RE: Goodfellow Federal Center – Bldg. # 103D Air Sampling for Total Chromium Project # 919103

Dear Ms. Czarnecki:

Thank you for the opportunity to provide the General Services Administration (GSA) with the above referenced environmental sampling activities. The following is our report.

INTRODUCTION

As requested, OCCU-TEC, Inc. (OCCU-TEC) conducted air sampling for the presence of total chromium at Building #103D of the Goodfellow Federal Center (GFC) located at 4300 Goodfellow Federal Boulevard in St. Louis, Missouri. Sampling was completed in response to the ongoing environmental condition assessment at the GFC which is documented at the GFC Reading Room located at:
<https://www.gsa.gov/portal/content/212361>.

Air sampling was conducted to determine the current levels of total chromium in representative locations throughout the building. Air sampling at Bldg. #103D was conducted on September 25, 2019 by Mr. Austin O'Byrne of OCCU-TEC.

METHODOLOGY

Air sampling for chromium was collected on 37-millimeter (mm) cassettes with 0.5 micrometer (μm) polyvinyl chloride (PVC) filters using powered air sampling pumps in accordance with National Institute for Occupational Safety and Health (NIOSH) sampling methods. Samples were collected in a method sufficient to collect a minimum sample volume of 300 liters. Air samples were submitted under chain-of-custody to Scientific Analytical Institute, Inc. (SAI), for independent analysis of chromium in accordance with

NIOSH Method 7300. SAI is accredited by the American Industrial Hygiene Association (AIHA) utilizing the Industrial Hygiene Proficiency Analytical Testing (IHPAT) program. SAI's IHPAT Laboratory ID is 173190.

Air sampling for the presence of chromium was conducted at seven (7) distinct locations within Building #103D. A total of eight (8) samples were obtained including field blanks. Sample location diagrams are attached as Appendix B. The air sampling professional's Missouri Lead license is included in Appendix D.

RESULTS AND DISCUSSION

A summary table of all sampling locations is included in Appendix A. The complete laboratory report for the air sampling from Scientific Analytical Institute is attached in Appendix C.

All results were below the Agency for Toxic Substances and Disease Registry (ATSDR) minimum risk level (MRL), and the NIOSH recommended exposure limit. One sample (103D-Cr-01) from the Lower Level at Column L-38 resulted in a Chromium concentration of 1.40 micrograms per cubic meter.

LIMITATIONS

The scope of this assessment was limited in nature. OCCU-TEC collected samples from a select number of locations in an effort to minimize cost while providing a general overview of the air quality at the site. Samples were only analyzed for chromium in accordance with the scope of services requested by GSA. OCCU-TEC is not responsible for potential contaminants not identified in this report.

This report was prepared for the sole use of GSA. Reliance by any party other than GSA is expressly forbidden without OCCU-TEC's written permission. Any parties relying on the report, with OCCU-TEC's written permission, are bound by the terms and conditions outlined in the original proposal as if said proposal was prepared for them.

OCCU-TEC appreciates the opportunity to work with the GSA on this project. Please contact us if you have any questions regarding this report or if we may be of any additional service.

Sincerely,

(b) (6)

Jeff T. Smith
Senior Project Manager

Appendix C, Laboratory Analytical Results and Chain of Custody Documentation

Appendix D, Qualifications and Licenses

Appendix A

Sample Summary by Location

Goodfellow Federal Center - Building # 103D - Air Sample Data

| Sample Number | Location | Analyte | Result ($\mu\text{g}/\text{m}^3$) | Minimal Risk Level *(MRL) ($\mu\text{g}/\text{m}^3$) | Recommended Exposure Limit** (REL) ($\mu\text{g}/\text{m}^3$) |
|---------------|----------------------------|----------|--|---|---|
| 103D-Cr-01 | Lower Level at Column L-38 | Chromium | 1.40 | 5.00 | 500.00 |
| 103D-Cr-02 | Lower Level at Column N-37 | Chromium | < 1.20 | 5.00 | 500.00 |
| 103D-Cr-03 | Lower Level at Column P-34 | Chromium | < 1.20 | 5.00 | 500.00 |
| 103D-Cr-04 | Lower Level at Column N-33 | Chromium | < 1.20 | 5.00 | 500.00 |
| 103D-Cr-05 | Upper Level at Column N-31 | Chromium | < 1.20 | 5.00 | 500.00 |
| 103D-Cr-06 | Upper Level at Column L-32 | Chromium | < 1.20 | 5.00 | 500.00 |
| 103D-Cr-07 | Upper Level at Column L-39 | Chromium | < 1.20 | 5.00 | 500.00 |
| 103D-Cr-08 | Field Blank | Chromium | < 1.20 | 5.00 | 500.00 |

