APPENDIX A

ANNOUNCEMENTS
GENERAL SERVICES ADMINISTRATION

[OMB Control No. 3090–00XX; Docket 2010–0002; Sequence 10]

General Services Administration Acquisition Regulation; Submission for OMB Review; GSA Advantage® and Electronic Commerce-FACNET

AGENCY: Office of the Chief Acquisition Officer, GSA.

ACTION: Notice of a request for comments regarding a new OMB clearance.

SUMMARY: Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the General Services Administration will be submitting to the Office of Management and Budget (OMB) a request to review and approve a new information collection requirement regarding GSA Advantage® and Electronic Commerce-FACNET. A request for public comments was published in the Federal Register at 74 FR 4596, January 26, 2009. No comments were received. Public comments are particularly invited on: Whether this collection of information is necessary and whether it will have practical utility; whether our estimate of the public burden of this collection of information is accurate, and based on valid assumptions and methodology; ways to enhance the quality, utility, and clarity of the information to be collected.

DATES: Submit comments on or before: April 19, 2010.

FOR FURTHER INFORMATION CONTACT:
Warren Blankenship, Procurement Analyst, Contract Policy Division, at telephone (202) 501–1900 or via e-mail at warren.blankenship@gsa.gov.

ADDITIONAL INFORMATION:

Dated: March 5, 2010.

Al Matera,
Director, Acquisition Policy Division.

Federal Register / Vol. 75, No. 52 / Thursday, March 18, 2010 / Notices 13131

PUBLIC NOTICE

Notice of Intent To Prepare an Environmental Impact Statement (EIS) for the Sale of Plum Island, NY

AGENCY: Office of Real Property Utilization & Disposal; General Services Administration.

ACTION: Notice.

SUMMARY: Pursuant to the requirements of the National Environmental Policy Act (NEPA) of 1969, and the President’s Council on Environmental Quality Regulations (40 CFR 1500–1508), as implemented by the U.S. General Services Administration (GSA) Order PBS P 1095.4C, GSA, as the operational Joint Lead Agency, announces its Notice of Intent (NOI) to prepare an EIS for the anticipated sale of Plum Island, New York and an ancillary support facility at Orient Point, New York. The US Department of Homeland Security (DHS) will act as a Joint Lead Agency in ongoing consultation with GSA for the NEPA and associated regulatory compliance activities.

ADDITIONAL INFORMATION:

Dated: March 5, 2010.

Al Matera,
Director, Acquisition Policy Division.
residence, will be public information and may be released by GSA.

FOR FURTHER INFORMATION CONTACT: Mr. Phil Youngberg via FAX at 617–565–5720 or e-mail: phil.youngberg@gsa.gov.

SUPPLEMENTARY INFORMATION:

Background: Plum Island is an 840-acre island located approximately 1.5 miles off the northeast tip of Orient Point, Long Island, New York. DHS, in cooperation with the U.S. Department of Agriculture (USDA), operates the Plum Island Animal Disease Center (PIADC) on the island. Plum Island is formerly the home of the U.S. Army’s Fort Terry and was transferred to the USDA in 1954 to establish a research facility for foot-and-mouth disease. In 2003, Plum Island was transferred to DHS. PIADC is comprised of buildings, industrial facilities and equipment, roadways, utilities, specialized facilities, easements, and rights of way. Additional assets on Plum Island include natural undeveloped land, the Plum Island Lighthouse constructed in 1869, and buildings and structures associated with the former Fort Terry. DHS also owns and operates transportation assets and a 9.5-acre facility to support PIADC at Orient Point, New York which includes buildings, utilities, and ferry docking facilities.

