new blue page  
598 format as developed by GSA's Blue Page Project (<http://www.bp.fed.gov>). The directories  
599 shall be delivered in bulk at one location at each customer site.

## 600 **G.4 Billing Procedures**

601 The contractor shall bill in arrears on a monthly basis. The contractor shall provide two  
602 methods of billing, as illustrated in Figure G.4-1:

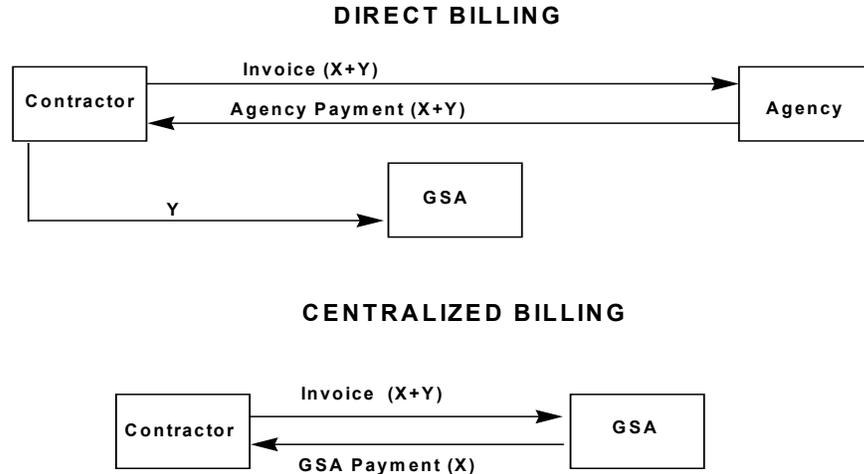

- 603 (a) Centralized Billing: The contractor shall provide a single consolidated invoice to  
604 GSA for all customer organizations using centralized ordering. GSA will validate  
605 and pay the centralized invoice (less the Contract Management Fee).
- 606 (b) Direct Billing: The contractor shall provide a single invoice to each customer  
607 organization using direct ordering. Each customer organization will validate and pay  
608 its invoice directly to the contractor.

609 For both the direct and centralized billings, the Contract Management Fee specified in  
610 Section H.26 shall be factored into the contractor's telecommunications service rates. The  
611 Contract Management Fee shall not be a separate item on the invoices. For direct billing

612 customers, the contractor shall collect the Contract Management Fee from the customer for  
613 GSA on a monthly basis. The contractor shall directly pay (not as a credit on the invoice) to  
614 GSA the amount of the Contract Management Fee on a quarterly basis (i.e., Government  
615 fiscal year quarters). The payment shall be remitted within 30 calendar days after the close  
616 of each quarter.

617       After contract award, the GSA ACO will identify to the contractor which customer  
618 organizations are authorized to use direct billing.

619

X = Contractor Charge for Telecommunications Services  
Y = MAA Contract Management Fee

620

621

Figure G.4-1. MAA Billing Processes

#### 622 G.4.1 Invoice Requirements

623 The contractor shall submit all centralized and direct billing invoices to the designated  
624 billing office(s) on the agreed date(s), to be determined by GDR/ADR and the contractor  
625 after award, of each month. The contractor shall deliver invoices and billing support data to  
626 GSA and customer organizations via paper or electronic format on a media to be determined  
627 by the Government and the contractor after a MAA contract award. Invoices shall be  
628 provided on one of the following electronic media options: magnetic tape, diskette, CD-  
629 ROM, write once read many (WORM) cartridge. Where available to commercial customers  
630 and requested by the Government, the contractor shall submit invoices in EDI format 811.

631 **G.4.1.1 Invoice Content**

632 Each invoice shall reflect all charges from the first day of the previous billing cycle  
633 through the last day of the previous billing cycle. The contractor shall charge for all services  
634 or equipment within three billing cycles after the services were rendered. All charges not  
635 submitted within three billing cycles shall be borne by the contractor.

636 The contractor shall provide an example and specify the content and format of all  
637 invoice(s) to be used for billing MAA services required under this contract.

638 Each invoice shall contain all pricing components in sufficient detail necessary to  
639 reconcile charges with completed orders or actual usage. The contractor shall ensure that all  
640 charges, credits, and debits are shown on the invoice and that no additional data are required  
641 by the Government to verify the price of a call or feature and verify the amount of discounts,  
642 credits or debits. In calculating applicable taxes, the contractor shall not impose taxes on the  
643 Contract Management Fee.

644 The contractor shall bill the entire SIC, indicating waived or discounted charges, on the  
645 invoice following acceptance by the Government for the installation of the service contained  
646 in the completed service order.

647 For other reimbursable charges such as other direct costs, invoices shall reflect the  
648 contractor's actual expenses for a specific delivery order. The Government will not pay any  
649 charges that are not agreed on between the contractor and the GDR or ADR and that are not  
650 specifically stated in the delivery order.

651 **G.4.1.2 Invoice Preparation**

652 The contractor shall prepare all invoices (for both direct and centralized billing) in  
653 accordance with the Government's Agency Billing Code, Agency Hierarchy Code, Agency  
654 Billing ID, and Service Delivery Point (SDP) identification (SDPID). These codes will  
655 permit the Government to bill each customer organization and sub-organization for MAA  
656 services actually used by that organization/sub-organization.

657 The contractor shall provide 60 calendar days notice to the ACO, GDR, and ADR, in  
658 writing, before making changes to the invoice content or format. The frequency of such  
659 changes, including changes resulting from the introduction of new services or industry  
660 standards modifications, shall not exceed once every 60 calendar days unless the change was  
661 mandated by a Federal, state, and/or local public utility regulatory authority or such other  
662 process that requires implementation in less than 60 calendar days. The contractor shall  
663 provide a detailed specification of the revised format to the ACO, GDR, and ADR in paper  
664 or

665 diskette form. Invoice changes initiated by changes in the invoice standards by an  
666 authorized regulatory body or at the direction of the contractor shall be done at no cost to the  
667 Government. The contractor shall obtain written approval from the ACO to initiate an  
668 emergency change.

669 When authorized by the Government, the contractor shall permit all customer  
670 organizations to use a Government credit card, authorized for telecommunications. The  
671 contractor shall coordinate with its bank to obtain the appropriate Standard Industrial  
672 Classification code for the services provided under the contract and establish its credit card  
673 financial procedures with its lending institution.

674 **G.4.1.3 Centralized Billing**

675 The contractor shall submit all centralized invoices to the designated billing office at the  
676 address indicated below:

677 **DESIGNATED BILLING OFFICE ADDRESS**

678 **FOR CENTRALIZED BILLING CUSTOMER ORGANIZATIONS**

679 **(Will be specified after each MAA contract award)**

680 **G.4.1.4 Direct Billing**

681 The contractor shall submit direct bills to each authorized customer organization at the  
682 customer organization address(s) indicated below:

683 **DESIGNATED BILLING OFFICE ADDRESSES**

684 **FOR DIRECT BILLING CUSTOMER ORGANIZATIONS**

685 **(Will be specified after each MAA contract award)**

686 Within 90 days notice by the GDR, the contractor shall change a customer organization  
687 from centralized to direct billing or vice versa, at no additional cost to the Government.

688 **G.4.1.5 Summary Report of Billed Charges for All Customers**

689 On a monthly basis, the contractor shall provide a Summary Report of Billed Charges for  
690 All Customers to the designated GSA organization, to be determined after award. For each  
691 customer organization, the Summary Report of Billed Charges for All Customers shall  
692 identify the billing option, all charges, and amount of MAA contract management fee  
693 charged to direct billed customers.

694 **G.4.1.6 Invoice Data Retention**

695 All original paid invoices and other related records shall be maintained by the contractor  
696 for the length of the contract plus three years after final payment is received. The contractor  
697 shall make this data available to the Government auditors upon request within ten business  
698 days notice.

699 **G.4.1.7 Trouble or Service Outage Credits**

700 The contractor shall propose, provide and implement a mechanism for uniquely  
701 identifying service outages. The contractor shall credit the affected customer organization as  
702 specified in Section H.11. Within three billing cycles after resolution of the service outage,  
703 the service outage credit shall be processed through the contractor's billing system and  
704 appear on the invoice.

705 **G.4.2 Billing Disputes**

706 The Government requires evidence that the service order has been completed and that  
707 each associated charge has been priced correctly, or it may dispute the charge. The customer  
708 organization and the contractor shall resolve their billing disputes directly, if possible. The  
709 contractor shall provide and implement a mechanism for uniquely identifying each billing  
710 dispute to permit the dispute initiator to track the status of a dispute. The contractor shall  
711 provide a toll-free, single point of contact for billing dispute inquiries.

712 The contractor shall attempt to resolve billing disputes to the satisfaction of the customer  
713 organization within 60 calendar days following official notification from either the GSA or  
714 the customer organization. The contractor shall take a proactive lead in resolving disputes  
715 promptly with the initiator of the dispute by establishing and maintaining meaningful  
716 dialogue directed toward a fair and equitable resolution. In cases where a resolution is not  
717 forthcoming, the contractor shall submit partial resolutions (less than the total amount in  
718 dispute) to the dispute's initiator for acceptance or denial. The ACO or the dispute initiator  
719 will respond within five business days with a proposed resolution. If either party wants to  
720 escalate the dispute to the ACO (GSA ACO for centralized billing, and customer  
721 organization ACO for direct billing) at any time, they may do so. Disputes that are not  
722 resolved within 60 calendar days or the approved extension time must be escalated to the  
723 ACO (GSA ACO for centralized billing, and customer organization ACO for direct billing).  
724 Any disputes escalated to the ACO will be resolved in accordance with Federal Acquisition  
725 Regulation (FAR) 52.233-1 (Alternate I) (Disputes).

726 Once a dispute is resolved, the contractor shall process and print the associated credit or  
727 debit in the next invoice or invoice supporting report, making sure that the debit or credit and  
728 the associated Billing Dispute Number is assigned to the proper level of the invoice  
729 prescribed by the Agency Billing Code, Agency Hierarchy Code, and Agency Billing ID.

### 730 **G.4.3 Right to Withhold Payment**

731 The Government reserves the right to withhold a partial or entire payment of an invoice  
732 as detailed in Section I (FAR 52.232-01, Payments).

## 733 **G.5 Trouble Handling**

734 The contractor shall provide, describe, and implement trouble handling procedures that  
735 include, but are not be limited to, the following functions:

- 736 (a) Centralized trouble reporting
- 737 (b) Determining the cause of and correcting troubles
- 738 (c) Working cooperatively with other contractors and Government designated  
739 representatives to resolve problems
- 740 (d) Maintaining audit trails of trouble resolution activities
- 741 (e) Responding to customer organization's inquiries on trouble resolution status
- 742 (f) Providing trouble escalation for normal and emergency events
- 743 (g) Monitoring trouble report management and escalation procedures
- 744 (h) Providing trouble report and performance information to customer organizations

745 In addition, the contractor shall provide the list of trouble handling points of contacts,  
746 including names and phone number for the Albuquerque MAA.

### 747 **G.5.1 Trouble Reporting**

748 The contractor shall provide a single point of contact for trouble handling. Customer  
749 organizations shall be able to submit trouble reports to the point of contact 24 hours a day, 7  
750 days a week. The contractor shall be able to receive trouble reports by toll-free telephone,  
751 electronic mail, or facsimile.

752 Audit trails of MAA trouble resolution activities shall be maintained for the duration of  
753 the contract.

### 754 **G.5.2 Escalation Procedures**

755 The contractor shall provide, describe, and implement an escalation procedure, with  
756 appropriate time intervals, for each service category provided under this contract. The

757 contractor designated point of contact name, title, telephone number, electronic mail address,  
758 and facsimile number shall be provided to the GDR and ADRs five business days after notice  
759 to proceed for each MAA contract. Changes to the point of contact information shall be  
760 provided to the GDR and ADRs when changes to the point of contact information are made.

761 The point of contact shall be responsible for coordinating trouble isolation and repair  
762 efforts within the contractor's organization, between other service providers who may be  
763 involved in resolving the problem, and the GDR or ADR. The point of contact shall be  
764 responsible for escalating all troubles not resolved in the required time frames. The point of  
765 contact shall stay actively involved with the trouble resolution process from start to  
766 completion, including the use of cooperative, end-to-end testing to be used when troubles  
767 remain unresolved or become chronic.

768 The contractor shall resolve trouble reports on a routine and emergency basis. The  
769 trouble report shall specify whether emergency or routine handling is required.

770 **G.5.2.1 Routine Restoration**

771 For routine trouble reports, the maximum allowable time to restore service shall be 24  
772 consecutive hours or the next business day unless a longer clearing time is mutually agreed  
773 upon by both the contractor and the Government.

774 **G.5.2.2 Emergency Restoration**

775 For emergency trouble reports, the maximum allowable time to restore service shall be 4  
776 consecutive hours unless a longer clearing time is mutually agreed upon by both the  
777 contractor and the Government. The contractor shall provide emergency restoration at  
778 occurrence of any of the following:

- 779 (a) Catastrophic failure of single and/or multiple switching system(s)  
780 (b) Catastrophic failure of single and/or multiple transmission facilities  
781 (c) Switching locations isolated due to equipment and/or facilities failures  
782 (d) Loss of system access to FTS2000/FTS2001  
783 (e) Loss of system access to the Local Exchange Network  
784 (f) Disruption of service to users and/or circuits designated as critical by the  
785 Government. Critical users and circuits will be identified in service orders or service  
786 order changes.  
787 (g) Any situation under which service to a system, or 20 percent of station lines at a  
788 single location is disrupted for more than four hours including disruption caused by  
789 fire, flood, explosion, civil disturbance, work stoppage (strike) or other labor  
790 disputes, and backup power failure

791 The contractor shall monitor the system(s) to identify outages requiring emergency  
792 restoration and commence appropriate remedial action prior to the actual submission of a  
793 trouble report. The contractor shall notify the GDR immediately when any emergency  
794 restoration action is implemented. The contractor shall provide status of trouble resolution  
795 to the GDR every hour afterward until the trouble is resolved, or otherwise specified by the  
796 GDR.

797 **G.5.2.3 Priority Restoration**

798 When outages occur, the contractor shall provide prioritized service restoration to station  
799 lines designated as critical by the Government. The identity and location of critical station  
800 lines shall vary over the life of the contract and will be provided to the contractor by the  
801 COTR.

802 **G.6 Reporting Requirements**

803 The contractor shall describe, or provide examples showing, the content, formats, and  
804 electronic media of all required reports. The contractor shall supply reports and service  
805 forecasts using the processes and formats supplied to other customers to the maximum extent  
806 possible.

807 The date for reports will be determined after each MAA contract award. For monthly  
808 reports, the contractor shall provide the reports consistently on the same date of each month.  
809 For quarterly reports, the contractor shall provide the reports consistently on the same date of  
810 each quarter. The reports shall contain data for each service for every location, for every  
811 MAA customer organization.

812 **G.6.1 General Reporting Requirements**

813 As part of basic service, the contractor shall provide the following monthly reports to the  
814 GDR or ADR:

- 815 (a) Service Order Status Summary (Section G.2.3.2)
- 816 (b) Service Trouble Status Summary (Section G.5)
- 817 (c) Service Outage Credit Summary (Section G.4.1.7)
- 818 (d) Summary Report of Billed Charges for All Customers (Section G.4.1.5)
- 819 (e) Monthly call detail records (CDRs) for each customer organization (centralized and  
820 direct ordering)

821 As part of basic service, the contractor shall provide the following quarterly reports to the  
822 GDR or ADR:

- 823 (f) Billing Dispute Status Summary
- 824 (g) Billing Adjustments Summary
- 825 (h) Contract Management Fee Summary

826 As part of basic service, the contractor shall provide the following semi-annual report to  
827 the GDR or ADR:

- 828 (i) Inventory report on MAA number assignments, lines, equipment, and features  
829 (Sections G.3.1 and G.3.4)

830 Upon request of the GDR and ADR, the contractor shall provide the following reports for  
831 each customer organization:

- 832 (j) Monthly Traffic Statistics by Service
- 833 (k) Monthly Service Performance Data
- 834 (l) Annual Traffic and Service Charge Forecast Report

835 The Annual Traffic and Service Charge Forecast Report shall forecast each customer  
836 organization's traffic and charges by type of service for the forecast period. When requested  
837 by the GDR, the total traffic and charges by service type shall be calculated. The report shall  
838 consist of a twelve-month forecast.

839 Prices for the Monthly Traffic Statistics by Service, Monthly Service Performance Data,  
840 Annual Traffic and Service Charge Forecast Report, and CDRs will be provided in each  
841 metropolitan area-specific price proposal.

842 The contractor shall archive reports and supporting information for the duration of the  
843 contract. The contractor shall make the archived information available to the GSA COTRs and  
844 ADRs within 10 business days after a formal, written request for information is received by the  
845 contractor. Archived information shall be provided in electronic format on a media to be  
846 determined by the Government and the contractor after each MAA contract award. The  
847 archived data shall be available in one of the following electronic media options: 3.5 inch  
848 diskette, Compact Disk-Read Only Memory (CD-ROM), DAT data cartridge, magnetic tape,  
849 or Internet.

## 850 **G.6.2 Future Reporting Requirements**

851 The contractor shall, at the request of the Government, provide special reports on a case-  
852 by-case basis. The Government may also discontinue or modify reports, to reflect evolving  
853 contract-related issues. The cost of making the changes for recurring and ad hoc reports  
854 shall be negotiated between the Government and the contractor.

51		

52 **Section H**

53 **Special Contract Requirements**

54 **H.1 Term of Contract**

55 The effective period of this contract is for a base term of four years (48 months) from  
56 date of award and at the option of the Government four successive one-year option years.

57 The Government will award fixed price, indefinite delivery, indefinite quantity  
58 contract(s) for each site-specific Metropolitan Area Acquisition (MAA) Request for  
59 Proposals (RFPs).

60 **H.2 Authorized Users**

61 (a) This contract is for the use of all Federal agencies; authorized Federal contractors;  
62 agency-sponsored universities and laboratories; and as authorized by law or  
63 regulation, state, local, and tribal Governments, and other organizations. All  
64 organizations listed in General Services Administration (GSA) Order ADM 4800.2D  
65 (as updated) are eligible.

66 (b) The Government has the right to add authorized users as defined in paragraph (a) ,  
67 above, at any time during the term of this contract up to the limits specified in  
68 Section H.3, below.

69 **H.3 Minimum Dollar Guarantee and Maximum Contract Limitation**

70 (a) The total minimum dollar guarantee for the Albuquerque MAA is \$100,000. The  
71 minimum dollar guarantee will be divided equally among Albuquerque MAA  
72 contract awardee(s).

73 (b) The maximum contract ceiling for all money paid to all contractor(s) that provide  
74 telecommunications service for the Albuquerque MAA is \$102 million.

75 The minimum dollar guarantee and maximum contract limitation shall be applied to the  
76 base term and all option years.

77 The total cost of all telecommunications services provided to Albuquerque under the  
78 MAA Program by all eligible contractors will not exceed the \$102 million maximum  
79 contract ceiling. Thus, the maximum contracting ceiling will be shared among all eligible  
80 contractors providing services in the Albuquerque MAA. The eligible contractors include  
81 the Albuquerque MAA contract awardee(s) and, after the one year forbearance period,  
82 eligible contractors from another MAA city or FTS2001. Correspondingly, the maximum  
83 contract

84 ceilings for other MAA cities and FTS2001 will be shared by eligible contractor(s) that  
85 provide telecommunications services under these programs.

86 **H.4 Disclosure of Information**

87 (a) Any GSA or Government information made available shall be used only for the  
88 purpose of carrying out the provisions of this contract and shall not be divulged or  
89 made known in any manner to any person except as may be necessary in the  
90 performance of the contract.

- 91 (b) In performance of this contract, the contractor agrees to assume responsibility for  
92 protecting the confidentiality of Government records and for ensuring that all work is  
93 performed under the supervision of the contractor or the contractor's responsible  
94 employees.
- 95 (c) Each officer or employee of the contractor to whom information may be made  
96 available or disclosed shall be notified in writing by the contractor that information  
97 disclosed to such officer or employee can be used only for a purpose and to the extent  
98 authorized herein. Use of such information for a purpose or to an extent  
99 unauthorized herein may subject the offender to criminal sanctions imposed by  
100 18 United States Code (U.S.C.) 641. The law provides, in pertinent part, that  
101 whoever knowingly converts to their use or the use of another, or without authority  
102 sells, conveys, or disposes of any record of the United States or whoever receives the  
103 same with intent to convert it to their use or gain, knowing it to have been converted,  
104 shall be guilty of a crime punishable by a fine of up to \$10,000, or imprisonment up  
105 to 10 years, or both.

106 **H.5 Internal Revenue Service: Disclosure Of Information - Safeguards**  
107 **and Sanctions**

108 The contractor agrees to comply, and to assume responsibility for its employees'  
109 compliance, with the Internal Revenue Service's statutory requirements for disclosure of  
110 information as specified by the following:

- 111 (a) All work shall be performed under the contractor's, or the contractor's responsible  
112 employees' supervision.
- 113 (b) Any Federal Tax Return or Return information (as defined in Internal Revenue Code  
114 (I.R.C.) 6103(b)(1) and (2)), made available to the contractor shall be used only for  
115 the purpose of carrying out the provisions of this contract. Information contained in  
116 such material shall be treated as confidential and shall not be divulged or made  
117 known in any manner to any person except as may be necessary in the performance  
118 of the contract. Disclosure to anyone other than an officer or employee of the  
119 contractor shall require prior written approval of the Internal Revenue Service.  
120 Requests to make such disclosures should be addressed to the GSA Administrative  
121 Contracting Officer (GSA ACO).
- 122 (c) Each officer, employee, or any other person to whom returns or return information is  
123 or may be disclosed shall be notified in writing that returns or return information  
124 disclosed to such officer or employee can be used only for a purpose and to the extent  
125 authorized herein, and that further disclosure of any such returns or return

126 information for a purpose or to an extent unauthorized herein constitutes a felony  
127 punishable upon conviction by a fine of as much as \$5,000.00 or imprisonment for as  
128 long as five years, or both, together with the costs of prosecution. Such person shall  
129 also notify each such officer or employee that any such unauthorized future  
130 disclosure of returns or return information may also result in an award of civil  
131 damages against the officer or employee in an amount not less than \$1,000.00 with  
132 respect to each instance of unauthorized disclosure. These penalties are prescribed  
133 by I.R.C. Sections 7213 and 7431 and set forth at 26 Code of Federal Regulations  
134 (CFR) 301.6103(n).

135 (d) Additionally, the contractor is required to inform its officers and employees of the  
136 penalties for improper disclosure that are imposed by the Privacy Act of 1974,  
137 5 U.S.C. 552a. Specifically, 5 U.S.C. 552a(i)(1), which is made applicable to  
138 contractors by 5 U.S.C. 552a(m)(1), provides that any officer or employee of a  
139 contractor, who by virtue of his/her employment or official position, has possession  
140 of or access to customer organization records that contain individually identifiable  
141 information, the disclosure of which is prohibited by the Privacy Act or disclosure of  
142 the specific material is so prohibited, willfully entitled to receive it, shall be guilty of  
143 a misdemeanor and fined not more than \$5,000.00.

## 144 **H.6 Continuity of Services**

145 (a) The contractor shall recognize that the services under this contract are vital to the  
146 Government and must be continued without interruption, and that upon contract  
147 expiration or at any time GSA discontinues or users relocate services, a successor,  
148 either the Government or another contractor, may continue them. The contractor  
149 agrees to phase-in coordination (coordinating the orderly transition to new contractor  
150 or Government provided services such that the level and quality of service are not  
151 degraded), and to exercise its best efforts and cooperate to effect an orderly and  
152 efficient transition to a successor.

153 (b) Upon the GSA ACO's written notice, the contractor shall:

154 (1) Furnish phase-in, phase-out services for up to 12 months after contract expiration,  
155 contract termination, contract discontinuance, or relocation of service. The price  
156 of services provided during the phase-in/phase-out period shall not exceed the  
157 prices in effect under the contract on the date of contract expiration, contract  
158 termination, contract discontinuance, or relocation of service.

159 (2) Negotiate in good faith a plan with a successor(s) and the Government for  
160 determining the nature and extent of phase-in and phase-out services required.

161 This plan shall specify interconnection and transition procedures enabling the  
162 services to be provided at the levels and quality called for by this contract.

163 (c) Upon the GSA ACO's written notice prior to contract expiration, the contractor shall  
164 continue performance under the then existing terms and conditions (including price)  
165 of the contract for a period of up to 12 months as specified by the GSA ACO.

166 (d) Should the GSA ACO, having elected paragraph (c) above, but not having elected  
167 initially to extend the contract the full 12 months, provide subsequent written notice,  
168 the contractor, as directed, shall continue to perform under the contract up to the full  
169 12-month period.

## 170 **H.7 Price Management Mechanism**

171 The contractor shall agree that during the contract life, the prices set forth herein shall  
172 not exceed the contractor's commercial price list (including applicable commercial  
173 discounts) and/or established tariff prices for similar (or identical) services and monitoring  
174 conditions. If at any time this should occur, the contractor shall immediately notify the GSA  
175 ACO and offer the lower prices for incorporation into this contract. Similar services are  
176 defined as comparable commercial technical services such as local voice dial tone (which is  
177 equivalent to the Government's Circuit Switched Service for voice) or private line (which is  
178 equivalent to the Government's dedicated transmission services). Monitoring conditions are  
179 limited to the following three: (1) contract traffic volume by service category, (2) overall  
180 contract revenue, and (3) contract length. When comparing contracts for similar services and  
181 monitoring conditions, the contracts need not include the exact composition of service  
182 category mix (i.e., a contract does not need to have all service categories specified in the  
183 Government's contract to be considered as a comparable contract). The Government  
184 reserves the right to make independent studies to determine if lower prices are being paid by  
185 other customers in the same MAA service area for similar (or identical) services and  
186 monitoring conditions covered by this contract.

187 In order to provide ongoing competitive prices to users of this contract, the contractor  
188 shall adhere to firm fixed prices for the contract period, including options, subject to the  
189 following exceptions:

190 (a) The contractor may reduce contract prices at any time.

191 (b) The implementation of the Price Management Mechanism (PMM) may reduce  
192 contract prices for each service category (e.g., Circuit Switched Service [CSS] and  
193 Dedicated Transmission Service [DTS]). The price of each service category after a  
194 PMM is conducted cannot exceed the contract price of the service category before a  
195 PMM is conducted.

196 The PMM will be exercised no more than once every six months. The first PMM will be  
197 exercised no sooner than six months after contract award. The decision on whether and  
198 when to conduct a PMM will be at the Government's discretion. In support of the PMM, the  
199 contractor shall furnish all tariffs and tariff options filed by the contractor, when requested  
200 by the Government.

201 The following paragraphs describe the process and methodology for conducting a PMM.

#### 202 **H.7.1 Price Management Mechanism Process and Methodology**

203 The Government will notify the contractor of its intent to conduct the PMM 90 calendar  
204 days prior to the expected PMM date (i.e., the date when price adjustment is to become  
205 effective). With the notice to the contractor, which signals the start of the PMM, the  
206 Government will furnish to the contractor for review a statistically significant demand traffic  
207 set based on the Government's best estimate of the existing traffic. The demand traffic set  
208 will include all services, features, and traffic volumes in such detail as necessary to  
209 determine the charges that the Government would pay when compared with other  
210 comparison sources as described below. Note: the demand traffic set may be re-created at  
211 the Government's discretion between successive applications of the PMM.

212 Seven calendar days after the contractor's receipt of the demand traffic set, the  
213 Government and the contractor will meet, acting in good faith, to mutually agree on the  
214 demand traffic set. If the parties cannot agree on the demand traffic set, the contractor shall  
215 follow the PMM dispute resolution process described in Section H.7.2. At the same meeting,  
216 the Government and the contractor will generate a set of up to six comparison sources (the  
217 sources which will be benchmarked against the demand traffic set). They will be derived  
218 from the following pool of possible comparison sources:

- 219 a) Publicly available tariffs or tariff options from any vendor of the appropriate services
- 220 b) Non-proprietary commercial and government contracts from any vendor
- 221 c) Other sources

222 The set of up to six comparison sources will be selected as follows. First, the  
223 Government and the contractor each will propose five comparison sources. (Note that if  
224 both parties name the same source when picking one or more of their five choices, the  
225 combined number of sources may turn out to be less than ten, but no less than five.) Note  
226 also that each comparison source must offer both service categories included in the MAA  
227 contract as awarded and any other service categories added via contract modifications. The  
228 contractor's proposed comparison sources shall be the contractor's best and most competitive  
229 contracts in terms of price for similar (or identical) services and monitoring conditions.  
230 Next, the contractor will select, from the set of five sources chosen by the Government, three  
231 sources for further use, while eliminating the remaining two. The contractor's unilateral right  
232 to

233 discard two of the Government's comparison sources is the contractor's sole opportunity to  
234 challenge the use or acceptability of a comparison source. At the same time, the Government  
235 will review the set of five sources chosen by the contractor, and from those five, select three  
236 for further use while eliminating two. As with the contractor, the Government's exercise of  
237 this unilateral right to discard two of the contractor's comparison sources is the Government's  
238 sole opportunity to challenge the use or acceptability of a comparison source. This process  
239 will generate a set of up to six comparison sources (less than six if there is overlap). It is this  
240 set that will be benchmarked against the demand traffic set.

241 By the 60th calendar day prior to the expected PMM date, the Government will have  
242 calculated the amount the Government would pay for each service category under each  
243 comparison source using the demand traffic set. Of the up to six comparison sources, the  
244 Government will select one source as the basis for price adjustment. The price adjustment  
245 shall be made by *service category*. The contractor's unit prices shall be lowered by a  
246 percentage sufficient to ensure that the contract prices are equal to or below the best price.  
247 The Government will forward the results of the calculations to the contractor, including the  
248 methodology for arriving at the results. If the calculation results are disputed by the  
249 contractor, the contractor shall follow the PMM dispute resolution process described in  
250 Section H.7.2.

251 The Government will meet with the contractor fifteen calendar days prior to the expected  
252 PMM date for a final review. This review process will not extend beyond one day. At this  
253 meeting, the Government and the contractor will discuss and finalize any adjustments  
254 suggested by the contractor and the Government upon reviewing the results of the  
255 calculation. All final calculations will be reviewed between the Government and the  
256 contractor. The price reduction shall be in effect within 14 calendar days after the review,  
257 which is the expected PMM date. As a result of the PMM procedure, the contractor shall  
258 reduce its prices to reflect the change(s). The contractor shall promptly file the appropriate  
259 changes to tariffs and tariff options according to the tariff filing requirements specified in  
260 Section H.12.

