1. Overview

This chapter defines succeeding and superseding leases, discusses the acquisition process requirements for them, and explains the templates available to accommodate them.

GSAR Subparts 570.402 and 570.404 provide the authority to enable the Government to run an advertisement, conduct market research, perform a cost-benefit analysis, and, if justified, prepare a sole source Justification for Other Than Full and Open Competition (Justification) to negotiate a lease directly with the present lessor for continued space requirements. This approach eliminates the need for the Government to negotiate with all offerors in situations where the acquisition cost is above the simplified acquisition threshold and the Government has determined through cost benefit analysis (CBA) (570.402-1(b)(2)) that it cannot expect to recover relocation costs and duplication of costs through competition. This approach also saves the private sector the time and expense associated with developing, submitting, and negotiating proposals in those instances where the Government cannot expect to recover such costs through competition.

Lease Contracting Officers (LCOs) may use the authorities of GSAR Subparts 570.402 and 570.404 to acquire a succeeding lease when a “continued occupancy” is sought; or for a superseding lease to replace an existing lease when major modifications to the space are required causing material changes to the lease, or when favorable market conditions allow the Government to renegotiate favorable lease terms over a new lease period. Both succeeding and superseding leases establish new terms and conditions and result in a new lease contract with an existing Lessor. A succeeding lease is one that begins upon expiration of an existing lease for space in the same building. Whereas, a superseding lease replaces an existing lease before it expires.

Succeeding and superseding leases are distinguished from other lease actions to fulfill a continuing need for space, such as a replacing lease. In a competitive replacing lease action, PBS seeks full and open competitive offers from the market to replace an expiring lease. PBS performs market research to identify potential locations and advertises for interested parties to submit their properties for consideration to be viewed on a market survey. There is clear intention to solicit offers on a competitive basis and “all responsible sources are permitted to compete.” Several offers may be solicited and received, or the existing Lessor’s offer may be the only one received.

In contrast, for succeeding or superseding lease actions, PBS seeks to negotiate a sole source lease with the current lessor only, based on either a valid mission-related reason to remain at the current location or because the Government cannot expect to recover relocation and duplication of costs through competition. Similar to a competitive replacing lease action, PBS performs market research within the delineated area to identify potential locations and advertises for interested parties to submit their properties for consideration. The advertisement for a succeeding or superseding action communicates to the market that the Government will consider alternative space only under certain circumstances; this restriction of competitive sources is a defining feature of a succeeding lease action.

---

1 Definition of ‘Full and Open Competition’ under FAR 2.101
2 Note that for sole source actions based on mission-related reasons, alternative sources are not sought and that the advertisement serves as an “intent to award” notice. No cost benefit analysis is performed to support the Justification.
1. Overview

Succeeding and superseding leases are replacing actions at an existing location. Both situations require a Justification\(^3\) to support why there is only one responsible source that will satisfy the agency requirements. In instances where potentially acceptable locations are identified, the Justification must include a CBA to reflect an estimate of the cost to the Government that would be duplicated and how the estimate was derived. PBS must document the absence of acceptable locations or a finding that the Government cannot expect to recover costs in a Justification in order to begin negotiations directly with the current Lessor.

Although succeeding and superseding lease procurements have some marked distinctions from new and replacing lease procurements, many more similarities exist than differences. This chapter highlights primarily the differences. Refer to Chapter 2, New or Replacing Lease, for a comprehensive discussion of the new and replacing lease procurement process, and supplement that information with the guidance in this chapter for a succeeding or superseding lease.

The flow chart on the next page shows the process for succeeding leases. Subsequent sections of this chapter explain these steps in more detail.

Keys to flow chart terminology:

- GSAM: General Services Administration Acquisition Manual.
- FAR: Federal Acquisition Regulation.
- Justification: Justification for Other than Full and Open Competition.
- RLP: Request for Lease Proposals package.

---

\(^3\) Per GSAR 570.203-2(b) and 570.402-1(a), sole source actions at or below the Simplified Lease Acquisition Threshold (SLAT) do not require a formal Justification for Other than Full and Open Competition. Written documentation by the LCO to explain the lack of competition is sufficient.
CHAPTER 5: Succeeding Lease, Superseding Lease

1. Overview

Succeeding Lease Process

- **Continuing need requirement**
  - Does agency have a mission-based reason to support a sole source action in accordance with FAR 6.302-1?
  - Yes: Develop and obtain approval of Acquisition Plan identifying succeeding lease acquisition approach.
  - No: Perform due diligence research, including current location and market alternatives.

- **Lease > 10,000 ABOCA at:**
  - Publicize acquisition consistent with 55SAM 570.100 on beta.SAM.gov.

- **Are potential acceptable locations (other than current lease) identified via beta.SAM.gov or market research?**
  - No: Develop and obtain approval of justification per 6.3.5 and OSAM 500.5.
  - Yes: Conduct cost-benefit analysis (CBA) to determine whether Government will recover costs of relocation and duplication through competition.

- **Does CBA show that Government will recover costs of relocation and duplication through competition?**
  - No: Develop and obtain approval of justification per 6.3.
  - Yes:Full and Open Competition pursuant; Re-publish (as applicable) on SAM.gov.

- **Issue RLP and proceed with discussions with current lessor**

- **GSA completes lease acquisition process**

PBS Leasing Desk Guide
This page last revised: 05/20/2021
2. Definitions and Applicability

a. Succeeding Lease

A succeeding lease secures long- or intermediate-term continuing occupancy at the current premises at the end of a lease term (or the end of an extension) without a break in tenancy. To pursue a succeeding lease, unless the agency provides a written justification of their mission-based reason to stay in place, the Leasing Specialist must investigate the availability of alternative locations; then, if alternative locations are found, the Leasing Specialist must either conduct a full and open procurement or demonstrate the cost advantages of staying in place through a CBA.

If a CBA is required but it does not support a Justification under the Competition in Contracting Act (CICA), then a competitive new/replacing lease must be pursued. The Leasing Specialist must update PBS systems to indicate that the lease action is not a succeeding lease but a new/replacing lease action if that is the case.

b. Superseding Lease

A superseding lease replaces an existing lease before its expiration. The existing lease is terminated simultaneously, effective with the commencement of the superseding lease. Generally, a superseding lease is used to significantly change the provisions of an existing lease, usually to the point where additional term years are added, the rent is significantly changed, and the amount or configuration of the space is significantly altered.

The main advantage of using a superseding lease, as opposed to a Lease Amendment, is that all lease provisions are brought up to current standards. The Leasing Specialist must understand that if the cost-benefit analysis does not support a Justification under CICA, then a competitive new or replacing lease must be pursued. The potential cost of remaining liability on the existing lease (in terms of net present value or a buyout) will play a major role in the superseding CBA, unless a backfill candidate has been identified.

As a practical matter, superseding leases are often used when the space is either being expanded or a reduction in rent is being obtained in exchange for a longer firm-term commitment by the Government. They are also a successful tool for backfilling vacant space by adding a tenant improvement allowance (TI) for the new tenant agency and extending the lease term to amortize the TI.

Examples of Potential Superseding Lease Scenarios

Not every trigger event—such as a change in the tenant agency’s square footage requirement or a space alteration—will necessitate a superseding lease. Space expansions are accommodated by Lease Amendments if they are determined by the LCO to be within the general scope of the lease. However, space expansions outside the general scope of the lease may be considered for a superseding lease if the agency has a mission-related need for the personnel to be co-located, or there are other justifiable reasons for the expansion. For determination of scope, the LCO must consider the factors discussed in detail in Chapter 6, Change in Square Footage—Expansion and...
Reduction, and must consult with the Office of Regional Counsel. Likewise, minor space alterations may fall within the scope of the lease (see Chapter 8, Alterations in Leased Space).

The Government may consider executing a superseding lease to replace an existing lease when various factors make it advantageous to do so. The following are examples of circumstances that may support a superseding lease. In all circumstances, a Justification is required for superseding leases (or, for actions at or below SLAT, documentation explaining the absence of competition is required).

**Significant Changes in Customer Requirements**

A tenant agency may need numerous or detailed modifications to a space that would cause complications or substantially change the existing lease. For example, the agency’s needs or organizational goals have changed significantly or it may need to co-locate or consolidate an affiliated agency or organization with itself under the same roof to meet evolving mission needs; and it might need more space to accomplish that. The agency may need the expanded space or extensive alterations now, two or three years before expiration of its current lease. A superseding lease can solve the space problem and also avert the need to redo the lease again in a couple of years, as well as provide enough additional term to allow a more tolerable amortization of any tenant improvement allowance. Note that a pricing deviation will be necessary if there are TIs remaining from the existing lease that are being amortized in the superseding lease.

**Opportunities for Economic Advantage**

In some cases, a superseding lease could take advantage of favorable market conditions to bring considerable financial savings to the Government. A superseding lease whose only purpose is to secure a longer lease term at the current location would ONLY be an acceptable approach in the case when the lessor is actually offering a rental rate lower than the existing rate for both the remaining term and the additional term. The fact that the lessor is offering an attractive rate to “blend” with the old rate is not necessarily a benefit to the Government, if that “blending” results in an immediate price increase to the tenants.

The “blend and extend” concept oftentimes used in the private sector can be misleading, especially when the lessor can offer a slightly below current market rate for the extension term that is higher than the existing rate, blend them, and get both an immediate price increase and additional term without competing. Unless the price goes down immediately, it would be hard to prove that competition at the end of the existing term would not produce an overall better deal for the Government. This scenario violates the intent of the CICA, the purpose of which is generally to foster competition and reduce costs. Identifying such opportunities requires analyzing the terms of the existing lease inventory against market conditions to find potential targets. More favorable rental rates may be available now than when the lease began, so executing a superseding lease now can lock in more beneficial terms. Leasing Specialists are encouraged to consider a superseding lease for such scenarios, which can result in renegotiated rent payments lower than those for the existing lease in exchange for a longer firm-term commitment.

**Administrative Simplification**

A superseding lease can be used to consolidate and reduce the number of leases that must be administered for a certain location, or for a particular customer agency. This approach can reduce the cost of administering the leases and make it easier to manage the lease workload, not only for the Government but also the lessor. A lease consolidation may be especially compelling in scenarios where multiple leases are spread out over highly dispersed or remote locations, and
where distances pose a significant challenge in terms of the time and cost of travel and coordination.

The coordinating requirements and timelines for executing a single-tenant superseding lease grow significantly when attempting to bring together the needs of multiple tenant agencies. The Leasing Specialist must carefully consider whether:

- the data, tools, and time are sufficient to conduct a thorough and defensible up-front analysis;
- the geographic location and travel issues are compelling;
- the opportunity offers clear advantages;
- the loss of flexibility for the individual tenants or locations is outweighed by the long-term benefits;
- the superseding lease can effectively resolve and harmonize the requirements of different tenant agencies;
- the superseding lease will increase the cost-efficiency of the leases; and
- the consolidated superseding lease will reduce or magnify administrative difficulties, or opportunities for OA rent bill errors.

