Highlight Summary of the Annual Report of Real Property Leased by the United States throughout the World as of September 30, 2000

Statistics in Brief

UNITED STATES: Number of Leases is 54,522, Total Acres are 1,611,382.6, Number of Building Locations is 72,862, Building Floor Area is 313,176,153 square feet, and Annual Rent is $2,930,723,117

OUTLYING AREAS OF THE UNITED STATES: Number of Leases is 407, Total Acres are 17,795.0, Number of Building Locations is 920, Building Floor Area is 1,898,888 square feet, and Annual Rent is $15,169,800

FOREIGN COUNTRIES: Number of Leases is 10,143, Total Acres are 40,756.5, Number of Building Locations is 9,948, Building Floor Area is 31,686,290 square feet, and Annual Rent is $448,605,674

WORLDWIDE TOTAL: Number of Leases is 65,072, Total Acres are 1,669,934.1, Number of Building Locations is 83,730, Building Floor Area is 346,761,331 square feet, and Annual Rent is $3,394,498,591

Highlight Summary Notes:
This report's information represents the most recently submitted data from each federal agency. The number of installations, number of buildings, and building square footage are not included for military functions in foreign countries and outlying areas of the United States.
These agencies did not submit a FY 2000 inventory to the Worldwide Inventory; therefore, the agency's last data submission is being used. Please contact the person listed below for information on the agency's current real property holdings.

Introduction
Coverage
This Inventory Report on Real Property Leased to the United States Throughout the World summarizes detailed data in the annual inventory prepared by the U.S. General Services Administration pursuant to the authority of the Federal Property and Administrative Services Act of 1949 (63 Statute 377), as amended. The detailed inventory, which supports this summary report, covers all real property leased to the U.S. Government (including wholly owned Government corporations) throughout the world, as of September 30, 2000. It includes real property leased from private individuals, organizations, and municipal, county, state, territorial, and foreign governments, as evidenced by a written agreement involving a monetary consideration and a landlord-tenant relationship. This report also includes the right of use and occupancy of real property obtained under eminent domain or equivalent proceedings by the Federal Government. Real property leased rent free or for nominal rental is included when considered significant by the reporting agency. Inventory data are presented in three major geographical groupings: (1) United States; (2) outlying areas of the United States (e.g., Commonwealth of Puerto Rico, Virgin Islands); and (3) foreign countries.

Reporting Entity Coverage.
A reporting entity, for purposes of the detailed inventory, is a lease or combination of leases covering: (a) land; (b) buildings or portions thereof; (c) structures and facilities; or (d) combinations thereof. For each reporting entity, the detailed inventory shows its name and location (state or foreign country,
county, and city including street address where appropriate); predominant use and area of land; predominant use, number and floor area of leased building locations; effective and expiration dates of the lease; period of renewal option; coverage of structures or facilities in the lease, and the annual rental. Each report, submitted for this inventory, contains a separate usage classification for land, each building location, and each structure or facility. For purposes of the inventory, the predominant use of the land, building location, or structure as of September 30, 2000, determines its classification. Thus, land leased primarily for storage purposes is so classified, even though certain portions thereof are used for other purposes. Similarly, building space leased primarily for office purposes is so classified even though small areas have other uses.

Acreage
Acreage data in this report are limited to the land area specified in the lease agreements and consist, for the most part, of land located separately and land leased in conjunction with building space. In many instances, acreage figures were not reported for land on which buildings are located since building leases frequently do not specify the land acreage.

Building Classifications
A building location represents a specific area obtained under a lease agreement, varying in size from a small room to an entire building. The number of buildings in which space is leased is smaller than the actual number of leases, as there may be several leases for space in a single building. Building floor area data are based on square footage stated in lease agreements. Data on floor area of housing space in foreign countries are generally estimated for the description of the dwelling in the lease.

Other Structures and Facilities
The Federal Government leases few structures and facilities other than buildings. When leased, these structures are sometimes combined with land or building space without a division of rental between the two types of real property. These data are not shown separately in this report since there is no common measure for other structures and facilities.

Annual Rental
The annual rental shown in this report represents the rental rate on the real property for a 12 month period. The following factors concerning the annual rental should be considered: (1) Rentals on leases made on a daily, weekly, or monthly basis have been converted to annual rates; (2) Annual rentals shown do not necessarily coincide with an agency’s rental disbursements in fiscal year 2000 since some real property may not have been leased for a full year; (3) Annual rental rates for foreign leases payable in local currencies have been converted to dollars at official exchange rates; (4) Leases generally provide for a single rental amount and do not segregate the portion applicable to land, buildings, and other structures and facilities; and (5) Only leases in effect as of September 30, 2000, have been reported. Leases which expired prior to this date are not included.