Statutory Authority: The purpose of this EIS is to examine the effects associated with the anticipated sale of Plum Island, New York and its support facility at Orient Point, New York including all real and related personal property and transportation assets (the “Property”). The need for this proposed action is mandated in Section 540 of the Consolidated Security, Disaster Assistance, and Continuing Appropriations Act of 2009; United States Public Law 110–329 (the “Act”), which directs the Secretary of the DHS to liquidate the Plum Island asset by directing the Administrator of the General Services to sell through public sale all real and related personal property and transportation assets which support Plum Island operations, subject to such terms and conditions as necessary to protect government interests and meet program requirements. The Act mandates the sale as a result of the determination by DHS to construct and operate a new National Bio and Agro-Defense Facility (NBAF) in Manhattan, Kansas and move its operations from the PIADC to the NBAF (Record of Decision dated 01/16/2009).

Scoping and Request for Comments: The EIS will address the potential impacts to the environment of two alternatives: sale of the Property (the “Action Alternative”), and continued Federal ownership (the “No-Action Alternative”). The Action Alternative will be further refined into a series of reasonably foreseeable land use options. Because the federal government has no authority to regulate future land uses, a precise statement of the specific land use-related environmental and socioeconomic effects that could result from reuse would be largely speculative. In response to the lack of certainty concerning future reuse of the Property, the EIS will identify reasonable land use options that could result upon the sale of the Property. When the Property leaves federal ownership, proposed uses would be subject to local and state environmental and land use regulation.

The primary purpose of the scoping process is for the public to assist the GSA and DHS in developing the EIS by identifying important issues and alternatives related to the sale of the Property. Scoping meetings in Southold, New York and Old Saybrook, Connecticut will allocate time for presentations by the GSA and DHS, followed by an opportunity for the public to comment. Land use and development scenarios will be developed with input from the local community through the scoping process. It is anticipated that these public scoping meetings will be held in the spring of 2010. GSA will provide public notice of these and all subsequent public meetings in local newspapers approximately two weeks prior to the event.

After the scoping is completed, a Draft EIS will be published that identifies and evaluates potential land use options developed to assess impacts of the Action Alternative. The Draft EIS will identify potentially significant direct, indirect, and cumulative impacts on historical and biological resources, land use, air quality, water quality, water resources, and socioeconomics, as well as other environmental issues that could occur as a result of the Action Alternative. For potentially significant impacts, the EIS may identify avoidance, minimization, or mitigation measures to reduce these impacts, where feasible. After the Draft EIS is issued, there will be a 45-day comment period. GSA will hold public meetings in Southold, New York and Old Saybrook, Connecticut during the comment period to solicit input from the public. GSA anticipates this comment period will occur in summer 2010. After the Draft EIS, GSA will issue a Final EIS.

Reasonable Accommodations: Persons needing reasonable accommodations in order to attend and participate in public meetings should contact John Dugan, General Services Administration Property Utilization & Disposal Division, 10 Causeway Street, Room 925, Boston, MA 02222 or e-mail john.dugan@gsa.gov. In order to allow sufficient time to process requests, please call no later than one week before the public meeting. Information regarding this proposed action is available in alternative formats upon request.

Dated: March 9, 2010.

John L. Dugan,
Realty Specialist, 1PZ, U.S. General Services Administration.

Proposed Data Collections Submitted for Public Comment and Recommendations

In compliance with the requirement of Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 for opportunity for public comment on proposed data collection projects, the Centers for Disease Control and Prevention (CDC) will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the data collection plans and instruments, call 404–639–5960 and send comments to Maryam I. Daneshvar, CDC Acting Reports Clearance Officer, 1600 Clifton Road, MS–D74, Atlanta, GA 30333 or send an email to omb@cdc.gov.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency’s estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Written comments should be received within 60 days of this notice.
HOUSE OF THE WEEK

This four-bedroom, two-bath Cape home on a hilltop offers all hardwood flooring, stone wood-burning fireplace, full basement with inside/outside access and water views from front yard.

Location: Mattituck
Price: $369,000
Broker: Community Rentals & Sales, Mattituck, 631-298-9100

Theresa Gallo, a volunteer who has lived on the North Fork full-time since 1992.

“I wanted something that was higher up on the water like this,” she said, cheese and cracker in hand. “I’m thinking about it.”