#### 261 **H.7.2 Price Management Mechanism Dispute Resolution Process**

262 If the Government and the contractor are unable to resolve disagreements arising during  
263 the PMM process because of: (1) the appropriateness of the demand traffic set, (2) the  
264 accuracy of the Government's calculations when applying the demand traffic set to the  
265 comparison sources, and/or (3) the way the price reduction is incorporated into the contract,  
266 then the following procedures shall be followed. First, the Government and the contractor  
267 will, acting in good faith, attempt to settle the disagreement via negotiation. The negotiation  
268 will take place immediately after the disagreement is identified. A disagreement shall be  
269 identified and a written notice will be given to the other party no later than seven calendar

270 days after the information (e.g., the demand traffic set, the Government's comparison price  
271 calculation, any final review suggested adjustments) is received by either party to review.  
272 The party that disputes the information shall forward documentation that provides detailed  
273 analysis, methodology, and data to support each point of disagreement no later than seven  
274 calendar days after the notice of the dispute is received by the other party. Negotiation will  
275 then occur for up to 14 calendar days. At the end of the negotiation period, absent  
276 settlement, the PMM will become subject to the Alternate Disputes Resolution (ADR)  
277 process described in the paragraphs below.

278 If a disagreement arising during the PMM process cannot be settled through negotiation,  
279 the Government and the contractor agree first to try in good faith to settle the matter by  
280 mediation (with a "neutral" selected from a pool of judges at the General Services Board of  
281 Contract Appeals [GSBCA]), before resorting to litigation. The mediation may include  
282 multiple sessions, and shall continue until terminated by: (1) the resolution of the matter by  
283 the Government and the contractor, (2) a written declaration of the Mediator to the effect that  
284 further efforts at mediation are no longer worthwhile, (3) a written declaration by any party  
285 to the effect that the mediation is terminated, or (4) the failure of the parties to reach  
286 settlement within fourteen (14) calendar days of the first scheduled mediation session.

287 In no event shall a single ADR or consolidation of ADRs continue beyond the expected  
288 PMM date (i.e., no later than 90 days after notice to the contractor of the initiation of the  
289 PMM). If the Government and the contractor are unable to resolve PMM disputes through  
290 the ADR process under this section, the matter shall be considered as a dispute to be resolved  
291 through the Dispute Clause (Section I, Clause I.1.47; FAR Clause 52.233.01, Disputes [DEC  
292 1998]). In the case that the dispute is unresolved as of the expected PMM date, the  
293 contractor may invoice at the unadjusted price, but the Government will withhold from  
294 payment the disputed portion of that price adjustment. The Government will calculate the  
295 potential price reduction based on the Government's demand traffic set and comparison  
296 source. The contracting officer will issue a final decision reflecting the Government's  
297 position on the changed price, and if necessary, instruct the contractor to file the changed  
298 price to tariff and tariff options.

## 299 **H.8 Price Reductions**

300 (a) The contractor may waive any non-recurring charge, including an installation or  
301 service initiation charge, at any time, to any customer.

302 (b) The contractor may reduce contract prices at any time. Price reductions other than  
303 those implemented by the Government under the PMM clause of this contract, or  
304 covered by paragraph (a) above, shall be subject to the following conditions:

- 305 (1) The contractor shall propose all price reductions to the GSA ACO and  
306 Contracting Officer's Technical Representative (COTR).
- 307 (2) The proposed price reduction shall be effective on the first day of a given  
308 invoicing period, after the effective date of the price reducing tariff(s).
- 309 (3) Price reduction proposals shall include all contract pricing tables, and the  
310 effective date(s) of the price reduction. The contractor shall provide all revised  
311 pricing tables in an electronic format (or formats) to be specified by the  
312 Government at the time of submission.

### 313 **H.9 Electronic Access to the Contract**

314 The contractor is hereby advised that a redacted version of the contract and all  
315 modifications including prices for the current contract year will be made available on an  
316 electronic bulletin board and/or the Internet.

317 The contractor shall submit both a redacted version and a non-redacted version of the  
318 contract and any modifications in two formats. The first format shall include the original  
319 contract and/or modifications separately. The second format shall include all modifications  
320 incorporated in context within the basic contract. Thus, four versions shall be submitted:

- 321 (a) Redacted version in the first format  
322 (b) Redacted version in the second format  
323 (c) Non-redacted version in the first format  
324 (d) Non-redacted version in the second format

325 The redacted version shall be prepared in accordance with Freedom of Information Act  
326 guidance and will be approved by the GSA ACO before release.

327 To facilitate this process, the contractor shall provide deliveries of both electronic and  
328 paper copies of the contract and any contract modifications within 20 Government business  
329 days after contract award or contract modification.

### 330 **H.10 Reserved**

331 .

332 **H.11 Credits and Consideration for Failure to Provide Service or Meet**  
333 **Contract Requirements**

334 **H.11.1 Performance**

335 When the contractor fails to provide service meeting the performance requirements  
336 specified in the contract, any extension of the contract, or any service order, the Government  
337 will take a credit from the succeeding monthly invoice amount of the affected customer  
338 organization according to the provisions of this clause.

339 Credits shall be applicable as set forth in Tables H.11-1 through H.11-3. Table H.11-2  
340 provides the performance references against which Table H.11-1 applies. Table H.11-3  
341 applies separately to all outages.

342 **NOTE: For this section, the Government will consider a proposed credit allowance**  
343 **plan that differs materially from the solicited plan, provided the proposed plan is at**  
344 **least as advantageous to the Government as the plan set forth below.**

345

**Table H.11-1. Credit Allowance Computation**

Type of Performance Requirement	For Each	Credit Equals
<b>Availability<sup>1</sup></b>	0.10 percent below the performance requirement	1.00% of the charge, for the affected users of the affected service, for the given month. Not to exceed 100% of the fixed monthly rate for each month.
<b>Grade of Service<sup>2</sup></b>	1.00 percentage point degradation from the performance requirement	1.00% of the network-wide revenue for the affected service, for the given invoice period. Not to exceed 100% of the fixed monthly rate for each month.
<b>Service Availability Interval</b>	Failure to meet confirmed service availability interval (standard or negotiated)	100% of the service initiation charge for the affected service when the due date of an order is not met and where responsibility for not meeting the due date is solely with the contractor.

346

347

**Table H.11-2. Performance Requirement Reference**

Service	Performance Requirement Section C References
Local Voice Service	C.2.2.1.1.3
Circuit Switched Data Service	C.2.2.2.3
Dedicated Transmission Service	C.2.3.2

<sup>1</sup> Availability shall be computed as specified in Section J.4 for each service.

<sup>2</sup> Grade of Service (GOS) shall be calculated as described in Section C.2 for each service.

348

**Table H.11-3. Credit Allowance Schedule for Outages**

Service <sup>3</sup>	Credit per Outage <sup>4</sup>
Dedicated Transmission Service	1/30 fixed monthly rate for the first 24 hours (or fraction there of) and 1/30 for each additional 24 hours. Not to exceed 100% of the fixed monthly rate for each month.
Business Line Service, Off-premises switched-based service, Key System Access Service, PBX System Access Service	1/30 fixed monthly rate for the first 24 hours (or fraction there of) and 1/30 for each additional 24 hours. Not to exceed 100% of the fixed monthly rate for each month.
Circuit Switched Data Service	1/30 fixed monthly rate for the first 24 hours (or fraction there of) and 1/30 for each additional 24 hours. Not to exceed 100% of the fixed monthly rate for each month.

349

350 **H.11.2 Additional Terms and Conditions for Failure to Provide Service or Meet**  
351 **Contract Requirements**

352 If services are delayed, the Government may terminate this contract in whole or in part,  
353 including a service order, under the Default (Fixed-Price Supplies and Services)(APR 1984),  
354 FAR 52.249-08, clause in Section I. However, the Government may elect not to terminate  
355 the contract and instead accept consideration in lieu thereof. Consideration will be  
356 negotiated on an individual case basis between the Government and the contractor.

357 **H.11.3 Retention of Government Rights**

358 Notwithstanding any provision of Section H.11 or any Government action taken under  
359 the provisions of Section H.11, the Government retains all rights and remedies available to it  
360 under any other provision of this contract under law.

---

3 Outages shall include, but are not limited to, incidents of call or connection interruption, involuntary service disconnection, unsatisfactory transmission performance, and dialing or call set-up error.

4 The period of outage ends when the service is operative, as defined by the user.

361 **H.12 Tariff Filing Requirements**

- 362 (a) The contractor shall make all tariff filings that are required by law or regulation and  
363 that are necessary for contract performance. The contractor shall provide the  
364 Government with one hard copy and two electronic copies of all such tariffs on the  
365 same day they are filed. The contractor shall certify that all terms, conditions, and  
366 prices in the tariff are as stated in the contract, and that the tariff contains nothing  
367 inconsistent with the contract. The electronic version shall be submitted on Compact  
368 Disk-Read Only Memory (CD ROM) in Word 97 and/or Excel 97 (or the most  
369 current versions) to the ACO and GDR.
- 370 (b) The contractor shall make the initial filing required to implement the contract within  
371 30 calendar days after the date of contract award. If such filing is not permitted to  
372 become effective by the State Public Service Commission or any other regulatory  
373 agency or court of competent jurisdiction within 90 calendar days after the date of  
374 contract award, or in extenuating circumstances a date approved by the ACO, the  
375 Government will have the right partially or entirely to terminate the contract without  
376 liability. This contract is a firm fixed price contract and all prices proposed by the  
377 contractor are to be effective from the date of award irrespective of State Public  
378 Service Commission approval.
- 379 (c) After contract award, except for the initial filing mentioned in paragraph (b) above,  
380 the contractor shall provide to the Government advance copies of all revisions to  
381 tariffs or new tariffs that specifically pertain to the contract or that may materially  
382 affect the Government's rights under the contract. These shall be provided to the  
383 ACO and GDR at least ten calendar days in advance of the intended filing date. The  
384 contractor shall make no revisions to its tariffs that materially and adversely affect  
385 the Government's rights under the contract (including the contract as modified),  
386 without obtaining the Government's prior written consent.
- 387 (d) If any ruling, order or determination of the State Public Service Commission or any  
388 other regulatory agency or court of competent jurisdiction shall materially and  
389 adversely affect the contractor's ability to offer services under the terms and  
390 conditions of this contract, the contractor shall immediately develop a proposal that  
391 provides comparable service to the Government at rates equal to or less than those set  
392 forth in the contract, and under terms and conditions identical to those set forth in the  
393 contract, to the extent permissible under applicable legal and regulatory requirements.  
394 Such service may be provided under other existing tariffs (if this can be done at such  
395 tariffs' then effective rates without further revision) or under newly filed tariffs. If  
396 the contractor is unwilling or unable to develop such a proposal within 10 days of any  
397 such event, the Government will have the right partially or entirely to terminate the  
398 contract without liability.

399 **H.13 New, Improved or Additional Services**

400 The incorporation of new, improved or additional services (including Emerging Services,  
401 defined in Section C.2.1.13) will be undertaken by contract actions in accordance with the  
402 terms of this contract and pursuant to FAR 52.243-01 (Alt II) Changes, Fixed Price.  
403 Decisions to add new, improved or additional services will be made in the best overall  
404 interest of the Government. After contract award, the contractor is encouraged to  
405 independently propose new, improved or additional services and the Government may solicit  
406 enhancements to the services, features, or other requirements of the contract.

407 New, improved or additional services may be solicited to reduce the Government's risk,  
408 meet or change new or changed Government needs, improve performance, or for any other  
409 purpose which presents a service advantage to the Government. Operational capability  
410 demonstrations or trials may be used in connection with such proposals. Proposed new,  
411 improved or additional services that are acceptable to the Government will be processed as  
412 modifications to the contract.

413 **H.13.1 Comparison of Publicly Available Services**

414 To measure the contractor's performance in keeping its contract services, features, and  
415 functions balanced with those available in the commercial marketplace, the Government will  
416 implement a Comparison of Publicly Available Services (CompPAS). The Government will  
417 conduct CompPAS on approximately an annual basis. CompPAS will examine differences  
418 between the services, features and functions offered by the contractor under this contract,  
419 and those available from major telecommunications contractors in the commercial  
420 marketplace. Based on the results of CompPAS, the Government may request the contractor  
421 to propose enhancements.

422 **H.13.2 Contractor Response to Request for Proposal for Enhancements**

423 The Government may issue to the contractor requests for proposals for enhancements.  
424 The contractor shall respond with a meaningful proposal to each Government request for  
425 proposals for items that are commercially available from the contractor. The Government  
426 will set out the required schedule for response in each such request. The contractor is  
427 encouraged to respond to Government requests for proposals for items that are not  
428 commercially available from the contractor, but shall not be obligated to respond.

429 The contractor's proposal in response to a Government's request for proposal for  
430 enhancements shall contain at a minimum, the following:

431 (a) A cover letter stating:

- 432 (1) The difference between the existing contract service requirement and the  
433 proposed new or enhanced service and the comparative Government advantages  
434 and disadvantages of each.
- 435 (2) An itemized account of proposed changes to sections of the contract and the  
436 proposed contract revision for each change.
- 437 (3) An estimate of the changes in contract performance and contract price.
- 438 (4) An evaluation of the effects of the proposed addition/enhancement on  
439 Government collateral prices or costs such as Government-furnished property,  
440 related items, maintenance or operation, and conversion (including Government  
441 premise equipment).
- 442 (5) A statement, including customer organization supporting rationale, of the time  
443 by which the contract must be executed to obtain the maximum benefits of the  
444 enhanced service during the remaining life of the contract.
- 445 (6) The service availability date(s).
- 446 (7) Any effect(s) on contract delivery schedules.
- 447 (b) A Price or Cost Proposal conforming to the requirements of FAR Part 15.
- 448 (c) A Technical Proposal including at least:
- 449 (1) Proposed contract change pages.
- 450 (2) An update to the Cross Reference Checklist of Requirements (see Section L)  
451 reflecting all proposed changes.
- 452 (3) Plans for any ODCs required.
- 453 (d) A Management Proposal including evidence of satisfactory product testing results  
454 and/or past performance of the proposed enhancements. The Government may, in its  
455 request, set forth-additional items that will be contained in the contractor's proposal.

456 The Government will not be liable for proposal preparation costs or any delay in acting  
457 upon any proposal submitted pursuant to any provision of this clause. The contractor shall  
458 specify a minimum proposal acceptance period of 90 calendar days.

459 Unless and until a revision is executed, the contractor remains obligated to perform  
460 according to the existing contract requirements and terms and conditions.

#### 461 **H.14 Other Government Service Contracts and Contractors**

462 Under the FTS Program, the Government has awarded several contracts which will  
463 provide various forms of technical and management services to include but are not limited to  
464 Technical and Management Support, Telecommunications Support Contract 2. When these  
465 contractors are in their official capacity as agents for the Government, the contractor shall  
466 provide them full cooperation.

#### 467 **H.15 Taxes; Prohibited Surcharges; and Contract Management Fee**

468 With respect to any “after imposed taxes” identified by the contractor in accordance with  
469 the FAR clause incorporated by I.1.37, the Government will pay all state and local taxes  
470 applicable to telecommunications services delivered under this contract, with the following  
471 exceptions:

- 472 (a) Taxes from which the Federal Government is expressly exempt under the authorizing  
473 state statute or local ordinance
- 474 (b) Any state or local tax whose legal incidence of taxation is on the Federal Government

475 As indicated in Section B.1.3, the firm fixed prices under this contract include the  
476 contractor’s recovery of current and future costs associated with any Universal Service  
477 obligations at the Federal, state or local level. Pre-Subscribed Interexchange Carrier Charges  
478 (PICC) and Universal Service Fund (USF) type charges are to be included in basic service  
479 prices. Such items will not be eligible for pass-through treatment, i.e., will not be treated as  
480 “taxes” for purposes of the FAR Clause cited by I.1.37. Since they will be included in basic  
481 service prices, the government will not pay any surcharges or separate line items for such  
482 items.

483 Special attention must be paid to the treatment of the MAA Contract Management Fee,  
484 which shall be included in the prices of MAA services, as explained in Section H.26. Under  
485 no circumstances shall the Government pay state and local taxes on amounts representing the  
486 MAA Contract Management Fee. For example, the contractor shall not include the MAA  
487 Contact Management Fee when calculating the revenues to which a state or local tax applies.

488 The exclusion of the MAA Contract Management Fee is for the purposes of tax calculations  
489 only. For all other billing purposes the MAA Contract Management Fee shall be handled in  
490 accordance with the billing process described in Section G.4.

491 The contractor shall provide to the ACO, within 60 days of award, and on a semi-annual  
492 basis thereafter, an updated itemized list of taxes that are not included in its monthly  
493 invoices, including the name of each tax, jurisdictions by name, reference to the statutory  
494 source for the tax, and applicable tax rates.

495 The contractor shall provide to the ACO copies of all statutes or ordinances changing or  
496 imposing new taxes within 30 calendar days of the contractor's identification of such statutes  
497 or ordinances.

498 **H.16 Small, Small Disadvantaged, Women-Owned Small, and HUBZone**  
499 **Small Business Concerns Subcontracting Program Support**

500 Because of the size, scope, and magnitude of this acquisition, the Government anticipates  
501 substantial subcontracting opportunities for small, small disadvantaged, women-owned  
502 small, and HUBZone small business concerns. The contractor shall provide a  
503 Subcontracting Plan that conforms to the requirements in Section J.5. The Government  
504 intends to monitor the contractor's adherence to the Subcontracting Plan and continually  
505 work to ensure the maximum practicable participation of small, small disadvantaged,  
506 women-owned small, and HUBZone small business concerns in the FTS Program. In  
507 support of this effort, the contractor shall provide to the GSA ACO, on a semi-annual basis:

- 508 (a) Provide a concise written summary of activity in the contractor's subcontracting  
509 outreach program (as described in the contractor's Subcontracting Plan).  
510 (b) Provide a list of the types of subcontracts awarded and any letters of commitment.  
511 (c) Provide an updated checklist which tracks adherence to the provisions of the  
512 Subcontracting Plan.  
513 (d) Attend periodic meetings with representatives of the Contracting Office, the Program  
514 Management Office, and the Small Business Administration to discuss the  
515 contractor's activity in the contractor's subcontracting program.

516 The contractor shall, in addition to the requirement to file a Standard Form (SF) 294 or  
517 SF 295 Subcontracting Report as required in FAR 52.219-09, provide Subcontracting Report  
518 backup data. The backup data shall consist of a spreadsheet showing, in chronological order  
519 of subcontract award, the work activities, the dollar value of each subcontract, and the name  
520 and size of the business concern to which the subcontract was awarded. The summation of  
521 information in the backup data shall correlate with the contractor's SF 294 or SF 295  
522 Subcontracting Report.

523 **H.17 Contractor Performance Information**

524 In conformance with the Government's need to record and maintain information on  
525 contractor performance during the life of this contract, the Government will periodically  
526 evaluate the manner in which the contractor performed in accordance with contract  
527 requirements and standards such as: quality of service; cost efficiencies; timeliness; business

528 relations; history of reasonable and cooperative behavior; commitment to customer  
529 satisfaction; and key personnel. Information obtained as a result of the evaluation(s) may be  
530 shared with Government agencies for their use in support of future award decisions  
531 (Reference FAR 42.15).

## 532 **H.18 News Releases**

533 News releases pertaining to this contract shall not be made without prior approval of the  
534 GSA ACO. A minimum of 36 hours notice is required for approval.

## 535 **H.19 Meetings/Conferences**

536 Technical meetings and/or post-award/pre-performance conferences and/or meetings  
537 during contract performance may be necessary to market services to customer organizations,  
538 resolve problems, or to facilitate understanding of the technical requirements of the contract.  
539 Participants at these meetings/conferences shall be members of the contractor's staff and  
540 representatives of the Government. These meetings/conferences shall be scheduled with the  
541 agreement and arrangements made between the GSA ACO or their representative and the  
542 contractor. All contractor costs associated with the attendance at these meetings shall be  
543 incidental to the contract and not be separately billed.

## 544 **H.20 Permits**

545 The contractor shall, without additional expense to the Government, be responsible for  
546 obtaining any necessary licenses and permits, and for complying with any applicable  
547 Federal, state, and municipal laws, codes, and regulations, and any applicable foreign work  
548 permits, authorizations, etc., and/or visas in connection with the performance of the contract.

## 549 **H.21 Contractor-Provided Equipment**

550 The Government reserves the right to acquire ownership of equipment located on  
551 customer premises at any time during the contract period by negotiation on a case-by-case  
552 basis. Where the Government acquires equipment, clause D.4 does not apply. The  
553 Government will negotiate with the contractors in instances where unique Government  
554 equipment is involved. In cases where standard interfaces are used, it is the contractor's  
555 responsibility to meet interface requirements.

## 556 **H.22 Fraud Prevention Management**

557 The contractor shall take a proactive approach in developing and implementing methods  
558 to prevent, detect and report fraudulent use of services. Within one hour of detection, the

559 contractor shall report to the GSA Designated Representative (GDR) or Agency Designated  
560 Representatives (ADRs) all incidents it detects of fraudulent use of services.

561 The contractor shall take all prudent measures to detect and prevent fraud abuse related  
562 to the MAA program. The contractor shall identify all fraud related system and network  
563 vulnerabilities and take corrective measures to eliminate them. A draft description of the  
564 procedures used to deter, detect, and prevent fraud shall be included in the proposal. The  
565 contractor shall maintain and update the fraud prevention procedures after contract award.

#### 566 **H.22.1 Financial Responsibility for Fraud**

567 The contractor shall assume financial responsibility for all costs resulting from fraudulent  
568 use of MAA services for cases where the contractor's fraud prevention measures fail, and  
569 where there is negligence or willful misconduct by the contractor, the contractor's  
570 subsidiaries, or the contractor's subcontractors.

#### 571 **H.22.2 Protection of Customer Systems**

572 Upon request, the contractor shall examine customer-owned Private Branch Exchanges  
573 and other customer-owned equipment used for MAA services and shall make  
574 recommendations, as appropriate, to protect against fraudulent use of MAA services. The  
575 cost of this service will be negotiated by the ACO as an ODC. Customer organizations  
576 utilizing this fraud protection service will not be liable for the fraudulent use of the MAA  
577 services.

#### 578 **H.23 Contractor Liability Limitations**

579 The contractor will not be liable for any form of consideration when the failure to  
580 provide service or meet contract requirements arises from causes beyond the control and  
581 without the fault or negligence of the contractor. Examples of such causes include:

- 582 (a) Acts of God or of the public enemy
- 583 (b) Acts of the Government in either its sovereign or contractual capacity
- 584 (c) Fires
- 585 (d) Floods
- 586 (e) Epidemics
- 587 (f) Quarantine restrictions
- 588 (g) Strike
- 589 (h) Freight embargoes

- 590 (i) Unusually severe weather  
591 (j) Denial of access by a third party

592 **H.24 National Emergency**

593 In time of a national emergency and/or war, the contractor maintenance personnel shall  
594 continue performance in accordance with the contract.

595 **H.25 Notice Regarding Option(s) (GSAM 552.217-71) (NOV 1992)**

596 The GSA has included an option to extend the term of this contract to demonstrate the  
597 value it places on quality performance. This extension provision is a mechanism for  
598 continuing a contractual relationship with a successful offeror whose performance meets or  
599 exceeds GSA's quality performance expectations as communicated to the contractor, in  
600 writing, by the GSA ACO or designated representative. When deciding whether to exercise  
601 the option, the ACO will consider the quality of the contractor's past performance under this  
602 contract in accordance with 48 CFR 517.207.

603 **H.26 MAA Contract Management Fee**

604 The contractor shall collect a Contract Management Fee on a monthly basis, throughout  
605 the life of the contract. The fee will be a percentage, to be specified at the time of contract  
606 award, of the total billed charges reported on the Monthly Summary Report of Billed  
607 Charges for All Customers. This fee collection requirement is subject to the following:

- 608 (a) Offerors **shall not** include the fee in their proposed prices. The fee shall be rolled  
609 into the price structure used to prepare MAA invoice prices by applying a suitable  
610 multiplicative factor to the contract prices. The fee shall not appear as a separate line  
611 item on invoices sent to the Government.
- 612 (b) The Government reserves the right to adjust the GSA fee percentage at any time  
613 during the life of the contract. The contractor will effect all fee adjustments only by  
614 written notice of the GSA ACO, with at least 60 calendar days advance notice given  
615 to the contractor. The contractor shall adjust the fee percentage at no additional cost  
616 to the Government.
- 617 (c) The Government may choose to receive this fee by electronic funds transfer (EFT) or  
618 by check (payable to the "General Services Administration"). To ensure that the  
619 payment is credited properly, the contractor shall identify the check as "MAA  
620 Contract Management Fee" and include the Accounting Control Transaction (ACT)  
621 number, invoice dates in month and year, total amount of billed charges on the  
622 Monthly Summary Reports of Billed Charges for All Customers, and period of the  
623 reports. Collection and supporting documentation shall be subject to audit as defined  
624 in Section I.1.11.
- 625 (d) The contractor shall forward payment to:  
626 General Services Administration  
627 Finance Division (7BC)  
628 Box 845933  
629 Dallas, Texas 75284-5933  
630 Attn: Mike Stroud  
631 Tel: (817) 978-8721
- 632 (e) If the full amount of the fee, based on the amount collected from direct billed  
633 agencies, is not paid within 30 calendar days after the end of the applicable  
634 Government fiscal year quarter, the nonpayment shall constitute a contract debt to the  
635 United States Government under the terms of Part 32.6 of the FAR. The Government  
636 may exercise all rights available to it under the Debt Collection Act of 1982,

637 including withholding or setting off payments and interest on the debt (see FAR  
638 52.232-17, Interest).

639 (f) Failure to submit Monthly Summary Reports of Billed Charges for All Customers,  
640 falsification of these monthly summary reports, and/or failure to pay the fee in a  
641 timely manner may result in termination or cancellation of this contract.

## 642 **H.27 Other Direct Costs (ODC)**

643 Other Direct Costs (ODCs) including material necessary for performance of this contract  
644 shall be specified in individual service orders and shall be reimbursed in accordance with the  
645 "Compensation" and "Payments" clauses of this contract. Maximum allowable amounts will  
646 be established for individual service orders. The cost of general purpose items required for  
647 the conduct of the contractor's normal business operations will normally not be considered an  
648 allowable ODC in the performance of this contract. ODC's are incidental service-related  
649 items provided on the Government side of the SDP. ODCs include but are not limited to  
650 telephone sets, inside wiring, automatic call distributors (ACDs), providing features that are  
651 compatible with existing PBX or key systems (e.g., call trace), and compatibility with  
652 existing legacy systems.

653 The contractor may be authorized to procure equipment ordered under this contract from  
654 Government schedules and Basic Ordering Agreements (see Section G.1.3).

## 655 **H.28 Reserved**

## 656 **H.29 Special Requirements For Work In Areas Containing Asbestos**

657 (a) This contract incorporates those requirements of the Occupational Safety and Health  
658 Administration (OSHA) asbestos regulations contained in Title 29, Part 1910 of the  
659 CFR. All installation and/or site preparation work undertaken in areas containing  
660 asbestos shall be completed in accordance with these requirements. If during the  
661 course of performance under this contract, the contractor suspects contact with  
662 hazardous or toxic materials/substances, such as asbestos, polychlorinated biphenyls  
663 (PCBs), explosives, or radioactive materials, as specified in Subpart H and Z of 29  
664 CFR 1910 and Federal Standard 313, the contractor shall immediately inform the  
665 GSA ACO of these harmful materials/substances, their exact whereabouts, and the  
666 identity of those individuals who have been exposed to these harmful  
667 materials/substances. The contractor shall not disturb suspected harmful  
668 materials/substances, but will take responsible measures to prevent exposure to  
669 individuals, pending receipt of direction from the GSA ACO. The GSA ACO will  
670 coordinate any necessary action with the COTR and the building owner.

671 (b) The contractor shall maintain full responsibility and liability for compliance with all  
672 applicable regulations pertaining to the protection of workers, visitors to the site and  
673 persons occupying affected and adjacent areas. The contractor holds the Government  
674 harmless against injury resulting from failure on the contractor's part, or on the part  
675 of the contractor's employees or subcontractors to comply with any applicable safety  
676 or health regulation.

### 677 **H.30 Warranty of Data Processing Hardware, Software, Equipment and** 678 **Systems**

679 For hardware, software, equipment and systems used to support provisioning of the  
680 services provided under this contract the offer/contractor must warrant the following: Fault-  
681 free performance, in the processing of date and date related data (including, but not limited  
682 to, calculating, comparing, and sequencing) by all hardware, software, equipment, and  
683 systems used in support of this contract, individually and in combination, for the contract  
684 period. Fault-free performance includes the manipulation of this data with dates prior to,  
685 through and beyond January 1, 2000 and shall be transparent to the user. Hardware and  
686 software products, individually and in combination, shall successfully transition into the year  
687 2000 with the correct system date, without human intervention, including leap year  
688 calculations. Hardware and software products, individually and in combination, shall also  
689 provide correct results when moving forward or backward in time across the year 2000.

### 690 **H.31 Historic Buildings**

691 The contractor shall be in compliance with 36 CFR Part 800 and all aspects of the  
692 Secretary of Interior's *Standards for the Treatment of Historic Properties* as they apply to  
693 the installation of equipment in historic buildings. For any historic buildings requiring MAA  
694 services, the contractor shall provide a plan for the proposed types of work that will occur.  
695 This plan will be reviewed by the Historical Preservation Officer, Public Buildings Service  
696 (PBS) and the State Historic Preservation Office to determine if the proposed types of work  
697 are in compliance with the Secretary of Interior's Standards. If found to be acceptable, the  
698 appropriate approval documents will be issued by the PBS authorizing the contractor to  
699 proceed with the installation. Any delay in providing Government or PBS approval or  
700 feedback will result in an automatic day-for-day extension to perform any work related to or  
701 affected by the Execution Plan.

702 Under no circumstances shall the contractor proceed with work in a historic building  
703 until the appropriate approval to proceed has been issued. This requirement applies to all  
704 buildings that are either on or eligible for listing on the National Historic Register.

705 As soon as any work is contemplated, the involved building managers should be  
706 contacted who in turn will contact and work closely with the Historical Preservation

707 Officer(s). Further contacts with the appropriate State Historical Preservation Officers, the  
708 National Advisory Council on Historical Preservation and other concerned authorities will be  
709 coordinated through the designated Historical Preservation Officers.

710 **H.31.1 Historical Preservation Officer - Public Buildings Service (PBS)**

711 Contact: Region (To be identified in service orders)

712 Name: (To be identified in service orders)

713

714 Location: (To be identified in service orders)

715

716 Telephone No: (To be identified in service orders)

717 **H.31.2 Historic Buildings Reference Documents**

718 All work performed in historical buildings shall conform to the requirements contained in  
719 the documents identified in this section.