Exclusions
Real property occupied under permit or similar arrangements with other Federal agencies or wholly owned Government corporations is excluded. Also excluded are rights-of-way, easements, and leasehold improvements (Government owned buildings or structures located on leased land are included in the federally owned real property inventory). Real property leased rent free or for nominal rent is excluded when considered insignificant by the reporting agency.

Source of Data
The real property data in this summary report are based on detailed inventory reports submitted by Federal agencies pursuant to Federal Property Management Regulations, subchapter A, part 101-3, Annual Real Property Inventories.

The reporting entity, for purposes of this inventory, is a lease or combination of leases covering: (a) land; (b) buildings or portions thereof; (c) other structures and facilities; or (d) combinations thereof. Real property leased to the United States is reported as follows:
A. Single Leases Single Reports
Each lease executed for a building location(s), other structures and facilities, or combinations thereof (whether or not land is included), with a total annual rental of $2,000 or more, is the subject of a single report. Each lease executed for land only, with an annual rental of $500 or more, is the subject of a single report.

B. Multiple Leases Single Reports
At the discretion of the reporting agency, a lease executed for building location(s), other structures and facilities, or combinations thereof (whether or not land is included) with a total annual rental of less than $2,000 is combined with similar leases to form a single report, provided the location(s) of the properties is in one of the following geographical areas:

1. The same major city (in the United States only limited to cities listed in Appendix 1, Table 7);
2. The same state (excluding leases for properties in major foreign cities); or
3. The same outlying area of the United States or foreign country. A lease executed for land only, with an annual rental of less than $500 is combined with similar leases to form a single report, provided it meets the location restrictions outlined in B. (1), (2), or (3) above.

Agency reports show the name and location of the leased property; predominant use and area of land; predominant use, number, and floor area of leased building locations; predominant use of structures and facilities; and the lease terms. The lease terms included the effective and expiration dates of the lease, the period of renewal option, and the annual rental. Civil agencies reported separately for each reporting entity throughout the world. The Department of Defense reported individually for each reporting entity in the United States. Defense also reported only overall summary data on total acres and total annual rental for its military functions in the outlying areas of the United States and in foreign countries. Agency reports were carefully reviewed for accuracy, completeness, and conformance with instructions. Questionable items were resolved with agency representatives and the detailed inventory listings supporting the summary data in this report were certified by the respective agencies as to the accuracy of the data therein.

Background
The Government-wide real property inventory program was initiated and is being continued pursuant to the desire of the Senate Committee on Appropriations. A comprehensive history of the real property inventory program is contained in the Senate Hearings on the Supplemental Appropriations Act, 1958 (Public Law 85-170). This report, together with its companion report on federally owned real property, published by the U.S. General Services Administration as of September 2000 furnishes a comprehensive presentation of the worldwide real property holdings of the United States. The availability of these data in a single place facilitates achievement of maximum control over, and utilization of, federally owned and leased real property. Individual agencies use the inventories to prepare budgets and appraise budgetary requests submitted by the Office of Management and Budget and the Senate and House Appropriations Committees. The Government-wide real property inventory (both owned and leased) constitutes a central source of information to the Congress, Office of Management and Budget, General Accounting Office, General Services Administration, and various Federal agencies. The availability of pertinent information in a single place covering all real property owned by, and leased to, the United States throughout the world serves to reduce the requirement for time consuming special studies and inquiries. The real property inventory, in combination with other available data, is being used in planning space needs; in promoting fuller utilization of available properties; in conducting property management and property accounting surveys; in the evaluation of budgetary requests for acquisition of real property; and in on site inspection activities.

The inventory is a ready reference to all the Government’s holdings in a given area. This provides information, which prior to the inventory was not available without site inspections and consultations with many agencies. The availability of the Government-wide realty information has undoubtedly saved travel and administrative expenses. Several of the real property holding agencies have
indicated that the inventory is serving to promote better real property management; stimulate improvements in property accounting and reporting; provide data for operational and budgetary purposes; and for answering various inquiries on their realty holdings. The U.S. General Services Administration collaborated with the General Accounting Office in providing appropriate guidelines to Federal agencies designed to assure consistent application of sound practices and adequate standards in accounting and reporting for owned and leased properties.

