

Meredith Whitehead

Deputy Assistant Commissioner, Office of Systems Management
Federal Acquisition Service
U.S. General Services Administration

Meredith "Memi" Whitehead serves as the deputy assistant commissioner for the Integrated Award Environment (IAE) in the GSA Federal Acquisition Service (FAS) Office of Systems Management (OSM), where she provides management and oversight of the IAE program.

Memi has more than a decade of program management experience within the IAE, having served in roles of increasing responsibility. Most recently, she served as the director of IAE's Business Applications & Operations Division where she focused on delivering value to stakeholders by releasing new business services into the modernized environment, providing oversight for the existing government-wide system portfolio, and preparing those legacy IAE systems for decommissioning. Her operational knowledge of the IAE systems, data, and business processes, combined with her understanding of the policy context that drives IAE systems, allowed her to quickly assess change and identify realistic solutions.

Prior to joining GSA, Memi was a highly decorated U.S. Army intelligence officer. Throughout the course of 14 years, she held multiple leadership, command, and staff positions, and deployed in support of peacekeeping, the global war on terrorism, and humanitarian missions.

Memi has a Bachelor of Arts in International Studies and East Asian Studies from Dickinson College in Carlisle, PA, holds a Project Management Professional (PMP) certification from the Project Management Institute, and is currently completing her Masters of Engineering in Cybersecurity Policy and Compliance at The George Washington University.