3. Statutory Authority

As discussed in Part 1 of Chapter 2 of this Desk Guide, CICA requires agencies to promote and seek full and open competition in soliciting offers and awarding Government contracts. CICA, as implemented in FAR Part 6, recognizes seven conditions that allow exceptions to this requirement. The exception most relevant to leasing is that there is “only one responsible source” and no other supplies or services “will satisfy” agency requirements (41 U.S.C. § 3304(a)(1)) as implemented in FAR Part 6.302-1. It is under this exception that PBS may negotiate with the current lessor and secure a succeeding lease using GSAR 570.402 or a superseding lease using GSAR 570.404. While the GSAR guidance on managing expiring leases is clear, some Leasing Specialists may not be aware of these authorities.

Leasing Specialists must be aware that a Justification is not supportable based on:

- a lack of advance planning by the client agency; or
- concerns related to the amount of funds available to the agency (FAR 6.301(c)).
4. Timing and Leverage

It is essential to begin considering the potential for a succeeding lease well in advance of the expiration of the current lease, depending on factors such as the size and complexity of the lease. See Leasing Desk Guide Chapter 1, Requirements Development. This lead time is necessary to allow a thorough analysis of:

- the agency’s long-term space needs;
- the current lease terms;
- prevailing market conditions;
- potential points of leverage in PBS’s negotiation position with respect to the incumbent lessor; and
- the relative costs and benefits to the tenant agency of staying in place versus moving to a new location.

Failing to allow enough time to investigate strategic options can impose significant costs on the Government that otherwise might have been avoidable. As the expiration date approaches, the lessor may begin to regard the Government as a captive tenant unlikely to be lost to a competitor, and the lessor will enjoy an increasingly stronger negotiating position regarding rental concessions or other terms.

5. Acquisition Planning Analysis

This section discusses some of the factors that the Leasing Specialist must consider in performing an analytical review to decide whether to pursue a succeeding lease as an option.

a. Issues to Consider

As part of due diligence, the Leasing Specialist must consider the following issues before deciding to pursue a succeeding lease. Note that many of these are documented in the Succeeding/Superseding Lease Analysis Tool, discussed later in this chapter:

Agency Requirements

- Have the agency’s requirements changed significantly? If so, can the existing location meet these new requirements? General requirements for a succeeding lease are largely the same as for a new or replacing lease action, but tenant improvement costs can be significantly less. If the agency is contemplating major changes in square footage or alterations, then full and open competition could be more appropriate.
• Is this an opportunity for the agency to reduce its square footage or pursue co-location or consolidation opportunities?

Suitability of Location

• Is Government-owned space available that may meet the agency’s requirements? Could a historic or other federal building meet the requirement and better serve the Government’s fiscal, sustainability, and stewardship goals?

• Does the current location comply with locational policies, such as E.O. 12072, and does it provide for desirable sustainability features such as walkability and public transit accessibility?

• Does the location still comply with floodplain and wetland policies?

• Is the agency satisfied with the current location? Does the current location still align with agency mission requirements?

• Does the current lessor have a good record of past performance regarding heating and air conditioning, janitorial service, maintenance, and alterations? Leasing Specialists should be contacting the Lease Administration Manager (LAM) for their feedback in this area.

• What is the condition of the building? In addition to agency and LAM feedback (such as annual inspections or a building evaluation report), determine the condition based on a physical tour, if at all possible—see the section below on the market survey.

RLP and Lease Technical Requirements

• Can the existing building or space be altered to meet the current solicitation requirements with respect to standards such as fire safety, accessibility, sustainability, seismicity, and security criteria?

• Will the client agency be able to continue to perform its mission during renovations or will the current lessor be required to offer alternative solutions to prevent disruption to ongoing agency operations?
  
  • Will the work need to be done in phases?
  
  • Will the agency have to temporarily relocate into swing space? Note that, while some improvements may adversely affect an agency’s ongoing operations to the point of requiring temporary swing space, this should not be assumed in all instances.

• If required, will the swing space involve unusual or redundant costs that would not be encountered if the agency were to relocate instead—for example,
telecommunications, data, or the physical move? How do these costs affect the cost-benefit analysis?

- Will the incumbent lessor install cost-effective energy efficiency and conservation improvements? See Chapter 18 of this Leasing Desk Guide for further information on EISA requirements, including details on cost-effective energy efficiency and conservation improvements.

**Competitive Advantage**

- Is the Government well-positioned to negotiate concessions from the current lessor with regard to rent, TI allowance, or other lease terms?

- Did you consult with field office representatives or LAMs to solicit their knowledge and expertise on post award/lease administration matters?

- Are there advantages to the Government in conducting a full and open competition to meet the agency’s requirements?

These factors will help the Leasing Specialist develop a general sense of whether a succeeding or superseding lease is desired and feasible.

**b. Succeeding/Superseding Lease Analysis Tool**

Lease Reform introduced the use of the Succeeding/Superseding Lease Decision Tool as a proactive approach in performing the due diligence described above for our expiring lease inventory. The decision tool, which was intended to assist the LCO in deciding the appropriate procurement strategy based upon a thorough evaluation and analysis of these factors that are typically reviewed as part of acquisition planning, was replaced in 2018 by a more streamlined version renamed as the Succeeding/Superseding Lease Analysis Tool. The replacement version contains automated functionality similar to the original version of the decision tool, but takes a more streamlined approach by focusing primarily on the cost-benefit analysis and due diligence aspects of the original tool. The Succeeding/Superseding Lease Analysis Tool enables Planning Managers, Project Managers, Leasing Specialists and/or LCOs to gather due diligence information about the current location and also perform an early Rough Order of Magnitude (ROM) based analysis. This information is used to help determine if pursuit of a succeeding lease is financially in the Government’s best interest and guides the requirements development and acquisition planning processes. The tool also enables the project team to perform a more detailed Independent Government Estimate (IGE)-based CBA that is used to support a Justification (see paragraph 10, Justification for Other Than Full and Open Competition (Justification), below, for additional details).

Use of the Succeeding/Superseding Lease Analysis Tool is mandatory for all succeeding or superseding lease procurements, regardless of project size, and for new/replacing leases above SLAT, in order to document adequate due diligence and acquisition planning for the project.

**c. Touring the Existing Location**

To the maximum extent practicable, as part of the Requirements Development process, the Leasing Specialist, LCO, or designee (such as property manager, project manager, or GSA broker contractor) will perform due diligence by touring the current lease location. The tour will confirm that the building’s condition, accessibility, fire safety features, seismic, energy efficiency/conservation, and other attributes meet current lease standards.
6. Occupancy Agreement (OA)

As described in other chapters of this Leasing Desk Guide, GSA sends the tenant agency a draft OA as part of requirements development. Tenant agency signature on the OA is required before PBS enters into a lease contract to confirm the agency’s financial commitment to pay the rent according to the terms and conditions stated in the OA.

However, in a succeeding lease situation, where the agency is already occupying the space but has not provided its requirements or is unwilling to sign an OA, the LCO may have to protect the Government’s financial interests without the benefit of an executed OA, to avert a holdover tenancy. In such situations, the LCO should only proceed with awarding a succeeding lease after providing written documentation that carefully weighs the risks and obtaining written concurrence from the Regional Portfolio Director. A superseding lease, in all scenarios, requires a signed OA, without exception.

The following steps will help to protect the Government’s legal rights as well as allow the Leasing Specialist flexibility to begin timely follow-on succeeding lease procurement:

- As a general practice for all leases, customers must be notified well in advance of lease expiration (See Chapter 1, Requirements Development). Subsequent notifications and requests for requirements should clearly state that if PBS does not receive a specific request to terminate or reduce the requirement at the end of the lease term, it will take action to protect the Government’s interest and negotiate either a succeeding lease or other contract action at the most favorable terms the Government can acquire.

- This notification also advises the customer that it will be financially obligated to pay the pass-through lease contract rent for the space. PBS will negotiate the most appropriate firm term possible. In the absence of instructions from the client agency, GSA will negotiate for the most appropriate terms that it deems to be in the best interest of the Government.

- As part of customer communications to obtain a signature on the OA, Leasing Specialists and/or Project Managers must escalate using the current notification process as outlined by the Office of Portfolio Management and Customer Engagement to assist with garnering the needed OA signature(s).

- As a general practice, in such scenarios PBS will seek to avoid the use of a lease extension or, when an extension offers the most advantageous solution, to minimize its term. The term of a lease extension should rarely exceed 2 years, unless it involves a consolidation of leases or lease construction (see Leasing Desk Guide Chapter 7, Lease Extension).

- As part of this process, PBS re-sends a draft OA to the agency in an additional attempt to gain its concurrence on the leasing action. It may be useful to send the draft OA to an escalated office within the agency, such as an assistant secretary for operations.

- If an agency has not provided a signed copy of the OA and continues to occupy space, no signed OA is required to finalize that assignment, provided no additional TIs were added and square footage did not increase. PBS must continue to seek signatures for succeeding lease projects. Where no signed OA is required, the proposed OA must
include the succeeding lease ad hoc clause contained in the OA Tool. Additional text may also be added after the standard clause for further explanations.

- All documentation related to PBS’s attempts to obtain a signed OA should be included in the lease file.

7. SAM.gov Contract Opportunities Posting and Newspaper Advertisements

The wording of SAM.gov postings is crucial in determining whether or not the action can be considered full and open competition under CICA. SAM.gov postings and newspaper advertisements for succeeding lease actions differ from those for full and open competition in that they contain language specifically communicating the potential of a sole source action to the market.

At a minimum the succeeding lease advertisement must:

- Indicate that the Government’s lease is expiring;
- Describe the requirement in terms of type and quantity of space;
- Indicate that the Government is interested in considering alternative space if it would be economically advantageous;
- Advise prospective offerors that the Government will consider the relocation costs, including the physical move and the voice and data systems move, when deciding whether it should relocate or pursue a sole-source acquisition; and
- Provide a contact person for those interested in providing space to the Government.

a. SAM.gov Posting for Succeeding Lease

The Leasing Specialist seeks expressions of interest using the SAM.gov combined procurement template described further in Chapter 2 of the Leasing Desk Guide. The attached template contains the following text, which must be included by the Leasing Specialist or broker to specifically address succeeding lease situations:
ACTION REQUIRED: USE THIS SECTION FOR PRE-SOLICITATION NOTICE/ADVERTISEMENTS SEEKING EXPRESSION OF INTEREST. DO NOT USE FOR RLP PROCUREMENT SUMMARY.

ACTION REQUIRED: FOR PRE-SOLICITATION NOTICES/ADVERTISEMENTS SEEKING EXPRESSIONS OF INTEREST, INSERT THE FOLLOWING LANGUAGE ONLY FOR POTENTIAL SOLE SOURCE SUCCEEDING LEASE ACTIONS. DELETE FOR PROCUREMENT SUMMARY PAGE. DO NOT USE FOR FULL AND OPEN PROCUREMENTS. NOTE THAT ANY FIGURES USED FOR A COST BENEFIT ANALYSIS (CBA) MUST BE SUPPORTABLE. CONSIDERATION OF “NON-PRODUCTIVE AGENCY DOWNTIME” IN A CBA SHOULD BE RARE.