* MRLs are Agency for Toxic Substances and Disease Registry (ATSDR) estimates of the amount of a chemical a person can eat, drink, or breathe each day without a detectable risk to health

**RELs are based on Appendix C (Supplementary Exposure Limits) of the National Institute for Occupational Safety and Health (NIOSH) Pocket Guide to Chemical Hazards, DHHS (NIOSH) Publication No. 2005-149. Revised September 2007.

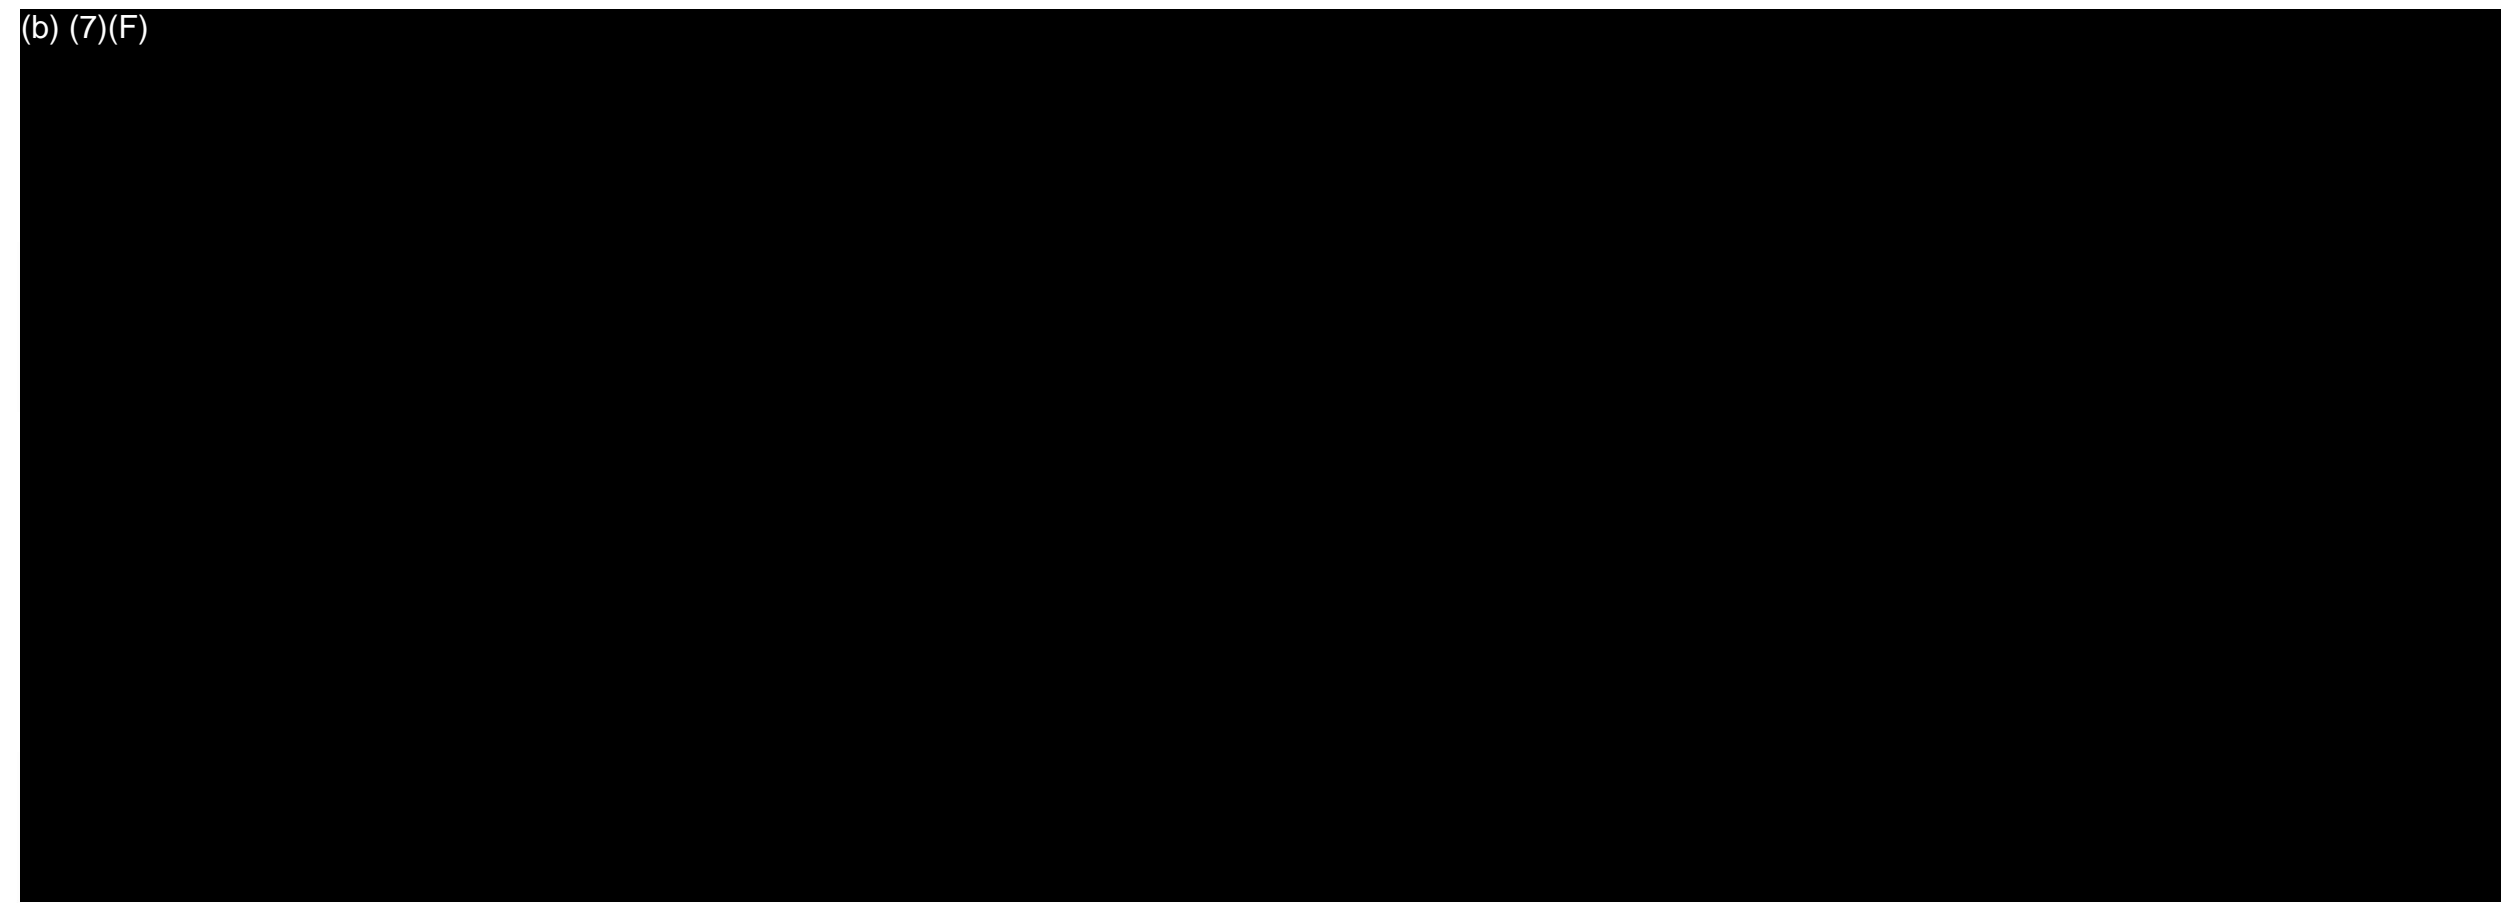

Indicates results at or above MRL
