

## Overview of the E-Gov Travel Service Master Contracts

GSA, with the support and collaboration of over 23 federal agencies, awarded Firm Fixed Price (FFP), Indefinite Delivery/Indefinite Quantity (IDIQ) contracts to three vendors. Each contract has a possible period of performance of up to ten years for the provision of web-based, end-to-end travel management services to the Federal Government.

The 23 Federal agencies were intimately involved with the acquisition strategy and planning, develop of government wide travel management requirements and objectives, and the evaluation and selection of the awarded ETS solutions.

Because they are multiple award, IDIQ contracts, ETS falls under the ordering provisions of FAR subpart 16.5, "Indefinite Delivery Contracts." Under these guidelines, formal proposal and extensive technical and price evaluation and discussion may not be required to award an ETS task order. However, agencies are required to provide fair opportunity to all vendors. The ETS PMO strongly recommends that at a minimum, vendor interviews and ETS demonstrations be conducted to ensure understanding of vendor solutions, determination of appropriate implementation service levels and the attainment of negotiated price reductions for those service related Contact Line Item Numbers (CLINs) that are not Firm Fixed Price at the Master Contract level. The task order issuance process described in this section is FAR compliant for IDIQ contracts.
