Background: The Green Building Advisory Committee provides advice to GSA as specified in Public Law 110–140, as a mandatory Federal advisory committee. Under this authority, the Committee advises GSA on the rapid transformation of the Federal building portfolio to sustainable technologies and practices. The Committee focuses primarily on reviewing strategic plans, products and activities of the Office of Federal High-Performance Green Buildings and providing advice regarding how the Office can most effectively accomplish its mission.

The Net Zero task group will consider a motion of a committee member to “Strengthen net zero energy commitments for new and existing federal buildings and federal leased buildings.” The Building Labels task group will consider a motion of a committee member to “Require building performance labels [for federal buildings], including current energy and environmental performance.”

The conference calls will focus on how the task groups can best refine these motions into consensus recommendations of each group to the full committee, which will in turn decide whether to proceed with formal advice to GSA based upon these recommendations.
