All Hazardous Material (Non-Cleaners)

- In-Service Engineering Agents (ISEAs) or ship documents technical need for hazardous materials (HAZMAT)
- Naval Surface Warfare Center Philadelphia Division (NSWCPD), Code 335, searches for an applicable equivalent, already approved product, thereby limiting additions to the Ship's Hazardous Material List (SHML).
 - If no equivalent, review material characteristics (components, pH, flash point, ect.)
- ISEAs specify HAZMAT required for equipment/system maintenance
 - **HAZMAT vendors do not contact Navy (NSWCPD or Ships) to be added to the SHML**

General Cleaners (Prior to Commercial Item Descriptions)

- **Cleaner vendors contact Navy Directly**
 - Contact NSWCPD directly for SHML authorization
 - Contact ships directly to sell products
- Process does not control the size (depth and range) of the SHML
 - There is no step to look for an equivalent, already approved product.
- Defense Logistics Agency (DLA)/General Services Administration (GSA) will not establish a National Stock Numbers (NSN) until the Navy requests it via Supply Support Request (SSR)
- GSA establishing cleaner NSNs as sole source due to need for NSWCPD review, contrary to preferred practice

Overall, the process for general cleaners (prior to CIDs) did not utilize GSA or Naval Supply Systems Command (NAVSUP) source selection processes. Vendors solicited directly to the ships and NSWCPD. Federal Acquisition Regulation (FAR) and other federal requirements were not followed.

- In coordination with GSA and NAVSUP Weapons System Support (WSS), NSWCPCD created CIDs for the below cleaner categories. GSA will manage the NSNs assigned to each CID and will issue solicitations, based on demand. Awards will be made competitively, as applicable in accordance with FAR and GSA Acquisition Manual (GSAM) regulations. Reformulations of products will be evaluated by GSA as requested and submitted during the procurement process (as applicable).

GSA Global Supply (NSN issues/requisition status): Please contact the GSA National Customer Service Center at ncscustomer.service@gsa.gov or call 1-800-488-3111

Group 1 (does not require dispenser w/utilities):

- Air Freshener
- Carpet Cleaner
- Dishwasher Descaler
- Dishwashing Detergent, Hand
- Disinfecting Wipes
- Foam Hand Soap
- Furniture Polish
- Hand Sanitizer
- Hand Soap, Borax
- Liquid Hand Soap
- Metal Polish
- Oven Cleaner
- Pre-Soak Cleaner
- Ready to Use Detergent, General Purpose
- Waterless Hand Cleaner

Group 1 Cleaner Dispensers:

Do not require the use of utilities (e.g., electric or water connection) and do not require Original Equipment Manufacturer (OEM) specific refills.

A variety of products are available at GSA Advantage and on the commercial market.

Gym/
Disinfecting Wipes

Foam Hand
Soap

Liquid Hand
Soap

Hand Soap
(Borax)

Group 2 (may require dispenser w/utilities):

- Floor Stripper
- Glass Cleaner
- Heavy Duty Cleaner, Concentrated
- Non-Food Contact Disinfectant

Group 3 (galley cleaners require dispenser):

- Dishwashing Detergent, Machine
- Dishwashing Rinse Additive
- Food Contact Cleaner

Groups 2 & 3 Cleaner Dispensers:

Dispensers are specific to the product characteristics and dilution ratio; therefore, OEM dispensers that are compatible with the vendor's group 2 & 3 cleaner(s) are allowed.

Minimal impact to Fleet and easier transition to CID approved cleaners.

CIDs for all cleaners are published and located on ASSIST: <https://assist.dla.mil>