The U.S. Government currently occupies office and related space in a building under a lease in [City, State], that will be expiring. The Government will consider alternative space if economically advantageous. In making this determination, the Government will consider, among other things, the availability of alternative space that potentially can satisfy the Government’s requirements, as well as costs likely to be incurred through relocating, such as physical move costs, replication of tenant improvements and telecommunication infrastructure, and non-productive agency downtime.

Note that SAM.gov advertisements for full and open competition must not include the succeeding lease text outlined above.

If the Leasing Specialist receives no responses for locations that can meet the requirements—for example, the space is outside the delineated area, is too small, or does not meet other requirements of the advertisement—then the Leasing Specialist must nevertheless conduct additional market research (described below) to confirm that no other options exist. If the market research also reveals that no other options exist, the Leasing Specialist can begin to prepare the Justification. If market research indicates that lease construction would offer a lower-cost alternative and if sufficient time remains in the lease, consult Chapter 14, Lease Construction.

If viable responses are identified, then this information is captured for the cost-benefit analysis (described below) and may be included in a potential market survey.

b. “Intent to Award” Advertisement

There may be rare instances in which an agency’s requirements can only be fulfilled by the unique characteristics of one property. For sole-source succeeding leases where the decision to limit competition is mission-driven, not cost-benefit driven, (for example, Transportation Security Administration’s requirement to remain on airport property), the SAM.gov posting does not include the succeeding lease language described above. Instead, the Leasing Specialist places an Intent to Award advertisement to clearly communicate our intent to remain at the current location. See Chapter 20 of this desk guide for an example.
c. Superseding Lease Advertisement

Superseding lease advertisements are similar to succeeding lease advertisements in that they outline the agency space requirement, seek expressions of interest, and communicate the potential of a sole source action to the market.

8. Market Survey

As used in Chapter 2 of this Leasing Desk Guide, the term “market survey” refers to the full process of gathering information about and actually visiting specific properties in the market to determine whether suitable property is competitively available and how to satisfy the lease requirement in the most competitive manner. For purposes of obtaining a succeeding or superseding lease, however, the requirement for a market survey is fulfilled through market research, using those resources described under Chapter 2, Part 2 (such as the SAM.gov posting, CoStar, LoopNet, regional listing files, and calls to owners and listing brokers). Through this research, the Leasing Specialist identifies all potential locations with sufficient space and corresponding rental rates.

A building tour of potential locations is not necessary at this stage, nor is it necessary to fill out market survey forms for these alternative locations, unless further cost-benefit analysis points to a possible need for a competitive action. The Leasing Specialist or LCO documents the results of this research for the file.

Three scenarios are possible at this point:

1. No potentially acceptable locations (other than the existing lessor) are identified through the advertisement and the market survey.
   Posting the expressions of interest on SAM.gov advertisement is not enough; Leasing Specialists must also conduct market research. Both actions are critical steps toward finding potentially acceptable locations. In this situation, if the succeeding lease advertisement language was used, a CBA is unnecessary, and the Leasing Specialist should proceed with preparing a Justification to negotiate directly with the current lessor.

2. Potentially acceptable locations are identified, but the required subsequent CBA indicates that the Government cannot expect to recover relocation costs and duplication of costs through competition. The Leasing Specialist must capture this information for preparing the Justification.

3. Potentially acceptable locations are identified, and the CBA indicates that the Government could recover relocation costs and duplication costs through competition. Under this scenario, the Leasing Specialist must cancel the succeeding lease project and initiate a competitive replacing lease project, posting a new SAM advertisement as applicable and touring all potential locations.

Broker Support

Project teams should consider the GSA Leasing Support Services (GLS) Plus contract to leverage in-house Government resources. GLS Plus enables PBS to use broker contractors to provide additional leasing capacity and supplement the work of the Leasing Specialist. Do not enlist broker support if the LCO knows in advance of the task order award that the lessor will pay a broker commission.
9. Cost-Benefit Analysis

If potentially acceptable locations are identified through the advertisement or market research, a CBA becomes necessary for justifying a decision to pursue a succeeding or superseding lease action. The critical issue in this analysis is to determine whether the agency will recover the costs of relocation and duplication through the lower rents and possible concessions that may be achieved through competition.

A CBA must consider the following factors:

- The lowest rates of other potentially available properties;
- Relocation costs for:
  - Moving
  - Telecommunications
  - Alterations amortized over the firm term of the lease
- Duplication of costs to the Government (such as for tenant improvements and disruptions if applicable);
- Other appropriate factors, such as costs to meet lease security standards in the new location versus retrofitting the existing location to meet lease security standards;
- For superseding leases, the cost of remaining liability for the firm term on the existing lease, unless a backfill candidate can be identified.

The costs used in the CBA must be defensible and supportable. Note that, except as provided above for superseding leases, the cost benefit analysis should be based on the full term of the lease, both the initial “firm” (non-cancelable) and “soft” (cancelable) terms, in addition to any required renewal option(s) (See Leasing Desk Guide Chapter 9). The firm, soft and renewal terms used for the cost-benefit analysis must be the same for each location being considered.

a. How to Establish Costs

Leasing Specialists must establish the prices for other potentially available properties by requesting each prospective offeror to provide an informational quotation for standard space for comparison purposes. To establish these prices, Leasing Specialists must:

a. Provide a general description of the Government’s needs that may be accomplished by publishing the requirement in SAM.gov using the succeeding lease language above. A

You cannot skip this step!

Once potentially acceptable locations are identified, the CBA is a critical step in the succeeding lease process.

TI Duplication/Replication Costs

When performing a CBA, PBS usually assumes that the alternative location will require use of the client agency’s full TI Allowance. PBS may assess TI replication costs above the Allowance if there is supportable evidence, such as an IGE, a past history of the agency exceeding their Allowance, etc., to do so. Note that an agency’s prior investment of lump sums may be considered only to the extent that these alterations must be replicated at the new location and that the costs for these alterations are expected to exceed the TI Allowance.
CHAPTER 5: Succeeding Lease, Superseding Lease

9. Cost-Benefit Analysis

formal RLP is not required to obtain the informational quotation.

b. Adjust the prices quoted for standard space for any special requirements. For example, adjust prices appropriately for office space versus holding cells. This adjustment could also be addressed in the tenant improvement budget.

c. The Leasing Specialist must understand that rates quoted may not be fully serviced (to the Government’s standards) and may need to be adjusted to compensate for these differences. For example, fully-serviced leases in the market might not include charges for snow removal, grounds maintenance, or common area maintenance as required in the RLP. When reviewing cost proposals, be aware that the private sector’s definition of shell is usually what GSA would refer to as “cold dark” space—the foundation and structural work, the roof and all concrete exterior walls, and interior slab flooring—as opposed to the PBS shell definition that GSA typically requires for office space, which is the complete enveloping structure, the base building systems, and the finished common areas that adjoin the tenant areas. This definition, sometimes referred to as “warm lit” space, is detailed in Table 2-4 of the Pricing Desk Guide 5th Edition, Shell Definition. The rate quoted might also not include costs for Government requirements, such as those regarding security, accessibility, fire and life safety, and seismic standards.

d. Quoted rates may need to be adjusted if they include a partial TI Allowance ("work-letter"). Also, quoted rates are usually “Year 1” rates and may need to be adjusted to reflect annual escalations, if typical in the local market.

e. For each price quote received, Leasing Specialists must document the following information:

1. Name and address of the firm solicited (the location must be within the delineated area)

2. Name of the firm’s representative providing the quote

3. Price quoted

4. Adjustments made to price

5. Description of the space and services for which the quote is provided

6. Name of the Government employee soliciting the quotation

7. Date of the quote

f. The Leasing Specialist must compare the informational quotations to the present lessor’s price, adjusted to reflect the anticipated price for a succeeding or superseding lease. The Leasing Specialist must be able to support any adjustments using technical resources, market research, or historical data.

b. Tools and Templates

As stated previously under paragraph 5.b above, Leasing Specialists must use the Succeeding/Superseding Lease Analysis Tool’s CBA spreadsheet to support a Justification, using market sources or information obtained through the SAM.gov posting or market research. The analysis must reflect the rigor necessary to support a Justification, described in further detail below.
10. Justification for Other Than Full and Open Competition (Justification)

The reason for a CBA’s is to determine whether the Government can expect to recover relocation costs and duplication of costs through competition. What LCOs and regional decision-makers must determine is whether the analysis clearly supports a non-competitive procurement.

When performing the comparison, the LCO should not just rely upon whether the analysis shows a projected savings by remaining at the current location, but also upon the degree of savings relative to the cost of the project. For example, a projected cost savings of $150,000 for a contract with an aggregate value of $500,000 reflects a stronger argument for a sole-source succeeding or superseding lease than a projected savings of $200,000 for a contract with an aggregate value of $3 million. (An alternative approach is to look at the costs savings from an annual rate/ABOA SF basis. A projected cost savings of $6.00/ABOA SF represents a more significant savings, and presents a more compelling economic argument for a succeeding lease, than a projected savings of $1.00/ABOA SF.) However, regardless of whether the comparison is done on the annual or aggregate value, if the cost-benefit analysis does not clearly support a non-competitive procurement, the lease must be competed.

In summary, if a CBA fails to make a strong economic case for negotiating with only the current lessor, the Leasing Specialist must pursue a full and open competition.

10. Justification for Other Than Full and Open Competition (Justification)

As outlined under FAR Part 6, a Justification for Other Than Full and Open Competition (Justification) provides the basis for the Leasing Specialist to negotiate with a single source—in this context, the existing lessor—without full and open competition. The level of approval required increases as the dollar value escalates. The Justification template for succeeding and superseding leases is attached (Attachment 1). A Justification that is not based upon a mission-related rationale or lack of available alternatives must incorporate the CBA. Negotiations with the lessor must not be conducted until the Justification is approved by the appropriate authority. The LCO will closely coordinate with the Office of Regional Counsel on drafting the actual Justification. The sample template in Attachment 1 is only for illustration and must not be used without careful consideration of the facts in each case. Also See Leasing Desk Guide Chapter 2, New and Replacing Leases for additional information on Justifications.

Thresholds for Review, Concurrence and Approvals

The thresholds for signature levels are outlined under FAR 6.304. However, there are additional required reviews which are not stated under FAR, as noted below:

Legal Review
Per GSA Order 5000.4B, Appendix A, legal review is required for “any acquisition action requiring the approval of the Head of the Contracting Activity (HCA) or higher, including but not limited to,
justifications for other than full and open competition under FAR Part 6.” (currently equates to an action with an aggregate value exceeding $15,000,000.). Since Appendix B of this same Order requires pre-award legal review for all lease awards above SLAT, which are based on Justifications Other than Full and Open, it is a best practice to obtain legal review of all Justifications over SLAT.

Office of Leasing Review

All Justifications requiring signature by the GSA Senior Procurement Executive (SPE) or those involving a prospectus level action, including use of interim leasing authority, must also be reviewed by the Office of Leasing. The purpose of this review is to work out any potential procurement issues or concerns. See Attachment 2 for further details regarding the Justification review and approval process.

Post-Award Publication of Justifications for Other Than Full and Open Competition

Redacted Justifications must be published on SAM.gov within 14 days after lease award. See paragraph 14 of this chapter for further guidance.