“The water is exactly what it’s all about,” said Rudy Bernhardt, a sales­man for Premium Wines in Mattituck who was providing a tasting at the open house. “I’m an outdoor, beach type of person, and the view is fantastic. Keep the house, I’ll take the decks and the garden.”

Mr. Planamento said he made it a point to get local businesses like Premium Wines and Capt. Bob’s Fishing Fleet involved in the waterfront showing to “foster a sense of cooperation” — essential in a smaller market like the North Fork, he said.

“Having lived here for a while, I know how to cross-promote,” said Mr. Planamento, who for years also ran the boutique retail store La Ferme De La Mère on Love Lane in Mattituck, which he recently sold. “Not only did I want to promote this house to breathe new life into it, I wanted to cooperate with my colleagues at the same time.

“And take a boat ride on a beautiful day.”

Damaged Station Fuels Emergency Move

By Becky Coffey
Harbor News Senior Staff Writer
OLD SAYBROOK

Before water began pouring into the police station from both above and below, the town’s Police Station Study Committee chaired by Tim Conklin was asked first to assess the feasibility and need for a new police station compared to the option of renovating the existing station. The substantial damage the deluge of late March wreaked on the police station building made the renovation option a non-starter.

Faced with the need to make extensive and expensive repairs to the existing building just to make it safe and inhabitable, the town’s Board of Selectmen decided to shift gears and make the study committee a building committee rather than apply insurance settlement funds and other town funds to repair a building that now appeared beyond an easy fix.

The only fortunate outcome of the deluge’s timing was that the Police Station Study Committee had already asked for and was evaluating packages of qualifications from architect-engineering firms interested in assisting the town’s police station committee. Six firms with police station design experience made the committee’s short list and interviews with these firms were to begin late last month. When the storm hit, the selectmen changed the committee’s charge and the new focus will be to use the selected firm to help plan the department relocation and then to develop a feasible plan for a permanent police station back at the Main Street location.

At press time, First Selectman Michael Pace said negotiations with the landlord of a commercial/industrial building for temporary police quarters were underway and that he hoped the town would have a signed lease agreement within the next 45 days.

Added to the town budget for the next fiscal year was $50,000 to help offset the department’s relocation costs. Pace said the town is continuing to work with its insurer, CIRMA, to reach an equitable storm-damage settlement to help offset the costs to complete the police department relocation. These costs include $30,000 to relocate the E-911 system—the core of which is located on a platform in the police station basement and another $100,000 to relocate another key communications system component.

Last week Governor M. Jodi Rell announced that municipal agencies in Middlesex County would be eligible to apply for competitive FEMA grants to offset the costs to towns and agencies of the extraordinary late-March storm. It was unknown at press time how much funding might be available to Old Saybrook to cover storm-related costs.

Existing Conditions

The condition of the police station building after the flood was assessed by both a town air quality consultant, Mystic Air, and the regional health district director, Mary Jane Engel, and the condition was deemed poor and even health-threatening for the employees who worked there.

The consultant’s report recommended to Police Chief Michael Spera that immediate measures be taken to protect the health of the department employees. Mystic Air confirmed the active growth of mold and mildew in interior building materials—ceiling insulation, pipe-wraps, wallboard, and ceiling tiles—that stayed water-soaked for several days after the storm passed. It recommended the removal of all of these items to remove a key source of mold growth and also to allow immediate repair of the leaky roof.

Removing these damaged building materials, making major repairs to the basement to prevent water intrusion, repairing the station’s roof to prevent further leaks, and then performing work to replace all removed materials, all while the department employees had to occupy the space on a 24/7 schedule, was not deemed feasible by the selectmen or the police chief.

Pace said that a preliminary estimate just works for a repair to work and to give the station’s existing basement floor to prevent further water intrusion was $133,700. An emergency relocation of the department to new space for the next two years was deemed to be the most cost-effective solution that would also assure that the department could continue to efficiently and effectively deliver police services to the town on a 24/7 schedule.
Three Friends Vie for One Candidacy
Continued from page 10

After separate conventions and possible primaries, two candidates, one from each political party, will be chosen as candidates. Their names will be on the Nov. 2 ballot for voters to choose.

