

**AMENDED PROSPECTUS – ALTERATION  
CARL B. STOKES U.S. COURTHOUSE  
CLEVELAND, OH**

Prospectus Number: POH-0301-CL19  
Congressional District: 11

**FY 2019 Project Summary**

The General Services Administration (GSA) proposes a repair and alteration project to complete, repair, and expand the plaza system at the Carl B. Stokes U.S. Courthouse (Stokes Courthouse) located at 801 W. Superior Avenue in Cleveland, OH. The completion of the proposed repairs will correct the ongoing deterioration of the plaza system, eliminate water infiltration into the building, and allow for the completion of the plaza toward Superior Avenue, which has remained unfinished since construction of the courthouse in 2002.

This prospectus amends Prospectus No. POH-0301-CL17. GSA is requesting approval of an additional \$4,440,000 to account for cost escalations and refined project scope.

**FY 2019 Committee Approval Requested**

**(Design, Construction, and Management & Inspection).....\$4,440,000**

**FY 2019 Appropriation Requested**

**(Design, Construction, and Management & Inspection).....\$19,964,000**

primary function is to serve as a Federal courthouse. The Stokes Courthouse is located at the intersection of Superior Avenue and Huron Road. The existing plaza spans the front of the property along Huron Road and was originally designed to extend to the corner of Superior Avenue. The building acts as an anchor to the downtown area of Cleveland and is prominent in the city's skyline.

**Tenant Agencies**

Judiciary, Department of Justice, Senate, GSA

**Proposed Project**

The project proposes to repair the plaza at the Stokes Courthouse to eliminate water leaks and infiltration into the lower levels of the building. The scope includes refinishing and reinforcing the structural steel that supports the plaza, along with repairs to fireproofing and upgrading the surface parking lot.

The project also proposes to extend the currently incomplete plaza toward Superior Avenue as was envisioned in the original design. Due to a funding shortage when the building was originally constructed, a portion of the plaza was left unfinished.

**Major Work Items**

Sitework	<u>\$16,515,000</u>
<b>Total ECC</b>	<b>\$16,515,000</b>

**Justification**

The structural steel that supports the plaza is exposed to the elements and has been since the original construction. The steel has considerable rust damage, and the structural beams that support the plaza and connect into the parking garage are heavily corroded. Part of the unfinished plaza includes the base of the structural steel columns that are at grade with the Cleveland Regional Transit Authority train tracks and support beams that run above and across the train tracks. If the steel continues to be left unattended, it will become difficult to repair and will result in structural issues. The corroded steel is also very unsightly and detracts from the appearance of the courthouse.

The plaza has experienced excessive water infiltration in many areas that will worsen until repairs are completed. The leaks have been causing damage to the structure, interior finishes, and the fireproofing in the lower levels of the building.

The plaza surrounding the Stokes Courthouse remains incomplete from the time of the original construction in 2002. The sidewalk on the northwest side of the site is built on a portion of the city-owned and controlled Huron Road. This sidewalk is the only way to access the building from the southeast intersection of Huron Road and Superior Avenue. Once the plaza is completed, the sidewalk will be returned to the city, and this will restore a lane of traffic on Huron Road. Completion of the plaza will protect the structural steel from future damage, improve pedestrian access to the building, incorporate the building into the surrounding urban environment, and significantly improve the appearance of the Stokes Courthouse. The building's location within the city acts as a prominent gateway for those entering into the city from the west. Unfortunately, this impression is lost when visitors reach the intersection of Huron Road and Superior Avenue, where the steel installed for the completion of the plaza is rusting and the appearance of the facility at street level is that of a public building that is difficult to approach.

**Summary of Energy Compliance**

This project will be designed to conform to requirements of the *Facilities Standards for the Public Buildings Service*. GSA encourages design opportunities to increase energy and water efficiency above the minimum performance criteria.

**Prior Appropriations**

None

**Prior Committee Approvals**

<b>Prior Committee Approvals</b>

---

**Alternatives Considered (30-year, present value cost analysis)**

There are no feasible alternatives to this project. This project is a limited scope renovation and the cost of the proposed project is far less than the cost of leasing or constructing a new building.