11. Request for Lease Proposals (RLP) Package and Offer Forms

Both the Global and SLAT model RLP and lease templates allow the Leasing Specialist greater flexibility in preparing RLP packages to meet the needs of individual succeeding lease transactions. Using either the Global or SLAT templates, Leasing Specialists choose paragraphs that convey either a sole source intent to negotiate with the current lessor, or, in instances when disclosure to the current lessor imposes an undue financial risk upon the Government, the appearance of competition. Leasing Specialists should not be choosing sole source language unless there is an approved Justification for a sole source action. TI can be priced as either turnkey or based on an allowance. Design Intent Drawings (DIDs) may be provided by either the Government or by the lessor (through an iterative or a DID workshop method), or, in instances where minimal build-out is anticipated, omitted altogether.

Note that an LCO may also use other models for a succeeding or superseding lease, depending upon project circumstances, such as the On-Airport, Warehouse, and Small Lease Models.

a. Seismic Requirements

Appendix G of this desk guide outlines the procedures for seismic safety in leased buildings. Note that the guidance below reflects compliance with Appendix G, as issued on September 18,
2012. This appendix is subject to revision and LCOs must follow the seismic requirements as outlined in latest version of this appendix.

If the currently leased building is in the green area of the map shown in the RLP (low and very low seismicity), the seismic requirements of Recommended Practice (RP) 8 do not apply to the succeeding or superseding lease transaction, and the Leasing Specialist should delete seismic paragraphs from the RLP package.

If the currently leased building is in the yellow area of the map (with planned federally occupied leases totaling 10,000 ABOA SF and above) or the red area (total building size 3,000 ABOA SF and above), then:

- Review the existing lease file to determine whether there is a certification from the previous procurement. If the file contains a certification under RP 6, then this certification suffices as seismic compliance for succeeding and superseding leases. Note: It is PBS's general policy that all certifications done under RP 6 (ASCE 31) are acceptable under RP 8. The RP 6 provision grandfathering RP 4 is not considered evidence of seismic compliance in any region.

- If a prior certification does not exist, the Leasing Specialist must obtain evidence of seismic compliance from the lessor. If the incumbent cannot or will not provide evidence of compliance with RP 6 (ASCE 31) or later standards, then the acquisition strategy must be changed to full and open competition, including the current lessor in the competition. The lessor’s building will then be evaluated in accordance with the provisions of the RLP seismic provisions.

b. Security Requirements

The Federal Protective Service (FPS) is the security organization that is legally and statutorily responsible for the security of GSA’s leased space. After GSA leases a space, the FPS performs an in-lease assessment. By policy, the FPS must complete additional in-lease security assessments according to the following schedule:

- Facility Security Level (FSL) I–II: Reviewed by FPS every 5 years
- FSL III–IV: Reviewed by FPS every 3 years.

For succeeding and superseding leases that are established through other than full and open competition, the requirement to change the security countermeasures will not apply unless there is a change in tenant(s) or mission. Otherwise, for these types of leasing actions the FSL determinations and risk assessments will continue to be done in accordance with the schedule established for the facility.

Replacement actions triggered by a change in tenants or mission, or major construction to the leased premises for the Government's continued occupancy at the existing location and achieved through full and open competition must consult with FPS to determine if the past assessment or a newly completed assessment is required.

Since security items may have been installed as part of the original lease or as lease alterations, there is no need to recreate the countermeasures installed in the original lease, but they still need to be maintained. Therefore, the use of the standard paragraphs for a particular FSL may need to be adjusted if there are any additional security countermeasures already installed.
11. Request for Lease Proposals (RLP) Package and Offer Forms

With either the past assessments or a newly completed assessment in hand, the Leasing Specialist or LCO consults with FPS and the tenant agency to determine whether any additional security countermeasures are required, needed, and affordable or if the current items have outlived their useful lives. This is done before completing the final requirements so that any deficiencies can be included in the negotiation of the succeeding or superseding lease or a fully competed lease transaction.

In those replacement actions triggered by a change in tenants or mission, the FPS inspector provides the recommendation for the items and the standards for them. Except for countermeasures being provided by FPS, these items must be included in the succeeding or superseding lease as part of the requested alterations and amortized as new building-specific amortized capital (BSAC). Leasing Specialists are reminded that BSAC is defined as any physical security measure that is either part of the building or attached to the building and not easily removed.

The FPS inspector reviews the installation to verify the installation and functionality of countermeasures and prepare a final acceptance report.

The lease must include the set of clauses for the pertinent FSL with additions or deletions as appropriate for the space.

Refer to Chapter 19 of this Leasing Desk Guide for information on lease security requirements for new and replacing leases.

c. Historic Preservation Act Review Process

The Leasing Specialist must consult the GSA Regional Historic Preservation Officer (RHPO) to determine whether the review process of Section 106 of the National Historic Preservation Act applies. For the most part, succeeding or superseding leases in non-historic buildings or in historic buildings without substantial TIs will not result in an adverse impact and therefore will not be subject to the review process. The Leasing Specialist must include documentation related to this determination in the lease file.

However, if in consultation with the RHPO the Leasing Specialist is informed that the proposed project/lease is likely to pose an adverse impact to historic properties, the Leasing Specialist must develop a Preservation Review Execution Plan in consultation with the RHPO to ensure a documented process for compliance with Section 106.

d. National Environmental Policy Act (NEPA) Review

The Leasing Specialist should consult the GSA Regional NEPA Specialist to determine NEPA review and documentation requirements. As outlined in GSA’s NEPA Desk Guide, lease extensions, renewals, or succeeding leases are defined as automatic categorical exclusions (or AutoCATEX). AutoCATEXs are not major Federal actions significantly affecting the quality of the human environment and, therefore, require limited NEPA review. The NEPA review, as documented through an AutoCATEX form, must include a determination of whether the site is in a floodplain. If the site is in a floodplain, please refer to LDG Chapter 2 for additional guidance.

The Leasing Specialist must include documentation related to the NEPA review in the lease file.
12. Negotiations and Fair and Reasonable Determination

e. Energy Independence and Security Act (EISA) Requirements

Succeeding and superseding leases fall within one of four allowable statutory exceptions to the Energy Star® building label requirement (“the agency will remain in a building it currently occupies”). Under this exception, the incumbent lessor, as part of its offer, must include in their proposal an agreement to renovate the building for all energy efficiency and conservation improvements that would be cost effective over the firm term of the Lease within one (1) year after lease award. In addition, the lessor is also required to obtain and publicly disclose the Building’s current ENERGY STAR® score (using EPA’s Portfolio Manager tool), unless the lessor cannot access whole building utility consumption data, or there is no building category within Portfolio Manager to benchmark against. Further details on this benchmarking requirement are outlined in the lease.

The Leasing Specialist should verify the completeness of these proposed improvements. Should the incumbent lessor not commit to making all cost-effective energy efficiency and conservation improvements, or agree to the benchmarking and disclosure requirements under the lease, then it is technically ineligible for a succeeding or superseding lease. The Leasing Specialist should incorporate agreed-upon cost-effective improvements in the final awarded lease contract.

12. Negotiations and Fair and Reasonable Determination

a. Negotiation Objectives

The LCO must establish an initial negotiation position on behalf of the Government (i.e., negotiation objectives) before engaging the lessor in negotiations. The LCO’s determination of a fair and reasonable price should align with these price objectives.

The Leasing Alert entitled “Bullseye Program, Negotiation Objectives, and GLS Commission Management” issued a standardized negotiation objectives template that is required to be used for all projects regardless of size or procurement type (except for AAAP leases, disaster leases, On-Airport, and Small (3626) leases) to ensure national consistency in developing negotiation objectives. LCOs should use this template or any subsequently issued version as mandated by the Office of Leasing.

b. Conducting Negotiations

The following points are valuable to remember in conducting negotiations with the current lessor and making a determination of fair and reasonable pricing.

- Even in a sole-source negotiation for a succeeding or superseding lease, the Government retains significant leverage. Keep in mind that the lessor has several incentives to negotiate productively. The lessor will face a significant loss in cash flow if the Government relocates, in terms of lost rent and the need to spend money to attract another tenant.

- It may be useful to remind the lessor that the Government can decide to stop sole-source negotiations and follow a full and open competition if the LCO cannot reach a satisfactory agreement with the lessor. Make this point especially if the lessor is attempting to
negotiate above-market rates or seeking other concessions from the Government in the terms of the lease.

- Do not award a “bad” lease—one that obligates the Government to pay above-market rent or accede to other detrimental contract terms—for expediency or administrative convenience. The short-term advantages are rarely worth the long-term costs.

- Remember to use the research and information tools available to you—such as REIS, Bullseye, CoStar, and other resources (e.g., prior tax receipts)—to strengthen your negotiating position and formulate a confident assessment of fair and reasonable rental terms.

- If TI is shown as a separate rental component, obtain an IGE to confirm that the TI component is fair and reasonable. This is especially important in a turnkey lease in sole-source procurement, since there is no competition against which to compare the TI amount or its amortization rate.

- If minimal or no improvements are required, confirm whether the lessor’s asking rent includes a TI allowance or work letter contribution and address this in your efforts to obtain a lower rental rate.

- Remind the lessor that the Government will not pay TI or BSAC rent until the work is completed.

Ultimately, the rental rate for succeeding and superseding leases must be determined by the LCO to be fair and reasonable before an award can be made.

### 13. Final Certification of Funds

As with a new or replacing lease, the Leasing Specialist must request certification of Budget Activity 53 funds from the authorized budget official for a succeeding or superseding lease. The certification must cover the square footage, effective date, and total annual rent consistent with the lease document. When funds are certified, the Budget Office will provide the Leasing Specialist with an approved final certification of funding document, often referred to as a “BA 53 Fund Cert.” The LCO must obtain the final funds certification before awarding the lease.

### 14. Posting of Redacted Justifications on SAM.gov

Once a succeeding or superseding lease has been awarded, a redacted version of the approved Justification must be posted on SAM.gov within 14 days after lease award. Attachment 3 to this chapter shows the information elements that are exempt from disclosure under the Freedom of Information Act (FOIA) and should be redacted from the Justification before posting. Note that this posting requirement does not apply to actions at or below the Simplified Lease Acquisition Threshold (SLAT). SLAT leases do not require a formal Justification for Other Than Full and Open Competition - documentation to explain the lack of competition is sufficient.
Before posting, LCOs, in consultation with the Regional Counsel’s Office, must screen the Justification to remove all contractor proprietary data, references, and citations as necessary to protect the proprietary data in accordance with FOIA. LCOs must be guided by the exemptions to disclosure of information contained in FOIA (5 U.S.C. § 552) and the prohibitions against disclosure in determining whether other data should be removed.

15. Space Acceptance and Rent Commencement

a. Space Acceptance and Rent Commencement Process

While the space acceptance and rent commencement process for succeeding and superseding leases is similar to the process for new/new-replacing leases outlined under Leasing Desk Guide Chapter 2 (New or Replacing Lease), there are some nuances. As an example, under both succeeding and superseding leases, the Government is already “occupying” the premises and there may be minimal or no improvements required. In addition, there may not be a need or reason to confirm the space measurement.