A state court, not a town office, probe courts address matters such as assigning guardianship to minor children or the mentally challenged, terminating or removing parental rights, adoptions, psychiatric commitment of children and adults, drug and alcohol commitment of adults, name changes, and validating wills and testaments.

Stillman received her law degree from Roger Williams School of Law in Rhode Island. She has a family law practice in Essex and New York and is licensed to practice law in Connecticut, New York, and Rhode Island. She and her husband Adam, who is also an attorney, have two children.

“For the past 11 years I have been working in family practice,” noted Stillman, who said the judge of probate position presents an opportunity for her to do what suits her best.

Stillman, who served as the managing editor of the Law Review, interned in Rhode Island’s federal district court, and clerked in a superior court, says she is “analytical, academic, and organized.”

“I do very well in a new atmosphere that needs immediate organizing,” said Stillman.

Evarts received her law degree from Quinnipiac School of Law while working, buying a new house with husband Frederck, raising one child, and giving birth to twins in her third year of law school. During the last year, she delved into a part-time career of research and interning part-time while caring for her three young children.

“I soon got into juvenile and child protection law,” said Evarts, who quickly took on as lead on 100 cases in a short period of time.

Her cases involved clients with substance abuse and mental health issues, as well as divorce, child custody, and child support agreements. Local probate courts would refer cases to her, she said, becoming a large part of her practice.

“The probate position involves everything I do on a daily basis,” she said.

Barone, the only former police officer in the group, decided to attend law school at Western New England College after working as a police officer in the town of Millbury. Barone admits it was tough to break through many barriers. It was there she met her husband Nick, a sergeant in the department. As she worked fulltime, attended classes, and studied each day, Barone knew she wanted to pursue a career in the general practice of law.

Today, she practices family law and handles real estate, probate, and general civil matters.

Barone said many local judges ask her to take the difficult probate cases because of her background as a cop.

“I’ll go into a house that no one wants to go to,” she says. “I’ve been there.”

Town Wins
Health Care Savings

By Becki Coffey
Harbor News Senior Staff Writer
OLD SAYBROOK

Facing proposed health care premium increases of 16 percent from Anthem to next year could be set by the Board of Finance at 13.87 mills, which would mean an increase of four-tenths of one mill instead of the original projection of six-tenths of one mill, effectively bringing a 4.5 percent tax increase to a 3 percent increase.

Anthem’s final proposal for premium increases was reduced to 13.17 percent increase from the initial 16 percent increase. However, this increased to 16.9 percent, beyond the $1 million.

Submarine Stories and Book Signings

Best designers and builders Fred Frese and Roy Manast are the authors of a new book on the nation’s first human-powered submarine, The Turtle. The book provides excerpts from historical accounts of the original Colonial-era Turtle project and also of the Old Saybrook High School 21st-century project to recreate a working replica. The working replica built by the student team under the direction of Fred Frese, Manast, and others who donated time and materials is now on display in the Engineering Technology museum in Westbrook. That project received financial support from grants from Lextong Lee III and from Toyota.

Two author book signings of the new book on The Turtle are scheduled: at the Connecticut River Museum in Essex on Thursday, May 13 from 5 to 7 p.m. and at the Florence Griswold Museum on Thursday, May 20 from 7 to 9 p.m.

New Meeting Day for SGFA
The Shoreline Gluten Free Association (SGFA) meets the second Saturday of the month, starting on Saturday, Sept. 11. Most meetings are at noon at the Westbrook Library. Celiac 101 classes are taught once a month pending request. For more information, call 860-399-3410 or email shoreglutenfree@ sbxglobal.net.

Join the Junior Colonials
The Junior Colonials Fife and Drum Corps seeks new fife, drummers, and guard members. No experience necessary. Children aged 8 and up are welcome. Uniforms, instruments, and lessons are provided. Practices are on Wednesdays from 6:30 to 8:30 p.m. at the Daisy Ingham School, 105 Goodspeed Drive, Westbrook. For more information, call 860-399-7572.
Protest: Boys affected, too:
No athletic sandals allowed

Cabrera said she can understand why flip-flops would not be allowed at most technical schools, due to the nature of equipment in those schools’ machine and automotive shops, but at a regular high school, she believes flip-flops are fine.

