

U.S. Land Port of Entry Expansion and Modernization

Alexandria Bay, New York | January 2019

New progress

- Completed 95% commercial building roofing.
- Completed structural concrete columns to support the overhead parking structure from the bridge abutment on the west to the east face of the new commercial building.
- Completed foundations and footers for the non-intrusive inspection building.
- Installed rebar for the west wall of the non-intrusive inspection building.
- Delivered the emergency generator and set in place.
- Completed slab-on-grade concrete floors for the new commercial building.
- Delivered and installed dock levelers in the warehouse.
- Constructed inspection booth foundations for the five Phase One dual use lanes.
- Ongoing interior wall partitions throughout the new commercial building.
