

## Land Port of Entry - Jackman, Maine

### Route 201 Jackman, ME

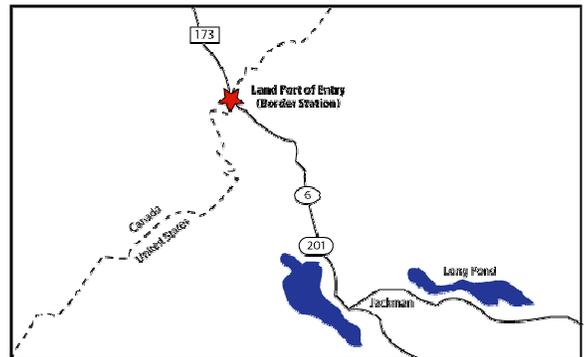

The new land port of entry located in Jackman, Maine was designed by Orcutt Associates, Inc. and is being constructed by J.C.N. Contractors of Manchester, NH. A construction contract in the amount of \$25,878,000 was awarded to J.C.N. on January 15, 2008.

The new port of entry will replace the existing facility which is antiquated and not equipped to process the increased volume of traffic. The project consists of a new main port building, commercial warehouse, truck inspection building and canopies, and vehicle garage. The new facility will meet the existing and future requirements of the tenant agencies in terms of size, efficiency, and security. It will provide space for the inspection of commercial and vehicular traffic, and will be occupied by the Department of Homeland Security/ Customs and Border Protection (DHS/CBP) and GSA.

Construction of the 62,730-square-foot facility, located approximately 15 miles from the Town of Jackman, began in March 2008 and is expected to be completed in July 2010.

Architectural drawing of the new land port of entry which is expected to complete in 2010.