Inventory Availability
The real property inventory was established primarily to serve as a ready reference within the Federal Government of all of the Government’s holdings (both owned and leased). As a byproduct, copies of the worldwide detailed inventory listings, arranged both geographically and by reporting agency, are on file and available for public inspection at the Central Office of the U.S. General Services Administration in Washington, DC. Copies are also available in each GSA regional office covering the States within each regional area. See Appendix 2 for a list of regional offices and the areas under their jurisdiction.

Section 2: Real Property Leased Throughout the World

Summary of Leasing Costs
Real property is leased to the Federal Government in every state, the District of Columbia, 7 outlying areas of the United States (e.g., Marshall Island, Northern Mariana Island, Federal States Micronesia, Commonwealth of Puerto Rico, Virgin Islands, American Samoa, and Guam), and in 185 foreign countries, at a total annual rental of $3,394.5 million. This rental is comprised of: (a) $2,930.7 million in the United States; (b) $15.2 million in outlying areas of the United States, and (c) $448.6 million in foreign countries.

Federal Real Property
Summary data on real property leased inside the United States, by state and the District of Columbia, are shown in Appendix 1, Table 5. Data on real property leased outside the United States, by continent and country, are shown in Appendix 1, Table 9. Civil agencies account for $3,119.8 million (91.9 percent) and the Department of Defense accounts for $274.7 million of the worldwide annual rental. These and other summary lease data are shown in Table 2.1, by major geographical areas. (See also Appendix 1, Table 1). The Department of Defense furnished only summary figures on total acres and total annual rental for its military functions located outside the United States.

Therefore, the tables and charts in this report do not show detailed information, (e.g., number of leases, number of locations and floor areas of buildings, and geographical locations) for military functions outside the United States. The General Services Administration and the Department of Transportation for $2,337.9 million (69.2 percent) of the total annual rental of $3,394.5 million for real property leased to 27 Federal agencies throughout the world.

Defense Agencies Leased Acreage
Defense Agencies Military Functions have 1,086,319.8 acres in the United States, 16,954.5 acres in Outlying Areas of the United States, 29,365.5 acres in Foreign Countries, making 1,132,639.8 total acres for Defense Agencies Military Functions, which is 67.8% of Total Acres Leased Worldwide by the United States.

Defense Agencies Civil Functions have 7.5 acres in the United States, 0.0 acres in Outlying Areas of the United States, 0.0 acres in Foreign Countries, making 7.5 total acres for Defense Agencies Civil Functions, which is 0.0% of Total Acres Leased Worldwide by the United States.

Defense Agencies Total is 1,086,327.3 acres in the United States, 16,954.5 acres in Outlying Areas of the United States, 29,365.5 acres in Foreign Countries, making 1,132,647.3 total acres for Defense Agencies, which is 67.8% of Total Acres Leased Worldwide by the United States.

Civil Agencies Leased Acreage
Interior has 269,372.0 acres in the United States, 0.0 acres in Outlying Areas of the United States, 0.0 acres in Foreign Countries, making 269,372.0 total acres for Interior, which is 16.1% of Total Acres Leased Worldwide by the United States.

Transportation has 217,310.9 acres in the United States, 756.1 acres in Outlying Areas of the United States, 182.2 acres in Foreign Countries, making 218,249.2 total acres for Transportation, which is 13.1% of Total Acres Leased Worldwide by the United States.

Agriculture has 14,224.1 acres in the United States, 0.0 acres in Outlying Areas of the United States, 0.0 acres in Foreign Countries, making 14,224.1 total acres for Agriculture, which is 0.9% of Total Acres Leased Worldwide by the United States.

United States Postal Service has 12,297.8 acres in the United States, 58.4 acres in Outlying Areas of the United States, 4.6 acres in Foreign Countries, making 12,360.8 total acres for United States Postal Service, which is 0.7% of Total Acres Leased Worldwide by the United States.

Energy has 6,029.4 acres in the United States, 0.0 acres in Outlying Areas of the United States, 0.0 acres in Foreign Countries, making 6,029.4 total acres for Energy, which is 0.4% of Total Acres Leased Worldwide by the United States.

National Science Foundation (NSF) has 2,580.0 acres in the United States, 0.0 acres in Outlying Areas of the United States, 0.0 acres in Foreign Countries, making 2,580.0 total acres for National Science Foundation, which is 0.2% of Total Acres Leased Worldwide by the United States.