The LCO must document acceptance of the space even when occupancy is uninterrupted and no alterations were performed. The method of documenting acceptance is at the discretion of the LCO and could range from a note to file to the use of a Form 1204. In instances where there are no or minimal space improvements (e.g., paint and carpet), agency and lessor concurrence is not required. Agency and lessor concurrence is required, however, when substantive tenant improvements are being performed as part of the succeeding or superseding lease.

Unless the lease contract has already pre-established the Lease Term Commencement Date (not recommended except where no improvements are involved), the Leasing Specialist must prepare a Lease Amendment, for signature by the lessor and the LCO, establishing the Lease Term Commencement Date.

b. Imminent Lease Expiration

There may be circumstances where the current lease expiration date is imminent and the work required under the succeeding lease will not be completed prior to lease expiration. In this scenario, the LCO has two options:

Option 1: Delay the start of new lease term and rent commencement until the work is completed; obtain an interim lease extension.
CHAPTER 5: Succeeding Lease, Superseding Lease

15. Space Acceptance and Rent Commencement

Under this option, the LCO obtains a lease extension to cover the time period until the lessor completes the improvements required under the succeeding lease. The lease term and rent will commence once the LCO has confirmed inspection and acceptance of the improvements. This option provides lower risk to the Government with respect to ensuring contract performance.

Option 2: Commence the start of new lease term and rent commencement upon expiration of the current lease.

Under this option, the LCO establishes the lease term and rent commencement date as the day after current lease expiration, noting that there is outstanding work to be performed by the lessor. While this option provides a higher level of risk to the Government with respect to contract performance, it has the benefit of avoiding the need for a lease extension, which is undesirable to the market. Note that the Government should not commence the payment of any TI or BSAC rent for work which has not been completed, inspected and accepted. When the TI/BSAC work is completed, the Government may elect to (1) keep the original amortization period and activate the TI and/or BSAC rents retroactively back to day one of the lease, or (2) re-amortize the TI and/or BSAC over the remaining firm term of the lease. In the event the full TI or BSAC allowances as stated in the lease are not used, the TI and/or BSAC rent must be adjusted accordingly (de-amortized). Unused TI or BSAC may not be converted into free rent in lieu of de-amortization, nor may it be “banked” for future use.

In deciding between these two options, the LCO must assess the associated benefits and risks in order to determine which option is in the best interest of the Government. Some of the questions to consider are as follows:

- **Rental rates:** Will the succeeding lease rent be higher than the rent for the extension, and, if so, how much higher? Will commencing a higher rent now remove the lessor’s incentive to negotiate TI costs or complete the build-out in a timely manner?
- **Existing lease language:** Does the current lease contain outdated performance specifications? Will starting the new lease relieve the situation and allow for the alterations to proceed smoothly?
- **Lessor willingness to enter into an extension:** Will delay of lease commencement result in a lease holdover?
- **Schedule:** What is the estimated construction time for the improvements?
- **Extent and nature of improvements required:** What is the level of complexity involved? Does work involve building systems or merely cosmetic upgrades? Does work involve correction of health or safety deficiencies (e.g., seismic or fire protection) or accessibility upgrades?
- **Allocation of costs:** Are the improvements required as part of the building shell or being funded out of the agency’s tenant improvements? As stated previously, the Government should not commence the payment of TI rent for work which has not been completed, inspected and accepted.
- **Risk associated with non-compliance:** Does the lessor have a reliable history with respect to past performance and in meeting prior contract deadlines? What are the ramifications if lessor fails to perform? What remedies are available to the Government?
- **Past project history:** Were there project delays? If so, to what extent did the Government contribute to the delay, adversely affecting the schedule?

Continuing Occupancies Awarded Through a Competitive Procurement

The requirements outlined under this part of the chapter also apply to new/replacing leases awarded at the incumbent’s location. LCOs must document their risk-based decision whether to commence the shell and operating rent at the current location prior to completion of TI/BSAC improvements.
- lessor financing: Is the lessor financing the property? How will an extension impact lessor’s ability to secure financing?

The LCO must document any decision to commence the succeeding lease prior to the completion of work and place in the lease file. The lease must provide a clear time frame for completion of work and the LCO must monitor contractor performance to confirm that all required work is completed in accordance with the schedule in the lease. In the event of lessor non-compliance, the LCO must seek lease enforcement remedies available under the lease. If applicable, a new Lease Amendment commencing the payment of TI rental payments must be prepared and executed.

## 16. Final Tips

Leasing Specialists and support contractors must include the most recent lease contract paragraphs in all succeeding and superseding leases unless they are waived or determined to be not applicable according to the contract terms.

Succeeding and superseding leases must also comply with all budget scorekeeping rules and prospectus requirements for succeeding and superseding lease actions. These scoring requirements are addressed in more detail in Chapter 11, Prospectus-Level Leases, and Appendix F, Determination of Operating or Capital Lease Classification for Budget Scoring.

If the customer has requirements and plans to use a Reimbursable Work Authorization (RWA) to fund alterations, the Leasing Specialist must follow the procedures detailed in Chapter 2 and other applicable RWA policies, including the RWA National Policy Document.

Because of the sole-source nature of a succeeding/superseding procurement and the lack of competition, be certain to verify that the overall costs of continued occupancy in the space are fair and reasonable.
NOTE: THIS TEMPLATE REFLECTS WORDING AND CITATIONS FOR SUCCEEDING LEASE ACTIONS WHERE POTENTIALLY ACCEPTABLE LOCATIONS HAVE BEEN IDENTIFIED, REQUIRING THE COMPLETION OF A COST BENEFIT ANALYSIS (CBA). SUCCEEDING LEASE JUSTIFICATIONS BASED ON MISSION OR LACK OF ALTERNATIVE ACCEPTABLE LOCATIONS MUST USE DIFFERENT WORDING, AS APPLICABLE FOR THE CIRCUMSTANCES.

JUSTIFICATIONS FOR OTHER TYPES OF ACTIONS (SUPERSEeding LEASES, EXTENSIONS, EXPANSIONS, UNEVALUATED RENEWAL OPTIONS) MUST USE THE SAME HEADINGS, BUT WITH DIFFERENT WORDING AND CITATIONS, AS APPLICABLE.

U.S. General Services Administration
GSA Region [ ]
[Name of Service Center/Division]

JUSTIFICATION FOR OTHER THAN FULL AND OPEN COMPETITION

PROJECT NUMBER: [Rexus Project Number]

Agency Name: [Agency]

1. **NATURE AND/OR DESCRIPTION OF ACTION BEING APPROVED.**

The General Services Administration currently leases [amount of space] ABOA/[amount of space] rentable square feet (RSF) of office space at [street address, city, state] under lease number GS-[ ] for the [Agency]. The current lease expires [date]. Approval is requested to negotiate a succeeding lease with the incumbent Lessor without full and open competition for continued occupancy at this leased location. The procedures for pursuing a succeeding lease are detailed in GSAR 570.402: Succeeding Leases.

2. **DESCRIPTION OF THE SUPPLIES OR SERVICES REQUIRED TO MEET THE AGENCY’S NEEDS (INCLUDING ESTIMATED VALUE).**

[Agency] submitted a continuing need letter on [date] for [amount of space] rentable square feet of office and related space. To satisfy the [agency] mission requirements, the facility must be within a walkable distance of the [complete sentence, as appropriate].

**ACTION REQUIRED: INCLUDE THIS FOR SUCCEEDING LEASES INVOLVING PROSPECTUS-LEVEL PROJECTS. OTHERWISE, DELETE.**

Prospectus Number [prospectus number] was submitted to the Office of Management and Budget (OMB) on [date submitted to OMB], was approved by the House Committee on Transportation and Infrastructure on [date approved by House committee], and the Senate Committee on Environment and Public Works on [date approved by Senate committee]. The prospectus provides approval of up to [maximum lease term years approved by prospectus] years and up to [maximum RSF approved by prospectus] RSF with a rent rate of $[maximum rental rate approved by
prospectus)/RSF. While the approved rent rate is $[maximum rental rate approved by prospectus]/RSF, we anticipate negotiating the rental rate below the approved prospectus rent rate.

This requirement is for [amount of space] ABOA/[amount of space] RSF of space for a [years of agency lease term requirement]-year term to commence on [date]. The estimated cost of this lease is [dollar amount based on information quotes received in response to advertisement] per rentable square feet per year for an annual cost of [dollar amount based on information quotes received in response to advertisement] and a total contract value of [dollar figure based on information quotes received in response to advertisement]. The delineated area is [identify specific delineated area]. ACTION REQUIRED: INCLUDE THIS SENTENCE FOR SUCCEEDING LEASES REQUIRING CENTRAL OFFICE REVIEW AND APPROVAL. OTHERWISE, RECOMMENDED BUT OPTIONAL.

THE GSAR CITATION [570.402] ONLY APPLIES FOR SUCCEEDING LEASE JUSTIFICATIONS. IF THIS IS NOT A SUCCEEDING LEASE ACTION, REVISE GSAR CITATION AS FOLLOWS:

- RENEWAL: 570.401
- SUPERSEDING: 570.402 AND 570.404
- EXTENSION, 570.405

3. IDENTIFICATION OF STATUTORY AUTHORITY PERMITTING OTHER THAN FULL AND OPEN COMPETITION.

41 U.S.C. 3304(a)(1): Only one responsible source and no other supplies or services will satisfy agency requirements. This statutory authority is implemented through GSAR 570.402. In accordance with GSAR 570.402, use of the sole source authority is appropriate where it is determined that award to any other offeror would result in substantial duplication of costs to the Government that are not expected to be recovered through competition.

4. DEMONSTRATION THAT THE PROPOSED CONTRACTOR’S UNIQUE QUALIFICATIONS OR NATURE OF THE ACQUISITION REQUIRES THE USE OF THE AUTHORITY CITED.

It is in the best interest of the Government to remain at the current location. Award to other than the current Lessor would require relocation of the entire requirement and would cause [Agency Name] to incur move and replication costs that would not be recovered through competition. Relocation costs are estimated to be $XX. Additionally, this allows the Government to make use of existing tenant improvements, avoiding replication costs of $XX. [Provide a brief summary of any special use space such as Heating, Ventilation, and Air Conditioning (HVAC) enhanced conference rooms with video teleconferencing capabilities or note the FSL level of special security requirements, etc., that would all have to be replicated if they were to move.] A cost-benefit analysis was completed following the procedures set forth in GSAR 570.402-6. The cost of relocating [Agency Name] using the low cost quote exceeds the cost of remaining at [current PBS leased location]. The total savings to the Government is [dollar amount].

[REVISE TEXT IF NO ACCEPTABLE ALTERNATIVES WERE IDENTIFIED OR IF THE CLIENT AGENCY HAS A MISSION-BASED REASON FOR SOLE SOURCE PROCUREMENT. A COST-BENEFIT ANALYSIS IS NOT REQUIRED UNDER THESE CIRCUMSTANCES. REVISE GSAR REFERENCE ABOVE TO 570.402-4, WHICH ADDRESSES SITUATIONS WHERE NO POTENTIAL ACCEPTABLE LOCATIONS WERE FOUND.]

