In February 2016, Local Telecom Service and WITS Customers will be able to access the Vendor and Customer Self Service (VCSS) website to view and run queries on summarized billing data, collections, and to dispute bills. Customers will continue to have access to e*Bill for Summary and Detailed billing information.

The About GSA changes to IPAC data fields for Local Telecom Service and WITS customers brochure will help you prepare to load data correctly into your internal systems without disruption. This brochure is designed to be a useful reference for those GSA customers who pull data from Treasury’s Intergovernmental Payment and Collection System (IPAC) into their accounting systems.

Federal standards make interagency interactions easier, so GSA complies with Common Government-wide Accounting Classification (CGAC), Financial Systems Integration Office (FSIO) Standards, and the Treasury Financial Manual (TFM) Publications and Guidance. To more fully align with these standards, we will be making changes to how we populate the IPAC records.

Please use this brochure as a guide on how to load data correctly into your internal systems when these changes take effect in February 2016.

We will continue to communicate with you to facilitate your transition to VCSS. Please visit gsa.gov/baar for more information.
