

**FACT SHEET – CONSTRUCTION
SOUTHEAST FEDERAL CENTER REMEDIATION
WASHINGTON, DC**

FY 2026 Project Summary

The Southeast Federal Center (SEFC) is a 53-acre site¹ in the southeast quadrant of the District of Columbia along the Anacostia River. Through Public Law 106-407, the Southeast Federal Center Public-Private Development Act of 2000, Congress authorized the General Services Administration (GSA) to redevelop this property by entering into agreements with private entities to enhance the value of the site to the Federal Government.

The site consists of two parcels. The first parcel, which contains 11 acres, was redeveloped through the construction of a new 1.35-million square foot facility that was leased to GSA to serve as the Department of Transportation (DOT) headquarters. The United States purchased the DOT headquarters facility in March 2020. The second parcel is approximately 42 acres and under redevelopment by Brookfield Properties, a private company and successor to Forest City Washington, pursuant to a development agreement for a mixture of uses.

Project Background

Remediation of environmental contamination has been underway at this site for several years to comply with a Consent Decree from the U.S. District Court in Washington, DC. GSA will continue to fund mitigation requirements related to a Consent Order from the Environmental Protection Agency pursuant to section 7003 of the Resource Conservation and Recovery Act of 1976, as amended by the Hazardous and Solid Waste Amendments of 1984, 42 U.S.C. § 6973, and the provisions of the development agreement with Brookfield Properties, the successor to Forest City Washington. Compliance with the remediation requirements of the Consent Decree, the Consent Order, and the development agreement are necessary to enable the site to be redeveloped and will continue until all the remediation requirements have been satisfied. To date, \$79,802,500 has been appropriated in support of remediation activities for the SEFC. The last appropriation GSA received was in FY 2023 in the amount of \$3,946,000. Based upon current due diligence, GSA anticipates that the FY 2026 appropriation request will complete the remediation of the remaining parcels.

FY 2026 Appropriation Requested

(Mitigation & Oversight).....\$4,200,000

¹ The original SEFC parcel contained approximately 55 acres. Approximately 2 acres, contiguous with the Washington Navy Yard, were returned to the Department of Defense, Department of the Navy.