5. DESCRIPTION OF EFFORTS MADE TO ENSURE THAT OFFERS ARE SOLICITED FROM AS MANY POTENTIAL SOURCES AS IS PRACTICABLE.

Per the requirements of GSAR 570.402, the GSA Lease Contracting Officer placed an advertisement on the Contracting Opportunities domain of SAM.gov on [date of advertisement] for [x] days. In addition, [national broker contractor name or PBS] conducted market research
using [describe the methods used to identify potential locations, e.g., CoStar, brokers were contacted by phone, etc.].

6. **DEMONSTRATION BY THE CONTRACTING OFFICER THAT THE ANTICIPATED COST TO THE GOVERNMENT WILL BE FAIR AND REASONABLE.**

Recent market surveys conducted by [national broker contractor name or PBS] in [city], [state] showed the rental rate within the delineated area ranges from [identify rental rate ranges quoted during market survey] per RSF. [Identify source of market data, e.g. REIS]

Therefore, the proposed rental rates for this succeeding lease of [dollar figure]/RSF, are within the current market range for this submarket and are deemed fair and reasonable by the GSA Lease Contracting Officer.

7. **DESCRIPTION OF MARKET RESEARCH CONDUCTED AND THE RESULTS.**

GSAR 570.402-5 allows for negotiation with the incumbent Lessor when a cost-benefit analysis shows that the Government cannot expect to recover relocation and duplication costs through competition.

DELETE THE PARAGRAPH ABOVE AND REVISE TEXT BELOW IF NO ACCEPTABLE ALTERNATIVES WERE IDENTIFIED OR IF THE CLIENT AGENCY HAS A MISSION-BASED REASON FOR SOLE SOURCE PROCUREMENT. A COST-BENEFIT ANALYSIS IS NOT REQUIRED UNDER THESE CIRCUMSTANCES.

On [date of market research], [national broker contractor name or PBS] conducted market research using [describe the methods used to identify potential locations, e.g., CoStar] and identified [number] potentially acceptable locations ([number] plus the incumbent) that might meet the agency’s needs within the delineated area. [Provide a brief summary of the potentially acceptable locations and their ability to meet the Government’s requirements.] In addition, PBS posted an advertisement conforming to GSAR 570.402-2 on the Contract Opportunities domain of SAM.gov website on [date advertisement was posted]. The incumbent Lessor’s expression of interest indicated that the rate would be [dollar amount] per RSF. The interested party that provided the lowest cost quoted a rate of [dollar amount] per RSF in its expression of interest.

See Figure 1 below for the results of the market research and SAM.gov advertisement, including the incumbent.

8. **OTHER FACTS SUPPORTING USE OF OTHER THAN FULL AND OPEN COMPETITION.**
[Consider describing past performance of current Lessor or tenant satisfaction survey results (for example, noting that the most recent property inspection showed the space to be well maintained and in good condition.])

9. **LIST OF SOURCES, IF ANY, THAT EXPRESSED, IN WRITING, AN INTEREST IN THE ACQUISITION.**

10. **STATEMENT OF ACTIONS, IF ANY, THE AGENCY MAY TAKE TO REMOVE OR OVERCOME ANY BARRIERS TO COMPETITION BEFORE ANY SUBSEQUENT ACQUISITION.**

In advance of an existing lease contract’s expiration, considerations will be given to allow for sufficient time to conduct a full and open procurement. The Government will consider the time and cost of moving from the existing location, and the time and cost to build out new space when deciding whether it is economically advantageous to stay at the existing building or undergo a competitive action.

Additionally, consideration will be given to the customer agency’s mission and security requirements (if applicable) to include limiting any agency space requirements that may be deemed unduly restrictive and thus favor the incumbent. The Government will remain conscious of the effort to continuously encourage competition when practicable.

11. **CONTRACTING OFFICER CERTIFICATION.**

By signature on this Justification for Other than Full and Open Competition, the GSA Lease Contracting Officer certifies that the award of a succeeding lease of [amount of space] RSF is in the Government’s best interest and that this Justification is accurate and complete to the best of the GSA Lease Contracting Officer’s knowledge and belief.

___________________________________________________ Date_____________________
[Name], Lease Contracting Officer

12. **PREPARER’S TECHNICAL CERTIFICATION.**

I certify that the supporting data used to form the basis of this Justification is complete and accurate to the best of my knowledge and belief.

___________________________________________________ Date_____________________
[Name], Leasing Specialist

See FAR 6.304 for appropriate signature threshold levels.

If Senior Procurement Executive (SPE) approval is required, must include signatures from Regional Contracting [Leasing] Director, Regional
Counsel, and Head of Contracting Activity (HCA). Use of a separate signature page is required.

Note that the threshold for SPE approval is based on aggregate contract value; therefore, it is possible that SPE approval may be required for actions below the prospectus threshold.
CHAPTER 5: Succeeding Lease, Superseding Lease

Attachment 2: Prospectus Level Justification for Other Than Full and Open Competition Office of Leasing Review/Submittal Guidance

Attachment 2: Prospectus Level Justification for Other Than Full and Open Competition Office of Leasing Review/Submittal Guidance

Justification for Other Than Full and Open Competition
Office of Leasing Review/Submittal Guidance

All Justification for Other Than Full and Open Competition requiring signature by the GSA Senior Procurement Executive (SPE) or those involving a prospectus level action, including use of interim leasing authority, must be reviewed by the Office of Leasing (OL). All submissions for the Office of Leasing (OL) review must be submitted timely (Lease Extension - 6 months prior to lease expiration, and Renewal and Succeeding Leases - 18 months prior to lease expiration) in order to provide enough time to fully evaluate the requested Justification for Other Than Full and Open Competition action.

Justification for Other Than Full and Open Competition (Justification) Reviews for when Senior Procurement Executive (SPE) signature is required [Projects $75M or over in total aggregate rent]: (per FAR 8.304 – threshold is subject to change).

1. Major Roles and Responsibilities: (Responsibilities addressed throughout)
   a. Office of Leasing (OL) Justification Program Manager (JPM) - The Office of Leasing Justification Program Manager is responsible to perform a due diligence review of a region’s Draft Justification for Other Than Full and Open Competition and Decision Paper submissions including supporting documentation and coordinate any revisions with the region, Senior Leadership, Office of the General Council (OGC), and Office of Government-wide Policy (OGP).
   b. Lease Acquisition Officer (LAO) - The LAO coordinates regional processes regarding Justification submissions to the Justification PM. They timely and simultaneously notify the assigned Zone Manager and the Justification PM of any impending prospectus level Justification and notify the Justification PM of impending Justifications over $75 million. The LAO coordinates review responses, provides additional information when requested, and works with Regional Control Document Tracker (CDT) personnel for CDT submission (See CDT process addressed below).
   c. Leasing Contracting Officer (LCO) - The LCO is the main contact for revisions to the Decision Paper and Justification. He or she is responsible for the submission of additional information requested by the Justification PM, CDT, General Counsel or the Senior Procurement Executive (SPE).
   d. Zone Managers - Zone Managers must include the Justification PM upfront in any prospectus-centered conversation concerning an impending or DRAFT Justification and submit all prospectus-related project information to the Justification mailbox at JOTFOC@GSA.GOV.

2. Justification $75M+ Document Submission Process -
   The LAO contacts the OL Justification Program Manager when a draft Prospectus level Justification is being developed. The LAO forwards the draft Justification using the Leasing Justification Template - Succeeding Lease (Exhibit A) to the Justification PM and JOTFOC@GSA.GOV. The Justification PM:
   a. Creates a project folder labeled as follows: Project number, Agency, Location, and Action Type. (ex. XNMXXX - Agency - Santa Fe - Succeeding),

1
b. Downloads the Draft Justification and

c. Notifies the LAO concerning all required documents for submission.

Submission documents are uploaded by the Justification PM into a prescribed regional
Submission Folder located within the National Office - Justification (JOTFOC) review
and Approval Folder. Those documents consist of the Justification, the Decision
Paper (defined below), and supporting documents and exhibits in WORD, EXCEL,
and/or PDF format.

IMPORTANT NOTES:

- The Decision Paper, draft Justification, and separate signature page must be
  forwarded in WORD format.
- The regional LAO’s will only have access to their regional folder.
- The mailbox notification must include the name(s) of regional personnel requiring
  access to the Project Folder and their requested security level access rights (EDIT,
  COMMENT, or VIEW). The Justification PM provides access to the project folder
  only to those individuals listed.
- If a GSA Broker is responsible for a project, their document revisions are to be
  submitted to the LCO. The LCO will review and only the LCO or LAO will submit
  documents or document revisions directly to the Justification PM.
- The unsigned and undated Draft Justification must have a separate page for all
  required signatures. See Justification - Signature Page Template (Exhibit B).

Additionally, a Decision Paper is required to be submitted separately from the
Justification. The Decision Paper is a short project synopsis that provides background
and supporting information necessary for approval determination. A Decision Paper
Template is attached as Exhibit C.

For document control purposes, all revised documents and requested document
changes are submitted directly to the Justification PM and mailbox. Follow-up
correspondence and the final documents approved to move forward for Leadership
review must be sent to the mailbox upon notification from the Justification PM.

a. Justification Package

i. Draft Justification - The Justification must specify the project is Mission or Cost
  Related.
  1. All Prospectus Justifications must include a basic background explanation and
     the Prospectus Bullseye rate¹ (additional details will become part of the
     Decision Paper).
  2. Cost Related Justifications must include:
     a. Market Analysis Roll-up
        i. Market Rate and range
     b. Advertisement Results
     c. Cost Benefit Analysis Summary²

¹ Not all markets will have Bullseye rates. In markets without Bullseye rates, there must be a Market
   Analysis to demonstrate fair and reasonableness of the estimated rental rate requested.
² If the Justification is based on the cost benefit analysis, a summary of the cost benefit analysis must be
   included in the body of the Justification and the full Cost Benefit Analysis must be attached as an exhibit
to the Decision Paper.
d. Move and Replication Cost Documentation in accordance with the Prospectus Package.

3. Separate, unsigned signature page using template - Justification - Signature Page (Exhibit B) only.

ii. Justification Package includes the Justification and a separate Decision Paper

b. Decision Paper - The Decision Paper provides a background narrative, project history and supporting documentation and Exhibits including but not limited to:

i. Delineated Area Map with accompanying agency justification

ii. Move and Replication Cost Estimate and Report

iii. Succeeding Lease Analysis Tool Findings or Cost Benefit Analysis (Typically this will be the formal CBA in the Lease Analysis Tool)

iv. Market Research and Analysis supporting information

v. Prospectus Buileye Report

vi. Acquisition Plan

vii. Milestone Schedule

viii. Prospectus -

1. GSA approved OMB submission

2. House Committee on Transportation and Infrastructure Approval

3. Senate Committee on Environment and Public Works Approval

ix. Advertisement using Procurement Summary Template

x. Other necessary information requested by the Justification PM to support the Justification.

