

Wireless Mobility Solutions

Governmentwide Solutions for a Mobile Workforce

Introduction to the Program

GSA's Wireless Mobility Solutions Program gives you everything you need to implement and manage your agency's wireless strategy and program. The Wireless Mobility Solutions Program, Multiple Awards Schedule (MAS) – Information Technology Special Item Number (SIN) 517312, offers value, cost savings, and a balance between functionality, security, and management for customers. We provide a one-stop shop for wireless and mobile solutions.

Launched in February of 2019, this Best-in-Class (BIC) program creates a space for the mobile community that includes wireless telecommunications carriers and resellers, mobility management services and solutions, security, and more. This allows agency program and contracting staff, as well as industry, to access mobile solutions more readily, easily, and holistically – enabling GSA to better serve our customers.

The enhancement to 517312 offers 11 service categories:

- ❖ Wireless Carrier Services
- ❖ Mobility Infrastructure
- ❖ Mobility as a Service (MaaS)
- ❖ Enterprise Mobility Management (EMM)
- ❖ Mobile Backend as a Service (MBaaS)
- ❖ Telecom Expense Management (TEM)
- ❖ Mobile Application Vetting
- ❖ Mobile Threat Protection (MTP)
- ❖ Mobile Identity Management
- ❖ Internet of Things (IoT)
- ❖ Other Mobile Services

Federal Mobility Group

The Federal Mobility Group (FMG) works to identify common wireless and mobility challenges, develop solutions, and create opportunities to share best practices. The FMG looks at non-national security and mobility mission-related challenges faced by agencies and is currently focused on 5G, Internet of Things (IoT), artificial intelligence (AI), security and policy regulations, and other emerging technologies.

How to Join:

The team includes 250 contracting officers, program managers, and leaders from 45 agencies and bureaus across the federal and technical spectrum. The team meets bi-weekly. Membership requires an active .gov or .mil address. To join the team, send an email to wireless@gsa.gov.

Benefits of the New Wireless Mobility Solutions Program

- ❖ **Broader mobility approach:** SIN 517312 helps agencies procure the latest in emerging wireless technology and solutions.
- ❖ **More flexible buying:** Enhancing and expanding the Mobility Solutions Program reflects the updated manner in which government agencies buy mobility.
- ❖ **Continued standardization:** Offerings are positioned to achieve value, cost savings, and an optimal balance between functionality, security, and management for customers.
- ❖ **Easy to do business with:** GSA provides a one-stop shop for mobile solution providers to better meet the needs of federal, state, local, regional, and tribal governments. By leveraging strategic sourcing and shared services, GSA's MAS complies with OMB guidance and offers opportunities for cross-government savings.
- ❖ **Center of Excellence:** Access to case studies enables agencies to leverage best practices and collaborate with the entire community of stakeholders to optimize performance and increase value.

- ❖ **Exercising option years and plans:** If your agency currently uses FSSI Wireless, you may continue to exercise option years under your current agreement. When you are ready to do a new procurement, the plans you were using under the BPA, and the applicable terms and conditions, are available via the new Wireless Mobility Solutions Program (SIN 517312). Moving should be seamless, and the [RFQ generator tool](#) hosted on the Acquisition Gateway can assist you in putting together your acquisition.