720 (a) U.S. Department of Interior, National Park Service

721 (1) *The Secretary of the Interior's Standards for the Treatment of Historic Properties*  
722 (Revised 1983), U.S. Government Superintendent of Documents, Washington,  
723 DC 20401, Stock No. 024005010033, \$2.00 a copy, Telephone (202) 512-1800.

724 (b) U.S. Department of the Interior, National Park Service, Conference of State Historic  
725 Preservation Officers

726 (1) *Preservation Tax Incentives for Historic Buildings*, Preservation Assistance  
727 Division, National Park Service, Order by Title, No Change, Telephone (202)  
728 606-8503.

729 (c) General Services Administration (GSA)

730 (1) *Maintenance, Repair and Alterations of Historic Buildings*, August 20, 1982,  
731 ADM 1020.1, Department of Commerce National Technical Information Service,  
732 \$21.95 plus \$3.00 handling fee, Telephone 1-800-553-6847.

733 (2) *Handbook Procedure for Historic Properties*, March 2, 1981, PBS P 102.2,  
734 Available from Contracting Officer.

735 **H.32 Notice to Proceed**

736 The contractor shall not commence any work specified until the contractor receives written  
737 notification from the CO providing a notice to proceed.

738 **H.33 Order of Precedence**

739 Any inconsistency in this solicitation or contract shall be resolved by giving precedence  
740 in the following order:

- 741 (a) The RFP Schedule (excluding the specifications).
- 742 (b) The RFP Representations and other instructions.
- 743 (c) The RFP Contract Clauses.
- 744 (d) Other Documents, exhibits, and attachments of the RFP.
- 745 (e) The RFP specifications.
- 746 (f) The RQS Schedule (excluding the specifications).
- 747 (g) The RQS Representations and other instructions.
- 748 (h) The RQS Contract Clauses.
- 749 (i) Other Documents, exhibits, and attachments of the RQS.
- 750 (j) The RQS specifications.

147 **I.2 52.216-18 Ordering (OCT 1995) (VARIATION)**

- 148 (a) Any supplies and services to be furnished under this contract shall be ordered by  
149 issuance of delivery orders by the individuals or activities designated in the  
150 contract. Such orders may be issued from date of award through the life of this  
151 contract.
- 152 (b) All delivery orders are subject to the terms and conditions of this contract. In the  
153 event of conflict between a delivery order and this contract, the contract shall  
154 control.
- 155 (c) If mailed, a delivery order is considered “issued” when the Government deposits  
156 the order in the mail. Orders may be issued orally or through on-line  
157 telecommunications only if authorized in the contract.

158 **I.3 52.216-22 Indefinite Quantity (OCT 1995) (VARIATION)**

- 159 (a) This is an indefinite-quantity contract for the supplies or services specified, and  
160 effective for the period stated in the contract. The quantities of supplies and  
161 services specified in the contract are estimates only and are not purchased by this  
162 contract.
- 163 (b) Delivery or Performance shall be made only as authorized by orders issued in  
164 accordance with the ordering clause. The contractor shall furnish to the  
165 Government, when and if ordered, the supplies or services specified in the contract  
166 up to and including the quantity designated in the contract as the “maximum.” The  
167 Government is responsible only for the minimum dollar guarantee designated in the  
168 contract.
- 169 (c) Except for any limitations on quantities in the Order Limitations clause or in the  
170 Schedule, there is no limit on the number of orders that may be issued. The  
171 Government may issue orders requiring delivery to multiple destinations or  
172 performance at multiple locations.

- 173 (d) Any order issued during the effective period of this contract and not completed  
174 within that period shall be completed by the contractor within the time specified in  
175 the order. The contract shall govern the contractor's and Government's rights and  
176 obligations with respect to that order to the same extent as if the order were  
177 completed during the contract's effective period; *provided*, that the contractor shall  
178 not be required to make any deliveries under this contract beyond twelve (12)  
179 months after the expiration of this contract.

180 **I.4 52.244-06 Subcontracts for Commercial Items and Commercial**  
181 **Components (OCT 1998)**

- 182 (a) Definition.  
183 "Commercial item," as used in this clause, has the meaning contained in the clause  
184 at 52.202-1, Definitions.  
185 "Subcontract," as used in this clause, includes a transfer of commercial items  
186 between divisions, subsidiaries, or affiliates of the contractor or subcontractor at  
187 any tier.
- 188 (b) To the maximum extent practicable, the contractor shall incorporate, and require its  
189 subcontractors at all tiers to incorporate, commercial items or nondevelopmental  
190 items as components of items to be supplied under this contract.
- 191 (c) Notwithstanding any other clause of this contract, the contractor is not required to  
192 include any FAR provision or clause, other than those listed below to the extent  
193 they are applicable and as may be required to establish the reasonableness of prices  
194 under Part 15, in a subcontract at any tier for commercial items or commercial  
195 components:
- 196 (1) 52.222-26, Equal Opportunity (E.O. 11246);
  - 197 (2) 52.222-35, Affirmative Action for Special Disabled and Vietnam Era Veterans  
198 (38 U.S.C. 4212(a));
  - 199 (3) 52.222-36, Affirmative Action for Workers with Disabilities (29 U.S.C. 793);  
200 and
  - 201 (4) 52.247-64, Preference for Privately-Owned U.S.-Flagged Commercial Vessels  
202 (46 U.S.C. 1241) (flows down not required for subcontracts awarded beginning  
203 May 1, 1996).
- 204 (d) The contractor shall include the terms of this clause, including this paragraph (d), in  
205 subcontracts awarded under this contract.

206 **I.5 552.203-71 Restriction on Advertising (SEP 1999)**

207 The Contractor shall not refer to this contract in commercial advertising or similar  
208 promotions in such a manner as to state or imply that the product or service provided is

209 endorsed or preferred by the White House, the Executive Office of the President, or any  
210 other element of the Federal Government, or is considered by these entities to be superior to  
211 other products or services. Any advertisement by the Contractor, including price-off  
212 coupons, that refers to a military resale activity shall contain the following statement: "This  
213 advertisement is neither paid for nor sponsored, in whole or in part, by any element of the  
214 United States Government."

215 **I.6 552.215-70 Examination of Records by GSA (FEB 1996)**

216 The contractor agrees that the Administrator of General Services or any duly authorized  
217 representatives shall, until the expiration of three (3) years after final payment under this  
218 contract, or of the time periods for the particular records specified in Subpart 4.7 of the FAR  
219 (48 Code of Federal Regulations (CFR) 4.7), whichever expires earlier, have access to and  
220 the right to examine any books, documents, papers, and records of the contractor involving  
221 transactions related to this contract or compliance with any clauses thereunder. The  
222 contractor further agrees to include in all its subcontracts hereunder a provision to the effect  
223 that the subcontractor agrees that the Administrator of General Services or any authorized  
224 representatives shall, until the expiration of three (3) years after final payment under the  
225 subcontract, or of the time periods for the particular records specified in Subpart 4.7 of the  
226 FAR (48 CFR 4.7), whichever expires earlier, have access to and the right to examine any  
227 books, documents, papers, and records of such subcontractor involving transactions related  
228 to the subcontract or compliance with any clauses thereunder. The term "subcontract" as  
229 used in this clause excludes purchase orders not exceeding \$100,000 and subcontracts or  
230 purchase orders for public utility services at rates established for uniform applicability to the  
231 general public.

232 **I.7 552.232-73 Availability of Funds (SEP 1999)**

233 The authorization of performance of work under this contract during the initial contract  
234 period and any option or extension period(s) is contingent upon the appropriation of funds to  
235 procure this service. If the contract is awarded, extended, or option(s) exercised, the  
236 Government's obligation beyond the end of the fiscal year (September 30), in which the  
237 award or extension is made or option(s) exercised, is contingent upon the availability of  
238 funds from which payment for the contract services can be made. No legal liability on the  
239 part of the Government for payment of any money beyond the end of each fiscal year  
240 (September 30) shall arise unless or until funds are made available to the Contracting Officer  
241 for this procurement and written notice of such availability is given to the Contractor.

242 **I.8 552.252-6 Authorized Deviations in Clauses (SEP 1999)**  
243 **(DEVIATION FAR 52.252-6)**

244 (a) Deviations to FAR clauses.

245 (1) This solicitation or contract indicates any authorized deviation to a Federal  
246 Acquisition Regulation (48 CFR Chapter 1) clause by the addition of  
247 "(DEVIATION)" after the date of the clause, if the clause is not published in  
248 the General Services Administration Acquisition Regulation (48 CFR Chapter  
249 5).

250 (2) This solicitation indicates any authorized deviation to a Federal Acquisition  
251 Regulation (FAR) clause that is published in the General Services  
252 Administration Acquisition Regulation by the addition of "(DEVIATION  
253 (FAR clause no.))" after the date of the clause.

254 (b) Deviations to GSAR clauses. This solicitation indicates any authorized deviation  
255 to a General Services Administration Acquisition Regulation clause by the  
256 addition of "(DEVIATION)" after the date of the clause.

257 (c) "Substantially the same as" clauses. Changes in wording of clauses prescribed  
258 for use on a "substantially the same as" basis are not considered deviations.

259 **I.9 552.228-70 Workers' Compensation Laws (SEP 1999)**

260 The Act of June 25, 1936, 49 Stat. 1938 (40 U.S.C. 290) authorizes the constituted  
261 authority of the several States to apply their workers' compensation laws to all lands and  
262 premises owned or held by the United States.

263 **I.10 552.232-76 Electronic Funds Transfer Payment (SEP 1999)**

264 (a) The Government will make payments under this lease by electronic funds transfer  
265 (EFT). The Lessor must, no later than 30 days before the first payment:

266 (1) Designate a financial institution for receipt of EFT payments.

267 (2) Submit this designation to the Contracting Officer or other Government  
268 official, as directed.

269 (b) The Lessor must provide the following information:

270 (1) The American Bankers Association 9-digit identifying number for wire  
271 transfers of the financing institution receiving payment if the institution has  
272 access to the Federal Reserve Communications System.

273 (2) Number of account to which funds are to be deposited.

274 (3) Type of depositor account ("C" for checking, "S" for savings).

- 275 (4) If the Lessor is a new enrollee to the EFT system, the Lessor must complete  
276 and submit a "Payment Information Form," SF 3881, before payment can be  
277 processed.
- 278 (c) If the Lessor, during the performance of this contract, elects to designate a  
279 different financial institution for the receipt of any payment, the appropriate  
280 Government official must receive notice of such change and the required  
281 information specified above no later than 30 days before the date such change is  
282 to become effective.
- 283 (d) The documents furnishing the information required in this clause must be dated  
284 and contain the:
- 285 (1) Signature, title, and telephone number of the Lessor or the Lessor's  
286 authorized representative.
- 287 (2) Lessor's name.
- 288 (3) Lease number.
- 289 (e) Lessor's failure to properly designate a financial institution or to provide  
290 appropriate payee bank account information may delay payments of amounts  
291 otherwise properly due.

292 **I.11 552.232-70 Invoice Requirements (SEP 1999)**

- 293 (a) Invoices shall be submitted in an original only, unless otherwise specified, to the  
294 designated billing office specified in this contract or order.
- 295 (b) Invoices must include the Accounting Control Transaction (ACT) number  
296 provided below or on the order.
- 297 ACT Number (*Contracting Officer insert number*)
- 298 (c) In addition to the requirements for a proper invoice specified in the Prompt  
299 Payment clause of this contract or order, the following information or  
300 documentation must be submitted with each invoice:

301 (*Contracting Officer list additional requirements.*)

302 **I.12 552.232-71 Adjusting Payments (SEP 1999)**

- 303 (a) Under the Inspection of Services clause of this contract, payments may be adjusted  
304 if any services do not conform with contract requirements. The Contracting Officer  
305 or a designated representative will inform the Contractor, in writing, of the type and  
306 dollar amount of proposed deductions by the 10th workday of the month following  
307 the performance period for which the deductions are to be made.

308 (b) The Contractor may, within 10 working days of receipt of the notification of the  
309 proposed deductions, present to the Contracting Officer specific reasons why any or  
310 all of the proposed deductions are not justified. Reasons must be solidly based and  
311 must provide specific facts that justify reconsideration and/or adjustment of the  
312 amount to be deducted. Failure to respond within the 10-day period will be  
313 interpreted to mean that the Contractor accepts the deductions proposed.

314 (c) All or a portion of the final payment may be delayed or withheld until the  
315 Contracting Officer makes a final decision on the proposed deduction. If the  
316 Contracting Officer determines that any or all of the proposed deductions are  
317 warranted, the Contracting Officer shall so notify the Contractor, and adjust  
318 payments under the contract accordingly.

319 **I.13 552.225-9 Buy American Act -- Trade Agreements -- Balance of**  
320 **Payments Program (SEP 1999) (DEVIATION FAR 52.225-9)**

321 (a) This clause implements the Trade Agreements Act of 1979 (19 U.S.C. 2501-2582)  
322 by providing a preference for U.S. made end products, designated country end  
323 products,

324 Caribbean Basin country end products, Canadian end products or Mexican end  
325 products over other products.

326 "Caribbean Basin country end products," as used in this clause, means an article  
327 that: (1) is wholly the growth, product, or manufacture of a Caribbean Basin  
328 country (as defined in section 25.401 of the Federal Acquisition Regulation (FAR)),  
329 or (2) in the case of an article which consists in whole or in part of materials from  
330 another country or instrumentality, has been substantially transformed into a new  
331 and different article of commerce with a name, character, or use distinct from that  
332 of the article or articles from which it was so transformed. The term includes  
333 services (except transportation services) incidental to its supply; provided that the  
334 value of those incidental services does not exceed that of the product itself. It does  
335 not include service contracts as such. The term excludes products that are excluded  
336 from duty free treatment from Caribbean countries under the Caribbean Basin  
337 Economic Recovery Act (19 U.S.C. 2703(b)). These exclusions presently consist  
338 of (i) textiles and apparel articles that are subject to textile agreements; (ii)  
339 footwear, handbags, luggage, flat goods, work gloves, and leather wearing apparel  
340 not designated as eligible articles for the purpose of the Generalized System of  
341 Preference under title V of the Trade Act of 1974; (iii) tuna, prepared or preserved  
342 in any manner in airtight containers, (iv) petroleum, or any product derived from  
343 petroleum; and (v) watches and watch parts (including cases, bracelets and straps)

344 of whatever type including, but not limited to, mechanical, quartz digital or quartz  
345 analog, if such watches or watch parts contain any material that is the product of  
346 any country to which the Tariff Schedule of the United States (TSUS) column 2  
347 rates of duty apply.

348 "Designated country end product," as used in this clause, means an article that (1) is  
349 wholly the growth, product, or manufacture of the designated country (as defined in  
350 section 25.401 of the Federal Acquisition Regulation (FAR)), or (2) in the case of  
351 an article which consists

352 in whole or in part of materials from another country or instrumentality, has been  
353 substantially transformed into a new and different article of commerce with a name,  
354 character, or use distinct from that of the article or articles from which it was so  
355 transformed. The term includes services (except transportation services) incidental  
356 to its supply, provided that the value of those incidental services does not exceed  
357 that of the product itself. It does not include service contracts as such.

358 "Canadian end product," as used in this clause, means an article that (1) is wholly  
359 the growth, product, or manufacture of Canada, or (2) in the case of an article  
360 which consists in whole or in part of materials from another country or  
361 instrumentality, has been substantially transformed in Canada into a new and  
362 different article of commerce with a name, character, or use distinct from that of the  
363 article or articles from which it was transformed. The term includes services  
364 (except transportation services) incidental to its supply; provided, that the value of  
365 those incidental services does not exceed that of the product itself. It does not  
366 include service contracts as such.

367 "Mexican end product," as used in this clause, means an article that (1) is wholly  
368 the growth, product, or manufacture of Mexico, or (2) in the case of an article  
369 which consists in whole or in part of materials from another country or  
370 instrumentality, has been substantially transformed in Mexico into a new and  
371 different article of commerce with a name, character, or use distinct from that of the  
372 article or articles from which it was so transformed. The term includes services  
373 (except transportation services) incidental to its supply, provided that the value of  
374 those incidental services does not exceed that of the product itself. It does not  
375 include service contracts as such.

376 "End products," as used in this clause, means those articles, materials, and supplies  
377 to be acquired under this contract for public use.

378 "U.S. made end product," as used in this clause, means an article which (1) is  
379 wholly the growth, product, or manufacture of the United States, or (2) in the case

380 of an article which consists in whole or in part of materials from another country or  
381 instrumentality, has been substantially transformed in the United States into a new  
382 and different article of commerce with a name, character, or use distinct from that  
383 of the article or articles from which it was so transformed.

384 "Nondesignated country end products," as used in this clause, means any end  
385 product which is not a U.S. made end product, designated country end product,  
386 Caribbean Basin Country end product, Canadian end product or Mexican end  
387 product.

388 "United States," as used in this clause, means the United States, its possessions,  
389 Puerto Rico, and any other place which is subject to its jurisdiction, but does not  
390 include leased bases or trust territories.

391 (b) The Contractor agrees to deliver under this contract only U.S. made end products,  
392 designated country end products, Caribbean Basin country end products, Canadian  
393 end products or Mexican end products or, if a national interest waiver is granted  
394 under section 302 of the Trade Agreements Act of 1979, nondesignated country end  
395 products. Only if such waiver is granted may a nondesignated country end product  
396 be delivered under this contract(s).

397 (c) Offers will be evaluated in accordance with the policies and procedures of Part 25  
398 of the FAR except that offers of U.S. made end products, designated country end  
399 products, Caribbean Basin end products, Canadian end products or Mexican end  
400 products shall be evaluated without the restrictions of the Buy American Act or the  
401 Balance of Payments Program.

#### 402 **I.14 552.232-23 Assignment of Claims (SEP 1999)**

403 Because this is a requirements or indefinite quantity contract under which more than one  
404 agency may place orders, paragraph (a) of the Assignment of Claims clause (FAR 52.232-  
405 23) is inapplicable and the following is substituted therefore:

406 In order to prevent confusion and delay in making payment, the Contractor shall not  
407 assign any claim(s) for amounts due or to become due under this contract. However, the  
408 Contractor is permitted to assign separately to a bank, trust company, or other financial  
409 institution, including any Federal lending agency, under the provisions of the Assignment of  
410 Claims Act, as amended, 31 U.S.C. 3727, 41 U.S.C. 15 (hereinafter referred to as "the Act"),  
411 all amounts due or to become due under any order amounting to \$1,000 or more issued by  
412 any Government agency under this contract. Any such assignment takes effect only if and  
413 when the assignee files written notice of the assignment together with a true copy of the  
414 instrument of assignment with the contracting officer issuing the order and the finance office

415 designated in the order to make payment. Unless otherwise stated in the order, payments to  
416 an assignee of any amounts due or to become due under any order assigned may, to the  
417 extent specified in the Act, be subject to reduction or set-off.

418 **I.15 552.229-71 Federal Excise Tax - DC Government (SEP 1999)**

419 If the District of Columbia cites an Internal Revenue Tax Exempt Certificate Number on  
420 orders placed under this contract, the Contractor shall bill shipments to the District of  
421 Columbia at prices exclusive of Federal excise tax and show the amount of such tax on the  
422 invoice.

423 **I.16 552.232-72 Final Payment (SEP 1999)**

424 Before final payment is made, the Contractor shall furnish the Contracting Officer with a  
425 release of all claims against the Government relating to this contract, other than claims in  
426 stated amounts that are specifically excepted by the Contractor from the release. If the  
427 Contractor's claim to amounts payable under the contract has been assigned under the  
428 Assignment of Claims Act of 1940, as amended (31 U.S.C. 3727, 41 U.S.C. 15), a release  
429 may also be required of the assignee.

430 **I.17 552.216-19 Order Limitations (OCT 1995)**

- 431 (a) Minimum order. When the Government requires supplies or services covered by  
432 this contract in an amount of less than \$50.00, the Government is not obligated to  
433 purchase, nor is the contractor obligated to furnish, those supplies or services under  
434 the contract.
- 435 (b) Maximum order. The contractor is not obligated to honor-- (1) Any order for a  
436 single item in excess of \$250,000, (2) Any order for a combination of items in  
437 excess of \$2,000,000.00, or (3) A series of orders from the same ordering office  
438 within 30 days that together call for quantities exceeding the limitation in  
439 subparagraph (1) or (2) of this section.
- 440 (c) If this is a requirements contract (i.e., includes the Requirements clause at  
441 subsection 52.216-21 of the FAR), the Government is not required to order a part of  
442 any one requirement from the contractor if that requirement exceeds the maximum-  
443 order limitations in paragraph (b) of this section.
- 444 (d) Notwithstanding paragraphs (b) and (c) of this section, the contractor shall honor  
445 any order exceeding the maximum order limitations in paragraph (b), unless that  
446 order (or orders) is returned to the ordering office within 7 days after issuance, with  
447 written notice stating the contractor's intent not to ship the item (or items) called for

448 and the reasons. Upon receiving this notice, the Government may acquire the  
449 supplies or services from another source.

66 **Section J**

67 **List of Attachments**

68 **J.1 Geographical Coverage**

69 This section defines the geographic boundaries for the Albuquerque MAA RFP. The  
70 boundaries are defined in terms of county and city boundaries. In addition, for pricing  
71 purposes, the boundaries are also defined by the associated NPANXXs. The Government, at  
72 its option, may expand the geographic coverage beyond the initial coverage area as defined  
73 in this section. The impact of any expansion will be negotiated with the contractor on a case-  
74 by-case basis.

75 **J.1.1 Albuquerque MAA Geographical Boundaries**

76 The Albuquerque MAA originating service area includes Bernalillo County. The  
77 Albuquerque MAA terminating service area shall include all localities listed in Table J.1.1-1.  
78 Any point in the originating service area shall also be in the terminating area.

79 **Table J.1.1-1. Albuquerque MAA Terminating Service Area by Locality**

LOCALITIES
ALBUQUERQUE
BELEN
BERNALILLO
ESTANCIA
LAGUNA ACOMA
LOS LUNAS
MORIARTY
MOUNTAINAIR
PENA BLANCA
TIJERAS

80

81 **J.1.2 Albuquerque MAA NPANXXs**

82 The NPANXXs that currently define the coverage for the Albuquerque MAA service  
83 area are identified in the B\_5\_4 spreadsheet in the NPANXX.xls file. This spreadsheet  
84 identifies each NPANXX, its location, and state. The column in B\_5\_4 entitled “Terminate  
85 only?” tells whether an NPANXX can both originate and terminate traffic or terminate only.  
86 “Yes” means the traffic can terminate at an NPANXX from an Albuquerque MAA site, but  
87 not originate. “No” means traffic can terminate and originate from the NPANXX.

88 The contractor shall support all NPANXXs that currently define coverage for the  
89 Albuquerque MAA service area.

90 **J.2 Requirements**

91 This section contains descriptions of the existing General Services Administration (GSA)  
92 requirements in the Albuquerque MAA service area and provides price evaluation quantities  
93 for the purposes of supporting evaluation of the Albuquerque MAA proposals. The  
94 quantities and locations presented in this section are not intended to represent definite service  
95 quantities to be acquired. The data are intended to represent an estimate of the possible  
96 requirements for the Albuquerque MAA acquisition. The data provided in this section is the  
97 best available information at the time of this solicitation. The service requirements are  
98 described to provide all offerors the same level of understanding of existing and potential  
99 usage in the Albuquerque MAA service area.

100 The remainder of this section is organized as follows:

- 101 (a) Section J.2.1 summarizes the engineering data
- 102 (b) Section J.2.2 describes the detailed engineering data (i.e., existing traffic and systems  
103 currently used to provide local telecommunications service to GSA customers in the  
104 metropolitan area)
- 105 (c) Section J.2.3 is a summary of the detailed price evaluation quantities and includes the  
106 GSA point of contact for on-premises existing wiring and the known historical  
107 building sites for the Albuquerque MAA.
- 108 (d) Section J.2.4 describes the detailed price evaluation quantities (i.e., the usage  
109 quantities that will be priced and evaluated as described in Section M)

110 The detailed engineering data and detailed price evaluation quantities are available in  
111 electronic form from GSA’s MAA Web site.

112 **J.2.1 Engineering Data Summary**

113 This section summarizes the detailed engineering data described in Section J.2.2. Tables  
114 J.2.1-1, J.2.1-2, and J.2.1-3 identify probable service requirements to be transitioned under  
115 the Albuquerque MAA contract. This information shall be the basis of the Albuquerque  
116 MAA Transition Plan required in Section C.4.1.4.

117 **Table J.2.1-1. CSS Line Summary**

City	ST	Number of Telephone Sets
ALBUQUERQUE	NM	4689
CIBOLA NATIONAL	NM	7

118 **Table J.2.1-2. DTS Local Circuit Summary**

Orig City	Orig State	Term City	Term State	Circuits
ALBUQUERQUE	NM	ALBUQUERQUE	NM	2

119 The existing DTS IXC Access Circuits in Table J.2.1-3 are described with two types of  
120 data. The column titled “Circuits” is a summary of the existing DTS circuits. The column  
121 titled “Monthly IXC Voice Minutes” is a summary of existing IXC Switched Voice Service  
122 Access minutes and is independent of the DTS circuit data. These minutes of IXC Switched  
123 Voice Service represent additional requirements that can potentially be satisfied by MAA  
124 DTS IXC access circuits.

125 **Table J.2.1-3. DTS IXC Access Circuit Summary**

City	ST	Circuits	Monthly IXC Voice Minutes
ALBUQUERQUE	NM	159	3756468
KIRTLAND AFB	NM	18	

126 In addition to the locations identified in the circuit.exe file, other locations may be  
127 included as part of the Albuquerque MAA in the future. However, the Government is not  
128 committed to include any potential sites or sites identified in the engineering data on any  
129 service order resulting from this contract.

130 Table J.2.1-4 identifies the location, of potential existing Government-owned telephone  
131 sets.

140 **J.2.2 Engineering Data**

141 This section describes the detailed engineering data for the local telecommunications  
142 services currently used by GSA customers in the metropolitan area. The engineering data is  
143 contained in the file circuits.exe available on the MAA Web site. The following tables  
144 describe the format and content of the engineering data.

145 The engineering data describes the architecture supporting approximately 4,700 users  
146 [including approximately 60 GSA Designated Representatives (GDRs) and Agency  
147 Designated Representatives (ADRs)] at 58 sites. These users and locations constitute the  
148 training requirements for the Albuquerque MAA RFP.

149 Table J.2.2-1 describes the format of the Circuit Switched Service (CSS) data. For each  
150 location (i.e., street address, city, state), central office NPANXX type of service, system  
151 type, and the number of telephone sets are identified.

152 **Table J.2.2-1. CSS Data Column Headers**

Street Address	City	State	NPANXX	Service Type	System Type	Number of Telephone Sets

153

154 Table J.2.2-2 describes the format of the Dedicated Transmission Service (DTS) local  
155 circuit count data. The addresses and the central office NPANXX of each end location, the  
156 service type and the number of circuits are provided.

157 **Table J.2.2-2. DTS Local Circuit Count Column Headings**

From Address				To Address				Service Type	Number of Circuits
Street	City	State	NPANXX	Street	City	State	NPANXX		

158

159 Table J.2.2-3 describes the format of the DTS IXC access circuit count data. For each  
160 IXC access location, the central office NPANXX, service type, quantity, and unit type are  
161 identified.

162

**Table J.2.2-3. DTS IXC Access Circuit Count Column Headings**

Street Address	City	State	NPANXX	Service Type	Quantity	Units

163

164 **J.2.3 Summary of Price Evaluation Quantities**

165 Evaluation quantities are provided for each price table as defined in Section B. These  
166 reflect estimated representative quantities over the 8-year maximum life of the contract.  
167 These quantities are based on current requirements and incorporate possible changes that  
168 might occur over that period. These changes include anticipated growth in users'  
169 participation using the approved MAA rates, growth in some services, and declining  
170 requirements in other services. Changes in volume are not meant to predict future  
171 requirements, but rather to provide the broadest possible evaluation of each offeror's price  
172 tables. The price evaluation quantities are provided in detail as described in Section J.2.4,  
173 and are summarized below.

174

**Table J.2.3-1. CSS Local Loop Summary**

Services	Estimated Lines by Contract Year							
	1	2	3	4	5	6	7	8
Analog Business Line	51	56	62	68	75	82	90	99

181

**J.2.3.4 Albuquerque On-Premises Wiring Point of Contact**

182

The Government point of contact for on-premises wiring for the Albuquerque MAA will be Edward Lefbevre, at (505) 248-7309.

183

184

**J.2.3.5 Albuquerque MAA Historical Building Sites**

185

The following historical site(s) has/have been identified for the Albuquerque MAA:

186

(a) 123 4th Street SW

187

(b) 421 Gold Avenue SW

188

**J.2.4 Detailed Price Evaluation Quantities**

189

This section describes the estimated Government evaluation quantities that will be used to evaluate each offeror's price proposal. The price evaluation quantity estimates provided do not imply any intent to define or restrict future purchases. They are instead intended to provide a fair and unbiased basis for evaluation of offeror price proposals. The service quantities represent federal agency local telecommunications requirements over the 8-year maximum life of the contract.

190

191

192

193

194

195

The price evaluation quantities describes a set of telecommunications service requirements for an average month for each contract year that are to be priced under each offeror's price tables. The price evaluation quantities are described at levels that may exist during the contract term. Each set of quantities shall be priced and evaluated as described in Section M.

196

197

198

199

200

**J.2.4.1 Workbooks**

201

The MAA Web site includes eight Microsoft Excel 97 for Windows workbooks that contain the estimated Government quantities for each of the eight contract years. There is a workbook for each contract year. Workbooks are named QuantX.xls where the letter "X" indicates the applicable contract year (1-8). All workbooks are compressed into a self-extracting file. Move the file to a desired directory and execute to extract the .xls files.

202

203

204

205

206 **J.2.4.2 Price Evaluation Quantities Workbook Format**

207 The formats of the eight workbooks are identical. Each workbook contains worksheets  
208 containing the price evaluation quantities estimates as follows:

- 209 (a) Proposal Identification (ID)
- 210 (b) CSS Local Loop (CLL)
- 211 (c) CSS Local Usage (CLU)
- 212 (d) DTS Local Loop (DLL)
- 213 (e) DTS Local Interoffice Channel (DLIO)
- 214 (f) DTS IXC Access (DIXC)
- 215 (g) Features (FEAT)
- 216 (h) Additional Local Loop (ADDLL)
- 217 (i) Move and Reconfiguration Charges (M&R)
- 218 (j) Other Charges (OTHER)
- 219 (k) CSS Local Loop Totals(CLLtots)
- 220 (l) DTS Local Loop Totals (DLLtots)

221 Each worksheet name is identified by the acronyms in the above list. The format of each  
222 worksheet is described in the following tables.