Submission Details:

- PBS can pursue acquisition activities upon transmission to House and Senate subcommittees, but award requires that signed resolutions are received by PBS.
- If exhibits are attached to the Justification, they are included when posting the Award Synopsis of the Justification.
- Prior to posting the Award Synopsis, the region should contact Regional Counsel’s Office with a proposed redacted version for review.

3. Office of Leasing (OL) Review Process:

a. The Region’s draft Justification, Decision Paper and supporting documentation is reviewed within 10 business days of the initial full package submission to the Justification mailbox. Any questions, comments, concerns, revisions and clarification requests are returned to the region with a similar 10 business day response turn-around.

b. Once all elements of the OL review are complete and all requested clarifications addressed, the Justification PM notifies the region to finalize the Justification and circulate within the region for required signatures including the Regional Commissioner.

c. Once Regional signatures are obtained, the region forwards their Final Justification Package (the Justification in WORD, the Decision Paper in WORD and the Signature Page [pdf]) to the OL Justification Program Manager, and the Office of Leasing Justification Mailbox - JOTFOC@GSA.GOV. The Justification PM creates a separate Controlled Document Tracker (CDT) folder, forwards the Justification package to the Office of Leasing Assistant Commissioner for signature and reroutes the signature page.
and CDT submission folder back to the LAO for submission to CDT by the Regional CDT POC. The Justification PM provides CDT routing instructions in the notification to the LAO. The submission documents are sent to CDT individually and not as a Google folder package. The documents in the package attached to the CDT folder are the only documents to be uploaded in CDT.

d. The Regional CDT POC sends the CDT submission folder which includes the final Justification, Justification signature page, the Decision Paper and supporting documents to executive-secretariat@gsa.gov and copies the Justification mailbox - JOTFPCC@GSACG. The Executive Secretariat creates the CDT record, uploads the documents into CDT and routes the control for concurrence through the Central Office Approval Chain.

e. Once the PBS Commissioner concurs on the package, CDT notifies the Justification PM that the document is ready for Senior Procurement Executive (SPE) approval.

4. Required National Office Signatures on Justification Signature Page (See Exhibit B)
   - Concurrency
     - Assistant Commissioner for Leasing
     - PBS Commissioner
   - Approval
     - National Competition Advocate, Senior Procurement Executive

5. Controlled Document Tracker (CDT)
   a. The following reflects the CDT approval chain the region should use when sending the e-mail to the Executive Secretariat:
      - Public Buildings Service Deputy Commissioner*
      - Office of General Counsel*
      - Supervisory Procurement Analyst*
      - Office of the Senior Procurement Executive*
      - Subject Matter Expert reviewers [Not Approver] in the Justification Program Manager or designee and LAO and their names must be provided in the email to the Executive Secretariat.

* CDT Justification Submission Approvers

b. If any reviewer in the approval chain requires document revisions, the Office of Leasing notifies the Region. The Region must submit all revised documents to the Justification Mailbox and Justification PM for review. Once all changes are approved, the Regional CDT POC can then upload the revised document or package into CDT and send an email via Chatter to notify the Executive Secretariat to continue the review cycle. As part of their submission, the Regional CDT POC copies the Justification PM and LAO.

6. SPE Submission and Approval
   a. Once all approvals and signatures have been obtained in CDT but prior to the package going to the Senior Procurement Executive (SPE) via CDT, the Office of Leasing sends the CDT Justification package to the Senior Procurement Executive (SPE) for review and copies the Senior Policy Advisor, GSA Acquisition Policy Division.

b. The SPE issues notice of the fully approved Justification with the Regional Commissioner, the OL Justification Program Manager, Regional Leasing Director and LAO for project movement and file retention.
7. **CDT Closeout** - After Justification approval, the Justification PM sends a copy of the final signature page along with a note to CDT in order to close out the control.
CHAPTER 5: Succeeding Lease, Superseding Lease

Attachment 2: Prospectus Level Justification for Other Than Full and Open Competition Office of Leasing Review/Submittal Guidance

Justification Review for Prospectus Level when SPE signature is NOT required
[Projects under $75M in total aggregate rent]

1. Major Roles and Responsibilities:
   a. Office of Leasing (OL) Justification Program Manager (JPM) - The Office of Leasing Justification Program Manager is responsible to perform a due diligence review of a region’s Draft Justification for Other Than Full and Open Competition and Project Synopsis (Exhibit D) submission including supporting documentation and coordinate any revisions with the region, Senior Leadership, and Office of the General Council (OGC) as necessary.
   b. Lease Acquisition Officer (LAO) - The LAO timely notifies the Justification PM of any impending prospectus level Justification under $75 million. They coordinate regional requirements regarding Justification submission to the Justification PM, review responses, provide additional information when requested, and work with Justification PM.
   c. Leasing Contracting Officer (LCO) - The LCO is the main contact for revisions to the Justification, the project synopsis and any additional information requested.

2. Justification Document Submission and Review Process Under $75 Million
   a. A Justification for Other Than Full and Open Competition at this level does NOT require a signature from the PBS Assistant Commissioner for Leasing.
   b. These Justifications are NOT required to be uploaded into CDT.
   c. The Lease Acquisition Officer (LAO) notifies the Justification PM concerning pending Justifications. (See notification instructions above - Section 2: Justification Document Submission Process)
   d. Typical Procurement Actions At This Level:
      i. Extensions: The LAO submits to the Justification PM the Draft Justification and a written Project Synopsis of the long term project which includes the status of the long term project and why a short term solution is warranted.
      ii. All Other Actions: The LAO provides the Justification PM with the following documents:
         - Draft Justification
         - Project Synopsis
         - Delineated Area Map with accompanying agency justification
         - Move and Replication Cost Estimate and Report
         - Market Research and Analysis supporting information
         - Bullseye Report
         - Acquisition Plan
         - Milestone Schedule
         - Succeeding Lease Analysis Tool Findings
         - Prospectus - either OMB approved or copy of document submitted to Congress
         - Advertisement using Procurement Summary Template
         - Other necessary information requested by the Justification PM to support the Justification.
   e. The Office of Leasing works with the regions concerning clarifications or enhancements as necessary.
f. Occasionally, it may be necessary to share the Justification with the Assistant Commissioner of Leasing and/or the Office of the PBS Assistant Commissioner.

g. Once the Office of Leasing has completed its due diligence review, the Office of Leasing notifies the region to move forward obtaining regional signatures on the Final Justification.
Exhibit A
Leasing Justification Template - Succeeding Lease

Sample Justification for Other Than Full and Open Competition, Succeeding Lease

NOTE: THIS TEMPLATE REFLECTS WORDING AND CITATIONS FOR SUCCEEDING LEASE ACTIONS WHERE POTENTIALLY ACCEPTABLE LOCATIONS HAVE BEEN IDENTIFIED, REQUIRING THE COMPLETION OF A COST BENEFIT ANALYSIS (CBA). SUCCEEDING LEASE JUSTIFICATIONS BASED ON MISSION OR LACK OF ALTERNATIVE ACCEPTABLE LOCATIONS MUST USE DIFFERENT WORDING, AS APPLICABLE FOR THE CIRCUMSTANCES. JUSTIFICATIONS FOR OTHER TYPES OF ACTIONS (SUPERSEDING LEASES, EXTENSIONS, EXPANSIONS, UNEVALUATED RENEWAL OPTIONS) MUST USE THE SAME HEADINGS, BUT WITH DIFFERENT WORDING AND CITATIONS, AS APPLICABLE.

U.S. General Services Administration
GSA Region [ ]
[Name of Service Center/Division]

JUSTIFICATION FOR OTHER THAN FULL AND OPEN COMPETITION

PROJECT NUMBER: [Nexus Project Number]
Agency Name: [Agency]

1. NATURE AND/OR DESCRIPTION OF ACTION BEING APPROVED.

The General Services Administration currently leases [amount of space] ABOA/[amount of space] rentable square feet ([RSF]) of office space at [street address, city, state] under lease number [GSL-] for the [Agency]. The current lease expires [date]. Approval is requested to negotiate a succeeding lease with the incumbent Lessor without full and open competition for continued occupancy at this leased location. The procedures for pursuing a succeeding lease are detailed in GSA R 570.402: Succeeding Leases.

2. DESCRIPTION OF THE SUPPLIES OR SERVICES REQUIRED TO MEET THE AGENCY'S NEEDS (INCLUDING ESTIMATED VALUE).

[Agency] submitted a continuing need letter on [date] for [amount of space] rentable square feet of office and related space. To satisfy the [agency] mission requirements, the facility must be within a walkable distance of the [complete sentence, as appropriate].

ACTION REQUIRED: INCLUDE THIS FOR SUCCEEDING LEASES INVOLVING PROSPECTUS-LEVEL PROJECTS. OTHERWISE, DELETE.

Prospectus Number [prospectus number] was submitted to the Office of Management and Budget (OMB) on [date submitted to OMB], was approved by the House Committee on Transportation and Infrastructure on [date approved by House committee], and the Senate Committee on Environment and Public Works on [date approved by Senate committee]. The prospectus provides approval of up to [maximum lease term].
years approved by prospectus. Years and up to [maximum RSF approved by prospectus], RSF with a rent rate of [maximum rental rate approved by prospectus]/RSF. While the approved rent rate is [maximum rental rate approved by prospectus]/RSF, we anticipate negotiating the rental rate below the approved prospectus rent rate.

This requirement is for [amount of space] ABOA/ [amount of space] RSF of space for a [year of agency lease term requirement] - year term to commence on [date]. The estimated cost of this lease is [dollar amount based on information quotes received in response to advertisement] per renter square foot per year for an annual cost of [dollar amount based on information quotes received in response to advertisement] and a total contract value of [dollars amount based on information quotes received in response to advertisement]. The delineated area is [identify specific delineated area]. ACTION REQUIRED: INCLUDE THIS SENTENCE FOR SUCCEEDING LEASES REQUIRING CENTRAL OFFICE REVIEW AND APPROVAL. OTHERWISE, RECOMMENDED BUT OPTIONAL. There is no vacant Federal Space available.

THE GSA CITATION [570.402] ONLY APPLIES FOR SUCCEEDING LEASE JUSTIFICATIONS. IF THIS IS NOT A SUCCEEDING LEASE ACTION, REVISE GSA CITATION AS FOLLOWS:

- RENEWAL: 570.401
- SUPERSEDING: 570.402 AND 570.404
- EXTENSION, 570.405

3. IDENTIFICATION OF STATUTORY AUTHORITY PERMITTING OTHER THAN FULL AND OPEN COMPETITION.

41 U.S.C. 3304(a)(1): Only one responsible source and no other supplies or services will satisfy agency requirements. This statutory authority is implemented through GSA R 570.402. In accordance with GSA R 570.402, use of the sole source authority is appropriate where it is determined that award to any other offeror would result in substantial duplication of costs to the Government that are not expected to be recovered through competition.

4. DEMONSTRATION THAT THE PROPOSED CONTRACTOR'S UNIQUE QUALIFICATIONS OR NATURE OF THE ACQUISITION REQUIRES THE USE OF THE AUTHORITY CITED.

