

GREEN PROVING GROUND

GPG helps drive building performance beyond business-as-usual

Leading by example

GPG accelerates market acceptance by assessing innovative building technologies in real world environments and deploying those that deliver

GPG helps technology bridge the valley of death

and accelerates market acceptance by:

Selecting promising technologies at the edge of commercialization

Piloting technology installations within GSA's real estate portfolio

Partnering with Department of Energy national laboratories to evaluate real-world performance

Identifying technologies with broad deployment potential for GSA

GPG results provide actionable data

to enable GSA to make sound investment decisions