Labor has 1,621.7 acres in the United States, 26.0 acres in Outlying Areas of the United States, 0.0 acres in Foreign Countries, making 1,647.7 total acres for Labor, which is 0.1% of Total Acres Leased Worldwide by the United States.

Health and Human Services (HHS) has 865.3 acres in the United States, 0.0 acres in Outlying Areas of the United States, 0.0 acres in Foreign Countries, making 865.3 total acres for Health and Human Services, which is 0.1% of Total Acres Leased Worldwide by the United States.

Other Civil Agencies (13) have 459.5 acres in the United States, 0.0 acres in Outlying Areas of the United States, 406.4 acres in Foreign Countries, making 865.9 total acres for other Civil Agencies, which is 0.1% of Total Acres Leased Worldwide by the United States.

Treasury has 290.3 acres in the United States, 0.0 acres in Outlying Areas of the United States, 0.0 acres in Foreign Countries, making 290.3 total acres for Treasury, which is 0.0% of Total Acres Leased Worldwide by the United States.
State (BROADCASTING BOARD OF GOVERNORS) has 4.3 acres in the United States, 0.0 acres in Outlying Areas of the United States, 10,797.8 acres in Foreign Countries, making 10,802.1 total acres for State (BROADCASTING BOARD OF GOVERNORS), which is 0.6% of Total Acres Leased Worldwide by the United States

Civil Agencies have a Total of 525,055.3 acres in the United States, 840.5 acres in Outlying Areas of the United States, 11,391.0 acres in Foreign Countries, making 537,286.8 total acres for Civil Agencies, 32.2% of Total Acres Leased Worldwide by the United States

Total, All Agencies have 1,611,382.6 acres in the United States, 17,795.0 acres in Outlying Areas of the United States, 40,756.5 acres in Foreign Countries, making 1,669,934.1 total acres for all agencies, 100.0% of Total Acres Leased Worldwide by the United States

Land and Buildings, Leased and Owned

The total land leased to and owned by the Federal Government throughout the world is 637.5 million acres, of which a minor portion, 1.67 million acres, is leased.

Table 2.4 shows the total acreage leased to and owned by the Federal Government throughout the world, by location. These data exclude 2 million acres of foreign base rights under the control of the Department of Defense. Occupancy of these bases is on a term basis, revocable at the discretion of the host government.

Civil agencies administer a total of 1,335 million square feet of leased and owned building space throughout the world, of which 324.3 million square feet are leased.

The Department of Defense leases only a minor percentage of its total building space requirements in the United States. Data on building space administered by Defense outside the United States were not reported. A comparison of leased and owned building space is shown in Table 2.5.

Appendix 1, Table 2 provides additional summary data on real property leased to and owned by the Federal Government throughout the world.

Table 2.4 Total Acreage Leased and Owned by Location

In the UNITED STATES 1,611,382.6 acres are leased to the United States, 635,354,700.5 acres are federally owned, making 636,966,083.1 Federally controlled acres in the United States, of which 0.3% are Leased

In the OUTLYING AREAS OF THE UNITED STATES 17,795.0 acres are leased to the United States, 199,438.3 acres are federally owned, making 217,233.3 Federally controlled acres in outlying areas of the United States, of which 8.2% are Leased

In FOREIGN COUNTRIES 40,756.5 acres are leased to the United States, 269,439.3 acres are federally owned, making 310,195.8 Federally controlled acres in foreign countries, of which 13.1% are leased

Prior Year Comparison of Real Property Leased
A comparison of data for real property leased to the United States throughout the world as of September 30, 2000, and September 30, 1999, shows a decrease of 365.7 million in annual rental, an increase of 269.6 thousand acres of land, and an increase of 10.4 million square feet of building space. Table 2.6 shows a comparison of summary inventory data as of September 30, 2000, and September 30, 1999.
Appendix 1, Table 4 shows detailed comparative data on leased real property as of September 30, 2000, and September 30, 1999, with regard to acreage, building floor area, and annual rental for each reporting agency. Table 2.7 shows the agencies, which account for the major portion of the net change.

Section 3: Real Property Leased in the United States

Summary
Real property leased to the Federal Government in the United States is comprised of 1.6 million acres of land, 313.2 million square feet of building space and various other structures and facilities. This real property is rented for a total annual rental of $2,930.7 million.