It is in the best interest of the Government to remain at the current location. Award to other than the current Lessor would require relocation of the entire requirement and would cause [Agency Name] to incur move and replication costs that would not be recovered through competition. Relocation costs are estimated to be $XX. Additionally, this will allow the Government to: make use of existing tenant improvements, avoid replication costs of $XX; [Provide a brief summary of any special use space such as Heating, Ventilation, and Air Conditioning (HVAC) enhanced conference rooms with video teleconferencing capabilities or note the FSL level of special security requirements, etc. that would all have to be replicated if they were to move]. A cost-benefit analysis was completed following the procedures set forth in GSA R 570.402-6. The cost of relocating [Agency Name] using the low cost quote exceeds the cost of remaining at [current PBS leased location]. The total savings to the Government is [dollar amount].

[REVISE TEXT IF NO ACCEPTABLE ALTERNATIVES WERE IDENTIFIED OR IF THE CLIENT AGENCY HAS A MISSION-BASED REASON FOR SOLE SOURCE PROCUREMENT. A COST-BENEFIT ANALYSIS IS NOT REQUIRED UNDER THESE CIRCUMSTANCES. REVISE GSA REFERENCE ABOVE TO 570.402-4, WHICH ADDRESSES SITUATIONS WHERE NO POTENTIAL ACCEPTABLE LOCATIONS WERE FOUND.]

5. DESCRIPTION OF EFFORTS MADE TO ENSURE THAT OFFERS ARE SOLICITED FROM AS MANY POTENTIAL SOURCES AS IS PRACTICAL.

Per the requirements of GSA R 570.402, the GSA Lease Contracting Officer placed an advertisement on the Contracting Opportunities domain of SAM.gov on [date of advertisement] for [x] days. In addition,
6. **DEMONSTRATION BY THE CONTRACTING OFFICER THAT THE ANTICIPATED COST TO THE GOVERNMENT WILL BE FAIR AND REASONABLE.**

Recent market surveys conducted by [national broker contractor name or PBS] in [city], [state] showed the rental rate within the delineated area ranges from [identify rental rate ranges quoted during market survey] per RSF. [Identify source of market data, e.g., REIS]

Therefore, the proposed rental rates for this succeeding lease of [dollar figure]/RSF, are within the current market range for this submarket and are deemed fair and reasonable by the GSA Lease Contracting Officer.

7. **DESCRIPTION OF MARKET RESEARCH CONDUCTED AND THE RESULTS.**

GSAR 570.402-5 allows for negotiation with the incumbent Lessor when a cost-benefit analysis shows that the Government cannot expect to recover relocation and duplication costs through competition.

DELETE THE PARAGRAPH ABOVE AND REVISE TEXT BELOW IF NO ACCEPTABLE ALTERNATIVES WERE IDENTIFIED OR IF THE CLIENT AGENCY HAS A MISSION-BASED REASON FOR SOLE SOURCE PROCUREMENT. A COST-BENEFIT ANALYSIS IS NOT REQUIRED UNDER THESE CIRCUMSTANCES.

On [date of market research], [national broker contractor name or PBS] conducted market research using [describe the methods used to identify potential locations, e.g., CoStar] and identified [number] potentially acceptable locations (number plus the incumbent) that might meet the agency's needs within the delineated area. [Provide a brief summary of the potentially acceptable locations and their ability to meet the Government's requirements.] In addition, PBS posted an advertisement conforming to GSAR 570.402-2 on the Contract Opportunities domain of SAM.gov website on [date advertisement was posted]. The incumbent Lessor's expression of interest indicated that the rate would be [dollar amount] per RSF. The interested party that provided the lowest cost quoted a rate of [dollar amount] per RSF in its expression of interest.

See Figure 1 below for the results of the market research and SAM.gov advertisement, including the incumbent.

8. **OTHER FACTS SUPPORTING USE OF OTHER THAN FULL AND OPEN COMPETITION.**

[Consider describing past performance of current Lessor or tenant satisfaction survey results (for example, noting that the most recent property inspection showed the space to be well maintained and in good condition).]
9. **LIST OF SOURCES, IF ANY, THAT EXPRESSED, IN WRITING, AN INTEREST IN THE ACQUISITION.**

10. **STATEMENT OF ACTIONS, IF ANY, THE AGENCY MAY TAKE TO REMOVE OR OVERCOME ANY BARRIERS TO COMPETITION BEFORE ANY SUBSEQUENT ACQUISITION.**

In advance of an existing lease contract’s expiration, considerations will be given to allow for sufficient time to conduct a full and open procurement. The Government will consider the time and cost of moving from the existing location, and the time and cost to build out new space when deciding whether it is economically advantageous to stay at the existing building or undergo a competitive action.

Additionally, consideration will be given to the customer agency’s mission and security requirements (if applicable) to include limiting any agency space requirements that may be deemed unduly restrictive and thus favor the incumbent. The Government will remain conscious of the effort to continuously encourage competition when practicable.

11. **CONTRACTING OFFICER CERTIFICATION.**

By signature on this Justification for Other than Full and Open Competition, the GSA Lease Contracting Officer certifies that the award of a succeeding lease of [amount of space] RSF is in the Government’s best interest and that this Justification is accurate and complete to the best of the GSA Lease Contracting Officer’s knowledge and belief.

Attachment 3: Sample Redactions in Justification

U.S. General Services Administration

[Name of Service Center/Division]

JUSTIFICATION FOR OTHER THAN FULL AND OPEN COMPETITION

PROJECT NUMBER: [Rexus Project Number]

Agency Name: [Agency]

1. NATURE AND/OR DESCRIPTION OF ACTION BEING APPROVED.

The General Services Administration currently leases [amount of space] ABOA [amount of space] rentable square feet (RSF) of office space at [street address, city, state] under lease number GS-[ ] for the [Agency]. The current lease expires [date]. Approval is requested to negotiate a succeeding lease with the incumbent Lessor without full and open competition for continued occupancy at this leased location.

2. DESCRIPTION OF THE SUPPLIES OR SERVICES REQUIRED TO MEET THE AGENCY'S NEEDS (INCLUDING ESTIMATED VALUE).

[Agency] submitted a continuing need letter on [date] for [amount of space] rentable square feet of office and related space. To satisfy the [agency] mission requirements, the facility must be within a walkable distance of the [complete sentence, as appropriate].

This requirement is for [amount of space] ABOA [amount of space] RSF of space for a [years of agency lease term requirement]-year term to commence on [date]. The estimated annual cost of this lease is [dollar amount based on information quotes received in response to advertisement] BOMA rentable square feet per year for an annual cost of [dollar amount based on information quotes received in response to advertisement] and a total contract value of [dollar figure based on information quotes received in response to advertisement]. The delineated area is [identify specific delineated area].

3. IDENTIFICATION OF STATUTORY AUTHORITY PERMITTING OTHER THAN FULL AND OPEN COMPETITION.

41 U.S.C. 3304(a)(1): Only one responsible source and no other supplies or services will satisfy agency requirements.

4. DEMONSTRATION THAT THE PROPOSED CONTRACTOR'S UNIQUE QUALIFICATIONS OR NATURE OF THE ACQUISITION REQUIRES THE USE OF THE AUTHORITY CITED.

GSAM 570.402-5 allows for negotiation with the incumbent Lessor when a cost-benefit analysis shows that the Government cannot expect to recover relocation and duplication costs through competition. PBS placed an advertisement conforming to GSAM 570.402-2 on the Federal Business Opportunities Web site (fedbizops.gov) on [date advertisement was posted] and received [number of expressions of interest received] responses. The incumbent Lessor’s expression of interest indicated that the rate would be [dollar amount] RSF. The interested party that provided the lowest cost quoted a rate of [dollar amount] in its expression of interest.

Award to other than the current Lessor would require relocation of the entire requirement and would cause [Agency Name] to incur move and replication costs that would not be recovered through competition. [Provide a brief summary of any special use space such as a Sensitive Compartmented Information Facility (SCIF), Heating, Ventilation, and Air Conditioning (HVAC) enhanced conference
rooms with video teleconferencing capabilities, special security requirements, etc., that would all have to be replicated if they were to move.

[Insert Cost-Benefit Analysis]

The cost of relocating [Agency Name] using the low cost quote exceeds the cost of remaining at [current PBS leased location]. The savings to the Government is [dollar amount]. Based on this cost-benefit analysis, the Government cannot expect to recover relocation and duplication costs through competition. Therefore, the Government intends to negotiate a succeeding lease and remain at its current location.

5. DESCRIPTION OF EFFORTS MADE TO ENSURE THAT OFFERS ARE SOLICITED FROM AS MANY POTENTIAL SOURCES AS IS PRACTICABLE.

In [date of market survey], [national broker contractor company name or PBS] conducted a market survey and identified four potentially acceptable locations (three plus the incumbent) that might meet the agency’s needs within the delineated area. [Provide a brief summary of the potentially acceptable locations and their ability to meet the Government’s requirements.] In addition, an advertisement was placed in FedBizOpps on [date of advertisement]. PBS received only [number of expressions of interest received] responses, which are:

[in incumbent]

[other]

6. DEMONSTRATION BY THE CONTRACTING OFFICER THAT THE ANTICIPATED COST TO THE GOVERNMENT WILL BE FAIR AND REASONABLE.

In accordance with Federal Acquisition Regulation (FAR) 6.303-2(a) (7), the Contracting Officer determines by certifying this document that the anticipated cost to the Government of [dollar figure]/RSF for the entire requirement is fair and reasonable.

Recent market surveys conducted by [national broker contractor name or PBS] in [city], [state] showed the rental rate within the delineated area ranges from [identify rental rate ranges quoted during market survey] per RSF.

7. DESCRIPTION OF MARKET RESEARCH CONDUCTED AND THE RESULTS.

In [date of market survey], [national broker contractor name or PBS] conducted a market survey that identified the following four locations including the incumbent:

<table>
<thead>
<tr>
<th>Address</th>
<th>Asking Full Service Rental Rate</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Figure 1: Market Survey Comparables
8. OTHER FACTS SUPPORTING USE OF OTHER THAN FULL AND OPEN COMPETITION.

9. LIST OF SOURCES, IF ANY, THAT EXPRESSED, IN WRITING, AN INTEREST IN THE ACQUISITION.

10. STATEMENT OF ACTIONS, IF ANY, THE AGENCY MAY TAKE TO REMOVE OR OVERCOME ANY BARRIERS TO COMPETITION BEFORE ANY SUBSEQUENT ACQUISITION.

Consistent with the Competition in Contracting Act, full and open competition will be undertaken in future requirements for [agency name and location], as future opportunities are available.

11. CONTRACTING OFFICER CERTIFICATION.

By signature on this Justification for Other than Full and Open Competition, the Lease Contracting Officer certifies that the award of a succeeding lease of [amount of space] RSF is in the Government’s best interest and that this Justification is accurate and complete to the best of the Lease Contracting Officer’s knowledge and belief.

[Name], Lease Contracting Officer

Date

12. TECHNICAL REQUIREMENTS PERSONNEL CERTIFICATION

I certify that the supporting data used to form the basis of this Justification is complete and accurate to the best of my knowledge and belief.

[Name], Leasing Specialist

Date

See FAR 6.304 for appropriate signature threshold levels.
