Financial Management

Our focus on financial management means you can be assured that your agency's money will be spent in accordance with your appropriation, authorization and bona fide need. When we perform contract administration, we pay vendor invoices upon your acceptance of goods and services. Funds expenditures are tracked and reported monthly to you with line item detail.

Getting Started

Doing business with the Federal Acquisition Service is simple. We work through Interagency Agreements (also known as Memorandums of Understanding) to establish the service level expectation, schedule and funding mechanism. As a cost-reimbursable, non-appropriated organization, our services are offered on a fee-for service basis and include hourly rates, fixed price and surcharge options.

We provide services and supplies pursuant to specific authority under 40 U.S.C. 501 and pursuant to an Executive Agent designation for the acquisition of information technology under the authority of the Information Technology Management Reform Act of 1996 (ITMRA) from OMB. Since GSA has specific statutory authority to provide services and supplies to Federal agencies, the authority of the Economy Act does not apply to GSA's provision of goods and services to the Federal agencies, with some minor exceptions.

The full-service and far-reaching nature of our capabilities allows for support on a surge or long-term basis, for strategic or transactional projects. We can even provide staff on-site with you.
