Project Summary
The General Services Administration (GSA) proposes alterations to the Daniel Patrick Moynihan U.S. Courthouse at 500 Pearl Street, New York, NY, that will restore space for use by the Courts upon the vacation by the District judges. In support of the building-wide modernization project currently underway for the Thurgood Marshall Courthouse, New York, NY, it was necessary to relocate Probation and Pretrial Services from the Moynihan Courthouse to leased swing space to provide temporary chambers for the District judges from the Marshall Courthouse. When the District judges move back into the Marshall Courthouse in 2012, approximately 138,000 rentable square feet (rsf), will be vacant in the Moynihan Courthouse. In addition, GSA will address entrance security and screening.

Major Work Items
Demolition, interior alterations, security and entrance screening, HVAC, fire and life safety measures, and electrical replacement.

Project Budget
Design and Review ........................................................................................ $2,031,000
Estimated Construction Cost (ECC).............................................................. 22,000,000
Management and Inspection (M&I)............................................................... 3,969,000
Estimated Total Project Cost (ETPC)* ........................................................... $28,000,000

* Tenant agencies may fund an additional amount for alterations above the standard normally provided by the GSA.

Authorization Requested (Design, ECC and M&I) .............................................. $28,000,000

Funding Requested (ETPC) ............................................................................ $28,000,000

Building
The Moynihan Courthouse is a 27-story, 933,715 gross square foot building located at 500 Pearl Street in lower Manhattan. Upon its completion in 1994, it was the largest Federal courthouse in the nation. The building has 29 district judge courtrooms, 14 magistrate judge courtrooms, a special courtroom for mega trials and ceremonies, and 42 chambers. It offers state-of-the-art telecommunications, energy-efficient lighting, heating and air-conditioning.

Tenant Agencies
Judiciary and GSA

Proposed Project
Temporary judges' chambers were constructed and other spaces throughout the building were modified to accommodate the District judges and other Court-related agencies from the Marshall Courthouse. The original tenants, Probation and Pretrial Services, were temporarily relocated to leased space in the Woolworth Building at 233 Broadway, New York, NY. The proposed project includes the demolition, retrofit, and realignment of space in order to meet the Courts' current needs. In addition, due to revised space requirements for the Courts, three new additional District chambers will be constructed. Finally, GSA will address entrance security and screening.

Major Work Items
Demolition $1,371,000
Interior Alterations 7,932,000
Security/Enhanced Screening 5,511,000
HVAC 4,121,000
Electrical Replacement 1,865,000
Fire and Life Safety 1,200,000
Total ECC $22,000,000

Justification
The proposed alterations will allow for the recapture of approximately 138,000 rsf of vacated space in the Moynihan Courthouse after the District judges return to the Marshall Courthouse. Ongoing costs to the Government include additional rental expenses as long as Probation and Pretrial Services remain in their temporary leased space.
Summary of Energy Compliance
This project will integrate and implement sustainable design principles and energy efficiency effort as seamlessly as possible into all aspects of both the design and construction process. The goal is to obtain certification through the Leadership in Energy and Environmental Design (LEED) Green Building Rating System of the U.S. Green Building Council.

Alternatives Considered (30-year, present value cost analysis)
There are no feasible alternatives to this project.

Recommendation
ALTERATION
Certification of Need

The proposed project is the best solution to meet a validated Government need.