The Department of Defense leased 1,086,327.3 acres (67 percent) of the total land leased to the Federal Government in the United States but only 22.4 million square feet (7.2 percent) of the leased building space. Civil agencies leased 525,055.3 acres and 290.7 million square feet of building space in the United States.

Table 3.1 summarized data in this report with respect to real property leased to the Federal Government in the United States.

Of the total land leased in the United States, 1.4 million acres are located in rural areas while 161.1 thousand acres are located in urban communities. Additional data on real property leased in the United States by location and agency are presented in Appendix 1, Tables 5, 6, and 7. Data on real property leased in the United States by predominant usage are presented later.

By Agency
The General Services Administration, which is responsible for rental of office and storage space in the United States for most Federal agencies and Government corporations, and the Department of Transportation account for annual rental of $2,338 million (79.8 percent) of the total annual rental of $2,930.7 million for real property leased in the United States.

Table 3.2 summarizes data on real property leased in the United States, by major leasing agency. Additional summary data on real property leased to the Federal Government in the United States, by Agency and bureau are shown in Appendix 1, Table 6. Figure 3.1 graphically presents the total annual rentals paid for real property, by major leasing agency.

By State

The Federal Government leases real property in each of the 50 States and the District of Columbia with Stateside annual rentals ranging from $468.7 million in the District of Columbia, to $4.4 million in Delaware. The general pattern is shown in Figure 3.2. The annual rental for real property leased in the top seven States and the District of Columbia, as shown in Table 3.3, amounts to $1,771.8 million (60.5 percent) of the Federal Government’s total annual rental of $2930.7 million in the United States.

Figure 3.2 graphically presents the annual rentals for leased real property, by state.
Although land is leased in every state and the District of Columbia, 1 million acres (62.4 percent) of the total land leased to the federal Government in the United States, are located in four States as shown in Table 3.4.

Summary data on real property leased to the Federal Government in each state are provided in Appendix 1, Table 5.

By Predominant Usage
Leased building space located in 72,862 building locations, containing 313.2 million square feet of space is leased to the Federal Government in the United States.

Leased building space is reported in 11 categories according to the predominant usage of the space. These categories are office, hospital, school, other institutional, housing, storage, industrial, service, research and development, and all other.

Building space leased to the Federal Government ranges from 27 million square feet in California to 471 thousand square feet in Delaware. Table 3.5 lists the 13 States and the District of Columbia where 63.8 percent of the building space is located.

The United States Postal Service and the General Services Administration account for the major portion of three of the principal predominant usage categories. This is shown in Table 3.6, which shows the distribution of building floor area for the major building usage categories, by principal leasing agencies.

By Major City
Building space rented in or near 125 major cities by the Federal Government totals 85.0 million square feet. This space represents 27 percent of the Government’s total leased building space requirements in the United States.
The annual rental for all real property leased in these major cities is $767.1 million (32 percent) of the total annual rental for all real property leased to the Federal Government in the United States.

Washington, D.C.; New York, NY; and Boston, MA, with annual rentals of $467.6 million, $47.6 million, and $24.5 million, respectively, lead all other cities in real property leased to the Federal Government.

Table 3.7 shows floor area and annual rental for property leased to the Federal Government in ten major cities in the United States. Summary data on real property leased in each of the 125 major cities are shown in Appendix 1, Table 7.

Office space leased in major cities amounts to 31.1 million square feet (19 percent) of the total office space leased to the Federal Government in the United States. Table 3.8 indicates the percentage of leased building space in the major cities, by predominant usage.

Section 4: Real Property outside the United States

Summary
The annual rental for real property leased to the Federal Government outside the United States is $463.8 million. Of this total, $448.6 million (96.7 percent) is for real property leased in 185 foreign countries, and $15.7 million is for real property leased in four outlying areas of the United States.

Figure 4.1 summarizes data for real property leased outside the United States. Data on the floor area of building space leased outside the United States were not reported by Defense, and, therefore, are not shown in Table 4.1.

Appendix 1, Tables 8 and 9, contain additional summary data on real property leased to the Federal Government in outlying areas of the United States and in foreign countries, by agency and by location. These tables show complete supporting data for civil agencies only. The Department of Defense furnished only summary figures on total acres and total annual rental for its military functions located outside the United States.

Three agencies, State, Navy, and the Agency for International Development, account for $442.5 million (95.4 percent) of the total annual rental outside the United States. Figure 4.1 presents annual rental data on real property leased outside the United States, by major leasing agency.

