FY2015 Project Summary
The General Services Administration (GSA) proposes to acquire the Internal Revenue Service (IRS) Annex Building located at 2021 Woodward Street in Austin, TX. The leased facility provides 144,101 rentable square feet of space and 179 parking spaces and is currently occupied entirely by the IRS. In addition to acquiring the building, GSA proposes to modernize the HVAC, electrical, and fire and life safety systems to improve the safety and efficiency for long term use of the building. Purchase will reduce the Government’s rental payment to the private sector by approximately $1,163,000 annually.

FY2015 Committee Approval and Appropriation Requested
(Site, Design, ECC, M&I) ............................................................... $11,887,000

Building
The IRS Annex was built in 1979 by the lessor and is a single story tilt-up pre-cast concrete building. The building is co-located on a 57-acre campus with federally-owned buildings housing a regional IRS Service Center, a Department of Veterans Affairs administrative facility, and the U.S. Department of the Treasury Financial Management Service. The campus is bounded by East Woodward Street on the North and East, IH-35 on the West and U.S. Highway 290 on the South. The location of the IRS annex on this campus is critical to the IRS mission since trucks make daily runs between the Annex, Service Center, Compliance Center and other IRS locations transporting supplies, furniture and tax returns.

Project Budget
Building and Site Acquisition ......................................................... $9,027,000
Design ......................................................................................... 330,000
Estimated Construction Cost (ECC) ............................................. 2,223,000
Management and Inspection (M&I) ............................................... 307,000
Estimated Total Project Cost (ETPC)* ........................................... $11,887,000

*Tenant agencies may fund an additional amount for tenant improvements above the standard normally provided by the GSA.

Acquisition and Design FY2015  FY2015
Construction    FY2016  FY2016

Overview of Project
The project proposes acquisition of the building currently leased by GSA for the IRS. The facility provides office, warehouse and light industrial storage space for IRS adjacent to the main IRS Service Center Building in Austin, TX. In addition, the warehouse is located in close proximity to four other IRS leases located in southeast Austin. The project also proposes alterations to include upgrade of some demising walls, repairs to the dry sprinkler system, lead paint abatement, mechanical upgrades to HVAC, replacement of main switch board and roof work.

Justification
The Annex is an integral part of the tax return submission processing pipeline. As a receiving point for mail during tax season and a holding place for the completed returns, this building is the first and last stop for tax returns through the pipeline. It is entirely within the secure fenced campus perimeter and is tied in to the communications, security and fire alarm systems in the IRS Service Center. The IRS Annex building is the only part of the 57-acre campus facility that is not federally owned. Ownership of the annex would provide greater flexibility for future development of the campus site as needed for IRS or other agencies. Additionally, purchase of the IRS Annex will reduce the Government’s rental payment to the private sector by approximately $1,163,000 annually.
An assessment of the existing facility was completed to determine what improvements would be required for the building to come under federal ownership. Life safety issues to be addressed in the building include an upgrade of some demising walls in order to maintain fire resistance per code, repairs to the dry sprinkler system, and lead paint abatement. Mechanical upgrades to the HVAC are needed for energy efficiency and tenant comfort. Electrical upgrades needed include replacing the main switch board to comply with code. Roof work includes adding walkways to preserve the integrity of the roof surface.

Summary of Energy Compliance
This project will be designed to conform to requirements of the Facilities Standards for the Public Buildings Service and will implement strategies to meet the Guiding Principles for High Performance and Sustainable Buildings. GSA encourages design opportunities to increase energy and water efficiency above the minimum performance criteria.

Alternatives Considered (30-year, present value cost analysis)

- Purchase: $51,660,000
- Lease: $123,883,000
- New Construction: $65,691,000

The 30-year, present value cost of purchase is $14,032,000 less than the cost of new construction with an equivalent annual cost advantage of $716,000.