223 **Table J.2.4.2-1 Proposal Identification (ID)**

254 **J.3 Development of FTS Program Guiding Principles**

255 Prior to the release of this RFP, extensive exchanges of information and views took place  
256 among Congress, Executive Branch agencies, and industry. These exchanges included  
257 formal Congressional hearings, open public meetings, letters and other written materials, and  
258 private meetings arranged under the auspices of Congressional oversight committees.

259 **J.3.1 Statements of Principles Released FEB 18, 1997 and APR 4, 1997**

260 A set of general principles intended to broadly guide the development and  
261 implementation of the FTS telecommunications program emerged from these exchanges.  
262 These principles are intended to convey the consensus that emerged between the Legislative  
263 and Executive branches. Tables J.3.1-1 and J.3.1-2 reproduce the two documents that  
264 encapsulate these principles. These tables are provided for information purposes only.

265 Certain terms used in Tables J.3.1-1 and J.3.1-2 vary from terms used elsewhere in this  
266 RFP. Specifically, the term “local loop” in the tables includes both the local loop, local  
267 switching, and associated features. The term “local access” in the tables is referred to as  
268 “IXC access” in the RFP. The term “network transport” in the tables is referred to as “IXC  
269 transport” in the RFP. Where any conflict in terms occurs between the tables and the RFP,  
270 the RFP terms shall take precedence.

271 The Government expects that agencies acquiring local service for non-MAA locations  
272 below the threshold (referred to in Principle 15.8 of Table J.3.1-2) will follow established  
273 contracting principles and examine all options, including FTS2001 contractors, MAA  
274 contractors, and other potential providers, including their Local Exchange Carriers (LECs).

275 **J.3.2 Forbearance Period**

276 Following the release of the documents represented in the above attachments, further  
277 discussions resulted in the emergence of one further point of consensus, as follows. No  
278 contract modifications for optional local services in an MAA area will be executed to an  
279 FTS2001 contract or an MAA contract before one year after the relevant MAA award. In  
280 addition, no contract modifications for optional local services in a non-MAA area will be  
281 executed to an FTS2001 contract or an MAA contract before one year after any competitive  
282 award of such services. Similarly, the Government will not execute contract modifications  
283 to an MAA contract for optional long-distance services before one year after the initial  
284 FTS2001 award.

285

**Table J.3.1-1. Statement of Principles Released February 18, 1997**

Federal Telecommunications Service Program  
*Statement of Principles*  
Page 1 of 2

**FTS Program Goals**

1. Ensure the best service and price for the Government
2. Maximize competition

**Program Strategy**

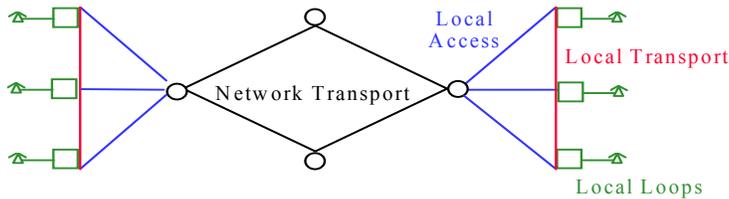

In general, the Government's goals will be met by:

- Multiple, overlapping, staggered contracts
- Comprehensive and niche contracts
- Awarding minimum revenue guarantees (e.g., \$1B in FTS2001) to vendors that compete and win
- Leveraging the Government's large traffic volumes
- Aggressively pursuing Metropolitan Area Acquisitions (MAA) and other opportunities to maximize competition

Specifically, the Government will:

- Award multiple contracts for FTS2001
- Award MAA contracts in multiple areas, multiple contracts may be awarded in any particular area at the option of the Government
- Award niche contracts (e.g., wireless) to focus competition where and when needed
- Later, award multiple FTS-TS contracts for required end-to-end services, timing of award is at the discretion of the Government

**Required and Optional Services**

FTS2001 Contracts  
Required services  
  Network transport  
  Local access  
Optional services  
  Local transport  
  Local loops

MAA Contracts  
Required services  
  Local loops  
  Local transport  
  Local access  
Optional services  
  Network transport

286

287

**Table J.3.1-1. Statement of Principles Released February 18, 1997 (Concluded)**

**Federal Telecommunications Service Program**  
*Statement of Principles*  
Page 2 of 2

**For FTS2001 and MAA Contracts**

1. Vendors must bid required services.
2. Vendors must meet all requirements specified in the appropriate RFP (e.g., technical specifications and price structures).
3. The vendor may choose to offer services from owned facilities or as a reseller. The Government's evaluation of services offered will be facility-neutral.
4. Compliance with the RFP requirements for the required services and evaluation of the unbundled prices for the required services, using the traffic models provided by the Government, will serve as the sole basis of the contract awards.
5. The Government's sole obligation under any contract will be to meet the minimum revenue guarantees' (e.g., the Government does not plan to manage a revenue or traffic distribution among the contracts).
6. Contractors (i.e., vendors who have won either an FTS2001 or an MAA contract) may offer optional services. Contractors determine which specific optional services to offer. Contractors determine when (i.e., at time of submission of proposals or anytime during the contract life) and where to offer optional services.
7. Optional services must meet all requirements as specified in the appropriate RFP (e.g., optional local transport service offered by an FTS2001 contractor must meet the technical specification for local transport in the MAA RFP).
8. Prices, whether offered for required or optional services, must comply with the price structures contained in Section B of the appropriate RFP (e.g., optional local transport service offered by an FTS2001 contractor must comply with the price structure for local transport in the MAA RFP, optional network transport service offered by an MAA contractor must comply with the price structure for network transport in the FTS2001 RFP).
9. Individual price elements (i.e., unbundled prices) are required for all required and optional services.
10. Contractors may also offer bundled prices. The price structure will allow fixed discounts for optional bundles offered by the contractor. (This is structurally similar to the scenario based discounts used in the FTS2000 Year 7 Price Redetermination.) However, the sole basis of contract award is per item 4 above.
11. MAA contractors may elect to offer any MAA-required service, on an optional basis, outside of the awarded MAA area.
12. MAA contractors may offer in-region network transport services (and submit technical and price information) on a contingent basis for ordering immediately upon regulatory approval.

288

289 Note: Principle 12 above was deleted and replaced by a new Principle 12 in the document  
290 released on April 4, 1997 (Table J.3.1-2).

**Table J.3.1-2. Statement of Principles Released April 4, 1997**

The following principles supplement the 12 Principles issued on 18 February 1997.

Original Principle 12 is hereby deleted and replaced with the following new Principle 12:

12. The contract duration of the FTS2001 and MAA will be the same. Specifically, the contract duration for the FTS2001 and MAA contracts will be 4 base years and 4 one year options.
13. No work will be contracted for under any FTS contracts that is prohibited by any federal or state laws.
14. There are no minimum revenue guarantees (MRGs) for optional services.
15. Award process for MAA contracts:
  - 15.1. The Government will issue a request for qualification statements to which interested vendors may respond. The Government will use the standard RFP structure to enumerate its requirements. Specific price information will not be requested by the Government as part of the qualification process. Vendors may submit qualification statements at any time. However, the Government will specify a due date for qualification statements for each specific MAA. The Government reserves the right to re-examine its requirements or require re-qualification.
  - 15.2. The qualification statements will be required to address, in appropriate detail, the Government's requirements. The qualification statements must state the specific NPAs and NXXs in which the vendor is seeking to be qualified.
  - 15.3. The Government will evaluate the qualification statements. Vendors who are qualified will be placed on an MAA Qualified Vendor List.
  - 15.4. The Government will conduct competitions for each of the designated MAAs. The Government will specify the MAA-specific requirements, as well as the traffic model for that MAA, in an RFP issued for each MAA.
  - 15.5. Vendors on the MAA Qualified Vendor List may respond to the MAA RFP. Proposals shall include a price proposal based on the traffic model, an MAA-specific transition plan, and a proposal responsive to any other requirements unique to the specific MAA.
  - 15.6. Based on an evaluation of the MAA-specific proposals, the Government will award a contract(s) and an MRG(s) for that MAA.
  - 15.7. In areas designated as MAA areas, agencies will typically participate in the MAA-specific competition to be conducted. However, an individual agency may elect to compete its requirements prior to the conduct of the MAA.

**Table J.3.1-2. Statement of Principles Released April 4, 1997 (Concluded)**

- 15.8 In areas not designated as MAA areas, the Government will conduct a competition for services in that area and will accept proposals from any firm on the MAA Qualified Vendor List. The Government may elect not to conduct such competitions for requirements below a specified dollar threshold. This threshold will be determined at a later date by the GSA with input from the IMC and will be set to ensure that the Government's cost do not exceed the possible savings.
- 16. Optional services (i.e., for long distance services or for local services in other areas) may be offered under the following conditions:
  - 16.1 Only contractors (i.e., those companies with either an FTS2001 or an MAA contract) may offer optional services.
  - 16.2 Optional services may be added to the contract as modifications within the scope of the FTS2001 and MAA contracts.
  - 16.3 The Government will not require service or geographic ubiquity on any optional services.
  - 16.4 MAA contractors seeking to offer long distance services will submit prices, as well as a technical/management response based on the FTS2001 RFP, which will be evaluated in the contract modification process.
  - 16.5 MAA contractors seeking to offer local services (i.e., in areas other than their awarded MAA area) will submit prices, which will be evaluated in the contract modification process.
  - 16.6 FTS2001 contractors seeking to offer local services will submit prices, as well as a qualification statement based on the MAA request for qualification statements, which will be evaluated in the contract modification process.
  - 16.7 Any contractor may offer optional services in an area after the competition is completed for that area.

295 **J.4 Glossary of Terms**

<b>911 service</b>	An emergency reporting system whereby a caller dials a common number—911—for all emergency service.
<b>E911-CAMA trunk</b>	A dedicated one-way trunk for handling outgoing 911 calls from a non-ISDN key system or PBX. It uses loop reverse-battery call supervision and in-band multi-frequency signaling for address and Caller Emergency Service Identification (e.g., directory number of the calling telephone) transmission as part of call set up.
<b>Access circuit</b>	The access facilities provided between the Service Delivery Point (SDP) and the local telephone service provider's central office or the inter-exchange carrier's point of presence.
<b>Account code</b>	A code that identifies the caller so that the cost of the call can be billed to the appropriate party.
<b>Accounting control transaction number</b>	A specific number assigned to each contract award winner authorizing the invoicing of services.
<b>Additional directory listings</b>	A feature that provides multiple numbers within a single, main directory listing.
<b>Additional directory number</b>	A second phone number can be obtained on the same line when ordering an ISDN service.
<b>Agency</b>	A term used to identify all federal agencies, authorized federal contractors, agency-sponsored universities and laboratories, and, when authorized by law or regulation, state, local, and tribal Governments.
<b>Agency billing code</b>	A Government-provided code that identifies a specific billing account for an agency allowed to order MAA services and that elects to use centralized billing.

<b>Agency billing identification</b>	An agency or contractor-provided code that identifies a specific billing account for an agency allowed to order MAA services and that elects to use direct billing.
<b>Agency hierarchy code</b>	An agency-provided code that identifies how billing data shall be grouped; e.g., by GSA, customer agency, customer - agency defined subhierarchies, such as department and office, service, telephone number, and accounting code. Each level of the hierarchy shall contain the aggregate information pertaining to the lower levels.
<b>Alphanumeric</b>	Pertaining to a character set that contains letters, digits, and sometimes other characters, such as punctuation marks.
<b>Alphanumeric dialing</b>	A feature that enhances data terminal dialing by allowing a data terminal user to place a data call by entering an alphanumeric name instead of dialing a long string of numbers.
<b>Alternate call directory listings</b>	A feature that allows alternate numbers to be indicated under a directory listing.
<b>American National Standard Institute (ANSI)</b>	A standard-setting, non-governmental organization, which develops and publishes standard for “voluntary” use in the United States.
<b>Analog</b>	In telephone transmission, the signal being transmitted—voice, video, or image – is “similar to” the original. In telecommunications, analog means telephone transmission and/or switch which is not digital.
<b>Analog data</b>	Data represented by a physical quantity that is considered to be continuously variable and whose magnitude is made directly proportional to the data or to a suitable function of the data.
<b>Anonymous call rejection</b>	The capability of rejecting calls that have the call ID blocked.

<b>Attendant multi-line hunt group</b>	A feature that allows the creation of a group in which a designated member of the group can change call forward for other members of the group.
<b>Audit trail</b>	A chronological record of system activities that is sufficient to enable the reconstruction, reviewing, and examination of the sequence of environments and activities surrounding or leading to an operation, a procedure, or an event in a transaction from its inception to final results.
<b>Authorization codes</b>	A code that, once entered, can permit the user to gain access to a system or service.
<b>Automatic call distributor (ACD)</b>	This feature provides equitable distribution of large volumes of incoming calls to available call answering positions of the customer. The ACD can also provide an optional data stream of call events to a compatible computer where the customer can use the information to prepare management information reports.
<b>Automatic number identification (ANI)</b>	A service feature that provides the automatic identification of the calling station billing number.
<b>Automatic route selection (ARS)</b>	The ability of a switch to automatically choose the least cost route for a long distance call.
<b>Availability</b>	The ratio of the total time a functional unit is capable of being used during a given interval to the length of the interval; e.g., if the unit is capable of being used for 100 hours in a week, the availability is 100/168. For purposes of this RFP, the length of the interval is the applicable month.
<b>Backup of ISDN PRI shared D channel capability</b>	For PRI(s) with 24B+0D, shared-D channel backup/redundancy can be supported when the associated (i.e., primary) PRI with 23B+D is down/inoperative.

<b>Bandwidth</b>	(a) The bandwidth of a device is the difference between the limiting frequencies within which performance with respect to some characteristic falls. (b) The difference between the limiting frequencies of a continuous frequency band.
<b>Base price</b>	The price for providing service with no features.
<b>Basic rate</b>	The transmission speed supported by the basic interface structure of an ISDN system that is composed of 2 B (64 kb/s) and 1 D (16 kb/s) channel, as defined in CCITT I-412.
<b>Bell operating company (BOC)</b>	One of the 22 operating telephone companies that were divested from the AT&T Company under the terms of the 1982 antitrust suit settlement agreement. <i>Note:</i> Cincinnati Bell Telephone Co. and Southern New England Bell Telephone Co. are not included.
<b>Billing accounting codes - unverified</b>	The capability to enter a billing account code to be used in billing.
<b>Billing accounting codes - verified</b>	The capability to enter a billing account code to be used in billing and to block the call if the code cannot be verified.
<b>Billing/billed</b>	The process of creating an invoice or a bill.
<b>Binary digit (bit)</b>	In binary notation either of the characters 0 or 1.
<b>Blocking</b>	Denying access to, or use of, a facility, system, or component.
<b>Blocking caller-paid information phone numbers</b>	The capability to block caller-paid calls from a station.
<b>Blocking dialed carrier identification code (CIC)</b>	The capability to block the change from the pre-subscribed carrier on a per call basis.

<b>Blocking of selected numbers</b>	The capability to block calls incoming from pre-determined selected numbers.
<b>Bridging service</b>	Bridging service feature is the capability to have an incoming call ring at two locations when a primary number is dialed. Bridging Service is assumed to be served by a single wire center. It is normally used for locations within a building and is accomplished via software change.
<b>Business line</b>	This service provides a business customer with a single, voice-grade telephonic communications channel which can be used to place or receive one call at a time. This service also provides connection of business customer-single station sets or facsimile machines to the public switched telecommunications network.
<b>Byte</b>	A sequence of 8 adjacent binary digits usually treated as a unit.
<b>Cable</b>	Any communications channel having a bandwidth greater than a voice-grade telecommunications channel, sometimes used synonymously with wideband.
<b>Call</b>	Any demand to set up a connection. A unit of traffic measurement.
<b>Call back/camp on</b>	The capability to allow a user to place a call back on a busy line. When the called station goes on-hook, the originating station is rung and, when answered, the original call is automatically placed.
<b>Call block</b>	The capability to block a user-specified predesignated number(s) from completing incoming calls to the user.
<b>Call blocking</b>	The capability to block outgoing calls from a user(s) to specific numbers, NXXs, NPAs, or country codes.
<b>Call consultation</b>	A feature that allows a user to alternate between a party on hold and an existing conversation.

<b>Call detail record</b>	A record generated by customer traffic later used to bill the customer for service. At a minimum, call detail records include the number used to make the call, date the call is made, number called (local or long distance), time the call started, and call duration. Other information such as the circuit used to make the call (WATS, MCI, etc.) or purpose of the call (e.g., client, project) is also typically provided as part of the call detail records.
<b>Call forward - busy line</b>	A feature that permits calls attempting to terminate to a busy station line to be redirected to a predetermined line when the called station is in use.
<b>Call forward - don't answer</b>	A feature that provides for forwarding of incoming calls to a predetermined line when the called station line does not answer within a prescribed time.
<b>Call forward - remote access</b>	A feature that lets a user turn on or turn off call forward variable features from a telephone other than their own. From a remote location, a user dials a remote access directory number and through a series of prompts enters their own telephone number and a personal identification number.
<b>Call forward - variable</b>	A feature that allows a user to choose to reroute incoming calls to another specified telephone number.
<b>Call forwarding</b>	A feature that allows all calls destined for a station to be routed to another station (or to the attendant), designated during activation, regardless of the busy or idle state of the called station. This feature can be activated or canceled by the station user or by the attendant.

<b>Call hold</b>	A feature that allows a station user to “hold” any call in progress by flashing and then dialing a “hold” code, thus freeing the same line for the purpose of originating another call or returning to a previously held call. If the controlling station user does not dial any additional digits after the “hold” code, muting of the station set and removal of dial tone will occur after a time-out period. The call will remain on hold until the controlling station user either hangs up, causing the station to ring with the held call, or flashes and redials the “hold” code to return to the original call. Only 1 call per station line may be held at a time. The held call cannot be added to the other call.
<b>Call hunting</b>	See hunting.
<b>Call park</b>	The capability to allow a call to be parked at a directory number for retrieval by another line or trunk.
<b>Call pickup</b>	A feature that allows a station user to answer any calls directed to another station line within his own preset pickup group by dialing a pickup code from an idle or busy station. If more than 1 station line in the pickup group is ringing, the individual call to be answered will be selected by the system. Multiple call pickup groups can be defined within a single Centrex service group.
<b>Call restriction</b>	A feature that allows the system to restrict certain types of calls being made from stations.
<b>Call return</b>	A feature that allows a telephone user to dial the last caller, even if he/she did not answer the phone.
<b>Call screen</b>	A feature that allows a telephone user to keep a list of telephone numbers to be screened out so that his/her phone will not ring from those numbers until the feature is turned off.

<b>Call trace</b>	<p>A user activated feature that allows the user to identify the last call received by entering a code into the DTMF pad (e.g., *57, *69).</p> <p>In addition, call trace may involve system-level equipment and procedures for determining equipment and procedures for determining the source of incoming calls. This call identification data is held by the phone company for later use.</p>
<b>Call transfer</b>	<p>A feature that allows a station user to transfer any call in progress to another station without the assistance of the attendant.</p>
<b>Call waiting</b>	<p>A feature that allows a call to a busy station line to be held waiting while a tone signal is directed towards the busy station user. (Only the called station user hears this tone.) The called station user may connect to this waiting call by hanging up, whereby the station will be rung and will be connected to the call upon answer. Alternatively, the station user may flash and dial an answer-hold code to hold the original call and answer the waiting code.</p>
<b>Caller identification (ID)</b>	<p>A feature that provides the capability of passing the calling number to the terminating station.</p>
<b>Caller, calling party, call</b>	<p>A person, program, or equipment that originates a call.</p>
<b>Calling number suppression</b>	<p>A feature that provides the capability to block the originating phone number from being passed to the terminating station on an all call basis.</p>
<b>Cancel</b>	<p>A service order is canceled if the action is taken prior to acceptance.</p>
<b>Central office based service</b>	<p>A service with functions and features similar to those provided by a PBX system, often referred to as centrex services, that are provided by the telephone company's central office.</p>

<b>Centrex</b>	A service that provides, from the telephone company central office, functions and features comparable to those provided by a PBX or a PABX.
<b>Centrex service group</b>	A group of affiliated users within a common Centrex configuration.
<b>Channel</b>	(a) A connection between initiating and terminating nodes of a circuit. (b) A single path provided from a transmission medium either by physical separation; e.g., multiplier cable, or by electrical separation; e.g., frequency- or time-division multiplexing. (c) A single unidirectional or bi-directional path for transmitting or receiving, or both, of electrical or electromagnetic signals. (d) A path along which signals can be sent; e.g., data channel, output channel.
<b>Class of service (COS)</b>	A designation assigned to describe the service treatment and privileges given to a particular terminal.
<b>Class of service display</b>	This feature provides attendants with an alphabetic or numeric code display representing the class of service of the calling PBX station line seeking attendant assistance.
<b>Clear channel</b>	A full 64 kb/s channel for transferring user information. Signaling is communicated over a separate channel.
<b>Clear channel capability</b>	A channel able to support full 64 kb/s for user information transfer.
<b>Client</b>	One that uses telecommunications service.
<b>Commercially available</b>	As applied to a telecommunications service in a geographic area, that service, or service related feature, that is, for a consideration, currently legally provided by 1 or more entities who are generally considered to be providers of telecommunications service(s) to 1 or more other entities, independent from the service provider, for their own legal commercial business purposes.

<b>Compatibility</b>	A property of systems that allows the exchange of necessary information directly and in usable form. <i>Note:</i> Implies use of identical or compatible protocols.
<b>Conference calling</b>	A feature that allows a station user to establish a multiparty conference connection (of up to 6 conferees including himself), either without attendant assistance at all, or with attendant assistance only for adding trunks.
<b>Confidentiality</b>	The concept of holding sensitive data in confidence, limited to an appropriate set of individuals or organizations.
<b>Contract line item (CLIN)</b>	A telecommunications-related service that can be ordered by item number under an MAA contract. Examples of MAA CLINs are Analog Centrex Line, Analog Centrex Voice Mail and T-1 line.
<b>Cross-Connection</b>	Cross-connection is the connection of one wire to another typically by attaching each wire to a connecting block and then placing a third “cross-connect” wire between each to complete the electrical connection.
<b>Customer</b>	One that purchases service.
<b>Customer premises equipment (CPE)</b>	Equipment owned, leased or under the control of the Government and physically located at the Government’s premises or at the premises of another contractor.
<b>Customized group dialing plan</b>	A feature that provides the capability to customize the dialing plan for a defined group of stations within the system.
<b>Customized intercept and recorded announcement</b>	This feature provides a recorded message, as specified by the customer, to an intercepted call indicating why the call cannot be completed.
<b>Cutover</b>	The physical changing of circuits or lines at a telecommunications location from 1 configuration to another.

<b>Data</b>	Representation of facts, concepts, or instructions in a formalized manner suitable for communication, interpretation, or processing by humans or by automatic means.
<b>Data call setup</b>	Provides three methods to set up a data call: <ul style="list-style-type: none"><li>• Data terminal (keyboard) dialing (which also includes alphanumeric dialing and default dialing)</li><li>• Voice terminal dialing</li><li>• Dedicated voice terminal for data calls.</li></ul>
<b>Data hot line</b>	Provides for automatic nondial placement of a data call to an endpoint when the originator goes off-hook.
<b>Data line privacy</b>	Protects analog data calls from being interrupted by any of the system's overriding or ringing features. When activated by the user, it denies the system the ability to gain access to, or superimpose tones onto, the protected data call.
<b>Data terminal equipment (DTE)</b>	Equipment consisting of digital end instruments that converts the user information into data signals for transmission or reconverts the received data signals into user information.
<b>Dedicated transmission service (DTS)</b>	The private-line transmission of voice or data.
<b>Default dialing</b>	Enhances data terminal (keyboard) dialing by allowing a data terminal user to place a data call to a preadministered destination by simply entering a carriage return at the "Dial" prompt.
<b>Delay</b>	The interval of time between origination and receipt of a signal.

<b>Demarcation point</b>	The point where the phone company brings in the wiring that connects to the subscriber's phone system and where the subscriber assumes responsibility for the service.
<b>Dial access code</b>	The digit or digits entered by a user utilizing a switching vehicle to gain access to MAA services.
<b>Dial pulse</b>	A direct current pulse produced by a telephone instrument interrupting a steady current at a sequence and rate determined by an operator-selected digit and the operating characteristic of the instrument.
<b>Dial zero</b>	As a feature of Voice Mail, Dial Zero, also called "Personal Assistance" capability, allows a caller to transfer the call to another extension or human operator via a "dial zero" or comparable option.
<b>DID number block assignment and maintenance</b>	A feature provided by the telephone carrier to offer a range of consecutive telephone numbers in a new DID-PBX installation and to maintain the inventory of these phone numbers.
<b>DID/DOD two way</b>	This feature allows a central office access trunk to have both DID and DOD capabilities.
<b>Digit display</b>	A feature that provides the capability of displaying digits on the station's LCD display.
<b>Digital data</b>	Data represented by discrete values or conditions, as opposed to analog data.
<b>Digital form</b>	A discrete representation of a quantized value of a variable.
<b>Digital format</b>	Voice or data signals represented by discrete values or conditions.
<b>Digital signal 0 (DS0)</b>	A digital signal rate of 64 kb/s. The world wide standard speed for digitizing one voice conversion using pulse code modulation.

<b>Digital signal 1 (DS1)</b>	A digital signal rate of 1.544 Mb/s.
<b>Direct inward dialing (DID)</b>	The capability of dialing a call from an external party directly to a station without the assistance of an attendant.
<b>Direct outward dialing (DOD)</b>	The capability allowing an internal user to place a call to an outside party without the assistance of an attendant.
<b>Directed call pickup</b>	A feature that allows a station user to answer any calls directed to another station line dialing a pickup code from an idle or busy station.
<b>Directory assistance</b>	This service is provided by the local telephone company. It allows the subscriber to call for information about phone numbers and/or addresses.
<b>Disconnect</b>	A service order is disconnected if the action is taken after the service has been accepted.
<b>Disks/diskettes</b>	A memory system based on rotating disks coated with a magnetic recording medium.
<b>Distinctive call waiting tones</b>	A feature providing the capability of distinguishing between internal, intercom, or DID calls based on the call waiting tones.
<b>Distinctive ringing</b>	A feature providing the capability of distinguishing between internal, intercom, or DID calls based on the station ringing pattern.
<b>Diversity routing</b>	The capability to allow routing over diverse pathways to include physically separate loop exit points from the customer's site, separate cable right-of-way, and separate switching offices.

<b>Dual service</b>	Dual service is the capability to have an incoming call ring at two locations when a primary number is dialed. One location is assigned with a primary number, and the other with a secondary number (e.g., a different extension). The two locations are assumed to be served by a single wire center and are normally between buildings.
<b>Dual-tone multifrequency (DTMF) signaling</b>	A telephone signaling method employing standard combinations of 2 specific voice band frequencies, 1 from a group of 4 low frequencies and the other from a group of 4 higher frequencies.
<b>E&amp;M signaling</b>	An arrangement whereby communication between a portion of a circuit and a separate signaling unit is accomplished over 2 leads: the “E” or (“Ear”) lead which receives open or ground signals from the signaling unit, and the “M” (or “Mouth”) lead which transmits battery or ground signals to the signaling units.
<b>Electronic access</b>	The capability to access information via on-line access (dedicated or dial-up), E-mail, or facsimile.
<b>Electronics Industries Associations (EIA)</b>	A Washington, D.C. trade organization of manufactures which sets standards for use of its member companies, conducts educational programs and lobbies for members’ collectives prosperity.
<b>Encrypt</b>	To convert plain text into an unintelligible form by means of a cryptosystem.
<b>End-to-end</b>	Telecommunications service from the originating user’s terminal to the destination user’s terminal.
<b>Erlang</b>	A measurement of telephone traffic intensity. For example, one Erlang is equal to 1 full hour of use, or $60 \times 60 = 3600$ seconds of phone conversation. Traffic measured in 1 hundred call seconds (CCS) can be converted into Erlangs by multiplying by 100 and then dividing by 3600.

<b>Erlang B</b>	A probability distribution to estimate the number of telephone trunks needed to carry a given amount of traffic. Erlang B assumes that, when a call arriving at random finds all trunks busy, it vanishes (the blocked calls cleared condition).
<b>EUCL charge</b>	End User Common Line Charge, also known as Subscriber Line Charge. This charge is for the use of an End User Common Line to obtain local telephone exchange service, but does not include the provision of a telephone number, detail billing, directory listing, or intercept arrangements.
<b>Extended local calling</b>	The local phone company sometimes offers rate plans to cover an area wider than the local calling area. The rate plans are usually more expensive than the local calling plan, but less than the long distance plans.
<b>Extended superframe format (ESF)</b>	A T1 framing standard used in Wide Area Networks (WAN). With this format, 24 frames—instead of 12—are grouped together.
<b>Facsimile capability</b>	As a feature of Voice Mail, this provides the ability to create a class of service for facsimile mailbox applications. The system should permit callers to send a facsimile to a subscriber's mailbox on the system.
<b>Feature</b>	A service capability that is made available in addition to the basic capabilities associated with a service.
<b>Feature group D</b>	Also referred to as “equal access,” Feature Group D provides trunkside LATA access, affording call supervision to an Interexchange Carrier, a uniform access code (10XXX), optional calling-party identification, recording of access-charge billing details, and presubscription to a customer-specified Interexchange Carrier as defined in paragraphs 12.20 through 12.77, Section 6 of the <i>Notes on the BOC Intra-LATA Networks (SR-2275)</i> .

<b>Federal Communications Commission (FCC)</b>	The FCC is a Federal regulatory agency that was created by the Communications Act of 1934. It regulated the provision of interstate telecommunications services within the United States.
<b>Fiber optics</b>	A technology that uses light as a digital information carrier.
<b>Flexible disconnect, both/either party</b>	The capability to disconnect a call when either or both parties hang up.
<b>Foreign exchange (FX) service</b>	Enables a subscriber to receive local telephone calls from a central office that is outside the subscriber's exchange area.
<b>Four-wire circuit</b>	A transmission circuit consists of 2 pairs of 2-wire circuits. One pair is used to transmit and the other to receive. A 4-wire circuit costs more than a 2-wire circuit but provides better reception. All long distance trunks are 4-wire circuits. Subscribers can request and pay a little more to get a 4-wire local loop circuit.
<b>Frame relay</b>	A data communications transmission protocol, similar to packet switching, that is optimized for reliable transport facilities (such as fiber optic transport) that transmit at a low bit-error rate.
<b>Full-duplex operation</b>	A mode of operation in which simultaneous communication in both directions may occur between 2 terminals. Contrast with half duplex or simplex operation in which communications occur in only 1 direction at a time.
<b>Grade of service (GOS)</b>	The probability of a call being blocked during a call attempt, expressed as a decimal fraction, during the busy hour.
<b>Ground start</b>	A supervisory signal from a terminal to a switch in which 1 side of the line is temporarily grounded.
<b>Group intercom</b>	A feature allowing intercom groups to be defined. Each station within a group can reach any other station in that group by dialing a one or two digit number.

