Extension of Study to Allow Multiple Buildings on Single F-type and N-type RWAs

Dear Client Agency,

The Small Projects and Reimbursable Services Division is extending the Study to Allow Multiple Buildings on Single F-type and N-type RWAs that was made available to all client agencies during FY2012 and FY2013.

This extension will remain effective until it is either cancelled by me, or superseded by the next update and issuance of the Reimbursable Work Authorization National Policy Document. We look forward to the opportunities and flexibilities this Study will continue to provide our client agencies.

For questions pertaining to this Study, please contact your Regional RWA Manager (map provided at <u>Contact Your Regional RWA Core Team Managers</u>) or go to: <u>Study Guidance for use of Multiple Buildings on F- and N-Type RWAs</u>. Other RWA inquiries may be directed to: ASKRWA@gsa.gov. We also encourage you to visit our Reimbursable Services website at http://www.gsa.gov/rwa frequently for additional references.

Thank you for your continued support of the Reimbursable Services Program!

Sincerely,

Keith Colella

Director, Small Projects and Reimbursable Services Division