Saffo agreed that flip-flops are a lot more convenient and cooler to wear to school this time of year than hot, stuffy sneakers.

“Even the guys at our school support it, because they can’t wear their Adidas (athletic) sandals to school either,” Saffo said.

Several other students said flip-flops are also much easier on their feet, and don’t cause blisters.

Students also noted that they couldn’t recall any specific incidents in which students wearing flip-flops, which were previously allowed in the high school, were injured. There was one girl who was wearing flip-flops, they said, who did slip, but it was because there was water on the floor.

Board member Fred Stanek said he sees nothing wrong with students and staff wearing backless shoes at school.

“I don’t have a problem with flip-flops at school,” Stanek said.

Board Chairman Ed Strumello agreed that the ban being issued from Superintendent Schools Mary Anne Abrera said out of 22 area schools she researched, 16 schools do have a policy against flip-flops at school.

No athletic sandals allowed

N.J. carnival shooting leaves gunman, victim injured

Associated Press

OAKFIELD, N.J. — A gunman opened fire at a New Jersey carnival on the Fourth of July, wounding himself and a 17-year-old boy in what police said was a dispute over the sale of a drink.

Officials said a bullet struck a man in the arm, and a Bloomfield police officer then shot the gunman.

The shooting occurred at the Oakfield Fair, which is owned by the Knights of Columbus.

A crowd of about 1,000 people had gathered there on Sunday night to watch a fireworks display. The shooting took place shortly after the display began.

Bloomfield police said a man who was shot in the arm was taken to a hospital for treatment.

The gunman, identified as a 17-year-old boy, was also injured and was taken to a hospital.

The boy who was shot in the arm was released from the hospital on Tuesday.

The identity of the gunman was not released.

The shooting occurred in the area of the fair where food is served.

The fair is owned by the Knights of Columbus, a Catholic fraternal organization.

The church has not issued a statement about the shooting.

The fair is open daily from 3 p.m. to 11 p.m. until Labor Day.
**Hazel Soares, 94, center, gets her picture taken with some of her classmates before the start of commencement exercises at Mills College, in Oakland, Calif., Saturday.**

Grad, 94, proves it’s never too late

OAKLAND, Calif. (AP) — It’s never too late to earn your college degree. Just ask Hazel Soares.

The 94-year-old woman was among roughly 500 students to pick up their diplomas at the Mills College commencement on Saturday. She is believed to be the world’s second-oldest person to graduate from college. The Guinness Book of World Records says Nola Ochs of Kansas became the oldest when she graduated from Fort Hays State University three years ago at age 95.

Born in 1915, Soares received a special congratulation from House Speaker Nancy Pelosi, who delivered the keynote speech at the women’s college in Oakland.

The art history major now hopes to find work as a docent at a San Francisco Bay area museum.

Boy who survived plane crash returns home

AMSTERDAM — The 9-year-old Dutch boy who miraculously survived a plane crash in Libya returned to the Netherlands aboard an airborne ambulance Saturday and was whisked away to a hospital in his hometown, where he must begin to rebuild his life without his parents or brother.

Ruben van Assouw was the sole survivor, pulled unconscious from the wreckage of an Afriqiyah Airways jetliner that plunged into the desert less than a mile from the runway on a Facebook page set up by his father to chronicle the family’s vacation to South Africa. They were returning home when their flight from Johannesurg to Tripoli crashed.

The Connecticut Public Scoping Meeting is scheduled from 6PM-8PM Wednesday, May 19, 2010, at the Old Saybrook Middle School Auditorium 60 Sheffield Street, Old Saybrook, CT 06475

The New York Public Scoping Meeting is scheduled from 6PM - 8PM Thursday, May 20, 2010, at the Greenspoint School Auditorium 720 Front Street, Greenspoint, NY 11944