<b>Hard copy</b>	In telecommunications systems, a permanent reproduction of any part of the data transmitted through the system. The reproduction may be generated by equipment such as teletypewriter pages, continuous printed taped, facsimile pages, computer printouts, or radiophoto prints.
<b>Hunting</b>	Serial hunting: The capability to route incoming calls through a series of stations. If the first station is busy, the calls will be routed to the second station in the series, and so on. Circular hunting: The capability to route incoming calls through a series of stations. If the first station is busy, the calls will be routed to the second station in the series, and so on. If the last station in the circular hunt group is busy the call will be routed to the first station in the group. UCD hunting: the capability of distributing calls uniformly across a series of stations.
<b>Identification</b>	The process that enables recognition of an entity by a system, generally by the use of unique machine-readable user names.
<b>Immediate start</b>	A trunk signaling where pulsing is required to be received about 120 milliseconds after receipt of the connected signal.
<b>Implementation</b>	The process of adding new services or changing existing services at user locations provisioned under the MAA program.
<b>In writing</b>	the term “in writing” refers to a printed, hard copy form or as electronically-accessible via on-line messaging and/or database. Verbal communication alone is not to be considered “in writing”.
<b>Inadequate wiring</b>	Wiring or equipment that does not support service from the NID to the SDP at the performance level specified in the RFP.
<b>Inside move charge</b>	A charge for a change in SDP location ( not SDP type) within the same customer premises.

<b>Integrated services digital network (ISDN)</b>	A network that provides end-to-end digital connectivity to support a wide range of services, including voice and nonvoice services, to which users have access by a limited set of standard multipurpose user network interfaces, as defined in the CCITT I series. See Basic Rate and Primary Rate.
<b>Integrity</b>	Assurance that the received data has not been altered in an unauthorized manner from the original transmission.
<b>Intercept</b>	Calls which cannot reach their destination may be intercepted and diverted to a station attendant or a recording.
<b>Intercom dial</b>	The capability to reach another station within an intercom group by dialing one or two digits.
<b>Interconnection</b>	The linking together of systems which are not necessarily interoperable.
<b>Interexchange carrier (IXC)</b>	Any service provider offering inter-LATA telecommunications services.
<b>Intermediate distribution frame (IDF)</b>	A metal rack designed to connect cables, usually located in an equipment room or closet. Proves the connection between inter-building cabling and the intra-building cabling, i.e., between the main distribution frame (MDF) and individual phone wiring.
<b>International telephone and telegraph consultative committee (CCITT)</b>	An international organization, part of the International Telecommunications Union, that issues recommendations that are frequently adopted as standards by the telecommunications community.
<b>Internetworking</b>	The process of interconnecting a number of individual networks to provide a path from a terminal or a host on 1 network to a terminal or a host on another network. The networks involved may be of the same type, or they may be of different types. However, each network is distinct, with its own addresses, internal protocols, access methods, and administration.

<b>Interoperability</b>	The ability of each service provider to effectively and efficiently transfer all information and control data within its own network and between its network and those of other service providers so that a given service offering operates transparently and without performance degradation for users.
<b>Invoice</b>	A due and payable itemized list of goods or services from a contractor which states quantities, prices, charges, and other data.
<b>Invoicing</b>	The process of preparing and forwarding a list of charges to the Government for services rendered by the contractor.
<b>IXC POP termination charge</b>	A charge that may be imposed when a DTS circuit terminates at an IXC POP.
<b>Key telephone system</b>	In a customer environment, terminals and equipment that provides user terminals with access to a variety of telephone services without attendant assistance.
<b>Kilobyte (kB)</b>	1000 bytes.
<b>Last number redial</b>	The capability of redialing the last number dialed by pressing a feature code or button.
<b>Line hunting</b>	See Hunting.
<b>Local access and transport area (LATA)</b>	Under the terms of the Modified Final Judgment (MFJ), the geographical area within which a BOC is permitted to provide telecommunications services after divestiture by AT&T.

<b>Local area network (LAN)</b>	A data communications system that (a) lies within a limited spatial area, (b) has a specific user group, (c) has a specific topology, and (d) is not a public switched telecommunications network, but may be connected to 1. <i>Note 1:</i> LANs are usually restricted to relatively small areas, such as rooms, building, ships, and aircraft. <i>Note 2:</i> An interconnection of LANs within a limited geographical area, such as a military base, is commonly referred to as a campus area network. An interconnection of LANs over a city-wide geographical area is commonly called a MAN. An interconnection of LANs over large geographical areas is commonly called a WAN. <i>Note 3:</i> LANs are not subject to public telecommunications regulations.
<b>Local interoffice channel charge</b>	A charge based on the direct airline distance measured between the two serving wire centers in the local calling area.
<b>Local loop</b>	The service provided from the subscriber's service demarcation point to and including the telephone company's central office. It also includes any service provided by the company's central office as part of the monthly port service.
<b>Logon</b>	The procedure that is followed by a user in beginning a period of on-line terminal operation.
<b>Loop start</b>	A supervisory signal given by a telephone or PBX after the loop path to the central office is completed.
<b>Mail system redundancy</b>	As a feature of Voice Mail, this provides physical backup capability (e.g., through a dual disk drive) to prevent the loss of messages in the event of a system equipment failure.
<b>Meet me conference</b>	Capability to provide a conference bridge and line number for up to 400 participants to dial at a specified time to hold a conference.
<b>Megabyte (MB)</b>	1,000,000 bytes.
<b>Message waiting indication</b>	A visual or aural indication at a station that a message is waiting.

<b>Microwave</b>	A term applied to radio frequency wavelengths less than 30 centimeters long, corresponding to a frequency of 1 GHz or greater.
<b>Mileage</b>	The distance in miles between the 2 end points of a circuit.
<b>Modem</b>	Acronym for MOdulator-DEModulator. A device that modulates and demodulates signals. <i>Note:</i> Modems are primarily used for converting digital signals into quasi-analog signals for transmission over analog communication channels and for reconverting the quasi-analog signals into digital signals.
<b>Multi-appearance preselection and preference</b>	Provides multi-line appearance voice terminal users with options for placing or answering calls on selected appearance.
<b>Multiple appearance directory numbers</b>	A generic feature which allows a directory number to be assigned more than once to one or more telephone sets. This feature may also be referred to as shared call appearances, etc.
<b>Multiplexer</b>	Equipment that allows multiple channels to pass over a single communications circuit. An example is a T1 channel bank, which allows up to 24 voice grade lines coming out of a PBX to be multiplexed into a single T1 line.
<b>Multiplexing</b>	The division of a transmission facility into 2 or more channels either by splitting the frequency band transmitted by the channel into narrower bands, each of which constitutes a distinct channel (frequency-division multiplexing), or by allotting this common channel to several different information channels, 1 at a time, sequentially based on discreted time intervals (time-division multiplexing).
<b>Names directory</b>	As a feature of Voice Mail, this provides callers with the ability to send message to end users on the system via a spell-by-name directory.

<b>Narrowband</b>	As in a narrowband data, narrowband switched services, or narrowband signal. A data stream whose digital signal representation has an essential spectral content that is limited to that which can be contained within a voice channel of nominal 4-kHz bandwidth.
<b>National security emergency preparedness (NS/EP) requirements</b>	As used in this document, National Security Emergency Preparedness (NS/EP) requirements are intended to maintain a state of readiness or respond to and manage an event or crisis (local, national, or international) that causes or could cause injury or harm to the population, damage to or loss of property, or degrade or threaten the security posture of the United States.
<b>NBD initial price</b>	The valid initial units of usage-sensitive calls during Normal Business Day (NBD is defined in Section B.1.3) are 1 minute for CSS.
<b>Network</b>	(a) An interconnection of 3 or more communicating entities and (usually) 3 or more nodes. (b) A combination of passive or active electronic components that serves a given purpose.
<b>Network interface device (NID)</b>	The NID is located at the demarcation point between the customer's equipment and the network as defined by the Federal Communications Commission (FCC) and the Public Utility Commission (PUC) and typically provides network protection, test access, and termination functions.
<b>Normal business day (NBD) additional price</b>	The valid increments of usage-sensitive calls during Normal Business Day (NBD is defined in Section B.1.3) are 1 minute for CSS.
<b>North American numbering plan (NANP)</b>	A numbering plan that allows all stations conforming to the 10-digit dialing pattern of the PSN to be accessed. The pattern is of the form NPA-NXX-XXXX where NPA equals Numbering Plan Area (Area Code); N = 2-9; P = 0-9; A = 0-9; and X = 0-9.

<b>NPANXX</b>	NPA is the Numbering Plan Area, also known as the area code, and NXX is the first 3 digits in a seven-digit local telephone number which identifies the central office that serves the phone number. When specified alone, originating NPANXX is implied.
<b>NPANXX group</b>	A group of NPANXXs, determined by the offeror, that have the same MAA service rates.
<b>Number portability</b>	Number portability is the ability of a user of telecommunications services to retain, at the same location or at other locations within the same rate center, existing telecommunications numbers without impairment of quality, reliability, or convenience when switching from one telecommunications carrier to another.
<b>Off-hook time out</b>	The capability of a switch to detect and react to an off-hook condition over a period of time before reception of dialing information or after call disconnect.
<b>Off-net call</b>	A call that originates from an SDP on an MAA contractor's network and terminates on an SDP on a different contractor's network, but is within the MAA service area (e.g., contractor 1 network to contractor 2, 3, etc. network).
<b>Off-premises switch-based voice service</b>	Off-premises switch-based voice services refer to voice services for a large number of users that can be provided via various solutions. Off-premises switch-based voice service is a set of capabilities and features that are commonly provided by Centrex-like or PBX-like services and features. Off-premises switched-based voice service is not located in Government facilities except at locations with existing on-premises PBX.
<b>On-line</b>	Electronic availability on demand from a computer-based system without mounting removable media such as magnetic tape or disks.
<b>On-net call</b>	A call that originates from an SDP on an MAA contractor's network and terminates on an SDP on the same MAA contractor's network (e.g., contractor 1 network to contractor 1 network).

<b>Operator assistance</b>	Calls completed or billed with the live or mechanical assistance by the telephone company's operator center.
<b>Operator assistance-busy line verification</b>	A feature that allows an operator to determine whether a busy line is in use.
<b>Operator assistance-busy line verification with interrupt</b>	A feature that allows an operator to break into an existing conversation and converse with one or both parties.
<b>Originating NPANXX group</b>	The area that includes the group of NPANXXs where a service originates. See Section J.1.1 for the list of valid originating NPANXXs.
<b>Other direct costs (ODC)</b>	Costs associated with services that are within the scope of the contract but are not priced under the pricing structures provided in Section B.
<b>Outage</b>	A telecommunication service condition wherein a user is deprived of service because of a malfunction of the communication system.
<b>Outside move charge</b>	A charge for a change in SDP location (not SDP type) to a different customer premises.
<b>Outside normal business day (ONBD) additional price</b>	The valid increments of usage-sensitive calls during Outside Normal Business Day (ONBD is defined in Section B.1.3) are 1 minute for CSS.
<b>Outside normal business day (ONBD) initial price</b>	The valid increments of usage-sensitive calls during Outside Normal Business Day (ONBD is defined in Section B.1.3) are 1 minute for CSS.
<b>Packet switching</b>	A system in which messages are broken down into smaller units called packets, which are then individually addressed and routed through the network.

<b>Packet switching network</b>	A network designed to carry data in the form of packets. The packet format, internal to the network, may require conversion at a gateway.
<b>Paging/outcall capability</b>	As a feature of Voice Mail, this is the ability to create a class of service that can notify a subscriber of a new message via either a page or telephone call.
<b>Password</b>	A word, alphanumeric character, or combination that permits access to otherwise inaccessible data, information, or facilities.
<b>Personalized ringing</b>	Allows users of certain voice terminals to uniquely identify their own calls. Each user can choose one of a number of possible ringing patterns.
<b>Point of presence (POP)</b>	An Interexchange Carrier's point of interface with a Local Exchange Carrier.
<b>Pre-subscribed interexchange carrier (PIC) change</b>	The capability for a telephone user to change to another interexchange carrier that is to be used with 1+ dialing.
<b>Price</b>	The charge for the associated price element.

<b>Price element</b>	<p>An individual cell in a price table. A price element cannot be ordered from the contract. A price element captures the following dimensions of the MAA pricing structure into a single value:</p> <ul style="list-style-type: none"><li>(a) Year (Time dimension)</li><li>(b) Price component for a Particular CLIN (Service dimension)</li><li>(c) NPANXX Groups (Geographic dimension where applicable)</li></ul> <p>Examples of a price element are:</p> <ul style="list-style-type: none"><li>(a) Year 1 Monthly Recurring Charge for a CSS Analog Business Line for NPANXX Group 2</li><li>(b) Year 3 Service Initiation Charge for CSS Analog Centrex for NPANXX Group 1</li><li>(c) Year 5 Monthly Recurring Charge for CSS Analog Centrex Voice Mail Feature</li><li>(d) Year 7 One-time charge for moving an analog business line</li></ul>
<b>Price per mile</b>	<p>The unit price per each mile specified in the mileage field.</p>
<b>Primary directory listing</b>	<p>A primary directory listing is listed in the telephone directory published by the dominant exchange service provider in the customer's exchange area of the station number which is designated as the customer's main billing number. It contains the name of the customer, or the name under which a business is regularly conducted, as well as the address and telephone number of the customer.</p>
<b>Primary rate</b>	<p>The transmission rate supported by the ISDN primary rate interface, defined on CCITT I.412 as 1536 kb/s and composed of 23 B (64 kb/s) and 1 D (64 kb/s) channels.</p>
<b>Privacy</b>	<p>A feature that provides the capability for a user to prevent others from entering into a connection on a multi-appearance line.</p>

<b>Private branch exchange (PBX)</b>	<p>Simply, a communications switching system serving an organization and normally located on the organization's premises.</p> <p>Specifically, communications switching equipment conforming to the EIA Standards RS-464 and RS-464-1, published in December 1977 and August 1982, and meeting FCC registration requirements for interconnection to the Public Switched Network.</p>
<b>Provisioning</b>	<p>The act of supplying telecommunications service to a user, including all associated transmission, switching, equipment, software, wiring, implementation services, and support systems.</p>
<b>Public switched network (PSN)</b>	<p>Any common carrier network that provides circuit switching among public users. <i>Note:</i> The term is usually applied to the Public Switched Telephone Network, but it could be applied more generally to other switched networks, e.g., public data networks and public packet-switched data networks.</p>
<b>Reconfiguration charges</b>	<p>Charges that apply to reconfiguration that cannot be accomplished using software reconfiguration by customer.</p>
<b>Replaced date</b>	<p>Date on which a quoted price is replaced.</p>
<b>Robbed-bit signaling</b>	<p>A DSI or T1 signaling mechanism. Bit robbing is the technique to steal bits from the speech path for in-band signaling and use the rest of the bits to create the original electrical analog signal i.e., the original sound.</p>

<b>Service delivery point (SDP)</b>	The point at which a service is delivered by the contractor to the user. It is defined in terms of location, contractor facilities, interface, and user facilities. The SDP is the interface point for the physical or logical delivery of a service, is 1 of the points at which performance parameters are measured to determine compliance with the contract, and the point used by the contractor to identify the charges for services rendered. Each SDP is defined as the combined physical, electrical, and service interface between the serviced network and Government premises equipment, off-premises switching and transmission equipment (including but not limited to, those provided by Centrex and telephone central offices), and other facilities, as well as the POP of the MAA contractor's transport network service provider in the future. SDPs may be located on or off Government premises.
<b>Service initiation charge (SIC)</b>	Those fees established by the contractor that enable new subscribers to access the service or existing subscribers to add a new feature. These are by definition one-time fees for physical and logical connection establishment within the network.
<b>Service profile identification and directory (SPID)</b>	Is a service profile identification used for ISDN BRI which allows automatic assignment of terminal identification attached to BRI.
<b>Service-based approach</b>	In a service-based approach, the Government delegates responsibility for transmission, switching, or support service functions to a telecommunications service provider. In a facilities-based approach, the Government retains ownership of some of the required network assets or "facilities."
<b>Signal system number 7</b>	Signal system No. 7 is a digital channel signaling for out-of-band signaling for call control, e.g., ISDN calls.
<b>Signaling</b>	The information exchange concerning establishment and control of a connection and management of the network, in contrast to user information transfer.

<b>Six-way conference calling</b>	See conference calling.
<b>Software reconfiguration by customer</b>	The capability allowing a customer organization to manage line and feature arrangements without going through service-order procedures. Typical customer initiated tasks would include adding, deleting, and changing station features; rearranging or swapping existing stations; verifying status of change orders; and reviewing current status of line and station configurations.
<b>Specification</b>	A document intended primarily for use in a procurement that clearly and accurately describes the essential technical requirements for items, materials, or services, including the procedure by which it will be determined that the requirements have been met.
<b>Speed calling</b>	A feature that allows a station user to reach any of a preselected group of phone number by dialing one or more digits.
<b>Start date</b>	Date on which a quoted price becomes effective.
<b>Station</b>	A data terminal or voice terminal used to access a network.
<b>Station message desk interface (SDMI)</b>	The interface between a voice mail system and an external local exchange carrier office.
<b>Station-to-station dialing</b>	A feature that allows a station user to directly dial other stations within the same system without the assistance of the attendant. The number of digits required depends on the numbering plan engineered for the customer.
<b>Stop date</b>	Date on which a quoted price is no longer effective.
<b>Supervised 700 ms disconnect</b>	This feature provides the capability to extend disconnect supervision timing to 700 ms on loop start lines.

<b>Synchronous transmission</b>	Digital transmission in which the time interval between any 2 similar significant instants in the overall bit stream is always an integral number of unit intervals. <i>Note:</i> “ <i>Isochronous</i> ” and “ <i>anisochronous</i> ” are characteristics, while “ <i>synchronous</i> ” and “ <i>asynchronous</i> ” are relationships.
<b>T1</b>	Digital services that provide transmission between 2 stations at an aggregate data rate of 1.544 Mb/s.
<b>T3</b>	Digital services that provide transmission between 2 stations at an aggregate data rate of 44.736 Mb/s.
<b>Tandem switch</b>	A switch that is capable of interconnecting PBX’s or end offices. In the North American telephone network prior to divestiture, tandem switches were also known as Class 4 switches, whereas central offices or serving offices were known as Class 5 switches.
<b>Telecommunications</b>	Any process that permits the passage of information from a sender to 1 or more receivers in any usable form by means of any electromagnetic system.
<b>Telecommunications industry association (TIA)</b>	Washington lobby and trade association providing communications and information technology products, materials, systems, distribution services, and professional services.
<b>Teleconferencing</b>	A conference between persons remote from 1 another but linked by a telecommunications system. <i>Note:</i> A teleconference is supported by audio and/or video communication equipment that enables the live exchange of information among remotely located persons and machines.
<b>Terminating NPANXX group</b>	The area that includes the group of NPANXXs where a service terminates. See Section J.1.2 for the list of valid terminating NPANXXs.
<b>Three-way conference calling</b>	See conference calling.

<b>Tie trunk</b>	A dedicated circuit linking two PBXs, assumed to be served by a single wire center. If the two PBXs are served by different wire centers, the trunking between the wire centers is priced according to MAA Dedicated Transmission Service Local Interoffice Channel price tables.
<b>Traffic</b>	(a) The information moved over a communications channel. (b) A quantitative measurement of the total messages and their length, expressed in calls, erlangs, 1 hundred call seconds (CCSs), or other units, during a specified period of time.
<b>Transmission facility</b>	The physical wires, amplifiers, and other equipment used to transmit an electrical signal.
<b>TSP level change</b>	Change level to another of five TSP levels.
<b>TSP provisioning</b>	Priority installation of a new circuit.
<b>TSP restoration</b>	Establishes and maintains a restoration priority for a circuit.
<b>Two-wire circuit</b>	A transmission circuit composed of 2 wires - signal and ground - used to both send and receive information. Local loop circuits are generally 2-wire circuits.
<b>Unit price</b>	A unit price is constructed from the price elements associated with a CLIN. For example, a CSS line incurs the following costs: one-time service initiation charge, monthly recurring line charge, EUCL charge.
<b>Value-added service</b>	A service that extends the basic service, such as electronic mail service over a Packet Switched Service or voice mail service over a Switched Voice Service.
<b>Vanity number</b>	A directory number that can be dialed using a meaningful alphanumeric representation.

<b>Virtual circuit</b>	A communication arrangement in which data from a source user may be passed to a destination user over various real circuit configurations during a single period of communication.
<b>Voice mail</b>	A voice messaging system.
<b>Wink start</b>	Short duration off hook signal.
<b>X.25</b>	ITU recommendation that specifies the interface between user data terminal equipment and packet-switching data circuit-terminating equipment.

## J.5 Small, Small Disadvantaged, Women-Owned Small, and HUBZone Small Business Concerns Subcontracting Plan Outline

GENERAL SERVICES ADMINISTRATION (GSA)  
SMALL, SMALL DISADVANTAGED, WOMEN-OWNED SMALL, AND HUBZone  
SMALL BUSINESS CONCERNS  
SUBCONTRACTING PLAN OUTLINE (MODEL)

*The following outline meets the minimum requirements of Section 8(d) and the Federal Acquisition Regulation (FAR) Subparts 19.7. It is intended to be used as a guideline. It is not intended to replace any existing corporate plan, which may be more extensive. If assistance is needed to locate small business sources, contact the Office of Enterprise Development at, 18<sup>th</sup> and F St .NW, Washington, DC 20405 (Phone: (202) 501-1021 or Fax (202) 208-5938. Please note that GSA has subcontracting goals of \_\_\_\_\_ for Small Business, \_\_\_\_\_ for Small Disadvantaged Business (SBD), \_\_\_\_\_ for Women-Owned Small Business (WOSB), and \_\_\_\_\_ for HUBZone Small Business Concerns for fiscal year \_\_\_\_\_.*

Identification Data: \_\_\_\_\_  
Company Name: \_\_\_\_\_  
Address: \_\_\_\_\_  
Date Prepared: \_\_\_\_\_ Solicitation Number: \_\_\_\_\_  
Item/Service: \_\_\_\_\_

1. TYPE OF PLAN: (Check only 1).

INDIVIDUAL PLAN: *In this type of plan all elements are developed specifically for this contract and are applicable for the full term of this contract.*

MASTER PLAN: *In this type of plan, goals are developed for this contract; all other elements are standard. The master plan must be approved once every 3 years. Once incorporated into a contract with specific goals, it is valid for the life of the contract.*

COMMERCIAL PRODUCTS PLAN: *This type of plan is used when the contractor sells large quantities of off-the-shelf commodities to many Government agencies. Plans/goals are negotiated with the initial agency on a company-wide basis rather than for individual contracts. The plan is effective only during year approved. The contractor must provide a copy of the initial agency approval, AND MUST SUBMIT AN ANNUAL SF 295 TO \_\_\_\_\_ WITH A BREAKOUT OF SUBCONTRACTING PRORATED FOR \_\_\_\_\_.*

1           2. GOALS: *State separate dollar and percentage goals for small business, small*  
 2 *disadvantaged business, women-owned small, and HUBZone business concerns in the*  
 3 *following format.*

4           A. Estimated dollar value of all planned subcontracting, i.e., to all types of business  
 5 concerns under this contract is:

ESTIMATED DOLLAR VALUE OF ALL PLANNED SUBCONTRACTING				
BASE	1 <sup>ST</sup> OPTION	2 <sup>ND</sup> OPTION	3 <sup>RD</sup> OPTION	4 <sup>TH</sup> OPTION
\$	\$	\$	\$	\$

6           B. Estimated dollar value and percentage of planned subcontracting with large  
 7 businesses (all business concerns classified as other than small) is:

SUBCONTRACTING TO LARGE BUSINESS CONCERNS				
BASE	1 <sup>ST</sup> OPTION	2 <sup>ND</sup> OPTION	3 <sup>RD</sup> OPTION	4 <sup>TH</sup> OPTION
\$	\$	\$	\$	\$
%	%	%	%	%

8           C. Estimated dollar value and percentage of planned subcontracting to small business  
 9 concerns is:

45 3. PROGRAM ADMINISTRATOR:

46 *FAR 19.704(a)(2) requires information about the company employee who will administer*  
47 *the subcontracting program. Please provide the name, title, address, phone number,*  
48 *position within the corporate structure and the duties of that employee.*

49 Name:  
50 Title:  
51 Address:  
52 Telephone:  
53 Position:

54 Duties: The Program Administrator shall have general overall responsibility for the  
55 Contractors subcontracting program, i.e., developing, preparing, and executing individual  
56 subcontracting plans and monitoring performance relative to this particular plan. These  
57 duties included but are not limited to, the following activities.

58 A. Developing and promoting company/division policy statements that demonstrate the  
59 company's/division's support for awarding contracts and subcontracts to small, small  
60 disadvantaged, women-owned small, and HUBZone small business concerns.

- 61 B. Developing and maintaining bidders' lists of small, small disadvantaged,  
62 women-owned small, and HUBZone small business concerns from all possible sources.
- 63 C. Ensuring periodic rotation of potential subcontractors on bidders' lists.
- 64 D. Assuring that small, small disadvantaged, women-owned small, and HUBZone  
65 small businesses are included on the bidders' list for every subcontract solicitation for  
66 products and services they are capable of providing.
- 67
- 68 E. Ensuring that subcontract procurement "packages" are designed to permit the  
69 maximum possible participation of small, small disadvantaged, and women-owned small  
70 businesses.
- 71 F. Reviewing subcontract solicitations to remove statements, clauses, etc., which might  
72 tend to restrict or prohibit small, small disadvantaged, women-owned small, and HUBZone  
73 small business concern participation.
- 74 G. Ensuring that the subcontract bid proposal review board documents its reasons for not  
75 selecting any low bids submitted by small, small disadvantaged, women-owned small, and  
76 HUBZone small business concerns.
- 77 H. Overseeing the establishment and maintenance of contract and subcontract award  
78 records.
- 79 I. Attending or arranging for the attendance of company counselors at Business  
80 Opportunity Workshops, Minority Business Enterprise Seminars, Trade Fairs, etc.
- 81 J. Directly or indirectly counseling small, small disadvantaged, women-owned small,  
82 and HUBZone small business concerns on subcontracting opportunities and how to prepare  
83 bids to the company.
- 84 K. Providing notice to subcontractors concerning penalties for misrepresentations of  
85 business status as small, small disadvantaged, women-owned small, or HUBZone small  
86 business concerns for the purpose of obtaining a subcontract that is to be included as part or  
87 all of a goal contained in the contractor's subcontracting plan.
- 88 L. Conducting or arranging training for purchasing personnel regarding the intent and  
89 impact of Section 8(d) of the Small Business Act on purchasing procedures.
- 90 M. Developing and maintaining an incentive program for buyers, which supports the  
91 subcontracting, program.
- 92 N. Monitoring the company's performance and making any adjustments necessary to  
93 achieve the subcontract plan goals.
- 94 O. Preparing and submitting timely reports.
- 95 P. Coordinating the company's activities during compliance reviews by Federal  
96 agencies.

97 4. EQUITABLE OPPORTUNITY

98 *FAR 19.704(a)(3) requires a description of the efforts the contractor will make to ensure*  
99 *that small, small disadvantaged, women-owned small, and HUBZone small business*  
100 *concerns will have an equitable opportunity to compete for subcontracts. These efforts*  
101 *include, but are not limited to, the following activities:*

102 A. Outreach efforts to obtain sources:

103 \_\_\_ Contacting minority and small business trade associations

104 \_\_\_ Contacting business development organizations

105 \_\_\_ Requesting sources from the Small Business Administration's Procurement  
106 Automated Source System (PASS)

107 \_\_\_ Attending small, minority, women-owned small, and HUBZone small business  
108 concern procurement conferences and trade fairs

109 B. Internal efforts to guide and encourage purchasing personnel:

110 \_\_\_ Presenting workshops, seminars and training programs

111 \_\_\_ Establishing, maintaining and using small, small disadvantaged, women-owned  
112 small, and HUBZone small business concern source lists, guides and other data for  
113 soliciting subcontracts

114 \_\_\_ Monitoring activities to evaluate compliance with the subcontracting plan

115 C. Additional efforts: (Please describes.)

116 \_\_\_\_\_  
117 \_\_\_\_\_  
118 \_\_\_\_\_

119 5. CLAUSE INCLUSION AND FLOW DOWN

120 *FAR 19.704(a)(4) requires that your company include FAR 52.2198, "Utilization of*  
121 *Small, Small Disadvantaged, Women-owned Small Business Concerns", in all subcontracts*  
122 *that offer further subcontracting opportunities. Your company must require all*  
123 *subcontractors, except small business concerns, that receive subcontracts in excess of*  
124 *\$500,000 (\$1,000,000 for construction) to adopt and comply with a plan similar to the plan*  
125 *required by FAR 52.219-9, "Small, Small Disadvantaged, and Women-Owned Small*  
126 *Business and Business Subcontracting Plan."*

127 Your company agrees that the clause will be included and that the plans will be reviewed  
128 against the minimum requirements for such plans. The acceptability of percentage goals for  
129 small, small disadvantaged, women-owned small, and HUBZone small business concerns  
130 must be determined on a case-by-case basis depending on the supplies and services involved,  
131 the availability of potential small, small disadvantaged, women-owned small, and HUBZone

132 small business concerns subcontractors and prior experience. Once the plans are negotiated,  
133 approved, and implemented, the plans must be monitored through the submission of periodic  
134 reports, including Standard Form (SF) 294 and SF 295 reports.

135 In accordance with policy letters published by the Office of Federal Procurement Policy,  
136 such assurance shall describe the offer's procedures for the review, approval and monitoring  
137 for compliance with such subcontracting plans.

138 6. REPORTING AND COOPERATION

139 *FAR 19.704(a)(5) requires that your company (1) cooperate in any studies or surveys as*  
140 *may be required, (2) submit periodic reports which show compliance with the subcontracting*  
141 *plan; (3) submit Standard Form (SF) 294, "Subcontracting Reports for Individual*  
142 *Contracts," and SF 295, "Summary Subcontract Report," in accordance with the*  
143 *instructions on the forms; and (4) ensure that subcontractors agree to submit SF 294 and SF*  
144 *295. Both the Director, Office of Small and Disadvantaged Business Utilization and the*  
145 *Small Business Specialist must receive the report(s) within 30 days after the close of each*  
146 *calendar period. That is:*

147

148	<u>Calendar Period</u>	<u>Report Due</u>	<u>Date Due</u>	<u>Send Report To</u>

159				Office of Enterprise
160				Development (OED)

161

162 \*SF 295 Shall also be submitted to the SBA Commercial Market Representative

*Small Business Technical Advisor's address is: (To Be Completed by Contracting Officer)	*Associate Administrator, Office of Enterprise Development address is: 18 <sup>th</sup> and F Street, NW Room 6029 Washington, DC 20405
---	--

163

164 7. RECORD KEEPING

165 *FAR 19.704(a)(6) requires a list of the types of records your company will maintain to*  
166 *demonstrate the procedures adopted to comply with the requirements and goals in the*  
167 *subcontracting plan. These records will include, but not be limited to, the following:*

168 A. Small, small disadvantaged, women-owned small, and HUBZone small business  
169 concern source lists, guides, and other data identifying such vendors.

