PROSPECTUS – ALTERATION
FEDERAL BUILDING AND U.S. COURTHOUSE
MILWAUKEE, WI

Prospectus Number: PWI-0044-MI18
Congressional District: 4

FY 2018 Project Summary
The General Services Administration (GSA) proposes fire and life-safety upgrades to the Federal Building and U.S. Courthouse (FB/CT) located at 517 E. Wisconsin in Milwaukee, WI. The proposed project will replace the fire alarm system and extend and upgrade the fire suppression system.

FY 2018 Committee Approval and Appropriation Requested
(Design, Construction and Management & Inspection)..................................$12,991,000

Major Work Items
Fire protection upgrades; hazardous materials abatement; interior construction

Project Budget
Design ..........................................................$ 1,069,000
Estimated Construction Cost (ECC) ........................................... 11,205,000
Management and Inspection (M&I) ............................................... 717,000
Estimated Total Project Cost (ETPC) ........................................... $12,991,000

*Tenant agencies may fund an additional amount for alterations above the standard normally provided by GSA.

Schedule
Start End
Design and Construction FY 2018 FY 2020

Building
The FB/CT in Milwaukee, WI, is a five-story, granite structure originally constructed between 1892 and 1899 and is listed in the National Register of Historic Places. Between 1929 and 1932, a five-story addition was erected to the south of the original building, which was increased in height to seven stories during the 1940s. The FB/CT, including the addition, has 543,510 gross square feet of space. Each corner of the original building features a short, round tower with a conical roof and a skylight atrium in the center. The building also features an open-air light court at its center that extends down to the roof of the first floor.
Tenant Agencies
Judiciary, Department of Justice, U.S. Department of Homeland Security, U.S. Tax Court, Congress – Senate, Social Security Administration, and GSA

Proposed Project
The proposed project will replace the building fire alarm system and add both audio and visual alarms as required by GSA and National Fire Protection Association guidelines. The project also will extend sprinkler service to those areas of the building that are not currently protected and will replace any existing sprinkler heads nearing the end of their useful life. Hazardous materials, including asbestos and lead-based paint, that directly impact the project, will be abated. Interior repairs incidental to replacing and upgrading the fire protection system also will be completed.

Major Work Items
- Fire Protection Upgrades: $8,310,000
- Hazardous Materials Abatement: 1,900,000
- Interior Construction: 995,000
- Total ECC: $11,205,000

Justification
The FBICT's fire alarm system is nearing the end of its useful life. The main fire alarm panel displays frequent false alarms and repair parts are difficult to obtain. There are problems with the annunciator's clarity, speaker zones in the building do not meet code requirements, and areas of the building do not have visual and audible fire alarm devices. The current sprinkler system does not provide protection in all areas of the building and the sprinkler heads are nearing the end of their useful lives.

Summary of Energy Compliance
This project will be designed to conform to requirements of the Facilities Standards for the Public Buildings Service. GSA encourages design opportunities to increase energy and water efficiency above the minimum performance criteria.

Alternatives Considered (30-year, present value cost analysis)
There are no feasible alternatives to this project. This is a limited scope renovation and the cost of the proposed project is far less than the cost of leasing or constructing a new building.

Recommendation
ALTERATION
Certification of Need

The proposed project is the best solution to meet a validated Government need.