Table 4.1 Real Property Leased Outside the United States

OUTLYING AREAS OF THE UNITED STATES

Civil Agencies have 840.5 leased acres, which is 1.4% of total land leased outside the United States, and 1,869,054 square feet floor area, and $14,154,571 annual rental, which is 3.1% of the total annual rental of leases outside the United States

Defense Agencies (Civil Functions) have 0.0 leased acres, which is 0.0% of total land leased outside the United States, and 29,834 square feet floor area, and $622,518 annual rental, which is 0.1% of the total annual rental of leases outside the United States

Defense (Military Functions) have 16,954.5 leased acres, which is 29.0% of total land leased outside the United States, and $392,711 annual rental, which is 0.1% of the total annual rental of leases outside the United States

OUTLYING AREAS OF THE UNITED STATES TOTAL = 17,795.0 leased acres, which is 30.4% of total land leased outside the United States, and 1,898,888 square feet floor area, and $15,169,800 annual rental, which is 3.3% of the total annual rental of leases outside the United States
FOREIGN COUNTRIES
Civil Agencies have 11,391.0 leased acres, which is 19.5% of total land leased outside the United States, and 31,686,190 square feet floor area, and $349,816,569 annual rental, which is 75.4% of the total annual rental of leases outside the United States

Defense Agencies (Civil Functions) have 0.0 leased acres, which is 0.0% of total land leased outside the United States, and 100 square feet floor area, and $1,794,344 annual rental, which is 0.4% of the total annual rental of leases outside the United States
Defense Agencies (Military Functions) have 29,365.5 leased acres, which is 50.2% of total land leased outside the United States, and $96,994,761 annual rental, which is 20.9% of the total annual rental of leases outside the United States

FOREIGN COUNTRIES TOTAL = 40,756.5 leased acres, which is 69.6% of total land leased outside the United States, and 31,686,290 square feet floor area, and $448,605,674 annual rental, which is 96.7% of the total annual rental of leases outside the United States

WORLDWIDE TOTAL = 58,551.5 leased acres, which is 100.0% of total land leased outside the United States, and 33,585,178 square feet floor area, and $463,775,474 annual rental, which is 100.0% of the total annual rental of leases outside the United States

Table 4.1 Note:
Building square footage is not included for military functions outside the United States.

Figure 4.1 Annual Rental of Real Property Outside the United States
This figure is a graph illustrating the differences between the largest four agencies with regard to annual rental costs outside the United States

State = $318,057,728 annual rental of real property outside the United States
Navy = $97,315,712 annual rental of real property outside the United States
State (USAID) = $27,120,646 annual rental of real property outside the United States
General Services Administration = $10,281,780 annual rental of real property outside the United States
Other Agencies = $10,999,608 annual rental of real property outside the United States

Leased to Civil Agencies
Civil agencies lease 12,231.5 acres, 33.6 million square feet of building space, and various other structures and facilities outside the United States at a total annual rental of $364 million. This annual rental is comprised of $14.2 million in outlying areas of the U.S. and $349.8 million in foreign countries. The General Services Administration and Veterans Affairs account for $11.3 million (80.1 percent) of the total annual rental for real property leased to civil agencies in outlying areas of the U.S.

Table 4.2 lists the annual rentals and building space for civil agencies, which predominate in leasing activities in outlying areas of the U.S.

Civil agencies lease 1,869,054 square feet of building space in outlying areas of the U.S. Most of this space, 1,554,421 square feet, is leased in Puerto Rico for office and post office purposes. Detailed summary data on the amount of floor area leased to civil agencies in outlying areas of the U.S., by agency and bureau, are shown in Appendix 1, Table 8.

Foreign countries. The Department of State and the Department of the Navy account for 92.5 percent of the total annual rental of $448.6 million for real property leased to civil agencies in foreign countries.
The annual rental for real property leased in 14 countries listed in Table 4.3 amounts to $124.3 million (35.5 percent) of the total annual rental for real property leased to civil agencies in foreign countries.

Civil agencies lease 31.7 million square feet of building space in foreign countries. Of this total, 21.1 million square feet are used for housing purposes, and 6.9 million square feet are used for office purposes. Storage space, schools, service and other building types account for most of the remaining 3.7 million square feet of leased building space. Over 99 percent of the building space in foreign countries is controlled by the State Department, the Agency for International Development, the Broadcasting Board of Governors, and Veteran Affairs.

Additional summary data on real property leased to the Federal Government outside the United States, by location and agency, are provided in Appendix 1, Tables 8 and 9.