170 B. Organizations contacted for small, small disadvantaged, women-owned small, and  
171 HUBZone small business sources.

172 C. On a contract-by-contract basis, records on all subcontract solicitations over \$100,000  
173 which indicate for each solicitation (1) whether small business concerns were solicited, and  
174 if not, why not; (2) whether small disadvantaged business concerns were solicited, and if not,  
175 why not; (3) whether women-owned small and HUBZone small business concerns were  
176 solicited, and if not, why not; and (4) reasons for the failure of solicited small, small  
177 disadvantaged, women-owned small, HUBZone small business concerns to receive the  
178 subcontract award.

179 D. Records to support other outreach efforts, e.g., contacts with minority and small  
180 business trade associations, attendance at small, minority, women-owned small, HUBZone  
181 small business procurement conference and trade fairs.

182 E. Records to support internal activities to (1) guide and encourage purchasing  
183 personnel, e.g., workshops, seminars, training programs, incentive awards; and (2) monitor  
184 activities to evaluate compliance.

185 F. On a contract-by-contract basis records to support subcontract award data including  
186 the name, address and business size of each subcontractor. (This item is not required for  
187 company or division-wide commercial product plans).

188 G. Other records to support your compliance with the subcontracting plan: (Please  
189 describe)

190 \_\_\_\_\_  
191 \_\_\_\_\_  
192 \_\_\_\_\_  
193 \_\_\_\_\_

194 8. TIMELY PAYMENTS TO SUBCONTRACTORS

195 *FAR 19.702 requires your company to establish and use procedures to ensure the timely*  
196 *payment of amounts due pursuant to the terms of your subcontracts with small, small*  
197 *disadvantaged, women-owned small, and HUBZone small business concerns and*

198 Your company has established and uses such procedures:

199 9. DESCRIPTION OF GOOD FAITH EFFORT

200 *Maximum practicable utilization of small, small disadvantage, women-owned small, and*  
201 *HUBZone small business concerns as subcontractors in Government contracts is a matter of*  
202 *national interest with both social and economic benefits. When a contractor fails to make a*  
203 *good faith effort to comply with a subcontracting plan, these objectives are not achieved,*  
204 *and 15 U.S.C. 637(d)(4J(F) directs that liquidated damages shall be paid by the contractor.*  
205 *In order to demonstrate your compliance with a good faith effort to achieve the small, small*  
206 *disadvantaged, women-owned small, and HUBZone small business subcontracting goals,*  
207 *outline the steps your company plans to take. These steps will be negotiated with the*  
208 *contracting officer prior to approval of the plan.*

209 \_\_\_\_\_

210 \_\_\_\_\_

211 \_\_\_\_\_

212 The contractor is advised that this subcontracting plan will be made a material part of the  
213 contract and that the submission of the SF294 and SF295 will be made a line item  
214 deliverable in the contract.

264 **J.6 Requirements Matrixes**

265 Tables J.6-1a, J.6-1b, J.6-2a and J.6-2b comprise the Albuquerque technical and  
266 management requirements checklists referred to in Section L.22, *Detailed Proposal*  
267 *Instructions*. These tables list all management and technical requirements provided in the  
268 Albuquerque MAA RFP Sections B, C, G, and J.

269 For each technical and management requirement in Tables J.6.1a and J.6-2a, a narrative  
270 response is required. The last column in this table will be used by Government proposal  
271 evaluators to document whether or not the proposal is in compliance and whether any  
272 exceptions are noted.

273 For each requirement in Tables J.6-1b and J.6-2b, offerors must stipulate compliance or  
274 conformance. Tables J.6-1b and J.6-2b must be signed by an authorized corporate officer  
275 indicating agreement and commitment to full compliance and contract performance.

276 Tables J.6-3a and J.6-3b comprise the Albuquerque price requirements. For each  
277 requirement in Table J.6-3a, a narrative response is required. For each requirement in Table  
278 J.6-3b, offerors must stipulate compliance or conformance. Table J.6-3b must be signed by  
279 an authorized corporate officer indicating agreement and commitment to full compliance and  
280 contract performance.

281 Tables J.6-4 through J.6-7 are the Technical and Management, Price, and Business  
282 Proposal Conformance Checklists that will be used by the Government to evaluate offeror's  
283 conformance with the proposal instructions in Section L. Offerors shall complete the  
284 proposal reference section in each checklist.

**Table J.6-1a. Albuquerque Technical Requirements – Narrative Response Required**

#	RFP Section	Statement of Requirement	Proposal rence	Comply (Gov Use)
1.	B.2.2	The offeror shall address in its RFP proposal its intention to provide on-net calling between MAA contractor's networks and the projected time frame when this capability can be implemented (i.e., at award, or a period shortly after award).		
2.	C.4.1	The offeror shall describe the proposed technical approach for providing Albuquerque MAA-specific services.		
3.	C.4.1	The offeror shall describe the proposed system architecture for the Albuquerque MAA reflecting the engineering data provided with this solicitation: (f) The overall network architecture, including the types and capacity of the transmission and switching media, the transmission facility(ies) configuration, the type of equipment used in the network, and how the network will be used to fulfill Albuquerque MAA service requirements. (g) The anticipated local loop configuration to the NID for each location defined in Section J.2.2 (e.g., service category, User to Network Interface, trunk size) in sufficient detail for the Government to determine that performance parameters are satisfied. (h) The facilities that will be part of the proposed MAA network to include identification of ownership (e.g., offeror owned, subcontractor owned).		
4.	C.2.1.6	For Albuquerque, the contractor shall support the existing Government-owned telephone sets described in Section J.2.1. The contractor shall identify the necessary operations, procedures, software, and equipment to ensure service compatibility		
5.	J.1.2	The Transition Plan and the proposed system architecture shall describe the solution used to accommodate the approximately 1,043 NEC Model Dterm Series III telephone sets.		

**Table J.6-1b. Albuquerque Stipulated Technical Requirements**

#	RFP Section	Statement of Requirement
1.	C.2.1.6	The contractor shall continue to use the existing telephone numbers assigned to MAA stations when these stations are transitioned from existing Government networks/systems to the contractor's network.
2.	C.2.2.1.1.1 (a)	The contractor shall incorporate any changes in the NANP in both routing and automatic route selections (ARS) tables as necessary.
3.	C.2.2.1.1.1.2 (t-u)	For non-ISDN off-premises switch-based voice basic service, the contractor shall provide: (t) Reserved (u) Software Reconfiguration by Customer.
4.	C.2.2.1.1.1.5 (a-g)	In addition to the common basic capabilities specified in Section C.2.2.1.1.1, the contractor shall provide the following capabilities for ISDN business line basic service: (a) Caller Identification (ID) (b) Data Call Setup (c) Data Hot Line (d) Data Line Privacy (e) Default Dialing (SDP 6 only) (f) Personalized Ringing (SDP 6 only) (g) Three-way Conference Calling.
5.	C.2.2.1.1.1.6 (a-ee)	In addition to the common basic capabilities specified in Section C.2.2.1.1.1 and C.2.2.1.1.2, the contractor shall provide the following capabilities for ISDN off-premises switch-based voice basic service: (a) Call Back/Camp On (b) Call Consultation (c) Call Forward - Busy (d) Call Forward - Don't Answer (e) Call Forward - Variable (f) Call Hold (g) Call Hunting (h) Call Park (i) Call Pick-Up (j) Call Transfer (k) Call Waiting (l) DID (m) DOD (n) Last Number Redial (o) Message Waiting Indication (p) Speed Calling (q) Three-Way Conference Calling (r) Blocking of Selected Numbers (s) Class of Service (as specified in Section C.2.2.1.1.1.2) (t) Software Reconfiguration by Customer (u) Caller ID

**Table J.6-1b. Albuquerque Stipulated Technical Requirements**

#	RFP Section	Statement of Requirement
		(v) Customized Group Dialing Plan (w) Data Call Setup (x) Data Hot Line (y) Data Line Privacy (z) Default Dialing (SDP 6 only) (aa) Distinctive Ringing (SDP 6 only) (bb) Intercom Dial (cc) Multi-Appearance Preselection and Preference (SDP6) (dd) Multiple Appearance Directory Number (ee) Personalized Ringing (SDP 6 only).
6.	C.2.2.1.1.1.7 (a-c)	In addition to the common basic capabilities specified in Section C.2.2.1.1.1, the contractor shall provide the following capabilities for ISDN access to existing key systems: (a) Line Hunting (b) Caller ID (c) Three-way Conference Calling.
7.	C.2.2.1.1.1.8 (a)	In addition to the common basic capabilities specified in Section C.2.2.1.1.1, the contractor shall provide the following capability for ISDN access to existing PBX systems basic service: (a) Caller ID.
8.	C.2.2.1.1.2 (f-k)	For all non-ISDN and ISDN business lines, off-premises switch-based voice service, access to existing key systems, and access to existing PBX systems, the contractor shall provide the following features: (f) Call Return (e.g., *69) (g) Call Screen (h) Foreign Exchange Service (i) Number Portability. The contractor shall retain all existing telephone line numbers at a Government location. Remote call forwarding is not a compliant solution for number portability. (j) Anonymous Call Rejection (k) Meet Me Conference for up to 400 participants.
9.	C.2.2.1.1.2 (p) (8) (p) (10)	All calls to voice mail that originate in the contractor's network shall be treated as on-net calls. For all business lines and off-premises switch-based voice service, the contractor shall provide voice mail with the following features: (8) For the Albuquerque MAA RFP, the incoming message duration shall be 120 seconds (10) Provide, at a minimum, thirty minute storage capability for all incoming messages per individual voice mailbox.
10.	C.2.2.1.1.2.1 (j-n)	For non-ISDN business line service, the contractor shall provide the following features: (j) Bridging Service (k) Call Trace

**Table J.6-1b. Albuquerque Stipulated Technical Requirements**

#	RFP Section	Statement of Requirement
		(l) Customized Intercept and Recorded Announcement (m) Dual Service (n) Six-Way Conference Calling
11.	C.2.2.1.1.2.2 (m-t)	For non-ISDN off-premises switch-based voice service, the contractor shall provide the following features: (m) Attendant Multi-Line Hunt Group (n) Blocking Dialed Carrier Identification Code (CIC) (o) Bridging Service (p) Call Forward Remote Access (q) Call Trace (r) Customized Intercept and Recorded Announcement (s) Directed Call Pickup (t) Six-Way Conference Calling.
12.	C.2.2.1.1.2.3 (c-e)	For non-ISDN access to existing key systems, the contractor shall provide the following features: (c) Blocking Dialed Carrier Identification Code (CIC) (d) Call Trace (e) E911-Centralized Automatic Message Accounting (CAMA) Trunk (EIA/TIA-689)
13.	C.2.2.1.1.2.4 (g-i)	For non-ISDN access to existing PBX systems, the contractor shall provide the following features: (g) Blocking Dialed Carrier Identification Code (CIC) (h) Call Trace (i) E911-CAMA Trunk (EIA/TIA-689).
14.	C.2.2.1.1.2.5 (a-l)	In addition to the features specified in Section C.2.2.1.1.2, the contractor shall provide the following features for ISDN business line service:: (a) Additional Directory Number, i.e., Service Profile Identifier and Directory (SPID) (b) Authorization Codes (c) Billing Account Code –Verified (d) Billing Account Code – Unverified (e) Blocking Dialed Carrier Identification Code (CIC) (f) Bridging Service (g) Call Forwarding (h) Call Trace (e.g., *57) (i) Call Waiting (j) Customized Intercept and Recorded Announcement) (k) Six-way Conference Calling (l) Speed Calling.
15.	C.2.2.1.1.2.6 (a-o)	In addition to the features specified in Section C.2.2.1.1.2, the contractor shall provide the following features for ISDN off-premises switch-based voice service:

**Table J.6-1b. Albuquerque Stipulated Technical Requirements**

#	RFP Section	Statement of Requirement	Proposal Reference	Comply (Gov Use)
1.	G.1.2	The Contractor shall provide an organizational structure for the management and administration of the Albuquerque Metropolitan Area Acquisition (MAA) contract.		
2.	G.1.2	The contractor shall identify a Program Manager and a Project Manager for the Albuquerque MAA.		
3.	G.1.2	A list of all points of contact for the Albuquerque MAA shall be provided including telephone and pager numbers.		
4.	G.5	The contractor shall provide the list of trouble handling points of contacts, including names and phone number for the Albuquerque MAA.		
5.	G.6 and L.20.1.2	The offeror shall provide a sample of all reports described in Section G.6 that were not submitted in the RQS proposal and any known format/content changes to the RQS samples specifically to be use in Albuquerque.		
6.	C.4.1.1	The offeror shall illustrate its proposed approach to managing and controlling the operations of each proposed subcontractor.		

303

304

**Table J.6-2b. Albuquerque Stipulated Management Requirements**

#	RFP Section	Statement of Requirement
1.	C.3.6.1	The contractor shall provide initial end user training for the approximate number of users specified in Section J.2.2.
2.	C.3.6.2	The contractor shall provide system administrator training for the approximate number of GDRs and ADRs specified in Section J.2.2.
3.	G.1.2 (g-i)	In addition to the requirements set forth in the RQS, the organization structure shall include personnel to perform the following functions: (g) Serve as the point of contact to interface with the Government (GSA and customer organizations) on issues related to trouble reporting and trouble report resolution. (h) Provide copies of trouble reports when requested by the Government (GSA and customer organizations) (i) Report to the COTR within four hours upon notice of an NS/EP event.
4.	G.3.1	The contractor shall provide number portability.
5.	G.3.2	At Government request and when available, the contractor shall provide the means necessary to allow customer organizations the ability to make internal software reconfigurations and software changes. All changes shall be processed within 5 minutes on average.
6.	G.3.7	The contractor shall provide a service marketing and promotion plan for Albuquerque MAA customer organizations. As part of the plan, the contractor shall detail how it will conduct demonstrations and briefings for existing and potential customer organizations in Albuquerque that describe services and features, the frequency of such demonstrations and briefings, and how the services and features can be obtained and utilized to improve customer organizations' productivity and reduce costs.
7.	G.3.8	The contractor shall provide updated local telephone directories (i.e., telephone books) on an annual basis incorporating all publicly listed residential and business lines for the Albuquerque metropolitan area.
8.	G.3.8	The telephone directories shall be the same as those provided to the public by the Regional Bell Operating companies (i.e., include white, blue, green, and yellow pages).
9.	G.3.8	The Government blue pages shall be consistent with the new blue page format as developed by GSA's Blue Page Project ( <a href="http://www.bp.fed.gov">http://www.bp.fed.gov</a> ).
10.	G.3.8	The directories shall be delivered in bulk at one location at each customer site.

**Table J.6-3a. Albuquerque Pricing Requirements –Narrative Response Required**

#	RFP Section	Statement of Re	Proposal Reference	Comply (Gov Use)
1.	B.1	The offeror shall provide all prices in the format and structure defined herein.		
2.	B.1.2	The offeror shall provide in its proposal a separate itemized list of these taxes that would be included in its monthly invoices at the time of the proposal submission, including the name of the tax, jurisdiction by name, reference to the statutory source for the tax, and applicable tax rate.		
3.	B.1.3 B.5.4	The offeror shall group the NPANXXs comprising the MAA service area into not more than 5 NPANXX groups, identified by consecutive integers starting with 1, for originating and terminating CSS locations and for DTS local loop transmission facility locations.		
4.	B.1.3	Where the price for service provided to, from, or between NPANXXs is sensitive to location, the NPANXX group shall be used in lieu of specific NPANXXs.		
5.	B.1.4	Reserved		
6.	B.1.4	The offeror shall provide a document, entitled "Instructions for Pricing," that provides detailed procedures for applying the offeror's price tables. Several levels of pricing procedures shall be provided.		
7.	B.4.1	Prices and descriptions for additional features proposed by the offeror are provided separately.		

**Table J.6-3b. Stipulated Albuquerque Pricing Requirements**

#	RFP Section	Statement of Requirement
1.	B.1.1	The contractor's Final Revised Price Proposal, dated _____, including the Contract Line Item Prices contained herein, and all amendments thereto, are hereby incorporated by reference into this contract.
2.	B.1.1	The contractor's Final Revised Technical Proposal, _____, and all amendments thereto, are hereby incorporated by reference into this contract.
3.	B.1.1	Section K (Representations, Certifications, and Other Statements of Offerors), as signed by the contractor on _____, is hereby incorporated by reference into this contract.
4.	B.1.1	The contractor's Small Business and Small Disadvantaged Business Subcontracting Plan, dated _____, and all amendments thereto, are hereby incorporated by reference into this contract.
5.	B.1.2	The offeror shall propose fixed price schedules for all specified services and related features identified in Section C including the management and operations requirements in Section G for each applicable year of an eight year period.
6.	B.1.2	The unit prices for services (as defined in the Section B price tables) shall not include federal, state, or local taxes and duties in effect on the contract date that the taxing authority is imposing and collecting on the transactions or property covered by this contract.
7.	B.1.2	Excepted taxes, as defined in Federal Acquisition Regulation (FAR) 52.229-4, shall be included in the contract price, but not itemized on the monthly invoices.
8.	B.1.2	If the contract is awarded between October 1 and March 31 of a given fiscal year, price tables for contract pricing year one shall be effective through September 30 of that year.
9.	B.1.2	If the contract is awarded between April 1 and September 30 of a given year, price tables for contract pricing year one shall be effective through September 30 of the following year.
10.	B.1.2	Price tables for years two through eight shall be on a Government fiscal year basis.
11.	B.1.2	Prices provided in the proposal shall not change within a fiscal year.
12.	B.1.2	Prices shall be entered in spreadsheets provided with this solicitation. Eight workbooks are provided each named PricesX.xls where the X indicates the applicable contract year (1-8).
13.	B.1.3	The basic service prices shall include management and operations; transition and migration, and implementation; and reporting functions unless specified otherwise within this contract. Basic service prices shall exclude any taxes and End User Common Line (EUCL) charges that may apply.
14.	B.1.3	Charges for a call that spans the two time periods shall be split, with the appropriate rates applied to each portion of the call.
15.	B.1.3	All distance measurements shall be based on the airline distance between the locations involved.

**Table J.6-3b. Stipulated Albuquerque Pricing Requirements**

#	RFP Section	Statement of Requirement
16.	B.1.4	The price items that are not separately priced and are included as part of the basic service capabilities shall be noted as “NSP.”
17.	B.1.4	In Tables B.2.1-1, B.2.2-1, and B.3.1-1 where a price element is not appropriate due to unused NPANXX groups, the price entry shall be noted as “N/A.” “N/A” shall not be placed in any other price table.
18.	B.2.2	For the Albuquerque MAA, all on-and off-net voice and data terminations shall be free of usage charges
19.	B.3.1	No local loop charges shall apply where the SDP occurs on the network side of the contractor-provided switch.
20.	B.5.4	All NPANXXs within the MAA calling area shall be included.
21.	B.5.5	The contractor shall add and/or delete appropriate IXC POPs as necessary throughout the life of the contract.
22.	B.7	Any MAA contractor who proposes pricing for services, features, functions, or other offerings extending beyond the MAA calling areas shall conform to the appropriate pricing specifications and structures defined under the FTS2001 contracts or appropriate MAA contracts.
23.	B.5.4	The contractor shall be responsible for maintaining the list of originating and terminating NPANXXs in Table B.5.4-1 for the life of the contract.
24.	L.20.3.7	Where the proposed prices quoted are under an existing tariff, the prices are footnoted to indicate the applicable tariff and pages.
25.	L.20.3.8	Price proposals and/or tariffs do not contain termination or cancellation liabilities.
26.	B.1.4	The offeror shall not use its Instructions for Pricing or any price proposal narrative to place caveats, clarifications, modifications, or restrictions on any RFP or RQS technical, management, or price requirement. Any such language that is deemed necessary shall be identified by the offeror as exceptions, deviations, or clarifications in a separate section of the proposal (Section L.20.1.4).
27.	B.1.2	For those service orders that span more than one fiscal year, the invoice shall reflect the price tables in effect for the period in which services are provided

23 **Offerors**

24 **K.1 52.252-2 Clauses Incorporated by Reference (FEB 1998)**

25 This contract incorporates one or more clauses by reference, with the same force and  
26 effect as if they were given in full text. Upon request, the Contracting Officer will make  
27 their full text available.

28	<u>Clause No.</u>	<u>FAR Clause No.</u>	<u>Title and Date</u>

35 **K.2 52.203-02 Certificate of Independent Price Determination (APR**  
36 **1985)**

37 (a) The offeror certifies that—

- 38 (1) The prices in this offer have been arrived at independently without, for the  
39 purpose of restricting competition, any consultation, communication, or  
40 agreement with any other offeror or competitor relating to (i) those prices,  
41 (ii) the intention to submit an offer, or (iii) the methods or factors used to  
42 calculate the prices offered;
- 43 (2) The prices in this offer have not been and will not be knowingly disclosed by  
44 the offeror, directly or indirectly, to any other offeror or competitor before bid  
45 opening (in the case of sealed bid solicitation) or contract award (in the case  
46 of a negotiated solicitation) unless otherwise required by law; and
- 47 (3) No attempt has been made or will be made by the offeror to induce any other  
48 concern to submit or not to submit an offer for the purpose of restricting  
49 competition.

50 (b) Each signature on the offer is considered to be a certification by the signatory that  
51 the signatory—

- 52 (1) Is the person in the offeror's organization responsible for determining the  
53 prices being offered in the bid or proposal, and that the signatory has not  
54 participated and will not participate in any action contrary to subparagraphs  
55 (a)(1) through (a)(3) of this provision; or
- 56 (2) (i) Has been authorized, in writing, to act as an agent for the following  
57 principals in certifying that those principals have not participated, and will  
58 not participate in any action contrary to subparagraphs (a)(1) through  
59 (a)(3) of this provision \_\_\_\_\_ *[insert*  
60 *full name of person(s) in the offeror's organization responsible for*  
61 *determining the prices offered in this bid or proposal, and the title of his*  
62 *or her position in the offeror's organization]*;
- 63 (ii) As an authorized agent, does certify that the principals named in  
64 subdivision (b)(2)(i) above have not participated, and will not participate,  
65 in any action contrary to subparagraphs (a)(1) through (a)(3) of this  
66 provision; and
- 67 (iii) As an agent, has not personally participated, and will not participate, in  
68 any action contrary to subparagraphs (a)(1) through (a)(3) of this  
69 provision.
- 70 (c) If the offeror deletes or modifies subparagraph (a)(2) above, the offeror must  
71 furnish with its offer a signed statement setting forth in detail the circumstances  
72 of the disclosure.

73 **K.3 52.204-03 Taxpayer Identification (OCT 1998)**

- 74 (a) *Definitions.*
- 75 "Common parent," as used in this solicitation provision, means that corporate  
76 entity that owns or controls an affiliated group of corporations that files its  
77 Federal income tax returns on a consolidated basis, and of which the offeror is a  
78 member.
- 79 "Taxpayer Identification Number (TIN)," as used in this provision, means the  
80 number required by the IRS to be used by the offeror in reporting income tax and  
81 other returns. The TIN maybe either a Social Security Number or an Employee  
82 Identification Number.
- 83 (b) All offerors must submit the information required in paragraphs (d) through (f) of  
84 this provision to comply with debt collection requirements of 31 U.S.C. 7701(c)  
85 and 3325(d), reporting requirements of 26 U.S.C. 6041, 6041A, and 6050M, and  
86 implementing regulations issued by the Internal Revenue Service (IRS). If the  
87 resulting contract is subject to the payment reporting requirements described in  
88 Federal Acquisition Regulation (FAR) 4.904, the failure or refusal by the offeror

89 to furnish the information may result in a 31 percent reduction of payments  
90 otherwise due under the contract.

91 (c) The TIN may be used by the Government to collect and report on any delinquent  
92 amounts arising out of the offeror's relationship with the Government (31 U.S.C.  
93 7701(c)(3)). If the resulting contract is subject to the payment reporting  
94 requirements described in FAR 4.904, the TIN provided hereunder may be  
95 matched with IRS records to verify the accuracy of the offeror's TIN.

96 (d) *Taxpayer Identification Number (TIN).*

97  TIN: \_\_\_\_\_.

98  TIN has been applied for.

99  TIN is not required because:

100  Offeror is a nonresident alien, foreign corporation, or foreign  
101 partnership that does not have income effectively connected with the  
102 conduct of a trade or business in the U.S. and does not have an office or  
103 place of business or a fiscal paying agent in the U.S.;

104  Offeror is an agency or instrumentality of a foreign Government;

105  Offeror is an agency or instrumentality of the Federal, Government;

106 (e) *Type of Organization.*

107  Sole proprietorship;

108  Partnership;

109  Corporate entity (not tax-exempt);

110  Corporate entity (tax-exempt);

111  Government entity (Federal, State, or local);

112  Foreign government;

113  International organization per 26 CFR 1.6049-4;

114  Other \_\_\_\_\_.

- 115 (f) *Common Parent.*  
116  Offeror is not owned or controlled by a common parent as defined in  
117 paragraph (a) of this provision.  
118  Name and TIN of common parent:  
119 Name \_\_\_\_\_  
120 TIN \_\_\_\_\_

121 **K.4 52.204-05 Women-Owned Business (Other than Small Business)**  
122 **(MAY 1999)**

- 123 (a) *Definition.* “Women-owned business concern,” as used in this provision means a  
124 concern that is at least 51 percent owned by one or more women; or in the case of  
125 any publicly owned business, at least 51 percent of the stock of which is owned  
126 by one or more women; and whose management and daily business operations are  
127 controlled by one or more women.  
128 (b) *Representation.* [Complete only if the offeror is a women-owned business  
129 concern and has not represented itself as a small business concern in paragraph  
130 (b)(1) of FAR 52.219.1, Small Business Program Representations, of this  
131 solicitation.] This offeror represents that it  is a women-owned business  
132 concern.

133 **K.5 52.209-05 Certification Regarding Debarment, Suspension,**  
134 **Proposed Debarment, and Other Responsibility Matters (MAR 1996)**

- 135 (a) (1) The offeror certifies, to the best of its knowledge and belief, that—  
136 (i) The offeror and/or any of its principals—  
137 (A) Are  are not  presently debarred, suspended, proposed for  
138 debarment or declared ineligible for the award of contract by any  
139 Federal agency;  
140 (B) Have  have not , within a 3-year period preceding this offer, been  
141 convicted of, or had a civil judgment rendered against them for:  
142 commission of a fraud or a criminal offense in connection with  
143 obtaining, attempting to obtain, or performing a public (Federal, state  
144 or local) contract or subcontract; violation of Federal or state antitrust  
145 statutes relating to the submission of offers; or commission of  
146 embezzlement, theft, forgery, bribery, falsification or destruction of  
147 records, making false statements, tax evasion, or receiving stolen  
148 property; and

- 149 (C) Are  are not  presently indicted for, or otherwise criminally or  
150 civilly charged by a Governmental entity with, commission of any of  
151 the offenses enumerated in subdivision (a)(1)(i)(B) of this provision.
- 152 (ii) The offeror has  has not , within a 3-year period preceding this  
153 offer, had one or more contracts terminated for default by any Federal  
154 agency.
- 155 (2) "Principals," for the purposes of this certification, means officers; directors;  
156 owners; partners; and, persons having primary management or supervisory  
157 responsibilities within a business entity (e.g., general manager; plant manager;  
158 head of a subsidiary, division, or business segment, and similar positions).
- 159 THIS CERTIFICATION CONCERNS A MATTER WITHIN THE  
160 JURISDICTION OF AN AGENCY OF THE UNITED STATES AND THE  
161 MAKING OF A FALSE, FICTITIOUS, OR FRAUDULENT  
162 CERTIFICATION MAY RENDER THE MAKER SUBJECT TO  
163 PROSECUTION UNDER SECTION 1001, TITLE 18, U.S.C.
- 164 (b) The offeror shall provide immediate written notice to the CO if, at any time  
165 prior to contract award, the offeror learns that its certification was erroneous  
166 when submitted or has become erroneous by reason of change of  
167 circumstances.
- 168 (c) A certification that any of the items in paragraph (a) of this provision exist  
169 will not necessarily result in withholding of an award under this solicitation.  
170 However, the certification will be considered in connection with a  
171 determination of the offeror's responsibility. Failure of the offeror to furnish  
172 a certification or provide such additional information as requested by the CO  
173 may render the offeror non responsible.
- 174 (d) Nothing contained in the foregoing shall be construed to require establishment  
175 of a system of records in order to render, in good faith, the certification  
176 required by paragraph (a) of this provision. The knowledge and information  
177 of an offeror is not required to exceed that which is normally possessed by a  
178 prudent person in the ordinary course of business dealings.
- 179 (e) The certification in paragraph (a) of this provision is a material representation  
180 of fact upon which reliance was placed when making award. If it is later  
181 determined that the offeror knowingly rendered an erroneous certification, in  
182 addition to other remedies available to the Government, the CO may  
183 terminate the contract resulting from this solicitation for default.

184 **K.6 52.215-06 Place of Performance (OCT 1977)**

- 185 (a) The offeror or quoter, in the performance of any contract resulting from this  
186 solicitation,  intends,  does not intend (check applicable block) to use one or

187 more plants or facilities located at a different address from the address of the  
188 offeror or quoter as indicated in the proposal or quotation.

189 (b) If the offeror or quoter checks "intends" in paragraph (a) above, it shall insert in  
190 the spaces provided below the required information:

191	Place of Performance	Name and Address of Owner
192	(Street, Address, City	and Operator of the Plant or
193	County, State, Zip Code)	Facility if Other than Offeror
194		or Quoter
195	_____	_____
196	_____	_____
197	_____	_____

198 **K.7 52.219-01 Small Business Program Representation (MAY 1999)**

199 (a) (1) The Standard Industrial Classification Code for this acquisition is 4813.

200 (2) The small business size standard is 1,500 employees.

201 (3) The small business size standard for a concern which submits an offer in its  
202 own name, other than on construction or service contract, but which proposes  
203 to furnish a product which it did not itself manufacture, is 500 employees.

204 (b) *Representations*

205 (1) The offeror represents and certifies as part of its offer that it  is,  is not a  
206 small business concern.

207 (2) (Complete only if offeror represented itself as a small business concern in  
208 block (b)(1) of this section.) The offeror represents as part of its offer that it  
209  is,  is not a small disadvantaged business concern.

