Symphony

Task Order Management for OASIS Customers

March 17, 2022
Ms. Hayes serves as the OASIS PM managing strategic program initiatives & provides support to the PSHC portfolio and to OASIS Industry Partners.

She brings to her role more than 10 years of progressive contracting experience from both the Army’s Defense Logistics Agency & GSA, as the former Contracting Officer for OASIS U.
Mr. Niess is the new Symphony PM. He joined GSA in November 2020.

His perspectives on Federal acquisition have been shaped by 30+ years of service in the private sector and government. Prior stops on his Federal career path included FEMA, EPA, TSA, and ICE, where he served as a Contract Specialist, COR, and Acquisition Program Manager.
What is Symphony?

- Symphony is a **web-based**, COTS contract management and automation tool for use within the Federal Government.
- Symphony resides on the **FedRAMP-certified** AWS cloud; it received ATO authorization in August 2018 on cloud.gov.
- Symphony helps manage **FAR 16.505** acquisitions from the master contract level to the task order level.
- Symphony was developed by **Apex Logic**, a HUBZone, woman-owned small business.
Why Symphony for OASIS Task Order Management?

- Provides an easy-to-use interface that reduces the amount of time between task order solicitation and award.
- Gives OASIS stakeholders access to a centralized portal of real-time OASIS task order management data.
- Provides automated release of RFIs, solicitations, and Q&A documents to OASIS contract holders.
- Provides transparency and mitigates risks associated with Fair Opportunity in comparison to the OASIS Google group email list.

At the core of Symphony is a configurable, collaborative workflow where OASIS stakeholders work together to fulfill Government requirements.
Symphony’s Benefits for Customer Agencies

1. Automatically release **RFIs and Solicitations** to contract holders upon CO approval.

2. Create **Amendments** in the system to extend solicitation deadlines, etc.

3. Set date/time deadlines for receipt of **questions**; review/respond to questions within the system.

4. View vendor “**no bid**” **responses** in the system to proactively manage task order competition.

5. Receive Offeror **proposals** and RFI responses within the system (**max of 20MB per file**).

6. Announce **award decisions** and provide automated notification to successful and unsuccessful Offerors.
## Comparison of OASIS Task Order Management Methods

**NOTE:** Use of Symphony is **optional**. Other methods (above) for posting task order solicitations will remain available to customer agencies.
Symphony in the OASIS Ordering Process
(Customer Perspective)

**Step 1: Acquisition Planning Considerations**
- Conduct market research (e.g., review vendor info and capabilities)
- If desired, prepare/release RFI in Symphony and receive Vendor Responses
- Select the OASIS vehicle (i.e. UR, SB, or 8a)

**Step 2: Develop the Solicitation**
- Develop RFP using your agency's form or the OASIS template
- Determine OASIS NAICS code
- Select OASIS Pool

**Step 3: Issue the Solicitation**
- Upload your RFP document(s) into Symphony
- Issue RFP
- Manage Vendor Q&A
- Review Vendor "No Bid" decisions
- Issue Amendments (if needed)
- Receive Offeror proposals

**Step 4: Evaluate Proposals**

**Step 5: Award the Task Order**
- Notify all Offerors of award decision
- Enter award info and upload agency Task Order Award document(s) into Symphony

**Step 6: Administer the Task Order**

**Transition to Symphony demo**

Lots of helpful Buyers Guidance and Resources at this GSA website
Questions & Answers (from the training/demo)

- **Additional Training Events** – Will there be additional live training sessions for Symphony?  This training event was recorded and will be posted to the GSA website for viewing at any time. Additional live training events have not been scheduled.

- **Registration** – How is the initial Symphony password obtained to begin the registration process?  Use the register option at [https://oasis.app.cloud.gov/](https://oasis.app.cloud.gov/) to create your Symphony account and password before trying to sign in.

- **Symphony Cost** – Is there a cost to use this service?  No, it’s free to OASIS customer agencies and OASIS vendors.

- **Security** – What is the security for vendor proposals uploaded into Symphony?  Symphony is hosted on cloud.gov with a FISMA Moderate 3 year ATO.  All data is encrypted in transit and rest.  More info on GSA’s IT Policy can be found here: [https://www.gsa.gov/policy-regulations/policy/information-technology-policy](https://www.gsa.gov/policy-regulations/policy/information-technology-policy)

- **Vendor Proposals** – Can anyone add themselves as a task order POC and then view Offeror proposals?  Only registered users (e.g., the OCO and CS) can be a POC on task orders in Symphony.  The OCO then controls who can view task orders and their associated documents.  Similarly, OASIS vendors (Offerors) can only view their own proposals in Symphony.  Vendors can upload/edit their proposals until the solicitation closing date/time.

- **OASIS Ordering Procedures** – Is Symphony mandatory for all OASIS task orders?  No, it is not mandatory.  Current ordering methods (profiled on slide #7) are still available to OASIS customer agencies.  However, GSA believes this presentation and demo shows Symphony offers customer agencies a value-added tool for OASIS task order management.
