FY 2016 Project Summary
The General Services Administration (GSA) requests additional design funds in advance of construction of a new U.S. Courthouse of approximately 243,000 gross square feet (gsf), including 43 inside parking spaces, in Harrisburg, PA. The courthouse project that GSA proposes will construct a courthouse to meet the 10-year space needs of the court and court-related agencies, and the site will accommodate the anticipated 30-year needs of the court. The Judiciary's Courthouse Project Priorities list (approved by the Judicial Conference of the United States on September 17, 2015) includes a courthouse project in Harrisburg, PA.

FY 2016 House and Senate Committee Approval Requested
(Additional Design, Management and Inspection, Construction) .......... $168,444,000

FY 2016 Funding (as outlined in the FY 2016 Spend Plan)
(Additional Design, Construction) .............................................. $29,510,000

Overview of Project
The courts and related agencies currently occupy space in the existing Ronald Reagan Federal Building in downtown Harrisburg. The new courthouse will provide 8 courtrooms and 11 chambers consistent with the application of courtroom sharing policies and limitation on the provision of space for projected judgeships. The site for the new courthouse is at Sixth and Reily Streets in the Midtown section of Harrisburg. Several parcels of the proposed site have already been purchased with prior funding.

1 The estimated total project cost of $194,444,000 includes $26,000,000 funded in FY 2004 and additional design = $5,336,000; a portion of the necessary construction = $24,174,000 funded in FY 2016. The balance of the construction funding and management and inspection will be requested in a future fiscal year.
PROSPECTUS
NEW U.S. COURTHOUSE
HARRISBURG, PA

Prospectus Number: PPA-CTC-HA16
Congressional District: 04

Site Information
Acquired.......................................................... Approximately 2.15 acres
To Be Acquired .................................................... Approximately 1.85 acres

Building Area²
Gross square feet (excluding inside parking).......................... 224,000 gsf
Gross square feet (including inside parking).......................... 243,000 gsf
Inside parking spaces .................................................. 43

Estimated Project Budget
Site (FY 2004)................................................................ $20,000,000
Design (FY 2004) ....................................................... $6,000,000
Additional Design (FY 2016) .......................................... $5,336,000
Estimated Construction Cost (ECC) ($502/gsf including inside parking) .... $155,353,000
Estimated Management and Inspection (M&I) ............... $7,755,000
Estimated Total Project Cost (ETPC)* ................................ $194,444,000³

*Tenant agencies may fund an additional amount for alterations above the standard normally provided by the GSA.

² Square footages are approximate. The project may contain a variance in gross square footage from that listed in this prospectus.
³ GSA requests approval for an estimated total project cost. The subtotals comprising the estimated project budget are intended to provide a breakdown in support of the ETPC. The actual total cost to perform the entire project may differ than what is represented in this prospectus by the various subcomponents.

*Design began in 2010 and proceeded to concepts. Design will restart upon approval of this prospectus.

Tenant Agencies

District Court, Court of Appeals, Probation Office, Bankruptcy Court, Department of Justice – Marshals Service, Department of Justice – Office of the U.S. Attorney, trial preparation space for the Federal Public Defender, and GSA.

Justification

The existing U.S. Courthouse, constructed in 1966, does not meet the United States Courts Design Guide standards, and lacks adequate security. The existing building configuration cannot provide secure travel for judges without traveling into common hallways. Due to lack of suitable expansion space in the Federal building, several courtrooms have been constructed with columns within the courtrooms, which blocks views of portions of some courtrooms.

The new courthouse will provide for a single location of court operations and separate circulation for the public, judges, and prisoners, thereby improving security as well as efficiency of court operations.

Summary of Energy Compliance

This project will be designed to conform to requirements of the Facilities Standards for the Public Buildings Service and will implement strategies to meet the Guiding Principles for High Performance and Sustainable Buildings. GSA encourages design opportunities to increase energy and water efficiency above the minimum performance criteria.

Future of Existing Federal Building

The existing Ronald Reagan Federal Building will be transferred out of the federally owned inventory upon occupancy of the new courthouse. GSA intends to proceed with established disposal processes to transfer the property after the remaining Federal tenants are relocated from the building into leased space.

---

This section is included to address recommendations in the following GAO Report: Federal Courthouses: Better Planning Needed Regarding Reuse of Old Courthouses (GAO-14-48).