210 (3) (Complete only if offeror represented itself as a small business concern in  
211 block (b)(1) of this section.) The offeror represents as part of its offer that it  
212  is,  is not a women-owned small business concern.

213 (c) *Definitions.*

214 "Joint venture," for purposes of a small disadvantaged business (SDB) set-aside  
215 or price evaluation preference (as prescribed at 13 CFR 124.321), is a concern  
216 that is owned and controlled by one or more socially and economically  
217 disadvantaged individuals entering into a joint venture agreement with one or  
218 more business concerns and is considered to be affiliated for size purposes with  
219 such other concern(s). The combined annual receipts or employees of the  
220 concerns entering into the joint venture must meet the applicable size standard  
221 corresponding to the Standard Industrial Classification Code designated for the  
222 contract. The majority of the venture's earnings must accrue directly to the

223 socially and economically disadvantaged individuals in the SDB concern(s) in  
224 the joint venture. The percentage of the ownership involvement in a joint venture  
225 by disadvantaged individuals must be at least 51 percent.

226 “Small business concern,” as used in this provision, means a concern, including  
227 its affiliates, that is independently owned and operated, not dominant in the field  
228 of operation in which it is bidding on Government contracts, and qualified as a  
229 small business under the criteria in 13 CFR Par 121 and the size standard in  
230 paragraph (a) of this provision.

231 “Small disadvantaged business concern,” as used in this provision, means a small  
232 business concern that (1) is at least 51 percent unconditionally owned by one or  
233 more individuals who are both socially and economically disadvantaged, or a  
234 publicly owned business having at least 51 percent of its stock unconditionally  
235 owned by one or more socially and economically disadvantaged individuals, and  
236 (2) has its management and daily business controlled by one or more such  
237 individuals. This term also means a small business concern that is at least  
238 51 percent unconditionally owned by an economically disadvantaged Indian tribe  
239 or Native Hawaiian Organization, or a publicly owned business having at least  
240 51 percent of its stock unconditionally owned by one or more of these entities,  
241 which has its management and daily business controlled by members of an  
242 economically disadvantaged Indian tribe or Native Hawaiian Organization, and  
243 which meets the requirements of 13 CFR Part 124.

244 “Women-owned small business concern,” as used in this provision, means a small  
245 business concern—

- 246 (1) Which is at least 51 percent owned by one or more women or, in the case of  
247 any publicly owned business, at least 51 percent of the stock of which is  
248 owned by one or more women; and  
249 (2) Whose management and daily business operations are controlled by one or  
250 more women.

251 (d) *Notice*

252 (1) If this solicitation is for supplies and has been set aside, in whole or in part,  
253 for small business concerns, then the clause in this solicitation providing  
254 notice of the set-aside contains restrictions on the source of the end items to  
255 be furnished.

256 (2) Under 15 U.S.C. 645(d), any person who misrepresents a firm’s status as a  
257 small or small disadvantaged business concern in order to obtain a contract to  
258 be awarded under the preference programs established pursuant to sections  
259 8(a) 8(d), 9, or 15 of the Small Business Act or any other provision of Federal  
260 law that specifically references section 8(d) for a definition of program  
261 eligibility, shall—

- 262 (i) Be punished by imposition of fine, imprisonment, or both;  
263 (ii) Be subject to administrative remedies, including suspension and  
264 debarment; and  
265 (iii) Be ineligible for participation in programs conducted under the authority  
266 of the Act.

267 Alternate 1 (NOV 1999)

268 (3) [Complete only if offeror represented itself as a small business concern in  
269 paragraph (b)(1) of this provision.] The offeror represents, as part of its  
270 offer, that--

- 271 (i) It\* is, \* is not a HUBZone small business concern listed, on the date of  
272 this representation, on the List of Qualified HUBZone Small Business  
273 Concerns maintained by the Small Business Administration, and no  
274 material change in ownership and control, principal office of ownership,  
275 or HUBZone employee percentage has occurred since it was certified by  
276 the Small Business Administration in accordance with 13 CFR Part 126;  
277 and  
278 (ii) It\* is, \*not a joint venture that complies with the requirements of 13 CFR  
279 Part 126, and the representation in paragraph (b)(4)(i) of this provision is  
280 accurate for the HUBZone small business concern or concerns that are  
281 participating in the joint venture. [The offeror shall enter the name or  
282 names of the HUBZone small business concern or concerns that are  
283 participating in the joint venture: \_\_\_\_\_.]  
284 Each HUBZone small business concern participating in the joint venture  
285 shall submit a separate signed copy of the HUBZone representation.

286 **K.8 52.222-22 Previous Contract and Compliance Reports (FEB 1999)**

287 The offeror represents that:

- 288 (a) It  has,  has not, participated in a previous contract or subcontract subject to  
289 the Equal Opportunity clause of this solicitation.  
290 (b) It  has,  has not, filed all required compliance reports; and  
291 (c) Representations indicating submission of required compliance reports, signed by  
292 proposed subcontractors, will be obtained before subcontract awards.

293 **K.9 52.222-25 Affirmative Action Compliance (APR 1984)**

294 The offeror represents that (a) it  has developed and has on file,  has not developed  
295 and does not have on file, at each establishment, affirmative action programs required by the  
296 rules and regulations of the Secretary of Labor (41 CFR 60-1 and 60-2) or, (b) it  has not

297 previously had contracts subject to the written affirmative action programs requirement of  
298 the rules and regulations of the Secretary of Labor.

299 **K.10 52.223-01 Clean Air and Water Certification (APR 1984)**

300 The offeror certifies that—

- 301 (a) Any facility to be used in the performance of this proposed contract is , is not   
302 listed on the Environmental Protection Agency (EPA) List of Violating Facilities;
- 303 (b) The offeror will immediately notify the Contracting Officer, before award, of the  
304 receipt of any communication from the Administrator, or a designee, of the EPA,  
305 indicating that any facility that the offeror proposed to use for the performance of  
306 the contract is under consideration to be listed on the EPA list of Violating  
307 Facilities; and
- 308 (c) The offeror will include a certification substantially the same as this certification  
309 including this paragraph (c) in every nonexempt subcontract.

310 **K.11 52.223-13 Certification of Toxic Chemical Release Reporting (OCT**  
311 **1996)**

312 (a) The offeror, by signing this offer, certifies that—

313 (NOTE: The offeror must check the appropriate box(es).)

314  (1) To the best of its knowledge and belief, it is not subject to the filing and  
315 reporting requirements described in Emergency Planning and  
316 Community Right-to-Know act of 1986 (EPCRA) sections 313(a) and  
317 (g) and Pollution Prevention Act of 1990 (PPA) section 6607 because  
318 none of its owned or operated facilities to be used in the performance of  
319 this contract currently—

320  (i) Manufacture, process or otherwise use any toxic chemicals listed  
321 under section 313(c) of EPCRA, 42 U.S.C. 11023 (c).

322  (ii) Have 10 or more full-time employees as specified in  
323 section 313(b)(1)(A) of EPCRA, 42 U.S.C. 11023(b)(1)(A).

324  (iii) Meet the reporting thresholds of toxic chemicals established  
325 under section 313(f) of EPCRA, 42 U.S.C. 11023(f) (including  
326 the alternate thresholds at 40 CFR 372.27, provided an  
327 appropriate certification form has been filed with EPA).

328  (iv) Fall within Standard Industrial Classification Code designations  
329 20 through 39 as set forth in FAR section 19.102.

330  (2) If awarded a contract resulting from this solicitation, its owned or  
331 operated facilities to be used in the performance of this contract, unless

332 otherwise exempt, will file and continue to file for the life of the  
333 contract the Toxic Chemical Release Inventory Form (Form R) as  
334 described in EPCRA sections 313(a) and (g) and PPA section 6607 (42  
335 U.S.C. 13106).

336 (b) Submission of this certification is a prerequisite for making or entering into this  
337 contract imposed by Executive Order 12969, August 8, 1995 (60 FR 40989-  
338 40992).

339 **K.12 52.225-01 Buy American Certificate (DEC 1989)**

340 The offeror certifies that each end product, except those listed below, is a domestic end  
341 product (as defined in the clause entitled "Buy American Act - Supplies"), and that  
342 components of unknown origin are considered to have been mined, produced, or  
343 manufactured outside the United States.

344	<i>Country of Origin</i>	<i>Excluded End Products</i>
345	_____	_____
346	_____	_____
347	_____	_____

348 (List as necessary)

349 Offerors may obtain from the Contracting Officer lists of articles, materials, and supplies  
350 excepted from the Buy American Act.

351 **K.13 52.227-06 Royalty Information (APR 1984)**

352 (a) *Cost or charges for royalties.* When the response to the solicitation contains  
353 costs or charges for royalties totaling more than \$250, the following information  
354 shall be included in the response relating to each separate item of royalty or  
355 license fee:

- 356 (1) Name and address of licensor.
- 357 (2) Date of license agreement.
- 358 (3) Patent numbers, patent applications serial numbers, or other basis on which  
359 the royalty is payable.
- 360 (4) Brief description, including any part or model numbers of each contract item  
361 or component on which the royalty is payable.
- 362 (5) Percentage or dollar rate of royalty per unit.
- 363 (6) Unit price of contract item.
- 364 (7) Number of units.
- 365 (8) Total dollar amount of royalties.

366 (b) *Copies of current licenses.* In addition, if specifically requested by the  
367 Contracting Officer before execution of the contract, the offeror shall furnish a  
368 copy of the current license agreement and an identification of applicable claims or  
369 specific patents.

370 **K.14 552.225-8 Buy American Act -- Trade Agreements -- Balance Of**  
371 **Payments Program Certificate (Sep 1999) (Deviation Far 52.225-8)**

372 (a) The Offeror, by signing this offer, certifies that each end product to be delivered  
373 under this contract is a U.S. made end product, a designated country end product, a  
374 Caribbean Basin country end product, a Canadian end product or a Mexican end  
375 product as defined in the clause entitled "Buy American Act -- Trade Agreements --  
376 Balance of Payments Program" at 48 CFR 552.225-9.

377 (b) Offers will be evaluated in accordance with Subpart 25.4 of the Federal  
378 Acquisition Regulation except that offers of U.S. made end products, designated  
379 country end products, Caribbean Basin end products, Canadian end products, or  
380 Mexican end products shall be evaluated without the restrictions of the Buy  
381 American Act or the Balance of Payments Program.

54 **L.2 Federal Acquisition Regulation (FAR) Clauses**

55 **L.2.1 52.233-2 Service of Protest (AUG 1996)**

56 (a) Protests, as defined in Section 33.101 of the Federal Acquisition Regulation (FAR),  
57 that are filed directly with an agency, and copies of any protests that are filed with the  
58 General Accounting Office (GAO), shall be served on the Contracting Officer by  
59 obtaining a written and dated acknowledgment of receipt from the Contracting  
60 Officer at the address listed in Block 7 on Standard Form 33.

61 (b) The copy of any protest shall be received in the office designated above within one  
62 day of filing a protest with the GAO.

63 **L.2.2 52.211-3 Availability of Specifications Not Listed in the GSA Index of Federal**  
64 **Specifications, Standards and Commercial Item Descriptions (JUN 1988)**

65 The specifications cited in this solicitation may be obtained from the PCO. The requester  
66 should identify the solicitation number and the specification requested by date, title, and  
67 number, as cited in the solicitation.

68 **L.3 General Services Administration Manual (GSAM) Clauses**

69 **L.3.1 552.219-71 Notice to Offerors of Subcontracting Plan Requirements**  
70 **(SEP 1999)**

71 The General Services Administration (GSA) is committed to assuring that maximum  
72 practicable opportunity is provided to small, HUBZone small, small disadvantaged, and  
73 women-owned small business concerns to participate in the performance of this contract  
74 consistent with its efficient performance. GSA expects any subcontracting plan submitted  
75 pursuant to FAR 52.219-9, Small Business Subcontracting Plan, to reflect this commitment.  
76 Consequently, an offeror, other than a small business concern, before being awarded a  
77 contract exceeding \$500,000 (\$1,000,000 for construction), must demonstrate that its  
78 subcontracting plan represents a creative and innovative program for involving small,  
79 HUBZone small, small disadvantaged, and women-owned small business concerns as  
80 subcontractors in the performance of this contract.

81 **L.3.2 552.219-72 Preparation, Submission, and Negotiation of Subcontracting Plans**  
82 **(SEP 1999)**

- 83 (a) An offeror, other than a small business concern, submitting an offer that exceeds  
84 \$500,000 (\$1,000,000 for construction) shall submit a subcontracting plan with its  
85 initial offer. The subcontracting plan will be negotiated concurrently with price  
86 and any required technical and management proposals, unless the offeror submits  
87 a previously-approved commercial products plan.
- 88 (b) Maximum practicable utilization of small, HUBZone small, small disadvantaged,  
89 and women-owned small business concerns as subcontractors is a matter of  
90 national interest with both social and economic benefits. The General Services  
91 Administration (GSA) expects that an offeror's subcontracting plan will reflect a  
92 commitment to assuring that small, HUBZone small, small disadvantaged, and  
93 women-owned small business concerns are provided the maximum practicable  
94 opportunity, consistent with efficient contract performance, to participate as  
95 subcontractors in the performance of the resulting contract. An offeror submitting  
96 a commercial products plan can reflect this commitment through subcontracting  
97 opportunities it provides that relate to the offeror's production generally; i.e., for  
98 both its commercial and Government business.
- 99 (c) GSA believes that this potential contract provides significant opportunities for the  
100 use of small, HUBZone small, small disadvantaged, and women-owned small  
101 business concerns as subcontractors. Consequently, in addressing the eleven  
102 elements described at FAR 52.219-9(d) of the clause in this contract entitled  
103 Small Business Subcontracting Plan, the offeror shall:

- 104 (1) Demonstrate that its subcontracting plan represents a creative and innovative  
105 program for involving small, HUBZone small, small disadvantaged, and  
106 women-owned small business concerns in performing the contract.
- 107 (2) Include a description of the offeror's subcontracting strategies used in any  
108 previous contracts, significant achievements, and how this plan will build  
109 upon those earlier achievements.
- 110 (3) Demonstrate through its plan that it understands the small business  
111 subcontracting program's objectives and GSA's expectations, and it is  
112 committed to taking those actions necessary to meet these goals or  
113 objectives.
- 114 (d) In determining the acceptability of any subcontracting plan, the Contracting  
115 Officer will take each of the following actions:
- 116 (1) Review the plan to verify that the offeror demonstrates an understanding of  
117 the small business subcontracting program's objectives and GSA's  
118 expectations with respect to the program and has included all the  
119 information, goals, and assurances required by FAR 52.219-9.
- 120 (2) Consider previous goals and achievements of contractors in the same  
121 industry.
- 122 (3) Consider information and potential sources obtained from agencies  
123 administering national and local preference programs and other advocacy  
124 groups in evaluating whether the goals stated in the plan adequately reflect  
125 the anticipated potential for subcontracting to small, HUBZone small, small  
126 disadvantaged, and women-owned small business concerns.
- 127 (4) Review the offeror's description of its strategies, historical performance and  
128 significant achievements in placing subcontracts for the same or similar  
129 products or services with small, HUBZone small, small disadvantaged, and  
130 women-owned small business concerns. The offeror's description can apply  
131 to commercial as well as previous Government contracts.
- 132 (e) Failure to submit an acceptable subcontracting plan and/or correct deficiencies in a  
133 plan within the time specified by the Contracting Officer shall make the offeror  
134 ineligible for award.

135 **L.3.3 552.233-70 Protests Filed Directly with the General Services Administration**  
136 **(SEP 1999)**

- 137 (a) The following definitions apply in this provision:  
138 "Agency Protest Official for GSA" means the official in the Office of Acquisition  
139 Policy designated to review and decide procurement protests filed with GSA.

- 140 “Deciding official” means the person chosen by the protester to decide the agency  
141 protest. The deciding official may be either the Contracting Officer or the  
142 Agency Protest Official.
- 143 (b) The filing time frames in FAR 33.103(e) apply. An agency protest is filed when  
144 the protest complaint is received at the location the solicitation designates for  
145 serving protests. GSA’s hours of operation are 8:00 a.m. to 4:30 p.m. Protests  
146 delivered after 4:30 p.m. will be considered received and filed the following  
147 business day.
- 148 (c) A protest filed directly with the General Services Administration (GSA) must:
- 149 (1) Indicate that it is a protest to the agency.
- 150 (2) Be filed with the Contracting Officer.
- 151 (3) State whether the protester chooses to have the Contracting Officer or the  
152 Agency Protest Official for GSA decide the protest. If the protest is silent on  
153 this matter, the Contracting Officer will decide the protest.
- 154 (4) Indicate whether the protester prefers to make an oral presentation, a written  
155 presentation, or an oral presentation confirmed in writing, of arguments in  
156 support of the protest to the deciding official.
- 157 (5) Include the information required by FAR 33.103(d)(2):
- 158 (i) Name, address, fax number, and telephone number of the protester.
- 159 (ii) Solicitation or contract number.
- 160 (iii) Detailed statement of the legal and factual grounds for the protest, to  
161 include a description of resulting prejudice to the protester.
- 162 (iv) Copies of relevant documents.
- 163 (v) Request for a ruling by the agency.
- 164 (vi) Statement as to the form of relief requested.
- 165 (vii) All information establishing that the protester is an interested party for  
166 the purpose of filing a protest.
- 167 (viii) All information establishing the timeliness of the protest (see paragraph  
168 (b) of this provision).
- 169 (d) An interested party filing a protest with GSA has the choice of requesting either  
170 that the Contracting Officer or the Agency Protest Official for GSA decide the  
171 protest.
- 172 (e) The decision by the Agency Protest Official for GSA is an alternative to a decision  
173 by the Contracting Officer. The Agency Protest Official for GSA will not  
174 consider appeals from the Contracting Officer’s decision on an agency protest.
- 175 (f) The deciding official must conduct a scheduling conference with the protester  
176 within three (3) days after the protest is filed. The scheduling conference will

- 177 establish deadlines for oral or written arguments in support of the agency protest  
178 and for agency officials to present information in response to the protest issues.  
179 The deciding official may hear oral arguments in support of the agency protest at  
180 the same time as the scheduling conference, depending on availability of the  
181 necessary parties.
- 182 (g) Oral conferences may take place either by telephone or in person. Other parties  
183 (e.g., representatives of the program office) may attend at the discretion of the  
184 deciding official.
- 185 (h) The following procedures apply to information submitted in support of or in  
186 response to an agency protest:
- 187 (1) The protester and the agency have only one opportunity to support or explain  
188 the substance of the protest (either orally, in writing, or orally confirmed in  
189 writing).
- 190 (2) GSA procedures do not provide for any discovery.
- 191 (3) The deciding official has discretion to request additional information from  
192 either the agency or the protester. However, the deciding official will normally  
193 decide protests on the basis of information provided by the protester and the  
194 agency.
- 195 (4) The parties are encouraged, but not required, to exchange information  
196 submitted to the Agency Protest Official for GSA.
- 197 (5) Any written response by the agency to the protest must be filed with the  
198 deciding official within five (5) days after the filing of the protest.
- 199 (6) Any additional information that either party wants to submit in writing after  
200 one-time oral arguments in support of the agency protest, must be received by  
201 the deciding official within two (2) days after the date of the oral arguments.
- 202 (i) The deciding official will resolve the protest through informal presentations or  
203 meetings to the maximum extent practicable.
- 204 (j) An interested party may represent itself or be represented by legal counsel. GSA  
205 will not reimburse the party for any legal fees related to the agency protest.
- 206 (k) GSA will stay award or suspend contract performance in accordance with FAR  
207 33.103(f). The stay or suspension, unless over-ridden, remains in effect until the  
208 protest is decided, dismissed, or withdrawn.
- 209 (l) The deciding official will make a best effort to issue a decision on the protest  
210 within twenty-eight (28) days after the filing date. The decision may be oral or  
211 written. If the decision is communicated orally to the protester, the deciding  
212 official will confirm in writing within three (3) days after the decision.
- 213 (m) GSA may dismiss or stay proceedings on an agency protest if a protest on the  
214 same or similar basis is filed with a protest forum outside of GSA.

215 **L.3.4 Authorized Deviations In Provisions (DEVIATION FAR 52.252-5) (SEP 1999)**

216 (a) Deviations to FAR provisions.

217 (1) This solicitation indicates any authorized deviation to a Federal Acquisition  
218 Regulation (48 CFR Chapter 1) provision by the addition of  
219 "(DEVIATION)" after the date of the provision, if the provision is not  
220 published in the General Services Administration Acquisition Regulation (48  
221 CFR Chapter 5).

222 (2) This solicitation indicates any authorized deviation to a Federal Acquisition  
223 Regulation (FAR) provision that is published in the General Services  
224 Administration Acquisition Regulation by the addition of "(DEVIATION  
225 (FAR provision no.))" after the date of the provision.

226 (b) Deviations to GSAM provisions. This solicitation indicates any authorized  
227 deviation to a General Services Administration Acquisition Manual provision by  
228 the addition of "(DEVIATION)" after the date of the provision.

229 **L.4 Reserved**

230 **L.5 Solicitation Copies and Enclosures**

231 An electronic version of this solicitation is available on the MAA Website  
232 (<http://www.gsa.gov/maa>).

233 **L.6 Point of Contact for Information**

234 The contact responsible for supplying additional information and answering inquiries is  
235 the Procuring Contracting Officer (PCO).

236 (a) Formal communications, such as requests for clarification and/or information  
237 concerning this solicitation, shall be submitted in writing to the following:

238 General Services Administration  
239 Attention: **George A. Davis**, Procuring Contracting Officer  
240 Mail Stop Z397  
241 7525 Colshire Drive  
242 McLean, VA 22102-7400

243

244 (b) Questions/comments may also be submitted electronically to GSA's Internet mail  
245 address at [geo.davis@gsa.gov](mailto:geo.davis@gsa.gov). Electronic mail attachments, if included, must be  
246 viewable by Microsoft Word 97. The address of the Internet home page is:  
247 <http://www.gsa.gov/maa>.

248 (c) Information concerning this solicitation or requests for clarification will not be  
249 provided in response to offeror-initiated telephone calls. All such requests shall be  
250 made in writing and submitted to one of the above addresses. Questions shall identify  
251 the specific area of the solicitation in which clarification is desired. All questions and  
252 answers shall be provided to all prospective offerors. Sources of questions will not  
253 be identified.

254 (d) Prospective offerors are cautioned against discussing the preparation of their  
255 proposals or technical questions with Government technical personnel. The  
256 circumstances of such a contact, when verified may result in non-consideration of the  
257 offeror's proposals. Discussions with Government technical personnel concerning  
258 the specifications, the documents incorporated by reference, pricing, or any other  
259 technical matters are strictly forbidden. Accordingly, all communications prior to  
260 award shall be directed to the PCO at the following telephone number:

261 [George A Davis](#), Procuring Contracting Officer  
262 (703) 610-1632

263 (e) Inquiries are to be submitted in writing. Inquiries may be submitted by facsimile to  
264 the following:

265 Attn.: [George A. Davis](#), Procuring Contracting Officer  
266 Facsimile Number: (703) 610-1642

Contact with any other Government official except the PCO concerning this solicitation may result in disqualification of the offeror from consideration for award.

## 267 **L.7 Interpretation of RFP Requirements**

268 No interpretation of any provision of this RFP, including applicable contract  
269 specifications, shall be binding on the Government unless furnished or agreed to in writing  
270 by the PCO.

## 271 **L.8 Identification of Restricted Rights in Computer Software**

272 The offeror's attention is called to the requirement that any restrictions on the  
273 Government concerning use or disclosure of computer software that was developed at private  
274 expense and is to be delivered under the contract must be set forth in an agreement to be  
275 negotiated prior to award and made a part of the contract. Therefore, the offeror shall  
276 identify in its proposal, to the extent feasible, any such computer software that was  
277 developed at private expense and upon which it desires to negotiate restrictions, and shall

278 state the nature of the proposed restrictions. A listing of such software shall be attached to  
279 and be included as part of the Technical and Management Proposal. If no such computer  
280 software is identified in the proposal, it will be assumed by the Government that it has  
281 unlimited rights.

## 282 **L.9 Incurring Costs**

283 Costs shall not be incurred in the anticipation of receiving reimbursement from the  
284 Government without the written authorization of the Administrative Contracting Officer  
285 (ACO).

## 286 **L.10 Amendments to the Proposal**

287 All proposal revisions/updates must meet the following criteria:

- 288 (a) Submit changes in the same hard copy and electronic copy quantities as required for  
289 the initial proposal submission.
- 290 (b) At the Government's discretion, offerors may be required to use differently colored  
291 paper for hard copies of modified pages.
- 292 (c) Submit hard copy changes as complete change pages. Changes shall be indicated by  
293 change bars (vertical lines adjacent to the change in the right margin) generated by  
294 the word processing software to indicate any change that has been made.
- 295 (d) Include the date of the modification in the lower right hand corner at the bottom of  
296 the respective page. For inserted pages, number each page using an alphanumeric  
297 designator (e.g., 1, 1a, 1b, 2, 3, if two pages are inserted between pages 1 and 2).
- 298 (e) Modifications of a proposal are subject to FAR Clause 52.215-10, *Late Submissions,*  
299 *Modifications, and Withdrawals of Proposals.*

## 300 **L.11 Prime Contractor Responsibilities**

301 Offerors are strongly encouraged to include in their proposals other sources of supply  
302 when such inclusions provide the Government a lower overall cost. However, the offeror  
303 shall be the prime contractor for procurement of the services offered. The offeror alone shall  
304 be held responsible by the Government for performance of all contractor obligations under  
305 any contract resulting from its proposal. The Government, in turn, shall render payment of  
306 any and all charges solely to the prime contractor.

307 The offeror is reminded that any resultant contract will not create any contractual  
308 relationship between the Government and any eventual subcontractors.

309 **L.12 Security Requirements**

310 Performance under the contemplated contract may require the contractor to have access  
311 to information classified “Top Secret.” Therefore, upon award, the successful offeror may be  
312 required to obtain the appropriate personnel and facility clearances to have access to such  
313 information. The customer organization shall initiate and coordinate the clearance request.  
314 If the contractor is not granted “Top Secret” clearance within a reasonable period of time, the  
315 Government may terminate the contract.

316 Information about obtaining the security clearances set forth herein may be obtained from  
317 the following organization:

318 Defense Investigative Service Clearance Office  
319 P.O. Box 2499  
320 Columbus, OH 43216-5006  
321 (614) 692-3176

322 **L.13 Alternate Proposals**

323 **L.13.1 Multiple Proposals**

324 Offerors may submit more than one proposal in response to this solicitation provided that  
325 each proposal addresses and meets all requirements specified herein. If alternate proposals  
326 are submitted, each proposal must be clearly labeled and identified on the cover page of each  
327 separate document, and the reason for each alternate and its comparative benefits shall be  
328 explained. Each page of each proposal shall identify the proposal to which it belongs. Each  
329 proposal must be a complete offer in and of itself. Each proposal submitted will be evaluated  
330 on its own merits. The Government will not accept or evaluate proposals for other than  
331 requirements identified in this Request for Proposal (RFP).

332 **L.13.2 Focused Alternatives**

333 Alternate proposals aimed at satisfying specific elements of the Government’s overall  
334 requirements in a unique or alternative manner will be permitted if accompanied by and fully  
335 cross-referenced to a fully compliant proposal. Each alternate proposal will be evaluated on  
336 its focused proposed solutions and the common solutions of the fully compliant proposal that  
337 accompanies it.

338 **L.14 Delivery of Proposal**

339 (a) **Markings.** It is important that the outer envelope or wrapping of each offer be  
340 addressed as shown below. Failure to properly address the outer cover could cause  
341 an offer to be misdirected.

342 (1) Offeror's Return Address

343 (2) Contracting Officer's Address:

344 General Services Administration

345 Attn: George A. Davis, MAA Procuring Contracting Officer

346 Mail Stop Z397

347 Solicitation Number: TQD-AL-00-1020

348 7525 Colshire Drive

349 McLean, VA 22102-7400

350 (3) **DO NOT OPEN IN MAIL ROOM**

351 (4) **TO BE OPENED BY PROCURING CONTRACTING OFFICER ONLY**

352 **L.15 Disposition of Unclassified Drawings and Specifications**

353 Any drawings, specifications, and other material furnished by the Government in  
354 connection with this solicitation need not be returned to the Government, except as noted.

355 **L.16 Proposal Preparation Costs**

356 This RFP does not commit the Government to pay any cost for the preparation and  
357 submission of a proposal(s) in response to this RFP. The PCO is the only individual who can  
358 legally commit the Government to the expenditure of public funds in connection with this  
359 procurement.

360 **L.17 Disposition of Proposals**

361 GSA will retain at least one copy of each proposal and the remainder will be destroyed.  
362 No destruction certificate will be issued.

363 **L.18 Reserved**

364 **L.19 General Proposal Instructions**

365 This section specifies the general requirements for the contents of proposals. The  
366 proposal shall be presented as shown in Table L.19-1.

367

368

369 Proposals shall be prepared using a 12-point font, single-spaced, that can be reproduced  
 370 on U.S. letter size (8 ½” x 11”) paper, and legible in all required copies. Foldout pages are  
 371 allowed for figures and tables, but the use of foldouts for the body of the text is prohibited.  
 372 The maximum page limit indicated in Table L.19-1 does not include the requirement  
 373 checklists, example plans, or report samples required for Volume IB. The pages of the  
 374 technical and management volume shall be numbered using the volume and page number.

375 One electronic copy of all text, figures, tables (including narrative and stipulated  
 376 requirements), and forms within Volumes IB, III, and IV shall be submitted on a compact  
 377 disk. The electronic versions shall use, as appropriate, Microsoft Word 97 and Microsoft  
 378 Excel 97 formats, or the most current versions as directed by the PCO. An electronic copy of  
 379 the completed Albuquerque MAA Price Evaluation Tool and all yearly and summary outputs  
 380 shall be submitted. One copy of Volume IIB may be submitted in either hard copy or  
 381 electronic format.

382

383 As part of the electronic copy, the offeror shall include a “Readme” file that identifies  
 384 each file and the file contents. The following is an example of the type of information that  
 385 should be provided in the readme.txt file:

386

**Table L.19-2. Sample “Readme” File**

File Name (Example)	Proposal Volume	Contents
Section I.doc	Technical and Management	Section 1
Voliv.doc	Business Proposal	Sections 1-6
Vol_IB_sec_Master.doc	Technical and Management	Section 2
Sec J.doc	Technical and Management	All requirements checklists

387

388 A hard copy original of the following, signed, and dated shall also be submitted:

- 389 (a) Standard Form 33  
390 (b) Table J.6-1b Stipulated Technical Requirements  
391 (c) Table J.6-2b Stipulated Management Requirements  
392 (d) Table J.6-3b Stipulated Price Requirements  
393 (e) Section K, Representations, Certifications, and Other Statements of Offerors  
394 (f) Small, Small Disadvantaged, Women Owned Small, HUBZone Small Business  
395 Concerns Subcontracting Plan.  
396 (g) GSA Form 527

397 The offeror shall guarantee, in writing, that the electronic version is virus free. The  
398 offeror shall identify the name and version of the virus software used. All document  
399 revisions shall be accepted prior to submission to the Government.

