Appendix D
October 4, 2002

David Hampleman, P.E.
SCS ENGINEERS
10401 Holmes Rd., Suite 400
Kansas City, MO 64131

Dear Mr. Hampleman:

We have reviewed your application dated October 2, 2002 requesting approval to discharge up to 700 gallons of wastewater to the Metropolitan St. Louis Sewer District for treatment. This wastewater is generated from the wash down of walls and floors at the General Service Administration building 105 located at 4300 Goodfellow, St. Louis, Missouri. We understand that the wash down is related to remediation of the former shooting range area.

Based on the analytical results, this wastewater meets MSD Ordinance 8472 standards and is approved for discharge into a sanitary sewer on site subject to 0.5 micron filter treatment for lead, as indicated in your application. This approval is valid for 30 days from the date of this letter.

You must be certain the waste is discharged into a sanitary or combined sewer inlet only. This letter does not authorize any discharge to a separate storm sewer, or to any watercourse, as any such discharge would be in violation of state and federal laws. Please notify me at the number below when the discharge is to commence.

This discharge has been approved based upon the information and sample analysis you provided, and is subject to the conditions stated above. This approval may be revoked by the District at any time if any of the information is found to be incorrect, or if the conditions of this approval are violated. Also, if the discharge causes any operational or maintenance problem within the District's collection or treatment system, or results in violations of any conditions of the District's NPDES permit, SCS Engineers and the property owner, U.S. General Service Administration, will be considered responsible for damages.

If you have any questions, please call me at (314) 436-8742.

Sincerely,
METROPOLITAN ST. LOUIS SEWER DISTRICT

Roland A. Biehl
Environmental Associate Engineer

dss

APPLICATION FOR SPECIAL DISCHARGE APPROVAL

I. WASTEWATER SOURCE IDENTIFICATION:

Site name: General Service Administration
Premise Address: Building 105, 4300 Goodfellow
City: St. Louis State: MO Zip: 63147
Owner: U.S. General Service Administration
Contact person: Michael P. Croker
Title: Director
Phone: 314-263-3001 Fax: 314-263-9099

II. APPLICANT (mailing information):

Applicant name: David Hempleman, P.E
Title: Project Manager
Company name: SCS Engineers
Mailing address: 10401 Holmes Rd Suite 400
City: Kansas City State: MO Zip: 64131
Phone: 816 941 7510 Fax: 816 941 8025

III. A. MATERIAL TO BE DISCHARGED (check all applicable boxes):

1. Wastewater description/location: Water resulting from washdown of walls and floors
2. Process/activity generating wastewater: Remediation of former shooting range

3. Physical and chemical composition: List all constituents, and known or potentially present regulated contaminants below.
   - See separate listing enclosed, and/or
   - See analytical results enclosed, and/or
   - Material Safety Data Sheet enclosed.

4. Is this wastewater from a process subject to EPA's categorical standards in 40 CFR Subchapter N? □ Yes □ No
   a. If yes, the applicable standards are in: 40 CFR Part __________, Subpart __________

5. Does this wastewater contain polychlorinated biphenyls, asbestos or radioactive material? □ Yes □ No
   a. If yes, describe: Analyses attached: 5.6 mg/L Aroclor 1260 (PCB)

6. Representative sample: □ Laboratory results attached, and/or □ Sample provided (1/2 gallon minimum, clear container)
   a. Sample collection point/location: Open top storage vessels
   b. Sampler's name/Co: Brett Engard SCS Engineers
   c. Sample date/time: 9-11-02 9:00 am

7. Discharge will occur over the following time period: □ < 30 days □ ≥ Two years □ Other: ≤ 24 hrs
   a. Expected total volume of wastewater to be discharged over the time period above: 700 Gallons
   b. Proposed discharge volume: 700 Gallons, at a frequency of: □ One time □ Daily □ Weekly □ Monthly
       □ Once/three months □ Once/six months □ Other:

8. Pretreatment of wastewater prior to discharge: □ None □ Yes, describe: Water will be filtered using 0.5 μm mesh filters prior to discharge
   a. If yes, attach site plan, pretreatment system schematic, and design specifications.

9. Wastewater from a remediation project under: □ Superfund/CERCLA □ RCRA □ Voluntary program □ UST □ Not applicable
   a. If from a remediation project, briefly describe the past and present utilization of the property: Ammunition manufacturing and testing facility

Rev. 11/2000
III. B. MATERIAL FROM UNDERGROUND STORAGE TANK SOURCE

☒ Not applicable (go to Section IV.)

Please answer the following questions if you are requesting to discharge wastewater associated with an underground storage tank system.

1. a. Wastewater from: ☐ Inside UST(s) ☐ UST system pit ☐ Excavation outside UST system pit ☐ Monitoring well
☐ Groundwater remediation system
b. UST project involves wastewater from: ☐ UST(s) closed in place ☐ UST(s) removed ☐ Remediation ☐ Upgrade
☐ Maintenance activities ☐ Well monitoring ☐ Other, explain:
c. If wastewater is from a closure project, how long has UST(s) been out of service: ______ years

2. a. State assigned UST site identification number: ___________________________ ☐ Not applicable
b. Number of USTs affected: _______ ☐ Unknown
c. For the UST(s) involved, their state identification number(s): ___________________________ ☐ Not applicable
d. Service Station Identification Number, as applicable: ___________________________

3. Tank content/former contents: ☐ Gasoline ☐ #2 diesel ☐ Used oil ☐ Unknown ☐ Other: ___________________________

IV. DISCHARGE LOCATION

1. ☒ On-site. Describe proposed point of entry to sewer and the discharge rate (must be a sanitary or combined sewer): Basement
   Sewer inlet at < gal/min
   Note: Rate of discharge must not surcharge sewer line.

2. ☐ Haul to MSD Bissell Point Hauled Waste Receiving Station at 10 E. Grand, St. Louis, MO.
   a. Transporters Name: ___________________________ and MSD Hauler ID Number: ___________________________
   b. Hazardous Waste Certification:
      For wastewater which is hauled to MSD’s Bissell Point Hauled Waste Receiving Station, I hereby certify that to the best of my knowledge and belief, the above hauled waste is not classified as a RCRA “hazardous waste” as defined by the MDNR in 10 CSR 25 or USEPA in 40 CFR Part 261.
      
      Applicant name (print): ____________________________

      Signature: ____________________________ Date: ____________________________

V. APPLICANT SIGNATURE AND CERTIFICATION:

This application must be signed by the applicant: either the source contact, or a contractor or agent directly responsible for site activities.

I hereby certify that I am directly responsible for activities at the site regarding the wastewater to be discharged, and to the best of my knowledge and belief, based on appropriate inquiry, the information in this application is true, complete, and accurate. The samples or analyses submitted are representative of the materials to be discharged. If granted approval to discharge, I agree to abide by the MSD Ordinances, and all applicable federal, state and local regulations. I agree to pay the costs of any pre-approval analyses performed by MSD and to pay any applicable disposal charges for the volume and strength of the wastes discharged.
