Detailed information and the registration link is available at [www.gsa.gov/ffmcp](http://www.gsa.gov/ffmcp).
FFMCP FAQs

Q: Can Government contractors take the training?
A: Yes. If they do not have a government email address they will need to include remarks with their program registration explaining their affiliation with the Federal government.

Q: How long does it take to complete the program?
A: In total you need to complete 8 courses. Each course is about an hour long, so it should take about 8 hours. Participants must complete the program within 120 days of enrolling.

Q: Are there any annual continuous learning requirements to maintain this certification?
A: No. There are no training requirements beyond the initial certification process.

Q: I have completed other fleet training or certification programs. Can I use that training to get credit for this program?
A: No. This certification program is independent from other fleet management training. It is optional. Training credits will not be given for training taken outside of this curriculum.

Q: I attempted to register but it requires a smart phone, is there another option?
A: Federal IT security policy requires multi factor authentication for this system. Currently, there is not a process to register without a smartphone but GSA IT is working on a solution.