400 In the event of a conflict between the text of any hard copy version of the proposals and  
401 the contents of the electronic version, the electronic version shall prevail. The offeror shall  
402 provide a written guarantee that the hard copy version of the proposal agrees exactly with the  
403 electronic version.

404 Offerors who have not responded previously to the RQS are required to submit **separate**  
405 proposals in response to the RQS requirement and the Albuquerque MAA RFP requirements.  
406 Offerors responding to the RQS should refer to the RQS solicitation for proposal preparation  
407 instructions. The instructions for the RQS Technical and Management Proposal and RQS  
408 Technical Literature are contained in Sections L.20.1 and L.20.2, respectively, in Solicitation  
409 TQD-RH-97-0000 and its subsequent amendment(s).

410 Offerors which have submitted RQS proposals or have been previously qualified by the  
411 Government are not required to resubmit the RQS Technical and Management and Technical  
412 Literature Volumes. However, these offerors are required to stipulate that their qualification  
413 statement is current and accurate for incorporation into their Albuquerque MAA proposal.

414 Each proposal submitted in response to this RFP shall be in the format and content  
415 specified in Section L.20.

## 416 **L.20 Detailed Proposal Instructions**

417 This section provides detailed instructions for preparing the proposal volumes. Each  
418 volume shall include the following components:

- 419 (a) **Cover Page:** Each volume's cover page shall include the solicitation name and  
420 number, name of responding organization, and name of volume.  
421 (b) **Table of Contents:** Each volume shall have a table of contents.

- 422 (c) **Information Requested:** Instructions regarding the information to be contained in  
423 each RFP proposal volume are provided in the following sections:  
424 i. L.20.1 - Albuquerque MAA Technical and Management Proposal  
425 ii. L.20.2 - Albuquerque MAA RFP Technical Literature  
426 iii. L.20.3 - Albuquerque MAA Price Proposal  
427 iv. L.20.4 - Albuquerque MAA Business Proposal

428 **L.20.1 Albuquerque Technical and Management Proposal (Volume IB)**

429 The Albuquerque Technical and Management Proposal shall describe in detail the  
430 offeror's technical resources, technical and management approach, and experience and  
431 background that enable the offeror to fulfill the RFP requirements. The offeror's proposal  
432 shall not contain prices and shall not address any aspect of pricing. The Technical and  
433 Management Proposal shall contain the following sections.

434 **L.20.1.1 Section 1 - Pre-Qualified Offeror Stipulation**

435 If the offeror was previously qualified to participate in the MAA Program or has already  
436 submitted a pre-qualification proposal, the offeror shall stipulate that the qualification  
437 statement is current and accurate for incorporation into the Albuquerque MAA RFP  
438 Technical and Management Proposal. The offeror shall identify any changes or additions to  
439 the offeror's pre-qualified RQS proposal. The offeror shall acknowledge all Amendments to  
440 the RQS, Solicitation TQD-RH-97-0000.

441 **L.20.1.2 Section 2 - Narrative Responses**

442 The offeror shall provide a complete and detailed response to each technical requirement  
443 contained in Table J.6-1a. In responding to the technical requirements in Table J.6-1a, the  
444 offeror shall demonstrate the following:

- 445 (a) Soundness of technical approach for providing the Albuquerque MAA-specific  
446 services described in Sections C and J.2.2.
- 447 (b) Quality of transmission service and telecommunications facilities contained in the  
448 Albuquerque system architecture to support the provision of services.

449 The offeror shall provide a complete and detailed response to each management  
450 requirement contained in Table J.6-2a. In responding to the management requirements in  
451 Table J.6-2a, the offeror shall demonstrate the following:

- 452 (a) Ability to implement service ordering, billing, dispute management, trouble handling,  
453 and reporting requirements
- 454 (b) Soundness of management approach
- 455 (c) Ability to support MAA customers

456 (d) Ability to manage and facilitate implementation

457 In response to requirement 5 in Table J.6-2a, the offeror shall provide a sample of all  
458 reports described in Section G.6 that were not submitted in the RQS proposal and any known  
459 format/content changes to the RQS samples specifically to be use in Albuquerque.

460 The offeror shall complete the proposal reference column in Tables J.6-1a and J.6-2a,  
461 and include a copy of these tables in the proposal.

462 **L.20.1.3 Section 3 – Stipulated Requirements**

463 The offeror shall complete the stipulated technical requirements and management  
464 requirements provided in Tables J.6-1b and J.6-2b. The offeror is not required to prepare  
465 written responses describing how it will meet these requirements. Instead, the offeror is  
466 required to consent (stipulate) that it will fulfill all requirements. An authorized corporate  
467 officer indicating agreement and commitment to full compliance and contract performance  
468 shall sign these checklists.

469 **L.20.1.4 Section 4 - Exceptions and Deviations**

470 The offeror shall identify and explain any exceptions or deviations taken or conditional  
471 assumptions made in the offeror's proposal versus the requirements of the RFP.

472 **L.20.1.5 Section 5 – Conformance Appraisal Checklists**

473 The offeror shall complete the proposal reference blocks, as appropriate, in Table J.6-4,  
474 Albuquerque General Proposal Conformance Appraisal Checklist, and Table J.6-5,  
475 Albuquerque Technical and Management Proposal Conformance Appraisal Checklist.

476 **L.20.1.6 Section 6 - Guarantees**

477 The offeror shall provide the following written guarantees:

- 478 (a) The electronic version is virus free, including the name and version of the virus  
479 software used
- 480 (b) All document revisions have been accepted
- 481 (c) The text of any items provided in the hard copy version of the RFP as required in  
482 Section L.19, agrees exactly with the electronic version (including, SF-33, stipulated  
483 requirements, Section K, etc.).

484 **L.20.1.7 Section 7 - Corporate Qualifications**

485 The offeror shall provide the information below as part of the description of corporate  
486 qualifications.

487 **L.20.1.7.1 Corporate Resources.** The offeror shall describe the corporate resources  
488 that will be available to support the proposed MAA services and features in Albuquerque.

489 Corporate resources include network infrastructure and staffing. The offeror shall describe  
490 how corporate resources will be deployed to provide MAA services as required in Section C.

491 **L.20.1.7.2 Subcontractor Management.** The offeror shall illustrate its proposed  
492 approach to managing and controlling the operations of each proposed subcontractor. The  
493 offeror shall describe the facilities that it owns that will be part of the proposed MAA  
494 network and those that are owned by subcontractors. The offeror shall describe the controls  
495 proposed to manage MAA subcontractors, monitor and control service quality, and ensure  
496 the services comply with the contractor's standards and the requirements of the contract.

497 **L.20.1.7.3 Corporate Structure.** The offeror shall provide documentation describing  
498 the offeror's corporate organization for the Albuquerque MAA contract. This documentation  
499 shall include but not be limited to the following information:

- 500 (a) The contractor, the contractor's subsidiaries, and the contractor's major  
501 subcontractors' organization charts and descriptive text clearly depicting the areas of  
502 responsibility and flow of authority within each organization. These charts shall  
503 show the functional relationships among organizational elements.
- 504 (b) Organization charts and plans that clearly depict the areas of responsibility and flow  
505 of authority between the contractor and its subsidiaries and/or major subcontractors.
- 506 (c) Charts and descriptive text indicating the contractual, technical, and administrative  
507 interfaces between the Government and the contractor, the contractor's subsidiaries,  
508 and major subcontractors.
- 509 (d) A description of the contractor's, the contractor's subsidiaries', and the major  
510 subcontractors' management systems, including the controls and scheduling  
511 techniques to be used for ensuring task accomplishment and procedures for ensuring  
512 complete coordination of all activities, as well as escalation procedures to be used to  
513 ensure task accomplishment.
- 514 (e) A description of the relationship of the contractor's, the contractor's subsidiaries',  
515 and major subcontractors' organizations, which are responsible for managing both the  
516 project and individual activities of the project, to the corporate or "home" office  
517 during transition, migration, implementation, and operation. This description shall  
518 include a clear definition of the level of authority delegated to the manager of the  
519 local organization(s). A description of any corporate or "home" office resources,  
520 including manpower, computers, software, shop, service engineering or service  
521 development organization, applied research laboratory, etc., to be committed to this  
522 contract on an as-needed basis, and the procedures for using these resources, shall be  
523 included.

524 **L.20.2 Technical Literature (Volume IIB)**

525 In Volume IIB, the offeror may include descriptive materials such as service guides,  
526 quick-reference user cards, and/or user guides that supplement sections of Volume IB,  
527 Technical and Management Proposal. The technical literature reviewed by the Government  
528 will be used for information only and will not be evaluated or used to qualify offerors. Only  
529 information that supports the offeror's ability to satisfy the requirements of Sections C and G  
530 of this RFP and supplements the information required in Volume IB should be included.  
531 Volume IB shall include the appropriate references to this literature and shall identify the  
532 page(s) and paragraph(s) of the reference in Volume IIB to which it applies.

533 **L.20.3 Albuquerque MAA Price Proposal (Volume III)**

534 The Price Proposal shall address the requirements of Section B of this solicitation. All  
535 information regarding prices, including that contained on electronic media, for the proposed  
536 services shall be logically enclosed in this volume.

537 **L.20.3.1 Section 1 - Statement of Total Offered Price**

538 The Price Proposal shall provide a statement of the total offered price. This total shall  
539 represent the offeror's contract price for the base term and all options.

540 The total offered price shall be calculated using the Albuquerque MAA Price Evaluation  
541 Tool, provided on the MAA Web site. The MAA Price Evaluation Tool requires Windows  
542 95 and Microsoft Excel 97 to operate. The Albuquerque MAA Price Evaluation Tool  
543 multiplies the offeror's proposed prices by the appropriate summary price evaluation traffic  
544 for each service and each contract year and sums the total costs for each service and contract  
545 year. Instructions for using the MAA Price Evaluation Tool are contained in the file titled  
546 "Instructions" provided on the MAA Web site.

547 **L.20.3.2 Section 2 – Narrative Responses**

548 The offeror shall provide a complete and detailed response to each price requirement  
549 contained in Table J.6-3a. The offeror shall complete the proposal reference column in Table  
550 J.6-3a, and include a copy of this table in the proposal.

551 **L.20.3.3 Section 3 - Stipulated Requirements**

552 The offeror shall complete the stipulated price requirements provided in Table J.6-3b.  
553 The offeror is not required to prepare written responses describing how it will meet these  
554 requirements. Instead, the offeror is required to consent (stipulate) that it will fulfill all  
555 requirements. This checklist shall be signed by an authorized corporate officer indicating  
556 agreement and commitment to full compliance and contract performance.

557 **L.20.3.4 Section 4 - Instructions for Pricing**

558 The offeror shall provide detailed procedures for applying the proposed price tables.  
559 Where the offeror has applied discretion in the application of the price tables, the choices  
560 made by the offeror shall be clearly stated in this section.

561 **L.20.3.5 Section 5 - Price Tables**

562 The offeror shall provide a price for each price element as specified in Section B. The  
563 price tables are in Microsoft Excel 97 format and are available on the MAA Web site. The  
564 offeror shall use and submit prices in the exact format and layout of the electronic price  
565 tables provided. The offeror shall not modify the format or layout of any price table.

566 All price elements shall be priced and all cells in the spreadsheets shall be populated.  
567 Price elements that are not separately priced and are included as part of the basic service  
568 capabilities shall be noted as "NSP". Where a price element is not appropriate, the price  
569 entry shall be noted as "N/A."

570 **L.20.3.6 Section 6 - Conformance Appraisal Checklists**

571 The offeror shall complete the proposal reference blocks, as appropriate, in Table J.6-6,  
572 Albuquerque Price Proposal Conformance Appraisal Checklist.

573 **L.20.3.7 Section 7 - Tariff Information**

574 The offeror shall indicate whether Albuquerque MAA services will be provided under an  
575 existing tariff or an anticipated tariff filing with the Federal Communications Commission or  
576 state public utilities commission or equivalent authority. Where the prices quoted in Section  
577 B are under an existing tariff, these prices must be footnoted to indicate the applicable tariff  
578 and pages. Section H.12 of this RFP, and its subsequent amendment(s), address additional  
579 tariff filing requirements.

580 **L.20.3.8 Section 8 - Termination/Cancellation Liability**

581 Price proposals and/or tariffs containing termination or cancellation liabilities shall not be  
582 submitted.

583 **L.20.4 Albuquerque MAA Business Proposal (Volume IV)**

584 The Albuquerque MAA Business Proposal shall contain the following sections.

585 **L.20.4.1 Section 1 - Standard Form 33**

586 Standard Form (SF) 33, *Solicitation, Offer and Award*, completed and signed by the  
587 offeror, constitutes the offeror's acceptance of the terms and conditions of this solicitation.  
588 Block 16 of the SF33 (page 1 of this solicitation) shall be signed by an official authorized to  
589 commit the offeror to contractual obligations. The proposal shall be submitted in the required

590 number of copies, to the specified address, by the closing date and time, and marked as  
591 indicated in Blocks 8 and 9 of the SF33.

592 This form shall be submitted in lieu of the Optional Form (OF) 308 provided at issuance  
593 of the RQS. The offeror is required to acknowledge all amendments to the RQS TQD-RH-  
594 97-0000 and this RFP on this form.

595 **L.20.4.2 Section 2 - Representations and Certifications**

596 The Representations and Certifications included as Section K of this RFP, shall be  
597 completed and signed by an official authorized to bind the offeror. The offeror shall sign on  
598 the last page of Section K by adding name, title, date, and signature lines.

599 **L.20.4.3 Section 3 - Offeror Responsibility**

600 In order for an offeror to receive a contract, the PCO must first make an affirmative  
601 determination that the prospective contractor is responsible in accordance with the provisions  
602 of Subpart 9.1 of the FAR. To assist the PCO in this regard, the offeror shall include the  
603 following information in the business volume:

- 604 (a) A statement of financial condition of the offeror in the form of a completed GSA  
605 Form 527 (See Section J.9). This form may be appended with the offeror's most  
606 recent financial statements. However, all appropriate blocks of the form must be  
607 completed and the form must contain an authorized signature.
- 608 (b) A description of the accounting system and controls employed by the offeror.
- 609 (c) A description of the offeror's facilities and support systems that are essential to  
610 accomplishing the tasks outlined in this solicitation. This description may be the  
611 same as the corporate resources description required in Volume IB, Albuquerque  
612 MAA RFP Technical and Management Proposal.
- 613 (d) Demonstration of adequate financial resources, or the ability to obtain such resources  
614 as required during performance of the contract.
- 615 (e) Demonstration of the ability to comply with the required or proposed delivery  
616 schedule, taking into consideration all existing business commitments, both  
617 commercial and Government.
- 618 (f) Demonstration of a satisfactory record of integrity and business ethics.
- 619 (g) Demonstration of the necessary organization, experience, accounting and operational  
620 controls, and technical skills, or the ability to obtain them.
- 621 (h) Demonstration of the necessary production, construction, and technical equipment  
622 and facilities, or the ability to obtain them.
- 623 (i) Demonstration that the offeror is otherwise qualified and eligible to receive an award  
624 under applicable laws and regulations.

625 (j) Acknowledgment of all Amendments to the RQS TQD-RH-97-0000 and the  
626 Albuquerque MAA RFP.

627 (k) A statement of the total offered price. This total shall represent the offeror's contract  
628 value for the base term and all options.

629 **L.20.4.4 Section 4 - Annual Report**

630 A copy of the organization's most recent annual report shall be submitted as part of the  
631 business proposal. Annual reports shall also be submitted for all proposed major  
632 subcontractors.

633 **L.20.4.5 Section 5 - Small Business Subcontracting Plan**

634 If the proposed contract exceeds a total estimated cost of \$500,000 for the entire period  
635 of performance, the offeror is required to submit a subcontracting plan, specific to the MAA  
636 procurement in accordance with Clause I.1.14. This provision does not apply to small  
637 business concerns.

638 **L.20.4.6 Section 6 - Conformance Appraisal Checklists**

639 The offeror shall complete the proposal reference blocks, as appropriate, in Table J.6-7,  
640 Albuquerque Business Proposal Conformance Appraisal Checklist.

641 **L.21 Operational Capability Demonstration**

642 At the option of the Government, offerors may be required to perform an Operational  
643 Capability Demonstration (OCD) of its local telecommunications services capabilities,  
644 pursuant to Section C. If the Government requires an OCD, it will occur after the receipt of  
645 proposals and prior to qualification and/or contract award. At the request of the Government,  
646 the offerors shall provide an OCD plan.

647 The offeror's OCD plan shall describe what will be demonstrated, how the demonstration  
648 will be executed, and what will be required of the Government. The following shall be  
649 considered, at a minimum, in developing this OCD plan:

650 (a) **Services and Features.** The offeror shall demonstrate the availability of the services  
651 and features specified in Section C.

652 (b) **Management and Operations.** The offeror shall demonstrate its management and  
653 operations capabilities in the following areas:

654 (1) **Service Ordering System.** The offeror shall demonstrate how orders for service  
655 are entered, processed, tracked, and managed. The offeror shall provide samples  
656 documentation and reports generated by its service ordering system for customer  
657 use.

658 (2) **Billing System.** The offeror shall demonstrate its billing system. In particular,  
659 the offeror shall demonstrate how billing is initiated and supported on an ongoing

660 basis and procedures for handling billing disputes and trouble and service outage  
661 credits. The offeror shall provide samples of invoices, documentation, and  
662 reports generated by its billing system for customer use.

663 (3) Trouble Handling System. The offeror shall demonstrate how trouble reports are  
664 received, logged in, referred for trouble isolation and clearance, isolated and  
665 cleared, tracked, escalated, and closed out. The offeror shall provide samples of  
666 the types of data and reports that are generated by the trouble handling system for  
667 customer use.

668 (4) Customer Training. The offeror shall demonstrate its approach to training the  
669 customer's staff.

## 670 **L.22 Oral Presentations**

671 The Government reserves the right to require an oral presentation by the offeror to the  
672 proposal evaluation team(s). The Government may elect to videotape an offeror's oral  
673 presentation. The offeror will receive a minimum of fourteen (14) calendar days notice prior  
674 to the requested time for presentation. The presentation shall include but need not be limited  
675 to:

- 676 (a) Pricing
- 677 (b) Technical Response to Requirements
- 678 (c) Management Services
- 679 (d) Technical Plans and Procedures
- 680 (e) Transition
- 681 (f) Migration
- 682 (g) Interoperability
- 683 (h) Security
- 684 (i) Marketing and Promotion Plan

685 The Government reserves the right to require that personnel proposed by the offeror  
686 attend the oral presentation.

## 687 **L.23 Government Estimated Requirements**

688 The quantities shown in Section J.2 are estimates, based upon the best information  
689 available to GSA. Such estimates are being furnished for computation of price totals.

690 They are provided for evaluation purposes only. However, the contractor is required to  
691 furnish all services that may be ordered during the term of the contract in accordance with  
692 the contract.

693 **L.24 Preaward Audit Requirements**

694 In accordance with Part 15.404 of the FAR, offerors are advised that an audit review by  
695 the cognizant contract audit activity may be conducted on price proposals submitted in  
696 response to this solicitation. Offerors shall make available to the auditor(s) all books and  
697 financial records considered by the auditor(s) to be essential in the discharge of their duties  
698 under Part 15.8 of the FAR whenever the audit is conducted.

699 **L.25 Minimum Acceptance Period**

700 Offerors allowing less than 365 calendar days in the “offer” portion of SF 33 for  
701 acceptance by the Government may be rejected as unacceptable.

17 **Section M**

18 **Evaluation Factors for Qualification and Contract Award**

19 The Government intends to conduct the Metropolitan Area Acquisition (MAA) in two  
20 phases:

- 21 (a) **Initial Qualification Phase:** In this initial qualification phase, the Government  
22 issued a Request for Qualification Statements (RQS) on November 26, 1997 and  
23 amended it on January 22, 1998, May 28, 1998, July 16, 1999, and October 18, 1999.  
24 The RQS specifies factors considered to be fundamental MAA technical and  
25 management requirements and pre-qualifies offerors.
- 26 (b) **Metropolitan Area-Specific Requests for Proposals (RFPs) Phase:** RFPs for the  
27 designated metropolitan areas are released that define metropolitan area-specific  
28 technical, management, and pricing requirements.

29 **M.1 Qualification Process Continuation**

30 The qualification process is intended to accelerate the acquisition of MAA services in  
31 multiple cities by pre-qualifying offerors, who meet MAA technical and management  
32 requirements. Pre-qualification is a continuing process throughout the MAA Program:

- 33 (a) Offerors may be considered for pre-qualification by responding to the RQS at any  
34 time for the duration of the MAA Program.
- 35 (b) Offerors who are determined to be technically unacceptable in the initial qualification  
36 phase will be permitted to resubmit their qualification statement anytime for the  
37 duration of the MAA Program.
- 38 (c) Offerors may pre-qualify by responding at this Albuquerque MAA RFP. The offeror  
39 will be required to prepare proposals responding to both the RQS and the  
40 metropolitan area-specific RFP. Offerors who meet all RQS technical and  
41 management requirements, but do not win the Albuquerque MAA contract, will be  
42 pre-qualified for other MAA RFPs.
- 43 (d) Offerors may pre-qualify by responding to future metropolitan area-specific RFPs.  
44 The offeror will be required to prepare proposals responding to both the RQS and the  
45 metropolitan area-specific RFP.

46 **M.2 General Qualification Considerations**

47 **M.2.1 Evaluation Basis**

48 The offeror's technical and management proposal will be evaluated in accordance with  
49 Pass/Fail decision rules applied to each item in the technical and management requirements  
50 checklists in Section J.6. Based on this evaluation, and upon consideration of the assessment  
51 of potential risks, each proposal will be given an adjectival rating as follows:

52 (a) Acceptable - The proposal meets the Government's technical and management  
53 requirements and does not present unacceptable risks.

54 (b) Unacceptable - The proposal fails to meet the Government's technical and  
55 management requirements and/or presents unacceptable risks.

56 Proposals are to be prepared in accordance with the instructions in Section L. For a  
57 proposal to be acceptable, the offeror must agree to all terms and conditions of this RFP.

58 **M.2.2 Unrealistic Proposals**

59 Offerors are hereby notified that any proposals that are unrealistic in terms of technical  
60 and management commitment will be deemed reflective of an inherent lack of management  
61 and technical competence or indicative of failure to comprehend the complexity and risk of  
62 the contract requirements. This may be grounds for rejection of the proposal.

63 **M.2.3 Qualification Without Discussion**

64 The Government may qualify offerors based on initial proposals received without  
65 discussion of such offers. Accordingly, each initial proposal should be submitted on the  
66 most favorable technical and management terms that the offeror can submit.

67 **M.2.4 Evaluation Support**

68 Offerors are hereby notified that GSA intends to use a private organization to assist in the  
69 evaluation of proposals. That organization will have access to any and all information  
70 contained in the offerors' proposals and will be subject to appropriate conflict of interest,  
71 standards of conduct, and confidentiality restrictions.

72 **M.3 Qualification Statement Evaluation**

73 The offeror's technical and management qualifications statement will be evaluated in  
74 accordance with Pass/Fail decision rules as described in Sections M.2 and M.4 of the RQS,  
75 Solicitation TDQ-RH-97-0000, and its subsequent amendments. Offerors who have not yet

76 submitted a pre-qualified proposal for the MAA Program should refer to the RQS solicitation  
77 for details regarding the qualification statement evaluation.

#### 78 **M.4 Albuquerque MAA Proposal Evaluation**

79 Proposals will be evaluated with respect to the technical and management factors  
80 identified in Sections M.4.2.1 and M.4.2.2; business considerations as described in Section  
81 M.4.3; and price as described in Section M.4.4.

82 The steps comprising the evaluation process are as follows:

- 83 (a) **Conformance Appraisal.** Offeror submissions will be reviewed to verify  
84 conformance with instructions in Section L using the checklists in Tables J.6-4  
85 through J.6-7. Offerors will be given the opportunity to remedy minor irregularities  
86 in their submissions.
- 87 (b) **Initial Albuquerque MAA Proposal Compliance Appraisal.** Offeror proposals  
88 will be reviewed to determine their compliance with the **Albuquerque** MAA RFP  
89 requirements in Section J.6. Offerors will be given the opportunity to remedy minor  
90 informalities, irregularities, or apparent clerical mistakes in their submissions.
- 91 (c) **Reserved.**
- 92 (d) **Economic Evaluation.** Price proposals will be evaluated in accordance with Section  
93 M.4.4.
- 94 (e) **Competitive Range Determination.** A competitive range will be established to  
95 identify those offerors with whom written and/or oral discussions may be conducted.  
96 The competitive range will be established based on the proposed cost or price and  
97 the technical and management proposals.
- 98 (f) **Discussions and Negotiations.** The Contracting Officer will conduct written and/or  
99 oral discussions with all offerors who submit proposals determined to be within the  
100 competitive range. All offerors within the competitive range will be given the  
101 opportunity to submit revised proposals after the conclusion of discussions and  
102 negotiations.
- 103 (g) **Revised Albuquerque MAA Final Proposal Revision (FPR) Proposal**  
104 **Compliance Appraisal.** After any discussion and the receipt of any revised  
105 proposals, the Government will evaluate the revised proposal.
- 106 (h) **Review Revised Price Proposals.** Revised price proposals received as a result of  
107 discussions will be evaluated in accordance with Section M.4.4 and this section.  
108 Offerors whose price proposals are not fair and reasonable may receive no further  
109 consideration.

- 110 (i) **Final Proposal Revision Evaluation.** The FPR evaluation process steps are as  
111 follows:
- 112 (1) **FPR Price Evaluation.** FPR price proposals will be evaluated in accordance with  
113 Section M.4.4 and this section.
- 114 (2) **Determine Price Reasonableness.** The results of the FPR price evaluation will  
115 be used to determine price reasonableness. Depending upon the results of these  
116 comparisons, either of the following two actions may be taken:
- 117 (i) If none of the FPR price proposals are fair and reasonable the Government will  
118 either:
- 119 - Request offerors to revise and resubmit their FPR price proposals, and  
120 continue the evaluation process with step (i)(1) above, or
  - 121 - Terminate the acquisition process.
- 122 (ii) If one or more of the FPR price proposals is fair and reasonable, the evaluation  
123 process will continue with step (j) below.
- 124 (j) **Make Award(s).** An Albuquerque MAA contract with a minimum revenue  
125 guarantee as specified in Section H.3 will be awarded following the criteria in  
126 Section M.4.1. If the Government determines that any remaining proposals meet the  
127 criteria in Section M.4.1, then additional contract(s) may be awarded at the same  
128 time, and such contracts shall have minimum revenue guarantee(s) as specified in  
129 Section H.3.

#### 130 **M.4.1 Award Basis**

131 The Government intends to make multiple awards to multiple offerors for MAA  
132 telecommunications services in the Albuquerque metropolitan area defined in this RFP. One  
133 award will be made to the responsible, technically-acceptable offeror with the lowest total  
134 offered price. Subsequent award(s) will be considered for other responsible, technically-  
135 acceptable offeror(s) provided:

- 136 (a) The offeror's prices for all services are fair and reasonable, and  
137 (b) The offeror has the next-lowest total offered price (as compared to the previous  
138 awardee(s)).

#### 139 **M.4.2 Technical and Management Proposal Evaluation**

140 The offeror's Albuquerque Technical and Management Proposal will be evaluated in  
141 accordance with Pass/Fail decision rules applied to each technical and management  
142 requirement in the Albuquerque RFP. Qualified offerors from the initial qualification phase  
143 must certify that their qualification statement is current and accurate for incorporation into  
144 their RFP proposal.

145 **M.4.2.1 Albuquerque MAA RFP Technical Requirements Compliance Appraisal**

146 The offeror's proposal will be evaluated for compliance with the technical requirements  
147 in Tables J.6-1a and J.6-1b of the **Albuquerque** MAA RFP on a Pass/Fail basis.

148 **M.4.2.2 Albuquerque MAA RFP Management Compliance Appraisal**

149 The offeror's proposal will be evaluated for compliance with the management  
150 requirements in Tables J.6-2a and J.6-2b of the **Albuquerque** MAA RFP on a Pass/Fail  
151 basis.

152 **M.4.3 Business Proposal Evaluation**

153 The offeror's Albuquerque Business Proposal will be evaluated for compliance with the  
154 requirements, terms, and conditions in the RFP.

155 **M.4.4 Price Proposal Evaluation**

156 A price evaluation will be conducted for each Albuquerque Price Proposal.

157 **M.4.4.1 Scope of Price Evaluation**

158 The offeror's price proposal will be evaluated for compliance with the requirements in  
159 Tables J.6-3a and J.6-3b in the Albuquerque MAA RFP on a Pass/Fail basis.

160 The offeror's price proposal will be evaluated with respect to prices projected over the  
161 base period and all option periods covered by the proposal. In order to ensure that the prices  
162 are acceptably and materially and mathematically balanced, each offeror's unit prices, as  
163 defined in Section J.4, may be compared with one or more of the following:

- 164 (a) All offered prices
- 165 (b) Market prices
- 166 (c) Government price targets
- 167 (d) Other Government and publicly available contracts

168 **M.4.4.2 Errors in Pricing**

169 Any variance between total price submitted by the offeror and the total offered price  
170 computed by the Government will be corrected on the basis of the prices provided in the  
171 offeror's price tables, multiplied by the Government's estimated quantity as defined in  
172 Section J.2. The Government reserves the right to adjust any and all totals on that basis.  
173 Overall price evaluation will be based on corrected total prices.

174 **M.4.4.3 Total Offered Price**

175 The total offered price for an offer will be based upon the value of the aggregated prices  
176 for all years in the base period and all option periods. Service, feature, and Service Initiation  
177 Charge (SIC) costs will be computed using the prices provided by the Offeror in the Section

178 B price tables multiplied by the quantities in the Government's estimated requirements  
179 (Section J.2).

180 **M.4.4.4 Unbalanced Pricing**

181 The Government may reject any offer that is materially unbalanced, according to the  
182 FAR 15.814(b) definition of materially unbalanced.

183 **M.4.4.5 Evaluation for Additional Offerings**

184 Additional offerings as described in Section C.1.2 may be proposed by the offeror and  
185 will be evaluated independently by the Government. However, such services or features will  
186 have no bearing on the acceptability of an offer, and the prices will not be included in the  
187 total offered price.  
188
