GSA & DOE Seek Technologies for Net-Zero Carbon Buildings

Joint Request for Information Closes On
TUESDAY, DECEMBER 7, 2021

The U.S. General Services Administration (GSA), working with the U.S. Department of Energy (DOE), has issued a Request for Information (RFI) for technologies that help reduce greenhouse gas emissions from commercial buildings. Technologies will be evaluated under dynamic, real-world conditions in federally or privately owned commercial buildings. Responses to this RFI will be evaluated based on the technology's potential for equitable and wide adoption in the U.S. marketplace. Novel financing approaches and/or business models to accelerate uptake of low-carbon technologies are encouraged and may be integrated into RFI responses.

Validate Real-World Performance
Participation can increase market acceptence of your technology by validating real-world performance. Technology evaluations help inform public- and private-sector investment decisions, accelerating commercialization as well as adoption within the federal government and the commercial building industry.

Visit gsa.gov/gpg for more information and to access the RFI.

- Review and Complete the RFI by 12/07/21 sam.gov keyword “FY22RFI101221”
- Attend the Webinar Wednesday, 11/10, 1 pm ET register at: gsa.gov/gpg
- Questions? gpg@gsa.gov
